स्मृतिच० = स्मृतिचन्द्रिका (ed. by Mr. J. R. Gharpure).

ADDITIONS AND CORRECTIONS

(N. B. Errors in printing that can be easily detected have been passed over).

Sec. 4 pp. 12-20 *The Dharmasūtra of Gautama.* Mr. Batakrishna Ghose (in I. H. Q. vol. III for 1927, p. 607 ff) has an exhaustive note on the mutual relations of Gautama, Baudhāyana and Āpastamba. He holds that Gautama is not the oldest extant author, that Āp. and Gautama stand in the same relation as Manu and Yājñavalkya, that Baudhāyana-dharmasūtra is not older than Āpastambadharmasūtra, that the reference to the views of some in Gautama 15. 30 may easily be to Āp. Dh. S. II. 7. 21. Some of the reasons on which he relies for these views have already been examined in the body of the work. That the extant sūtra of Gautama has been in some places revised may be admitted ; but that Gautama as an author on dharma preceded Āpastamba's work cannot be denied. There is nothing of chronological value so far as Gautama is concerned in Āpastamba's rejection of the view of Śvetaketu that even a married man should continue Veda-study. That Āpastamba says nothing about mixed castes is on a par with his silence as to *niyoga* and the secondary sons. Āpastamba knew the lowest castes such as Cāṇḍāla and Paulkasa and Vaiṇa (Āp. Dh. S. II. 1. 2. 6). As to beef-eating allowed by Āpastamba, vide p. 45 of text and Śatapatha Brāhmaṇa (S. B. E. vol. 26 p. 11 where beef-eating is not allowed to a dīkṣita). Doctors of law were not agreed on many points of dharma and hence no certain chronological conclusion about individual authors can be drawn merely from their views on certain points. It is not correct to say as Mr. Ghose does that Āpastamba knows no fines for crimes. Āpastamba does say that in case of dispute between litigants elders were to decide, that in case of doubt they were to decide by inference or divine proof, that witnesses were to tell the truth and that if the witnesses were found to be false they were to be fined (II. 11. 29. 5-8). This shows that fines were not unheard of in Āpastamba's days and if he omits a detailed statement the reason must be sought for elsewhere

than in his being prior to all dharmasūtras. Fines for crimes are as old as the Taittirīya Saṁhitā II. 6. 10. 2.

Sec. 9 p. 56 l. 18 read 'note 41' for 'note 46.'

Sec. 10 p. 60 ll. 25-27. After the words 'the sūtra is in close relation to one of the oldest schools of the Yajurveda, viz. Kaṭha' the following should be added 'Vācaspati in his Śrāddhakalpa alias Pitṛbhaktitaraṅgiṇī says that the sūtra of Viṣṇu is meant for students of the Kaṭhaśākhā, as Viṣṇu is a sūtrakāra of that Śākhā'; यत्त्वाग्निं परिस्तीर्य पौष्णं श्रपयित्वा पूषा गा इति विष्णुस्मृतावुक्तं तत्कठशाखिपरं तस्य तत्सूत्रकारत्वात् (ms. of पितृभक्ति० in the India Office, folio 17a (I. O. cat. p. 556 No. 1730). The sūtra referred to is विष्णुधर्मसूत्र 86. 9.

Sec. 11 p. 71 Vide Ind. Ant. vol. 25 for 1896 pp. 147-48 for an account of the ms. of the Hārītadharmasūtra found by the late Pandit Vaman Śāstri Islampurkar.

Sec. 13 p. 84 l. 10 read '110' for '108'.

Sec. 14 *The Arthaśāstra of Kauṭilya.* There is a perennial stream of articles and works inspired by the Arthaśāstra. Some of them that appeared after this work was sent to the press and some that had appeared before but had been omitted through oversight are noticed here. Dr. Stein has a note on the word 'suruṅgā' occurring in the Arthaśāstra and its connection with the Greek word 'syrinx'; (vide I. H. Q. vol. I. pp. 429-432) and holds that the Arthaśāstra must be later than the 2nd century B. C. The same scholar contributes a note on 'Pāṇḍyakavāṭa' occurring in the Arthaśāstra II. 11 (in I. H. Q. vol. IV p. 778) and concludes from comparison with Bṛhat-saṁhitā and other works that the list of countries cannot be earlier than 6th century A. D. I am glad to note that the veteran *savant* Dr. Jolly (in 'Zeitschrift für Indologie and Iranistik' for 1927 pp. 216-221) approves of my view that the original name was Kauṭilya and not Kauṭalya. In the Nidhanpur plate of Bhāskarvarman (E. I. vol. 19 p. 245, at p. 248) doneés of Kauṭilya-gotra are mentioned. The verse in the second Act of the Mālatīmādhava of Bhavabhūti (गुणापेक्षाशून्यं कथमिदमुपक्रान्तमथवा कुतोपत्यस्नेहः कुटिलनयनिष्णातमनसाम् ।) contains a hit at

the name Kauṭilya and his teaching. Mr. E. H. Johnston contributes in the J R A S for 1929 pp. 77-102 an article on 'two studies in the Arthaśāstra of Kauṭilya,' wherein he examines the works of Aśvaghoṣa, the Laṅkāvatāra and the Jātakamālā and holds that the Arthaśāstra is not much earlier than Aśvaghoṣa and not later than 250 A. D. It is gratifying to see that from the untenable position of relegating the Arthaśāstra to the 3rd century A. D., western scholars are receding to the first century of the Christian era. Prof. Benoy Kumar Sarkar contributes an appreciative and lengthy review of Dr. Meyer's work 'Das altindische Buch vom Welt-&c' in the Indian Historical Quarterly for 1928 pp. 348-383. Dr. Meyer has brought out another work 'on Hindu Law-books and their relation with one another and with Kauṭilya' (über das Wesen der altindischen Rechtsschriften &c.). This work compels admiration for the author's patience and industry, but is seriously marred throughout by wild generalisations, perverse and startling propositions unsupported by weighty evidence. He makes Gautama the latest of the Smṛtis and Nārada one of the earliest, places Nārada several centuries before the Christian era, regards the compiler of the Yājñavalkyasmṛti as a stupid brāhmaṇa. He is blissfully ignorant of the references to Gautama occurring in the Tantravārtika, which I collected in my paper on 'the Tantravārtika and the dharmaśāstra literature' (JBBRAS vol. I new series for 1925 pp. 66-67). He propounds the absurd theory that the Brāhmaṇas were *people like gypsies roving about in bands without any* morals or principles of conduct. I can agree with some of his conclusions, viz. the non-existence of a Mānavadharmasūtra, the non-existence of a floating mass of verses on which authors of dharmaśāstra could draw. Mr. Batakrishna Ghose submits Dr. Meyer's work to a scholarly and trenchant criticism in I. H. Q. for 1928 vol. IV. pp. 570-592. Prof. D. R. Bhandarkar has recently published in a book-form his lectures on 'some aspects of ancient Hindu polity.' Vide I. H. Q. vol. V (1929) p. 780 for an article on 'salaries and allowances in Kauṭilya'.

Sect. 15 pp. 105-107 *Vaikhānasadharmapraśna*. Dr. Eggers recently published (Göttingen, 1929) his work ' Das Dharmasūtra der Vaikhānasa ', which is reviewed in JRAS for 1929 pp. 916-918.

Sec. 29 pp. 129-131 *Sumantu*. For a dharmasūtra of Sumantu, vide Madras Tri. cat. of Sanskrit mss. (1919-1922) pp. 5160-62.

Sec. 31 p. 154 read ' In other places ' for ' In another places '.

Sec. 34 pp. 170-175 *Yājñavalkyasmṛti*. Dr. Hans Losch writes a monograph on ' Die Yājñavalkyasmṛti un Beitrag zur Quellen-kunde des Indischen Rechts' (Leipzig 1927). His conclusions may be briefly summarised as follows : (I) the text of Yājñavalkya that we have and that is commented upon is not the original, but is enlarged with interpolations such as Vināyakaśānti and Grahaśānti (which are borrowed from Agnipurāṇa chap. 266 and 164 respectively by the compiler of Yāj. Smṛti), the section on rājadharma (which is a versified copy of ideas contained in arthaśāstra literature), verses 60-205 of the third chapter (of Yāj.) : (II) the 2nd book of Yāj. (on vyavahāra) is a later addition corresponding to an older redaction of the Agnipurāṇa ; (III) that the first and 3rd books of Yāj. are a recast of an ancient text which has been better preserved in the Garuḍapurāṇa. I have shown in my history of Sanskrit Poetics that the Agnipurāṇa was compiled about 900 A. D. and in this book it has been shown that the Garuḍapurāṇa must have been compiled about the same time, that it summarises Parāśara-smṛti and that it presents a text of Yāj. which is intermediate between that of Viśvarūpa and that of the Mitākṣarā. Dr. Locsh's work adduces no proofs that would shake these conclusions. I am pleased to find that Mr. Chintaharana Chakravarti holds (JASB for 1928 vol. 24 p. 467) that the *nīti* portion of Garuḍapurāṇa belongs to the 9th or 10th century. The indefatigable scholar Dr. Meyer appears to have criticized Dr. Losch in a monograph (vide review of it by Mr. Batakrishna Ghose in I. H. Q. for 1929 pp. 367-375). Mr. Batakrishna Ghose holds that vyavahāra did not originally form part of the Yājñavalkya

smṛti on the ground that otherwise it is very difficult to explain its absence in the Garuḍapurāṇa. But this is quite unconvincing. We have no sure criterion for judging on what bases the eclectic purāṇas (Agnipurāṇa and Garuḍapurāṇa) proceeded. But in the case of the Garuḍapurāṇa the omission of the vyavahāra section is easily explicable in several ways. The Garuḍapurāṇa was concerned more with purely religious matters and so omitted the rather secular chapter on vyavahāra. One might ask, why did the Agnipurāṇa omit the first and third kāṇḍas of Yājñavalkya if they existed in its day. One may with equal logic argue that those two kāṇḍas did not exist in the Yājñavalkya smṛti when the Agnipurāṇa was compiled.

P. 181 The late Sir Ramakrishna Bhandarkar outdid even Western scholars in assigning Yājñavalkya to a date not earlier than the 6th century A. D. In his work 'Vaishṇavism and Śaivism' (p. 148) the learned doyen of modern Sanskrit studies in Western India holds that the worship of Ganeśa is a late one, as it is not mentioned in the Gupta inscriptions. The veteran scholar did not notice the points brought out in my book (such as the mention of nakṣatras from Kṛttikā). He is willing to assign Amarasiṁha to the 5th or 6th century A. D. (ibid. p. 45). The great lexicographer mentions Vināyaka and his synonyms (such as ekadanta &c), but the words Mita, Sammita that are given as the appellations of Vināyaka in Yāj. are conspicuous by their absence in Amara's lexicon. Hence the conclusion is that Amara wrote centuries after Yājñavalkya and that Vināyaka worship had taken a complexion before Amara flourished that was very different from what it was in Yājñavalkya's day.

Mita and Sammita occur as names of Maruts in the Taittirīya Saṁhitā.

P. 186 That गजच्छाया and व्यतीपात had nothing to do with 'rāśis' follows from the following. 'योगो मघात्रयोदश्यां कुञ्जरच्छायसंज्ञितः। भवेन्मघायां संस्थे च शशिन्यर्के करे स्थिते ॥ (quoted in कृत्यरत्नाकर p. 319 as from ब्रह्मपुराण); श्रवणाश्विधनिष्ठार्द्रानागदैवतमस्तके। यदाऽऽ रविवारेण व्यतीपातः स उच्यते ॥ quoted in प्रायश्चित्ततत्त्व of रघुनन्दन as from बृहन्नारद.

Sec. 38 pp. 213-221 *Kātyāyana.* Mr. Narayana Chandra Bandopadhyaya has recently published (Calcutta 1927) about 800 verses of Kātyāyana on vyavahāra culled from five *nibandhas.* In the Hindu Law Quarterly recently started in Bombay I am editing a reconstruction of Kātyāyana on vyavahāra (reconstructed text from twenty *nibandhas*, references to the places whence verses are taken, translation, notes &c.). About 300 verses have been printed in the first two issues for January and April 1930.

Sec. 38 p. 215 read 'Manu' for Bhṛgu' in l. 11.

Sec. 39 pp. 221-223 *Aṅgiras.* In the 2nd Act of the Mālatīmadhava (p. 104 of Bhandarkar's edition) we have a prose quotation from Aṅgiras 'गीतश्रवायमर्थोङ्गिरसा यस्यां मनश्चक्षुषोरनुबन्धस्तस्यासृद्धि-रिति'. In the Apastambagṛhya (I.3. 19-21) this is cited without name as the view of some 'बन्धुशीलक्षणसंपन्नामरोगामुपयच्छेत। बन्धुशीलक्षणसंपन्नः श्रुतवानरोग इति वरसंपत्। यस्यां मनश्चक्षुषोर्निबन्धस्त-स्यासृद्धिर्नेतरदाप्रियेतेत्येके'. It is not likely that Bhavabhūti who was a great scholar would commit a mistake and it is extremely probable that he had a sūtra of Aṅgiras before him.

Sec. 44 pp. 226-227 *Pitāmaha.* Dr. Karl Scriba collected together from several *nibandhas* about 200 verses of Pitāmaha and published them with translation (Die Fragmente des Pitāmaha, Leipzig, 1902) on the eight constituents of karaṇa (i. e. the court of justice), fifty *chalas*, twenty-two wrongs (in which king acted *suo motu*), ordeals (162 verses) and the four kinds of ascetics.

Sec. 64 pp. 275-279 *Dhāreśvara Bhojadeva.* In the Madras Tri. Cat. of Sanskrit Mss. for 1919-1922 p. 4562 No 3078 there is a ms of Bhujabalanibandha by Bhojarāja in 18 chapters on astrological matters in relation to vratas, marriage &c.

In the Kṛtyaratnākara of Caṇḍeśvara quotations from a Kṛtyasamuccaya of Bhūpāla or Bhūpālasamuccaya are cited (at pp. 278, 289, 449, 461, 496 &c). It appears that this is entirely a different work from the Rājamārtaṇḍa and the Bhujabalabhīma.

Sec. 68. p. 285. l. 20 read 'Misarumiśra' for 'Harinātha'.

Sec. 71. pp. 294-296 *Kāmadhenu.* That Bhoja was not the author of the Kāmadhenu follows from the following words of the कृत्यरत्नाकर (p. 156) 'एतानि वाक्यानि अलवणतृतीयाव्रतबोधक-वाक्यमध्ये भूपालकामधेनुकल्पतरुषु लिखितानि.' At p. 30 of the same work the कामधेनु is spoken of as equal in authority to the Rājā (राजतुल्ययोगक्षेम). These references show that the Kāmadhenu was not regarded by Caṇḍeśvara as the work of Bhūpāla (or Bhojadeva); other passages of the Kṛtya-ratnākara where Gopāla, Kalpataru, and Bhūpāla are spoken of in the same breath indicate that Gopāla was as great an authority as the Kalpataru; and knowing as we do that Caṇḍeśvara looked upon Kāmadhenu, Kalpataru, Pārijāta, Prakāśa and Halāyudha as his best authorities, it follows that Gopāla was the author of the Kāmadhenu. Vide कृत्यरत्नाकर pp. 277, 443 (गोपालभूपालकल्पतरुपारिजातेषु तु).

Sec. 72 pp. 298-299 *Halāyudha.* There is a Ms. of a work called Paṇḍitasarvasva in the Madars Tri. cat. of Sanskrit mss. for 1919-22 p. 5165. In the manuscript itself there is no reference to the author or his parentage. It is a large work and deals with वर्णाश्रमाचार, दैवतिथिनिरूपण, उपवास, शौच, अशौच, श्राद्ध, ज्योतिःशास्त्र, विवाहादिसंस्कार, दान, प्रायश्चित्त, प्रतिष्ठा, स्त्रीधर्म, दिव्य, अभक्ष्यविचार, शुद्धि. From the style it seems more likely that it is not the work of Halāyudha.

In the Ekāḍaśītattva (Jivananda vol. II p. 51) and Śuddhi-tattva (Jivananda vol II p. 327) Halāyudha is said to be the author of Saṁvatsarapradīpa.

Sec. 73 pp. 301-306 *Bhavadevabhaṭṭa.*

There was another work of Bhavadevabhaṭṭa called Sam-bandha-viveka. This work is mentioned in the Saṁskāra-tattva (Jivananda vol I p. 890) and in the Vivāhatattva (vol. II p. 143).

Sec. 74 pp. 306-308 *Prakāśa.*

The Vivādaratnākara and other Ratnākaras of Caṇḍeśvara generally refer to Prakāśa only, but sometimes Caṇḍeśvara speaks of Smṛtimahārṇavaprakāśa e. g. on p. 326 of Kṛtyaratnākara we have 'जाबालमत्स्यपुराणवाक्यपरामर्शाच्चिराग्नि-सकलपुत्रैः साग्निभिश्चेतरपुत्रैरेकोद्दिष्टं कार्यमिति स्मृतिमहार्णवप्रकाशकार इति

कल्पतरौ लिखितमन्यैश्चानुमोदितं तल्लघु. This also shows that Smṛtimahārṇavaprakāśa was a work referred to by the Kalpataru and so earlier than 1100 A. D.

Sec. 87 pp. 354-359 *Hemādri.*

In the Marathi Quarterly of the Bhārata-itihāsa-saṁśodhaka-maṇḍala, vol. X part 2 p. 84, Mr. Y. K. Deshpande quotes from a work called Bhānuvijaya of the Mahānubhāva sect passages wherein Hemādri is charged with having been won over by Turks (Mahomedans) and with having brought about the imprisonment of Bhānubhaṭṭa alias Bhāskara Kavīśvara Vyāsa (a Mahānubhāva saint) 'जरि करावा रणकन्दन। हेमाद्रि तुर्का लागले पण। दिल्लीश्वरें देवोनि धन। मंत्री पा वश्यु केला॥ भानुगणीं असाहणेंपणें। अहिता प्रेरिलें दुर्जनें। तुर्का कांई असे आंगवणें। हेमाद्रियेची बंधाविलें॥'.

But in the absence of other corroborative evidence hardly any reliance can be placed on this charge, as it might have been levelled at Hemādri in revenge for his imprisoning a leader of a dissenting sect like that of the Mahānubhāvas.

P. 359 In the Śivadigvijaya (printed at Baroda in śake 1817) at p. 442 Hemāḍapanta (Hemādri) is credited with having brought from Laṅkā (Ceylon) in śake 1193 (1271-2 A. D.) the 'Piśācca lipi' (Moḍi script).

P. 368 l. 16 Read 'contemplate' for 'complete'.

P. 398 foot note 969 Read 'अलभत सुनयं' for 'अलभत तनयं.'

SYNOPSIS OF CONTENTS

Sec. 1 *Meaning of dharma* : ... pp. 1-4

Defies exact rendering in English - In the Ṛgveda, used as adjective or noun - means 'upholder or supporter' in some Ṛgvedic passages - in most Ṛgveda passages means 'religious ordinances or rites' and in rare cases 'fixed principles or rules of conduct' -- in Aitareya-brāhmaṇa dharma means 'whole body of religious duties-' in Chāndogya-Upaniṣad *dharma* means 'peculiar duties of āśramas-' *dharma* came to mean 'duties and privileges of a person as a member of the Āryan community, as member of one of the varṇas or as in a particular stage of life' - the same meaning in Taittirīya Upaniṣad (I. 11), Bhagavadgītā, Manusmṛti and other smṛtis - according to Medhātithi, dharma five-fold viz., varṇadharma, āśramadharma, varṇāśramadharma, naimittikadharma, guṇadharma - this meaning of dharma taken in this work - definitions of dharma according to Jaimini, Vaiśeṣikasūtra, Hārīta, Mahābhārata and Buddhist works - subjects treated in this work, viz. sources of dharma, contents of works on dharma, their chronology.

Sec. 2 *Sources of dharma* : ... pp. 4-7

According to Gautama, Āpastamba, Vasiṣṭha, Manu, Yājñavalkya -- principal sources were Veda, smṛtis and custom - Vedas do not contain positive precepts on dharma, but give information incidentally - examples from Vedic literature suggesting dharmaśāstra rules.

Sec. 3 *When dharmaśāstra works were first composed* ... pp. 8-10

It is difficult to say when composed - Nirukta (III. 4-5) exhibits controversies about inheritance and quotes a verse (śloka) from some work on dharma - Bühler's view about such verses -- Gautama and Baudhāyana speak of dharmaśāstra - Baudhāyana and Āpastamba mention numerous sages on *dharma* - Vārtika of Kātyāyana and Jaimini speak of dharmaśāstra - Patañjali on dharmasūtrakāras - dharmaśāstra works existed prior to Yāska or at least before 600 B. C. and in 2nd century B. C. dharmasūtras had become authoritative - method of dealing with the whole dharmaśāstra literature followed in this

book, first dharmasūtras, then early metrical smṛtis like those of Manu and Yājñavalkya, later versified smṛtis, then commentaries and digests, such as the Mitākṣarā - chronology of early writers very difficult to settle - Max Müller's view that works in continuous śloka metre followed sūtra works not acceptable.

Sec. 4 *Dharmasūtras* : ... pp. 10-12

Many of them formed part of the Kalpa and were studied in distinct sūtra-caraṇas - dharmasūtras of Āpastamba and Baudhāyana presuppose gṛhysūtras of their *caraṇa* - no dharmasūtras extant corresponding to the śrauta and gṛhya sūtras of Āśvalāyana, Śāṅkhāyana and Mānava-Tantravārtika on what dharmasūtra was studied in what particular Vedic Śākhā - all dharmasūtras gradually became authoritative in all schools - close connection between gṛhyasūtras and dharmasūtras on certain topics - scope of dharmasūtras - gṛhyasūtras sometimes refer to dharmasūtras - points of distinction between dharmasūtras and the other smṛtis.

Sec. 5 *Dharmasūtra of Gautama* : ... pp. 12-20

Gautama's is the oldest extant dharmasūtra - specially studied by followers of Sāmaveda - Gautama one of the nine subdivisions of the Rāṇāyanīya school of Sāmaveda - Gautamadharmasūtra points to close connection with Sāmaveda - Gautama refers to his own previous dicta - contents of 28 chapters of Gautamadharmasūtra - the work is entirely in prose - Gautama's language agrees more with Pāṇini's rules than Āpastamba's - explanation of this - Haradatta prefers Pāṇinian readings of Gautama's text - some sūtras of Gautama quoted in the Mitākṣarā and other works not found in extant text - extent of literature known to Gautama - the only author named is Manu - the meaning of 'ācāryāḥ' whose views are cited by Gautama - earliest reference to Gautama on dharma is in Baudhāyana- dharmasūtra - Baudhāyana (III. 10) borrows chap. 19 of Gautama - close correspondence between many other sūtras of Gautama and Baudhāyana - Vasiṣṭha (4. 34 and 36) refers to views of Gautama -Vasiṣṭha's 22nd chap. is borrowed from 19th of Gautama - many sūtras the same in *Gautama and Vasiṣṭha* - Gautama referred to by Manu as son of Utathya - Gautama referred to by Yājñavalkya, Bhaviṣyapurāṇa, Kumārila, Śaṁkarācārya, Medhātiṭhi - Gautama's reference to *Yavana* - probable age between 600 -

400 B. C. - Haradatta and Maskarin commented on Gautama - Asahāya also did so - śloka - Gautama and Vṛddha - Gautama.

Sec. 6 *Baudhāyana-dharmasūtra* : ... pp. 20-32

Baudhāyana is a teacher of the Black Yajurveda - arrangement of Baudhāyana kalpa according to Dr. Burnell and Dr. Caland - Baudhāyanagṛhya presupposes the Baudhāyanadharmasūtra - gṛhya (III.9.6) speaks of pravacanakāra Kaṇva Bodhāyana and sūtrakāra Āpastamba - tarpaṇa in Baudhāyana-dharmasūtra (II. 5. 27) mentions Kaṇva Bodhāyana, Āpastamba and Hiraṇyakeśin - contents of Baudhāyana-dharmasūtra - extant sūtra has not come down intact - fourth praśna probably an interpolation - third praśna also not free from doubt - Baudhāyana III. 10 taken from Gautama - Baudhāyana III. 6 agrees closely with Viṣṇudharmasūtra 48 - Dr. Jolly thinks both borrowed from a common source - probably Viṣṇu borrows from Baudhāyana - repetitions exist even in the first two praśnas - form and structure of Baudhāyana - quotes numerous verses, even in the first two praśnas - language of Baudhāyana often departs from Pāṇinian standard - literature known to Baudhāyana - several authors on dharma together with their views mentioned by Baudhāyana - Asura Kapila said to be originator of āśramas- Śabara, Kumārila, Viśvarūpa and Medhātithi refer to Baudhāyana dharmasūtra - home of Baudhāyana - Baudhāyana is styled pravacanakāra and Āpastamba sūtrakāra - Bühler holds that Baudhāyana was a southern teacher - age of Baudhāyana dharmasūtra - later than Gautama - Bühler's reasons for placing Baudhāyana a century or two earlier than Apastamba not convincing - divergences between Baudhāyana and Āpastamba - style of Baudhāyana compared with that of Āpastamba - Baudhāyana to be placed between 500-200 B. C.- numerous sūtras of Baudhāyana identical with those of Āpastamba and Vasiṣṭha - Baudhāyana mentions several appellations of Ganeśa, just as Mānavagṛhya does and mentions seven planets, Rāhu and Ketu - Govindasvāmin commented on Baudhāyana.

Sec. 7 *Dharmasūtra of Āpastamba*: ... pp. 32-46

The Āpastambakalpasūtra of the Black Yajurveda divided into 30 praśnas, dharmasūtra constituting 28th and 29th praśnas thereof - *Āpastamba is one of the five subdivisions of the Khāṇḍikeya school of Taittirīyaśākhā* - Āpastambagṛhya and dharma sūtras are composi-

tions of same author - some sūtras of the two are identical - Āp. gṛhya does not treat of some topics as they are dealt with in dharma sūtra - contents of Āp. dharmasūtra - form and structure of Āp. dharmasūtra - Āp. is more archaic and un-Pāṇinian than any other dharmasūtra - many unfamiliar words in Āp. - several verses quoted in Āp. - literature known to Āp. - Ap. mentions six aṅgas of Veda and ten writers on dharma by name - Śvetaketu and Āp. - Hārīta quoted frequently by Āp. - Āp. controverts several views - striking coincidences between Gautama and Āp. - Āp. quotes a verse from Purāṇa and speaks of the view of Bhaviṣyatpurāṇa - Āpastamba and Manu - Āpastamba presupposes many rules of the Mīmāṁsā and agrees closely with Jaimini's sūtras - age of Āp. Dh. S. - quoted by Śabara, Kumārila, Śaṁkarācārya, Viśvarūpa and Medhātithi - home and personal history of Āpastamba not known - Āp. is later than Gautama and probably Baudhāyana - his age between 600-300 B. C.- Āp. condemns *niyoga*, rejects secondary sons, does not admit *paiśāca* and Prājāpatya forms of marriage - divergence between the views of Āp. and Gautama and other sūtrakāras - Haradatta's is the only commentary extant on Āp. - Āpastamba smṛti in verse.

Sec. 8. *Hiraṇyakeśidharmasūtra* : ... pp. 46-50

Hiraṇyakeśidharmasūtra forms 26th and 27th *praśnas* of the Hiraṇyakeśikalpa-Hiraṇyakeśin's can be hardly called an independent work, as it borrows hundreds of sūtras word for word from Āp. - a few additions made to Āp. in Hiraṇyakeśi Dh. S. - Hiraṇyakeśin's readings are smoother and more classical than Āpastamba's - arrangement of sūtras also is somewhat different in the two - com. of Mahādeva called Ujjvalā on Hiraṇyakeśin is almost the same as Haradatta's on Āp. - Bühler thinks Mahādeva borrows from Haradatta - Mahādeva's com. in a few places contains more matter than Haradatta's and Mahādeva differs from Haradatta.

Sec. 9 *Vasiṣṭha-dharmasūtra* : ... pp. 50-60

Different editions of Vasiṣṭha contain different numbers of chapters - Kumārila says it was specially studied by Ṛgvedins - explanation of this statement - nothing special in the Vasiṣṭhadharmasūtra to connect it with Ṛgveda - contents of the Vasiṣṭhadharmasūtra - style of Vas. Dh. S. resembles Gautama's - many sūtras of Vas. identical with Gautama and Baudhāyana - form of Vasiṣṭha

dharmasūtra resembles Baudhāyana dharmasūtra - Medhātithi and Mitākṣarā quote from almost all chapters of extant Vasiṣṭha and so does Viśvarūpa - literature known to Vasiṣṭha - Vasiṣṭha prohibits learning language of Mlecchas - authors on dharmaśāstra named by Vasiṣṭha - Vasiṣṭha's references to the views of Manu are made with reference to a work of Manu almost identical with the present Manusmṛti and do not compel us to formulate the existence of a Mānavadharmasūtra - Bühler wrong in taking Vas. Dh. S. 4. 8 as a quotation from Mānavadharmasūtra - Only Vas. Dh. S. 12.16 and 19. 37 where Manu is quoted have no corresponding verses in the present Manusmṛti - Over forty verses are entirely common to Vas. and present Manusmṛti - conclusion that Vas. contains borrowings from the present Manusmṛti or its prototype in verse - Vas. Dh. S. 22 is same as Gautama 19 - Dr. Jolly's view that Vas. Dh. S. 28.10-15 and 18-22 are borrowed from Viṣṇudharmasūtra chap. 56 and 87 or its original the Kāṭhakadharmasūtra is wrong - home of Vas. to the north of Narmadā, according to Bühler - this is mere speculation - earliest reference to Vasiṣṭha as a writer on dharma is in Manu (8-140) - age of Vasiṣṭha - Vasiṣṭha's views are ancient, praticularly about secondary sons, about Dattaka son, about *niyoga* and remarriage - he mentions only six forms of marriage - but in other matters differs from Gaut. or Baudh. viz. on adoption, on documents - Vas. Dh. S. between 300-100 B. C. - whether Vas. 18. 4 (Rāmaka v. l. Romaka) contains a reference to the Romans - Vṛddha-Vasiṣṭha, an early compilation - there is a Bṛhad Vasiṣṭha and a Jyotir Vasiṣṭha - Yajñasvāmin commented upon Vas. Dh. S.

Sec. 10 *Viṣṇudharmasūtra*: ... pp. 60-70

Viṣṇu Dh. S. contains 100 chapters and yet sūtra not extensive- several chap. (40, 42, 76) contain only one sūtra and one verse - first chap. and last two are entirely in verse, the rest in mixed prose and verse - Viṣṇu Dh. S. closely connected with Kaṭhaśākhā - Dr. Jolly says chap. 21, 67, 73 and 86 of Viṣṇu closely correspond with Kāṭhaka gṛhya - but Viṣṇu Dh. S. is not the work of the author of Kāṭhaka gṛhya - contents of Viṣṇu Dh. S. - Viṣṇu resembles Vas. Dh. S. - its peculiar feature that it professes to be revealed by God Viṣṇu - its style, easy and diffuse - work contains old

and new material - hundreds of sūtras are prose renderings of hundreds of verses occurring in our Manu - hypothesis of a common origin or borrowing by both from a floating mass of verses untenable - extant Viṣṇudharmasūtra borrows from Manu - Viṣṇu contains verses identical with the Bhagavadgītā and Yājñavalkya smṛti - Dr. Jolly's view that Yājñavalkya borrows his anatomical section from Viṣṇu not correct - Viṣṇu Dh. S. contains long list of tīrthas, the word Jaiva for Jupiter - those wanting in Yājñavalkya - extant Viṣṇu Dh. S. later than Manusmṛti and Yājñavalkyasmṛti - Viśvarūpa does not quote a single sūtra of Viṣṇu by name, though he refers to Viṣṇu (ch. 97) for orders of saṁnyāsins - Mitākṣarā quotes hardly any verse from Viṣṇu - Aparārka and Smṛticandrikā quote Viṣṇu profusely-verses were added at a late date to original sūtra - literature known to Viṣṇu Dh. S. - Viṣṇu mentions the seven days of the week, recommends the practice of *satī*, speaks of pustakas, of many good and evil omens among which the sight of yellow-robed Buddhist ascetics is included - it prohibits speech with Mlecchas and journeys to Mlecca countries, it dilates on worship of Vāsudeva - though Viṣṇu agrees in some respects with Kāṭhakagṛhya, on some points it differs from it -- date of older kernel of Viṣṇu may be 300 to 100 B.C. - additions made after 3rd century A.D. and before 7th century - some sūtras agree closely with Nārada - Bṛhad Viṣṇu and Vṛddha Viṣṇu and Laghu Viṣṇu - Nandapaṇḍita's com. on the Viṣṇu Dh. S. - probably Bhāruci also commented on it.

Sec. 11 *The dharmasūtra of Hārīta* : ... pp. 70–75

Baudhāyana, Āpastamba and Vasiṣṭha quote Hārīta as an authority - Mr. Islampurkar secured a ms. of Hārīta-dharmasūtra at Nasik in 30 chapters - contents of that ms. - its relation to Maitrāyaṇīyasaṁhitā - it mentions the Kaśmirian word "Kaphella" -- quotations in commentaries and digests show that Hārīta dealt exhaustively with the same topics that are found in other dharmasūtras - Kumārila mentions Hārīta as dharmaśāstrakāra but does not assign him to any particular caraṇa as he does Āpastamba and others- notable doctrines of Hārīta - mentions worship of Ganeśa - Hārīta's verses on vyavahāra quoted in nibandhas are later than the sūtra - Laghu Hārīta and Vṛddha Hārīta - latter in verse is later than Yājñavalkya, Nārada and Kātyāyana.

Sec. 12 *The dharmasūtra of Śaṅkha-Likhita* : ... pp. 75-79

From Tantravārtika it appears that dharmasūtra of Śaṅkha-Likhita was studied by Vājasaneyins - Mahābhārata (Śānti 23) contains story of brothers Śaṅkha and Likhita - Various compilations ascribed to Śaṅkha alone or Likhita alone or to both - Restoration of Dharmasūtra in Annals of Bhandarkar Institute (vol. VII, VIII) - Verse Śaṅkhasmṛti stricter than prose Śaṅkha - Likhita - com. on dharmasūtra mentioned in Kalpataru and Vivādaratnākara - doctrines of dharmasūtra similar to those of other dharmasūtras - speaks of twelve secondary sons - allows *niyoga* - speaks of several ordeals - defines Āryāvarta as between Sindhu - Sauvīra and Kāmpilya - Literature known to Śaṅkha Likhita - probable age between 300-100 B. C.

Sec. 13 *Mānavadharmasūtra : Did it exist ?* ... pp. 79-85

MaxMüller and Weber responsible for the theory that the extant Manusmṛti was a recast of an ancient Mānavadharmasūtra now lost - hardly any data for the sweeping generalisation of Max-Müller that all genuine dharmaśāstras are nothing but more modern texts of earlier sūtra works on *kuladharma* - one main plank of this theory that the continuous employment of the śloka metre was unknown in the sūtra period is now exploded - Bühler supports Max Müller's theory by some additional arguments - Vasiṣṭha IV. 5-8 on which Bühler relies not properly understood by him - Vasiṣṭha (19-37) quotes a Mānava śloka which is not in the Anuṣṭubh metre and not found in extant Manu and Bühler thinks it is taken from Mānavadharmasūtra - Bühler's reliance on a fragment of Uśanas which is corrupt is not worth consideration - Bühler relies on Kāmandakīyanītisāra (II. 3. and XI. 67) where Mānavas are said to hold that there are three vidyās for a king and that Manu said that king's council should consist of 12 ministers - These views not the same in extant Manu- Bühler's conclusion not correct - Kāmandaka is only paraphrasing Kauṭilīya - Bühler's generalisation about Mānava or Mānavāḥ without foundation - Kumārila, Śaṅkara, and Viśvarūpa all employ 'Mānava' for Manusmṛti - Bühler relies on analogy of the complete set of Āpastamba and Baudhāyana sūtras for holding that a Mānavadharmasūtra existed - Proper explanation of Vas. Dh. S. IV. 5-8 - Bühler not right in saying that Vas. Dh. S. 11. 23, 12. 16, 23. 43 either contradict Manu or find no counterpart

therein - analogy of Āpastamba sūtras of no use - excepting the three caraṇas of the Black Yajurveda, no caraṇa of any Veda has a dharmasūtra attributed to the founder of that caraṇa - an explanation suggested - existing materials not sufficient to establish theory that a Mānavadharmasūtra once existed.

Sec. 14 *Arthaśāstra of Kauṭilya* : ... pp. 85-104

First translated by Dr. Shāma Sāstri and text published in 1909 - other editions - numerous works and articles inspired by the publication of Kauṭilīya Arthaśāstra - Kauṭilīya is oldest extant work on Arthaśāstra - scope of arthaśāstra and relation to dharmaśāstra - arthaśāstra an upaveda of Atharvaveda - purpose of this śāstra - rule in case of conflict between Dharmaśāstra and Arthaśāstra - Cāṇakya, Kauṭilya and Viṣṇugupta are names of the same person - glowing tribute paid to Cāṇakya or Viṣṇugupta by Kāmandakīyanītisāra, Tantrākhyāyikā, Daṇḍin - Bāṇa and Pañcatantra on Kauṭilya as author of Arthaśāstra - Bṛhatkathā of Guṇāḍhya contained his story - Mudrārākṣasa connects his name with Kuṭila - controversy as to whether Kauṭilīya can be the work of a busy minister of Candragupta Maurya - Jolly, Winternitz and Keith hold that extant work is not by the minister of Candragupta - Megasthenes' silence about Cāṇakya explained - whether the Kauṭilīya is the product of a school or of an individual author - Kauṭilya's views cited about 70 times in the work in the third person - explanation of this - Dr. Jolly wrong in his explanation of *apadeśa* (in XV. 1) - Keith thinks that an author would not parade an uncomplimentary epithet like Kauṭilya (derived from kuṭila) - Is the name Kauṭilya or Kauṭalya - works on gotra and pravara give various forms such as Kauṭali, Kauṭilya and Kauṭili - form, style and contents of the Kauṭilīya - a few verses interspersed in the work, generally at the end - in all 340 verses excluding *mantras* - some verses are certainly quotations - work abounds in numerous technical and rare words - deviations from Pāṇini - summary of contents - section on judicial administration interesting - greatest correspondence between Kauṭilīya and Yājñavalkya - some striking examples - it is Yājñavalkya that borrows - reasons - Yājñavalkya represents a far too advanced stage

of juristic principles than Kauṭilya - close agreement between Manu smṛti and Kauṭilya also - but they differ on *niyoga*, as to nomenclature of vyavahārapadas, about heirship of mother and paternal grandmother, on remarriage of widows, divorce, gambling - Kauṭilīya long anterior to the extant Manusmṛti - Kauṭilya's five references to Mānavas explained - references to Svāyambhuva and Prācetasa Manu contained in the Mahābhārata suggest that there were two works in verse on dharma and politics attributed to these or perhaps one work containing both, subsequently recast as the extant Manusmṛti - only two views ascribed to Mānavas in Kauṭilīya not found in extant Manusmṛti - in the dharmasthīya section the only other authors or schools cited are Bārhaspatyas and Auśanasas - none of the dharmasūtras of Gautama and others are anywhere quoted by name - views cited on the question as to whom a child belongs (to the begetter or to him on whose wife it is begotten) can be traced to Baudhāyana, Gautama and Vasiṣṭha - views of Ācāryas cited in the Kauṭilīya - Kauṭilīya later than Gautama and Āpastamba but earlier than extant Manusmṛti - date of Kauṭilīya - it is certainly not later than 2nd century A. D. and not earlier than 325 B. C. - schools named by Kauṭilya and also individual authors - views of Ācāryas are quoted over fifty times and Kauṭilya differs in each case - meaning of 'ācāryas' - literature known to Kauṭilya - Sanskrit official language and the work mentions guṇas of composition - Kauṭilīya agrees with Kāmasūtra in several respects - Dr. Jolly and Prof. Keith opine that both works composed about same time - points of difference between the two works - countries and peoples mentioned by Kauṭilya -- silks from Cīna and blankets from Nepal - corporations of Licchavis, Vṛjikas and others mentioned - meaning of 'rājaśabdopajīvinaḥ' (in XI-I) - best breeds of horses - Mlecchas sold or pledged children - references to Buddhists and Ājīvakas - weights to be made from stones of Magadha and Mekala - doubtful whether Kauṭilya knew extant text of Mahābhārata - most of the stories cited as illustrations by Kauṭilya occur in the Mahābhārata, but some divergence exists in the case of Janamejaya, Māṇḍavya - Kauṭilya's knowledge of drugs and of rasa (mercury) - references to shrines of Śiva, Skanda &c.- traditional date of 300 B. C. more likely to be correct than 3rd cen-

tury A. D. approved of by Dr. Jolly and Winternitz - two commentaries on Kauṭilīya, Nayacandrikā of Mādhavayajvan and Pratipadapañcikā of Bhaṭṭasvāmin - sūtras attributed to Cāṇakya - several nīti collections in verse ascribed to Cāṇakya are later than Kauṭilīya.

Sec. 15 *Vaikhānasadharmasūtra* : ... pp. 105-107

Vaikhānasa is one of the six sūtra caraṇas of the black Yajurveda mentioned by Mahādeva in his Vaijayantī on Satyāṣāḍha śrautasūtra - Vaikhānasa occurs in Gautama, Baudhāyana, Vasiṣṭha (9. 10) and Manu (6. 21) - Vaikhānasadharmapraśna divided into three praśnas - contents of the work - its age later than Gautama and Baudhāyana - names more mixed castes than even some of the verse smṛtis - devotion to Nārāyaṇa looms very large in the work - Dr. Caland's view that Manusmṛti borrows from Vaikhānasagṛhya not correct.

Sec. 16 *Atri* : ... pp. 107-110

Atri named in Manu (III. 16) - Ātreyadharmaśāstra in nine adhyāyas - summary of contents - form of Atridharmaśāstra - several works styled Atri - smṛti - summary of Atrisaṁhitā printed by Jīvananda - Atri quoted as an authority on adoption - Laghu Atri and Vṛddhātreyasmṛti - Mahābhārata (Anuśāsana 65. 1) quotes a verse of Atri.

Sec. 17 *Uśanas* : ... pp. 110-116

Uśanas wrote on politics, as Kauṭilīya shows - Mahābhārata (Śānti 56. 29-30) refers to work of Uśanas on politics - Nītiprakāśikā on Śukra as arranger of rājaśāstra - An Auśanasa dharmaśāstra in verse - contents - peculiar views of Uśanas about offspring of inter-caste marriages - several verses common to Uśanas and Manu - names the views of numerous writers on dharma - Haradatta and Smṛticandrikā knew a work of Uśanas dealing with all branches of dharma - Uśanas smṛti in verse - verses of Uśanas on vyavahāra - Śukranītisāra edited by *Oppert*.

Sec. 18 *Kaṇva and Kāṇva* : ... pp. 116-117

Āp. Dh. S. (I. 6. 19) shows that Kaṇva and Kāṇva were two distinct authors - verses of Kaṇva quoted in Smṛticandrikā.

Sec. 19 *Kaśyapa and Kāśyapa* : ... pp. 117-118

Baudhāyana (Dh. S. I. 11.20) cites a verse in which Kāśyapa's view is contained - there was a dharmasūtra of Kāśyapa - a Kāśyapa smṛti in prose contained in Deccan College Mss. - contents thereof- Smṛticandrikā includes Kāśyapa among 18 upasmṛtis.

Sec. 20 *Gārgya* : ... p. 119

A sūtra work of Gārgya on dharma existed - Gārgya and Vṛddha Gārgya - a Gārgīsaṁhitā on astronomy and astrology - Jyotir Gārgya and Bṛhad Gārgya.

Sec. 21 *Cyavana* : p. 119

Seems to have written a sūtra work on dharma.

Sec. 22 *Jātūkarṇya* : ... pp. 119-120

A verse of Vṛddha Yājñavalkya names Jātūkarṇya as a dharma śāstrakāra - quotations in verse in Mitākṣarā and later works.

Sec. 23 *Devala* : ... p. 120

A dharmasūtra of Devala existed once - Mitākṣarā and other works also contain quotations in verse on ācāra, vyavahāra, srāddha - this latter a later compilation - Devalasmṛti in 90 verses on purifications is also a late work - jurist Devala flourished about the same time as Bṛhaspati and Kātyāyana.

Sec. 24 *Paiṭhīnasi* : ... pp. 121-122

An ancient sūtrakāra, as Viśvarūpa quotes his sūtras - Dr. Jolly thinks he belongs to Atharvaveda - Paiṭhīnasi on *satī*, inheritance, on absence of untouchability under certain circumstances.

Sec. 25 *Budha* : ... p. 123

A sūtrakāra cited by Hemādri, Aparārka, Kalpataru and Jīmūtavāhana - a brief compilation and not very early in age.

Sec. 26 *Bṛhaspati* : ... pp. 123-126

An ancient teacher of arthaśāstra mentioned in Kauṭilīya - Mahābhārata (Śānti 59. 80-85) credits him with compression of vast work of Brahmā on *trivarga* and mentions several of his views- Kāmasūtra speaks of Bṛhaspati as writer on *artha* - peculiar views of

Bṛhaspati according to Kauṭilīya - Bṛhaspati also wrote a prose work on vyavahāra and prāyaścitta - probably the authors of the two are different - 700 verses on vyavahāra ascribed to Bṛhaspati are quoted in the Mitākṣarā - this is an independent work composed between 300-500 A. D. - smaller compilations in verse ascribed to Bṛhaspati - Bārhaspatya Arthaśāstra edited by Dr. Thomas is a late work.

Sec. 27 *Bharadvāja and Bhāradvāja* : ... pp. 126-128

A śrautasūtra and gṛhya of Bhāradvāja exist - Viśvarūpa's work establishes existence of a sūtra work on dharma of Bharadvāja - there was smṛti in verse also attributed to Bhāradvāja - Kauṭilīya shows that Bhāradvāja was an ancient author on politics - some views of Bhāradvāja - Mahābhārata on Bhāradvāja - verses on vyavahāra attributed to Bhāradvāja - this probably different from work on politics.

Sec. 28 *Śātātapa* : ... pp. 128-129

A sūtra work of Śātātapa on dharma dealing with prāyaścitta, śrāddha and ācāra must have existed - verses of Śātātapa quoted in Mitākṣarā and other later works - this is probably different from smṛti work - several verse compilations ascribed to Śātātapa - Vṛddha Śātātapa and Bṛhat Śātātapa.

Sec. 29 *Sumantu* : ... pp. 129-131

A sūtra work on ācāra and prāyaścitta ascribed to Sumantu existed - Yājñavalkya and Parāśara do not enumerate Sumantu among expounders of dharma - Sumantu mentioned in Mahābhārata and Bhāgavata - verses from Sumantu on dharma are cited by Aparārka - this is a different work - numerous verses on vyavahāra quoted from Sumantu in Sarasvatīvilāsa.

Sec. 30 *The Smṛtis* : ... pp. 131-135

Two senses of the word smṛti, viz. all orthodox ancient non-Vedic works (such as Pāṇini's grammar, Śrauta sūtras, Mahā bhārata Manu, &c.) and (a narrower sense) dharmaśāstra - smṛti, a source of dharma according to Gautama and others - number of smṛtis went on increasing - Yājñavalkya enumerates twenty writers of smṛtis, Parāśara 19 - Tantravārtika speaks of 18 dharmasaṁhitās - Catur-

viṁśatimata gives views of 24 writers - a smṛti called Ṣaṭ - triṁśan-mata - Paiṭhīnasi enumerates 36 and so does Aparārka - Vṛddha Gautama enumerates 57 - Vīramitrodaya enumerates 18 smṛtis, 18 upasmṛtis and 21 more- total number of smṛtis about 100 - these are products of widely separated ages - some entirely in prose, some entirely in verse, some are mixed - chronology of smṛtis presents perplexing problems - two or three smṛtis go under the same name, e. g. Hārīta, Atri, Śātātapa - sectarian zealots fabricate certain smṛtis - the prefixes laghu, bṛhat and vṛddha applied to smṛtis - well-known verses are ascribed to different authors, as authors quote from memory.

Sec. 31 *The Manusmṛti*: ... pp. 135-158

Numerous editions - Manu as the father of mankind in the Ṛgveda and other Vedas - Manu and the deluge in Śatapatha-brāhmaṇa - Manu in the Nirukta - Manu quoted as law-giver in Gautama, Āpastamba and Mahābhārata - introduction to Nāradasmṛti and Manu - how the Manusmṛti is narrated - four versions of Svāyambhuva śāstra according to Bhaviṣyapurāṇa - almost impossible to say who composed extant Manusmṛti - Bühler's theory that our Manu is a recast of Mānavadharmasūtra shown above to be unsustainable - the Mānavagṛhya differs from Manusmṛti in several particulars - Vināyakaśānti of Mānavagṛhya and tests for selecting a bride not contained in our Manu - Mahābhārata distinguishes between Svāyambhuva Manu and Prācetasa Manu, former promulgating dharmaśāstra - these two works combined in the present Manu - extant Manu has 12 chapters and 2694 verses - its style - contents of Manusmṛti - extent of literature known to Manusmṛti - the author of the Manusmṛti is not the first legislator - age of Manusmṛti - external evidence - Medhātithi's is first extant commentary - Viśvarūpa quotes nine verses - Śaṅkara, Kumārila and Śabara refer to Manu - Bṛhaspati knew the present text of Manu before him - Aśvaghoṣa in his Vajrasūci quotes several verses from 'Mānavadharma' some of which are found in our Manu - Rāmāyaṇa (*Kiṣkindhā 18. 30-32*) contains Yājñavalkya VIII. 318 and 316 - Manu attained present form long before 2nd century A. D. - there are earlier and later strata in Manu - contradictary statements as to Brāhmaṇa marrying a śūdra woman - about appropriate forms of marriage, about niyoga, about

flesh-eating - Bühler's conclusion is that cosomological and philosophical portions in 1st and 12th books, rules about mixed castes and duties of castes in 10th book are later additions - all additions made before 3rd century A. D.– Manusmṛti has not suffered several recasts - quotations cited as Vṛddha Manu and Bṛhan-Manu are later than Manusmṛti - extant Manu older than Yājñavalkya - Manu mentions Yavanas, Kāmbojas, Śakas, Pahlavas and Cīnas - extant Manusmṛti composed between 2nd century B. C. and 2nd century A. D. - relation of Mahābhārata and Manu - conflict of views between Mandlik, Hopkins and Bühler - Hopkins holds that there was a mass of floating verses ascribed to mythical Manu on which both Manusmṛti and Mahābhārata drew - Bühler says that the floating mass of verses was not all attributed to Manu - Manu mentions stories and names that occur in the Mahābhārata but these names go into Vedic antiquities – Manu never names the Mahābhārata, while the latter often refers to 'rājadharmas or śāstra of Manu' or to 'what Manu said' - Both Hopkins and Bühler hold that the Anuśāsanaparva and Śāntiparva knew a Manusmṛti, but earlier books, whenever they speak of Manu, refer to floating mass of popular verses - this conclusion not correct – final conclusion, viz., long before 4th century B. C. there was a dharmaśāstra in verse attributed to Svāyaṁbhuva Manu, there was another work on rājadharma attributed to Prācetesa Manu, that probably there was one work, then between 200 B. C. and 200 A. D. Manusmṛti was recast · extant Mahābhārata later than extant Manusmṛti – influence of Manu spread to Cambodia and other countries beyond India- Manu had several commentators, Medhātithi, Govindarāja, Kullūka, Nārāyaṇa, Rāghavānanda, Nandana and Rāmacandra - Asahāya commented on Manu - Udayakara is another commentator and so is Dharaṇīdhara – Nārāyaṇa flourished between 1100-1300 A. D. – Rāghavānanda later than 1400 A. D. – Vṛddha Manu and Bṛhan-Manu - explanation as to how these originated

Sec. 32 *The two Epics* : pp. 158-160

Rāmāyaṇa is relied upon as a source of dharma though less frequently than the Mahābhārata - Ayodhyākāṇḍa and Araṇyakāṇḍa contain disquisitions on politics - age of the epics a problem more appropriate for a separate treatise - table in which where dharmaśāstra topics occur in the Mahābhārata and the Rāmāyaṇa.

Sec. 33 *The Purāṇas* : ... pp.160-for

Purāṇas as a class of literature mentioned in Taittirīya Āraṇyaka, Chāndogya Upaniṣad, Gautama Dh. S., Mahābhāṣya - extant purāṇas are recasts made of older material - some of the extant Purāṇas like Vāyu earlier than 6th century A. D. - Names of principal 18 Purāṇas - 18 Upapurāṇas - Matsyapurāṇa contains much dharmaśāstra material - Agnipurāṇa contains disquisition on rājadharma and chapters 253-258 contain almost the whole of the vyavahāra section of Yājñavalkya - Garuḍapurāṇa borrows about 400 verses from ācāra and prāyaścitta sections of Yājñavalkya - chronology of Purāṇas passed over - Divergence as to the names of the principal 18 purāṇas and as to their extent - Purāṇas very valuable for study of social and religious questions as to mediæval and modern India - Padmapurāṇa divides 18 Purāṇas into three groups of sāttvika, rājasa, tāmasa and divides eighteen smṛtis also in the same way - table showing which dharmaśāstra topics are dealt with in which purāṇa.

Sec. 34 *The Yājñavalkyasmṛti* : pp. 168-190

Yājñavalkya, a name most illustrious among Vedic sages - stories about strained relations between Vaiśampāyana and Yājñavalkya - Yājñavalkya and Janaka in the Śatapathabrāhmaṇa - Yājñavalkya, a great philosopher in the Bṛhadāraṇyaka - Yājñavalkya smṛti claims that the Āraṇyaka and Yogaśāstra were composed by the author of the smṛti - slight variation in the number of verses contained in Yājñavalkyasmṛti according to Viśvarūpa, Mitākṣarā and Aparārka - arrangement of verses different in Viśvarūpa and Mitākṣarā, particularly in the prāyaścittakāṇḍa - readings of the two commentators also differ - Agnipurāṇa affords excellent check for consideration of text of Yājñavalkya - Readings of Agnipurāṇa compared with those of Viśvarūpa and the Mitākṣarā - conclusion is that the Agnipurāṇa represents a text midway between Viśvarūpa and that of the Mitākṣarā - So Agnipurāṇa represents a text of Yājñavalkya current about 900 A. D. - total number of verses on vyavahāra in the Agnipurāṇa is 315, out of which the first 31 are not taken from Yājñavalkya - almost all of these 31 taken from Nārada- Garuḍapurāṇa (chap. 93) expressly says that the dharma promulgated by Yājñavalkya was imparted therein - Garuḍa (chap. 93-106

xxvi ntains dharmaśāstra material taken from ācāra and prāyaścitta sections of Yājñavalkya - Garuḍa (93-102) deals with ācāra and 102-106 with prāyaścitta-Garuḍapurāṇa omits rājadharma section of Yājñavalkya – only a few verses of Yāj. are repeated word for word, while a summary only is given of several verses – comparison of the text of the Garuḍapurāṇa with Viśvarūpa's text and that of the Mitākṣarā – Garuḍapurāṇa represents text intermediate between Viśvarūpa and Mitākṣarā – are there different strata in Yājñavalkya? text mainly the same from 700 A. D. and little evidence to show that the text of Yājñavalkya as we have it contains several strata – comparison of Yājñavalkyasmṛti with Manusmṛti – close agreement in phraseology between the two – Yājñavalkya usually tries to compress Manu's dicta - Yāj. adds Vināyakaśānti and Grahaśānti and ordeals, while Manu omits first two and cursorily refers to two ordeals – Yāj. silent on origin of world which we have in Manu – style of Yājñavalkya – contents of smṛti – literature known to Yājñavalkyasmṛti – enumerates 19 authors on dharma – close agreement between Viṣṇu Dh. S. and Yājñavalkya and between Kauṭilya and Yāj. – Manu and Yāj. differ on several points and Yāj. represents a more advanced state of thought than Manu – Manu allows brāhmaṇa to marry śūdra girl, Yāj. does not – Manu condemns niyoga, Yāj. does not – same case with gambling – Yāj. takes Vināyakaśānti from Mānavagṛhya – Yājñavalkyasmṛti in intimate relation to white Yajurveda and literature appurtenant to it – Yājñavalkya closely agrees with Pāraskaragṛhya – Dr. Jolly's theory that Yājñavalkya's work goes back to a dharmasūtra of White Yājurveda is without foundation – date of Yājñavalkyasmṛti – Viśvarūpa separated from the smṛti by several centuries – probable date of Yājñavalky between 100 B. C. and 300 A. D. – Laṅkāvatārasutra (gāthās 814-81[illegible]) refers to Yājñavalkyasmṛti – Dr. Jolly thinks that Yāj. shows acquaintance with Greek astrology – Dr. Jacobi's theory that naming of week days after planets first introduced by Greeks and borrowed by Indians – these theories untenable – Yāj. does not mention week days, but only the nine planets (in I. 296) – Yāj. does not mention the zodiacal signs – he arranges the nakṣatras from Kṛttikā to Bharaṇī (I. 268) as the Taittirīyabrāhmaṇa does – 'susthe iṣṭadau' in Yāj. explained by Viśvarūpa without reference to zodiacal signs – from Vedic times nakṣatras divided into auspicious and inauspicious – Yājñavalkya's reference to nāṇakas – Yāj. regards sight of yellow-

robed people as an evil omen – Dr. Jolly's date of 400 A. D. for Yājñavalkya is far too late – there is a Vṛddha-Yāj., a Yoga-Yāj., and a Bṛhad-Yāj. - Yoga-Yājñavalkya existed much earlier than 800 A. D. as Vācaspatimiśra quotes a half verse from Yoga-Yāj. and Aparārka quotes profusely from him – mss. of Yoga-Yājñavalkya in Deccan College collection in 12 chapters and 495 vereses and of Bṛhad-Yogi-Yājñavalkya in 12 chapters and 920 verses – Yoga-Yājñavalkya and Bṛhad-Yogi-Yājñavalkya of the mss. are entirely different works - several commentaries on Yājñavalkya, viz. of Viśvarūpa, Vijñāneśvara, Aparārka and Śūlapāṇi.

Sec. 35 *Parāśarasmṛti* : ... 190–196

Yāj. mentions Parāśara, but the extant Parāśarasmṛti is probably a recast of an older smṛti – Garuḍapurāṇa (chap. 107) gives a summary of 39 verses of Parāśarasmṛti – From Kauṭilya it appears there was a work of Parāśara on politics - extant Parāśara in 12 chapters and 592 verses deals with ācāra and prāyaścitta alone – Parāśara, an ancient name – Parāśara mentions 19 smṛti writers – contents of the smṛti – Parāśara has peculiar views – authors cited by Parāśara – views of Manu frequently cited - several identical verses in Manu and Parāśara – age of Parāśarasmṛti between 100–500 A. D. - a Bṛhat-Parāśara saṁhitā in 12 chapters and 3000 verses – contents thereof – it is a late work – Vṛddha Parāśara quoted by Aparārka.

Sec. 36 *The Nāradasmṛti* : ... pp. 196-207

Two versions of Nārada on vyavahāra, a smaller and a larger one – com. of Asahāya as revised by Kalyāṇabhaṭṭa is contained in Dr. Jolly's edition – Nārada not mentioned by Yāj. or Parāśara in list of expounders of dharma – three introductory chapters on judicial procedure and on sabhā, then 18 *vyavahārapadas*, then an appendix on theft from Nepal ms. – some difference in the names of titles between Nārada and Manu – printed Nārada contains 1028 verses – about 1700 verses of Nārada quoted in digests – Viśvarūpa's and Medhātithi's quotations from Nārada agree with printed Nārada – Agnipurāṇa chap. 253 contains thirty verses of Nāradasmṛti defining the eighteen titles from ṛṇādāna to prakīrṇaka in the same order – Nārada's verses on ācāra, śrāddha and prāyaścitta quoted in Smṛti candrikā, Hemādri – probably this is a different Nārada – form, style and matre of Nārada – Literature known to Nārada – 50 verses rose

Sec. 41 *Kārṣṇājini* : ... p. 223

Sec. 42 *Caturviṁśatimata* : ... p. 223-225

Embodies in 525 verses the opinions of 24 sages - contents - quoted by Mitākṣarā and Aparārka, but not by Viśvarūpa and Medhātithi - probably compiled about 8th or 9th century A. D. - Bhaṭṭoji commented upon it.

Sec. 43 *Dakṣa* : ... pp. 225-226

Mentioned by Yāj. - Viśvarūpa quotes him several times - Aparārka quotes a prose passage - contents of printed Dakṣasmṛti in 220 verses.

Sec. 44 *Pitāmaha* : ... pp. 226-227

Quotations from Pitāmaha occur mostly on vyavahāra, particularly ordeals - he treats of nine ordeals - 50 *chalas* enumerated by Pitāmaha in which king took action without a complaint - views peculiar to Pitāmaha, viz. 18 lowest castes, eight constituents of hall of justice, &c. - mentions Bṛhaspati - flourished between 400-700 A. D.

Sec. 45 *Pulastya* : ... p. 228

An expounder of dharma named in a verse of Vṛiha Yājñavalkya - Viśvarūpa, Mitākṣarā, Aparārka cite many verses on āhnika and śrāddha - Dānaratnākara cites a prose passage : Pulastya-composed between 4th and 7th century A. D.

Sec. 46 *Pracetas* : p. 229

A dharmaśāstra writer mentioned by Parāśara, though not by Yāj. - prose and verse quotations cited by Mitākṣarā and Aparārka - a few prose quotations in Haradatta on Gautama and Smṛticandrikā - Vṛddha Pracetas and Bṛhat Pracetas.

Sec. 47 *Prajāpati* : ... pp229-230

Prajāpati cited as authority by Baudhāyana Dh. S. (I 4. 15) and Vasiṣṭha (III. 47 &c.) - they mean probably Manu's compilation in 198 verses ascribed to Prajāpati - Mit. and Aparārka and others quote Prajāpati on āśauca, prāyaścitta, śrāddha, ordeals and vyavahāra.

Sec. 48 *Marīci* : ... pp. 230-231

Quoted on āhnika, āśauca, śrāddha and vyavahāra by Mitākṣarā, Aparārka and Smṛticandrikā - recommends writing as essential for sale, mortgage, gift and partition of immovables.

Sec. 49 *Yama* : ... pp. 231-235

Yama quoted in Vas. Dh. S. (18. 13-15 and 19. 48) - various printed compilations in verse ascribed to Yama — Bṛhad Yama in 5 chapters and 182 verses— Viśvarūpa and others quote about a hundred verses of Yama on all topics including vyavahāra—some of these found in printed text - a few prose passages of Yama quoted by Aparārka - Anuśāsanaparva 104. 72-74 quotes gāthās of Yama - some views of Yama on vyavahāra set out - Bṛhad Yama, Laghu Yama and Svalpa Yama.

Sec. 50 *Laugākṣi* : ... pp. 235-236

Mitākṣarā quotes verses on āśauca and prāyaścitta, while Aparārka quotes prose and verse passages on saṁskāras, vaiśvadeva &c.

Sec. 51 *Viśvāmitra* : ... p. 236

Named by Vṛddha Yājñavalkya - verses quoted on all topics except vyavahāra.

Sec. 52 *Vyasa* : ... pp. 236-238

Printed compilation ascribed to Vyāsa in 250 verses - contents - about two hundred verses of Vyāsa on vyavahāra cited in Aparārka, Smṛticandrikā and other works - his doctrines closely agree with those of Nārada, Bṛhaspati and Kātyāyana - some of his views on vyavahāra set out - flourished between 200-500 A. D. - Aparārka cites many verses from Vyāsa on saṁskāras, śrāddha &c. - probably Vyāsa the jurist is identical with the latter - Gadya-Vyāsa, Vṛddha-Vyāsa and Bṛhad-Vyāsa, Mahāvyāsa and Laghu Vyāsa.

Sec. 53 *Saṭ-triṁsan-mata* : ... pp. 238-239

This was a compilation like Caturviṁśati-mata - quotations from it cited in Kalpataru, Mitākṣarā, Smṛticandrikā and Aparārka - Viśvarūpa and Medhātithi do not mention it - date between 700-900 A. D. - no verse quoted from this on vyavahāra.

Sec. 54 *Saṁgraha or Smṛtisaṁgraha* : ... pp. 239-242

Quoted by Mitākṣarā, Aparārka and Smṛticandrikā on sevaral topics of dharma—quotations on vyavahāra are many and important for history of Hindu Law - views of Saṁgrahakāra and Dhāreśvara coincide in many respects and were criticized by Mitākṣarā - date of Saṁgraha between 8th and 10th centuries.

Sec. 55 *Saṁvarta* : ... pp. 242-244

Mentioned as dharmaśāstrakāra by Yāj. - cited on all topics of dharma by Viśvarūpa, Medhātithi, Mitākṣarā - Aparārka quotes about 200 verses - some of his views on vyavahāra - contents of printed Saṁvarta in 230 verses - Bṛhat Saṁvarta and Svalpa Saṁvarta.

Sec. 56 *Hārīta* : ... p. 244

Verses from Hārīta on vyavahāra deserve special treatment - some of his views set out, e. g. definition of vyavahāra, four aspects of vyavahāra, importance of writing, defects of plaint and reply, protection of long possession, when title by itself is decisive against long possession, five kinds of sureties, treatment of erring wives - his date between 400-700 A. D.

Sec. 57 *Commentaries and Nibandhas* : ... pp. 246-247

Dharmaśāstra literature falls into three periods, the first from 600 B. C. to 100 A. D. being the period of the dharmasūtras and of the Manusmṛti, the 2nd from 100 A. D. to 800 A. D. of Yājñavalkya and other smṛtis and third from 700 to 1800 of commentators and authors of digests - first part of this last period contains commentaries - digests written from 11th century - no hard and fast line between commentaries and digests - these to be treated of in chronological order as far as possible.

Sec. 58 *Asahāya* : ... pp. 247-251

Portion of his bhāṣya on Nārada (up to verse 21 of abhyupetyāśuśrūṣā) published hy Dr. Jolly - Kalyāṇabhaṭṭa revised it - exact relationship of Kalyāṇabhaṭṭa's revision to original not clear, but he took great liberties - Kalyāṇabhaṭṭa was encouraged by

Keśavabhaṭṭa – Viśvarūpa on Yāj. (III. 263-264) mentions Asahāya by name and quotes latter's explanation of Gautama 22. 13. - Hāralatā of Aniruddha speaks of bhāṣya of Asahāya on Gautama – from a passage of Sarasvatīvilāsa it appears that Asahāya commented on Manu also – Medhātithi on Manu 8. 156 quotes Asahāya - Mitākṣarā mentions the views of Asahāya – date of Asahāya between 600-750 A. D.– a few views of Asahāya set out, viz. definition of dāya, succession to Śulka of a woman, succession to a childless brāhmaṇa.

Sec. 59 *Bhartṛyajña* : ... pp. 251-252

An ancient Bhāṣyakāra mentioned by Medhātithi (on Manu 8. 3) – his views cited by Trikāṇḍamaṇḍana - he wrote bhāṣya on Kātyāyana śrautasūtra and Pāraskara gṛhyasūtra – probably he commented on Gautamadharmasūtra – flourished about 800 A. D.

Sec. 60 *Viśvarūpa*: ... pp. 252-264

His commentary called Bālakrīḍā on Yāj. published at Trivandrum - Mitākṣarā refers to it in introductory verses and on Yāj. (I. 80 and III. 24) – printed com. of Viśvarūpa on vyavāhāra portion of Yāj. is very meagre - literature referred to or quoted by Viśvarūpa - most of the quotations from Svāyambhuva found in extant Manu, but not so those ascribed to Bhṛgu – quotes prose passages of Bṛhaspati on vyavahāra – quotes a verse of Viśālākṣa on politics and refers to arthaśāstras of Bṛhaspati and Uśanas – Kauṭilya not named, yet Viśvarūpa seems to have had his work before him - Viśvarūpa's work saturated with doctrines of Pūrvamīmāṁsā – quotes Śabara and Ślokavārtika – quotes his own kārikās on Yāj. I. 7. and other places – his philosophical views identical with Śaṁkarācārya's– Dr. Jolly's view that citations of Viśvarūpa in the Smṛticandrikā on certain points not traced in the printed Bālakrīḍā examined and shown to be incorrect – some citations of Viśvarūpa's views in Gṛhastharatnākara and Hemādri not found in printed text of Viśvarūpa – points in which Viśvarūpa and Mitākṣarā differ set out - Viśvarūpa must have flourished between 750 and 1000 A. D. – If Viśvarūpa identical with Sureśvara, pupil of Śaṁkara, then he flourished between 800-850 - reasons for identity set out – Maṇḍana and

Sureśvara not identical – Bhavabhūti and Umbeka identical, but not same as Sureśvara – a digest called Viśvarūpanibandha by another Viśvarūpa – a Viśvarūpasamuccaya mentioned by Raghunandana.

Sec. 61 *Bhāruci*: ... pp. 264–266

His views quoted by Mitākṣarā on Yāj. I. 81 and II. 124 – a Bhāruci mentioned as an ancient teacher of Viśiṣṭādvaita system by Rāmānujācārya in his Vedārthasaṁgraha – Bhāruci the philosopher is probably identical with Bhāruci the jurist – from notices in the Sarasvatīvilāsa Bhāruci seems to have commented on the Viṣṇu-dharmasūtra - Bhāruci and Mitākṣarā disagreed on numerous points.

Sec. 62 *Śrīkara*: ... pp. 266-268

Views of Śrīkara set out – first writer to propound the view that spiritual benefit was the criterion for judging of superior rights to succession – probably a Maithila – difficult to say whether he wrote a commentary or an independent digest – flourished between 800–1050 A. D.

Sec. *Medhātithi*: ... pp. 266-275

Wrote an extensive commentary on Manu - printed bhāṣya corrupt in 8th, 9th and 12th chapters - reference to king Madana having restored Medhātithi's bhāṣya explained – Dr. Jolly says Medhātithi was a southerner – this is wrong – He was a northerner and probably a Kashmirian – literature known to Medhàtithi – smṛtis quoted by him – mentions Asahāya, Bhartṛyajña, Yajvan, Upādhyāya, Ṛju, Viṣṇusvâmin - Medhātithi saturated with Pūrva-mīmāṁsā – his reference to Śārīraka explained – Medhātithi and Śaṅkarācārya - peculiar views of Medhātithi set out – wrote Smṛti-viveka from which he quotes verses in his Manubhāṣya – date of Medhātithi – flourished between 825–900 A. D.

Sec. 64 *Dhāreśvara Bhojadeva*: ... pp. 275-279

Mitākṣarā (on Yàj. II. 135 and III 24) mentions views of Dhāreśvara – Dhāreśvara is to be identified with king Bhojadeva of Dhārā – works on numerous branches of knowledge attributed to Bhoja of Dhārā such as on Poetics, Rājamṛgāṅka (on astronomy), a com. on Yogasūtras - Śuddhikaumudī of Govindānanda / mentions

Rājamārtaṇḍa of Bhoja on srāddha – Mitākṣarā and Dhāreśvara disagree on several points, e. g. on the question whether ownership was known from śāstra alone, on the meaning of 'duhitaraḥ' in Yāj. – on other points the two agree – Bhūpālapaddhati or simply Bhūpāla or rāja refers to a work of Bhojadeva – Bhujabalabhīma of Bhojarāja quoted in Tithitattva and Āhnikatattva of Raghunandana as distinct from the Rājamārtaṇḍa - Bhoja reigned from 1000 to 1055 A. D. - Dharmapradīpa of Bhoja is the work of another Bhoja, who was son of Bhāramalla and king of Āśāpura – it was written between 1400–1600 A. D.

Sec. 65 *Devasvāmin* : ... pp. 279–281

Said by Smṛticandrikā to have composed a digest of smṛtis – Nārāyaṇa, commentator of Āśvalāyanagṛhya, relies on bhāṣya of Devasvāmin – he composed a digest on ācāra, vyavahāra and āśauca – Smṛticandrikā quotes his views on the meaning of Yautaka, on the meaning of duhitaraḥ in Yāj., on Manu 9. 141 – A Devasvāmin commented on Pūrvamīmāṁsāsūtras and on the Saṁkarṣakāṇḍa – difficult to say whether he is identical with the writer on dharmaśāstra - Devasvāmin flourished about 1000-1050 A. D.

Sec. 66 *Jitendriya* : ... 281-283

He is frequently quoted by Jīmūtavāhana in his three works - Jitendriya held that the wives of a person whether separated or joint succeeded to their deceased husband - no early writer other than Jīmūtavāhana cites him - flourished between 1000-1050 A. D.

Sec. 67 *Bālaka* : ... pp. 283-284

Mentioned by Jīmūtavāhana, Śūlapāṇi, Raghunandana - several views of Bālaka set out - flourished before 1100 A. D.

Sec. 68 *Bālarūpa* : ... pp. 284-286

The opinions of Bālarūpa are cited in the Smṛtisāra and Vivādacandra - also in the Vivādacintāmaṇi – he wrote at least on vyavahāra and Kāla – Bālaka and Bālarūpa are probably identical - Bālarūpa is certainly earlier than 1250 A. D. - Vivādacandra once speaks of 'author of Bālarūpa', suggesting thereby that Bālarūpa was a work.

Sec. 69 *Yogloka* : ... pp. 286-287

Known only from works of Jīmūtavāhana and Raghunandana - Jīmūtavāhana only rarely agrees with him and generally criticizes him and taunts him with being a logician merely – Bṛhad Yogloka and Svalpa Yogloka – Yogloka wrote at least on vyavahāra and Kāla – flourished between 950-1050.

Sec. 70 *Vijñāneśvara* : ... pp. 287–293

The unique position of the Mitākṣarā on account of being esteemed as of paramount authority by British Indian courts - the several names of the Mitākṣarā - quotes a host of smṛti writers and six predecessors as authors of commentaries and digests - personal history of Vijñāneśvara - profound student of pūrvamīmāṁsā– date of Vijñāneśvara – between 1070-1100 – out of many commentators of the Mitākṣarā three famous – peculiar doctrines of the Mitākṣarā – seems to have been author of Āśaucadaśaka also – several commentaries on Āśaucadaśaka by Harihara, Raghunātha and Bhaṭṭoji - Vijñāneśvara not the author of Triṁsat-ślokī – Nārāyaṇa, a pupil of Vijñāneśvara, wrote Vyavahāra-śiromaṇi.

Sec. 71 *Kāmadhenu* : ... pp. 293-296

An ancient digest not yet discovered - quoted by Kalpataru, Hāralatā, and other works - Gopāla, the author of Kāmadhenu - Aufrecht's view that Śambhu is the author of Kāmadhenu wrong - Śambhu is a nibandhakāra on dharma cited by Smṛticandrikā and Hemādri - Mr. Jayasval wrongly ascribes Kāmadhenu to Bhoja - probable date of Kāmadhenu between 1000-1100 A. D.

Sec. 72 *Halāyudha* : ... pp. 296-301

A jurist quoted by Kalpataru, Smṛtisāra and other works - he flourished between 1000-1100 A. HISTORY OF DHARMAŚĀSTRA.

1. Meaning of Dharma.

Dharma is one of those Sanskrit words that defy all attempts at an exact rendering in English or any other tongue. That word has passed through several vicissitudes. In the hymns of the Ṛgveda the word appears to be used either as an adjective or a noun (in the form *dharman*, generally neuter) and occurs at least fifty-six times therein. It is very difficult to say what the exact meaning of the word *dharma* was in the most ancient period of the vedic language. The word is clearly derived from root *dhṛ* (to uphold, to support, to nourish). In a few passages, the word appears to be used in the sense of 'upholder or supporter or sustainer' as in Ṛg. I. 187.1[1] and X. 92.2[2]. In these two passages and in Ṛg. X. 21.3[3] the word *dharma* is clearly masculine. In all other cases, the word is either obviously in the neuter or presents a form which may be either masculine or neuter. In most cases the meaning of *dharman* is 'religious ordinances or rites' as in Ṛg. I. 22. 18, V. 26. 6, VIII. 43. 24, IX. 64. 1 &c. The refrain 'tāni dharmāṇi prathamānyāsan' occurs in Ṛg. I. 164, 43 and 50, X. 90. 16. Similarly we have the words 'prathamā dharmā' (the primeval or first ordinances) in Ṛg. III. 17. 1. and X. 56. 3 and the words 'sanatā dharmāṇi (ancient ordinances) occur in Ṛg. III. 3. 1. In some passages this sense of 'religious rites' would not suit the context, e. g. in IV. 53. 3[4], V. 63. 7[5], VI. 70. 1[6], VII. 89. 5[7]. In these passages the meaning seems to be 'fixed principles or rules of conduct'. In the Vājasaneyasaṁhitā the above senses of the word *dharman* are found and in II. 3 and V. 27 we have the words 'dhruveṇa dharmaṇā'. In the same Saṁhitā

the form 'dharmaḥ' (from dharma) becomes frequent, e. g. X. 29, XX. 9. The Atharvaveda contains many of those verses of the Ṛgveda in which the word *dharman* occurs, e. g. VI. 51. 3 (acittyā chet tava dharmā yuyopima), VII, 5. 1 (Yajñena yajñamayajanta) VII, 27. 5 (triṇi padā vicakrame). In XI. 9. 17 the word 'dharmaḥ' seems to be used in the sense of 'merit acquired by the performance of religious rites[8].' In the Aitareya-brāhmaṇa, the word *dharma* seems to be used in an abstract sense[9], viz. 'the whole body of religious duties'. In the Chāndogya-upaniṣad[10] (2. 23) there is an important passage bearing on the meaning of the word *dharma* 'there are three branches of *dharma*, one is (constituted by) sacrifice, study and charity (i. e. the stage of house-holder); the second (is constituted by) austerities (i. e. the stage of being a hermit); the third is the *brahmacārin* dwelling in the house of his teacher and [illegible] himself stay with the family of his teacher till the last; all making [illegible] to the worlds of meritorious men; one who abides these attain[illegible] attains immortality.' It will be seen that in this passage the word '*dhar*[illegible]*ma*' stands for the peculiar duties of the *āśramas*. The foregoing brief discussion establishes how the word *dharma* passed through several transitions of meaning and how ultimately its most prominent significance came to be 'the privileges, duties and obligations of a man, his standard of conduct as a member of the Aryan community, as a member of one of the castes, as a person in a particular stage of life.' It is in this sense that the word seems to be used in the well-known exhortation to the pupil contained in the Taittirīya-upaniṣad (I. 11) 'speak the truth, practise (your own) *dharma* &c.' It is in the same sense that the Bhagavadgītā uses the word *dharma* in the oft-quoted verse 'svadharme nidhanaṃ śreyaḥ.' The word is employed in this sense in the *dharmaśāstra* literature. The Manusmṛti (1. 2) tells us that the

The form *dharman* occurs in the Upaniṣads and in classical Sanskrit in Bahuvrīhi compounds, e.g. अनुच्छित्तिधर्मा in the बृहदारण्यकोपनिषद् and the sūtra धर्मादनिच् केवलात् (पा. V. 4. 124).

sages requested Manu to impart instruction in the *dharmas* of all the *varṇas*. The Yājñyavalkya-smṛiti (I. 1) employs it in the same sense. In the Tantra-Vārtika[11] also we are told that all the dharma-sūtras are concerned with imparting instruction in the *dharmas* of *varṇas* and *āśramas*. Medhātithi commenting on Manu says that the expounders of *smṛtis* dilate upon *dharma* as five-fold, e. g. *varṇadharma, āśrama-dharma, varṇāśrama-dharma, naimittikadharma* (such as prāyaścitta) and *guṇadharma* (the duty of a crowned king, whether Kṣatriya or not, to protect)[12]. It is in this sense that the word *dharma* will be taken in this work. Numerous topics are comprehended under the title dharmaśāstra, but in this work prominence will be given to works on *ācārā* and *vyavahāra* (law and administration of justice).

It would be interesting to recall a few other definitions of *dharma*. Jaimini[13] defines dharma as 'a desirable goal or result that is indicated by injunctive (Vedic) passages.' The word *dharma* would mean such rites as are conducive to happiness and are enjoined by Vedic passages. The Vaiśeṣikasūtra[14] defines *dharma* as 'that from which results happiness and final beatitude.' There are several other more or less one-sided definitions of *dharma* such as 'ahiṁsā paramo dharmaḥ' (Anuśāsanaparva 115. 1.), 'ānṛśaṁsyam paro dharmaḥ' (Vanaparva 373. 76), 'ācāraḥ paramo dharmaḥ' (Manu I. 108). Hārīta defined dharma as 'śrutipramāṇaka[15]' (based on revelation). In the Buddhist sacred books the word *dharma* has several senses. It often means the whole teaching of Buddha (S. B. E. Vol. X. p. XXXIII). Another meaning of *dharma* peculiar to the Buddhist system is 'an element of existence, i. e. of matter, mind and forces[16].'

The present work will deal with the sources of *dharma*, their contents, their chronology and other kindred matters. As the

material is vast and the number of works is extremely large, only a few selected works and some important authors will be taken up for detailed treatment. More space will be devoted to comparatively early works.

2. Sources of Dharma.

The Gautamadharmasūtra[17] says 'the Veda is the source of *dharma* and the tradition and practice of those that know it (the Veda).' So Āpastamba[18] says 'the authority (for the *dharmas*) is the consensus of those that know *dharma* and the Vedas.' Vide also the Vasiṣṭhadharma-sūtra[19] (I. 4-6). The Manusmṛti[20] lays down five different sources of *dharma* 'the whole Veda is (the foremost) source of dharma and (next) the tradition and the practice of those that know it (the Veda); and further the usages of virtuous men and self-satisfaction.' Yājñavalkya[21] declares the sources in a similar strain 'the Veda, traditional lore, the usages of good men, what is agreeable to one's self and desire born of due deliberation—this is traditionally recognised as the source of dharma.' These passages make it clear that the principal sources of *dharma* were conceived to be the Vedas, the Smṛtis, and customs. The Vedas do not contain positive precepts (*vidhis*) on matters of *dharma* in a connected form; but they contain incidental references to various topics that fall under the domain of dharmaśāstra as conceived in later times. Such information to be gathered from the Vedic Literature is not quite as meagre as is commonly supposed. In another place[22] I have brought together about fifty Vedic passages that shed a flood of light on marriage, the forms of marriage, the different kinds of sons, adoption of a son, partition, inheritance, *śrāddha*, *strīdhana*. To take only a few examples. That brotherless maidens found it difficult to secure husbands is made clear by several Vedic passages.

These passages constitute the basis of the rules of the dharmasūtras and the Yājñavalkya-smṛti against marrying a brotherless maiden[24]. This bar against marrying a brotherless maiden seems to have been due to the fear that such a girl might be an appointed daughter (*putrikā*) and that a son born of such a girl would be affiliated to his mother's father. This custom of *putrikā* is an ancient one and is alluded to in the Ṛgveda, according to Yāska[25]. Ṛgveda X. 85 is a very interesting hymn as regards marriage; verses from it are used even to this day in the marriage ritual.[26] It shows that in the remote Vedic age the marriage rite resembled in essence the Brāhma form as described in the Dharmasūtras and Manu.[27] But the purchase of a bride (i. e. what is called Āsura marriage in later literature) was not unknown in the Vedic age. A passage of the Maitrāyaṇīyasaṁhitā (I. 10. 11) is referred to in the Vasiṣṭhadharmasūtra[28] in this connection, viz. 'she who being purchased by the husband'. The Gāndharva form is hinted at in the words[29] 'when a bride is fine-looking and well adorned, she seeks by herself her friend among men'. The importance of the *aurasa* son was felt even in the remote Vedic ages. 'Another (person) born of another's loins, though very pleasing, should not be taken, should not be even thought of (as to be taken in adoption[30])'. The Taittirīya-saṁhitā (VI. 3. 10. 5) propounds the well-known theory of the three debts[31]. The story

of Śunaḥśepa in the Aitareya-brāhmaṇa (VII. 3) suggests that a son could be adopted even when there was an *aurasa* son. The Taittirīya-saṃhitā (VII. 1. 8. 1) tells the story of Atri who gave an only son in adoption to Aurva. The Kṣetraja son of the Dharmasūtras is often referred to in the earliest Vedic literature. 'What (sacrificer) invites you (Aśvins) in his house to a bed as a widow does a brother-in-law or a young damsel her lover'[32]. The Taittirīyasaṃhita makes it clear that a father could distribute his wealth among his sons during his own life time 'Manu divided his property among his sons' &c.[33] Another passage of the same *Saṃhita* seems to suggest that the eldest son took the whole of the father's wealth 'therefore people establish their eldest son with wealth '[34]. Even in the Vedic ages the son excluded the daughter from inheritance 'a son born of the body does not give the paternal wealth to (his) sister'[35]. A passage of the Taittirīya-saṃhitā is relied upon by ancient and modern writers on *dharmaśāstra* for the exclusion of women in general from inheritance 'therefore women being destitute of strength take no portion and speak more weakly than even a low person'[36]. The Ṛgveda eulogises the stage of studenthood and the Śatapathabrāhmaṇa speaks of the duties of the Brahmacārin such as not partaking of wine and offering every evening a *samidh* to fire[37]. The

Taittirīya-saṁhitā (VI.2. 8. 5) relates[38] how Indra consigned *Yatis* to wolves (or dogs) and how Prajāpati prescribed a Prāyaścitta for him. The Śatapathabrāhmaṇa speaks of the king and the learned Brāhmaṇa as the upholder of the sacred ordinances.[39] The Taittirīya-saṁhitā says 'therefore the Śūdra is not fit for sacrifice[40].' The Aitareya Brāhmaṇa tells us that when a king or other worthy guest comes, people offer a bull or a cow[41]. The Śatapatha-brāhmaṇa speaks of Vedic study as *yajña* and the Taittirīya-āraṇyaka[42] enumerates the five *yajñas*, which are a prominent feature of the Manusmṛti. The Ṛgveda eulogises the gifts of a cow, horses, gold and clothes[43]. Another passage of the Ṛgveda[44] (thou art like a *prapā* in a desert) is relied upon by Śabara on Jaimini (I. 3. 2) and by Viśvarūpa on Yājñavalkya as ordaining the maintenance of *prapās* (places where water is distributed to travellers). The Ṛgveda condemns the selfish man who only caters for himself[45].

The foregoing brief discussion will make it clear that the later rules contained in the *dharmasutras* and other works on *dharmaśastra* had their roots deep down in the most ancient Vedic tradition and that the authors of the *dharmasutras* were quite justified in looking up to the Vedas as a source of *dharma*. But, as said above, the Vedas do not profess to be formal treatises on *dharma*; they contain only disconnected statements on the various aspects of *dharma*; we have to turn to the smṛtis for a formal and connected treatment of the topics of the *dharmaśastra*.

When Dharmaśāstra works were first composed

of Śunaḥśepa son could ' important question is to find out when formal treatises Taittirīya *rma* began to be composed. It is not possible to give a definite only sor er to this question. The Nirukta (III. 4-5) shows that long sūtras ore Yāska heated controversies had raged on various questions of (sac heritance, such as the exclusion of daughters by sons and the rights doe f the appointed daughter (putrikā). It is very likely that these dis- yas cussions had found their way in formal works and were not merely a confined to the meetings of the learned. The manner in which Yāska writes suggests that he is referring to works in which certain Vedic verses had been cited in support of particular doctrines about inheritance[46]. It is further a remarkable thing that in connection with the topic of inheritance Yāska quotes a verse, calls it a śloka and distinguishes it from a ṛk.[47] This makes it probable that works dealing with topics of *dharma* existed either composed in the śloka metre or containing ślokas. Scholars like Bühler would say that the verses were part of the floating mass of mnemonic verses, the existence of which he postulates without very convincing or cogent arguments in his Introduction to the Manusmṛti (S. B. E. vol. 25 Intro.xc). If works dealing with topics of *dharma* existed before Yāska, a high antiquity will have to be predicated for them. The high antiquity of works on *dharmaśastra* follows from other weighty considerations. It will be seen later on that the extant *dharmasūtras* of Gautama, Baudhāyana and Āpastamba certainly belong to the period between 600 to 300 B. C. Gautama[48] speaks of *dharmaśastras* and the word *dharmaśāstra* occurs in Baudhāyana also (IV. 5.9). Baudhāyana speaks of a *dharmapāṭhaka* (I. 1. 9.). Besides Gautama quotes in numerous places the views of others in the words ' ityeke ' (e. g. II. 15, II. 58, III. 1, IV. 21, VII. 23). He refers to Manu[49] in one place and to ' Ācāryas ' in several places (III. 36, IV. 18 and 23).

3. When Dharmaśāstra works were first composed

Baudhāyana mentions by name several writers on dharma, v[illegible] for him. jaṅghani, Kātya, Kāśyapa, Gautama, Maudgalya and Hārita. [illegible]āhmaṇa tamba also cites the views of numerous sages such as those of [illegible]aṁhita Kaṇva, Kautsa, Harīta and others. There is a Vārtika which sp[illegible]areya of Dharmaśātra[50]. Jaimini speaks of the duties of a Śūdra as l[illegible]es, down in the dharmaśāstra[51]. Patañjali shows that in his days *dharma* [illegible]of *sūtras* existed and that their authority was very high, being next to [illegible]e the commandments of God[52]. He quotes verses and dogmas that [illegible] have their counterparts in the dharmasūtras. The foregoing dis cussion establishes that works on the *dharmaśāstra* existed prior to Yāska or at least prior to the period 600–300 B. C. and in the 2nd century B. C. they had attained a position of supreme authority in regulating the conduct of men.

In this book the whole of the extant literature on *dharma* will be dealt with as follows :- First come the dharmasutras, some of which like those of Apastamba, Hiraṇyakeśin and Baudhāyana form part of a larger Sūtra collection, while there are others like those of Gautama and Vasiṣṭha which do not form part of a larger collection ; some *dharmasūtras* like that of Viṣṇu are, in their extant form, comparatively later in date than other *sutra* works ; some *sutra* works like those of Śaṅkha-Likhita and Paiṭhīnasi are known only from quotations. Then early metrical smṛtis like those of Manu and Yājñavalkya will be taken up for discussion ; then later versified smṛtis like that of Narada ; there are many smṛti works like those of Bṛhaspati and Kātyāyana that are known only from quotations. The two epics, the Mahabhārata and the Ramāyaṇa, and the Purāṇas also have played a great part in the development of the Dharmaśāstra. The commentaries on the smṛtis, such as those of Viśvarūpa, Medhātithi, Vijñāneśvara, Aparārka, Haradatta will be next passed

in review and then the digests on *dharma* such as the works of Hemādri, Toḍaramalla, Nīlakaṇṭha and others.

It is very difficult to settle the chronology of the works on dharmaśāstra, particularly of the earlier ones. The present writer does not subscribe to the view of Max Müller (H. A. S. L. p. 68) and others that works in continuous Anuṣṭubh metre followed sūtra works[53]. Our knowledge of the works of that period is so meagre that such a generalisation is most unjustifiable. Some works in the continuous śloka metre like the Manusmṛti are certainly older than the Viṣṇudharmasūtra and probably as old as, if not older than, the Vasiṣṭhadharmasūtra. One of the earliest extant dharmasūtras, that of Baudhāyana, contains long passages in the śloka metre, many of which are quotations and even Āpastamba has a considerable number of verses in the śloka metre. This renders it highly probable that works in the śloka metre existed before them. Besides a large literature on *dharma* existed in the days of Āpastamba and Baudhāyana which has not come down to us. In the absence of that literature it is futile to dogmatise on such a point.

4. The Dharmasūtras.

It seems that originally many, though not all, of the *dharmasūtras* formed part of the Kalpasutras and were studied in distinct *sutracaraṇas*. Some of the extant dharmasutras here and there show in unmistakable terms that they presuppose the Gṛhyasutra of the *caraṇa* to which they belong. Compare Ap. Dh. S. I. 1. 4. 16 with Ap. Gṛ. S. I. 12 and II. 5; and Baud. Dh. S. II. 8. 20 with Baud. Gṛ. S. II. 11. 42 (and other sūtras)[54]. The Dharmasūtras belonging to all sūtracaraṇas have not come down to us. There is no dharmasūtra completing the Aśvalāyana Śrauta and Gṛhya sūtras; no Mānavadharmasūtra has yet come to light, though the

Mānava Śrauta and Gṛhya sūtras are extant; in the same w
the Śāṅkhāyana Śrauta and Gṛhya sūtras, but no Śāṅkhāyan
sūtra. It is only in the case of the Āpastamba, Hiraṇyak
Baudhāyana Sūtracaraṇas that we have a complete *kalpa* tra
with its three components of Śrauta, Gṛihya and Dharma sūtras
Tantravārtika of Kumārila contains very interesting observations
this point. It tells us that Gautama (dharmasūtra) and Gobhil
(gṛhyasūtra) were studied by the *Chandogas* (Sāmavedins)
Vasiṣṭha (dharmasūtra) by the Ṛgvedins, the dharmasūtra of
Śaṅkha-Likhita by the followers of Vājasaneya-saṁhitā and the
sūtras of Āpastamba and Baudhāyana by the followers of the Tait-
tirīya Śākhā[55]. The Tantravārtika (p. 179) establishes it as a *sid-
dhānta* (on Jaimini I. 3. 11) that all the *dharma* and *gṛhya* sūtras
are authoritative for all Aryan people. From this it appears that
although originally all sūtracaraṇas might not have possessed
dharmasūtras composed by the founder of the *caraṇa* or ascribed
to him, yet gradually certain dharmasūtras were specially taken over
or appropriated by certain *caraṇas*. As the *dharmasūtras* were
mostly concerned with rules about the conduct of men as members
of the Āryan community and did not deal with ritual of any kind,
all *dharmasūtras* gradually became authoritative in all schools.

The *dharmasūtras* were closely connected with the *gṛhyasūtras*
in subjects and topics. Most of the Gṛhyasūtras treat of the sacred
domestic fire, the divisions of Gṛhya sacrifices, the regular morning
and evening oblations, sacrifices on new and full moon, sacrifices
of cooked food, annual sacrifices, marriage, *puṁsavana*, jātakarma,
upanayana and other *saṁskāras*, rules for students and *snātakas* and
holidays, śrāddha offerings, madhuparka. In most cases the Gṛihya-
sūtras confine themselves principally to the various events of
domestic life; they rarely give rules about the conduct of men, their
rights, duties and responsibilities. The dharmasūtras also contain
rules on some of the above topics such as marriage and the saṃskāras,

brahmacarya and snātakas and holidays, on śrāddha and in review ka. It is therefore not to be wondered at that in the Hemādri pa-grhyasūtra the topics of the duties of the Brahmacārin the house-holder, of *atithis* and of *śrāddha* are meagrely Iy a as compared with the Āpastamba-dharmasutra. The dharma-dhar as very rarely describe the ritual of domestic life; they merely d uch upon it; their scope is wider and more ambitious; their a rincipal purpose is to dilate upon the rules of conduct, law and custom. Some sūtras are common to both the Āpastamba-grhya and the dharma sūtra[56]. Sometimes the grhyasūtra appears to refer to the dharmasūtra[57]. There are certain points which distinguish the dharmasūtras (the more ancient of them at least) from smṛtis. (a) Many dharmasūtras are either parts of the Kalpa belonging to each sutracaraṇa or are intimately connected with the grhyasūtras. (b) The dharmasūtras sometimes betray some partiality in their Vedic quotations for the texts of that Veda to which they belong or in the caraṇas of which they are studied. (c) The authors of the (older) dharmasūtras do not claim to be inspired seers or superhuman beings[58], while the other smṛtis such as those of Manu and Yājñavalkya are ascribed to Gods like Brahmā. (d) The *dharmasutras* are in prose or in mixed prose and verse; the other smṛtis are in verse. (e) The language of the *dharmasutras* is generally more archaic than that of the other smṛtis. (f) The *dharmasūtras* do not proceed upon any orderly arrangement of topics, while the other smṛtis (even the oldest of them, viz. Manusmṛti) arrange their contents and treat of the subjects under three principal heads viz. *ācāra*, *vyavahāra* and *prayaścitta*. (g) Most of the *dharmasūtras* are older than most of the other smṛtis.

edition with the commentary of Haradatta, and the Mysore Government edition with the bhāṣya of Maskari; it was translated by Bühler in S. B. E., Vol. II. with an introduction). The Ānandāśrama edition of 1910 which is incorrect in a few places (e. g. 21. 7) has been used in this work. This dharmasūtra is, as we shall see, the oldest of those we have. The Gautama-dharmasūtra was specially studied by followers of the Sāmaveda (see note 55 above). The commentary on the Caraṇavyūha tells us that Gautama was one of the nine subdivisions of the Rāṇāyanīya school of the Sāmaveda. A teacher Gautama is mentioned frequently in the Lāṭyāyanaśrautasūtra (e. g. I. 3. 3 and I. 4. 17) and in the Drāhyāyaṇaśrauta (e. g. I. 4. 17, IX. 3. 15) of the Sāmaveda. The Gobhilagṛhya (III. 10. 6) which belongs to the Sāmaveda cites Gautama as an authority. Therefore it is not improbable that a complete Gautamasūtra embodying Śrauta, Gṛhya and Dharma doctrines once existed. There are other indications pointing to the close connection of the Gautama-dharmasūtra with the Sāmaveda. Chapter 26 of the dharmasūtra about *Kṛicchra* penance is the same, almost word for word, as the Samavidhāna[59] Brāhmaṇa (I. 2, Burnell's ed.). Among the purificatory texts (21 in number) mentioned in Gau. Dh. S. (19. 12) there are nine that are Sāmans. The mention of the five utterances ('Vyāhṛtis') resembles the number in the Vyāhṛtisāma[60] though the order is different. It is however to be noted that Gautama is a generic name. In the Kaṭhopaniṣad, both Naciketas (II. 4. 15, II. 5. 6) and his father (I. 1. 10) are styled Gautama. In the Chāndogyopaniṣad there is a teacher Hāridrumata Gautama (IV. 4. 3).

59 There are however considerable divergences; e. g. गौ. ध. सू. 26. 10–12 are 'आपो हि ष्ठेति तिसृभिः पवित्रवतीभिर्मार्जयीत हिरण्यवर्णाः शुचयः पावका इत्यष्टाभिः। अथोदकतर्पणम्। नमोहमाय &c. while the सामविधान is 'आपोहिष्ठीयाभिरथोदकतर्पणं नमोहमाय'. गौ. ध. सू. 26.12 contains many additions. Wherever there is divergence, it is generally Gautama that amplifies the passages found in the सामविधान.

60 गौ. ध. सू. I. 52 ओंपूर्वा व्याहृतयः पञ्च सत्यान्ताः. Again in गौ. ध. सू. 25. 8 we have प्रतिषिद्धवाङ्मनसापचारे व्याहृतयः पञ्च सत्यान्ताः; while in गौ. 28. 8. the five व्याहृतिs seem to be भूः, भुवः, स्वः, तपः, सत्यं. As हरदत्त remarks the five व्याहृतिs in व्याहृतिसाम are भूः, भुवः, स्वः, सत्यं, पुरुषः. The व्याहृतिs are generally declared to be seven (तै. आ. 10. 28.1), the first three being styled महाव्याहृतिs (vide मनु II. 81.)

According to Haradatta the dharmasūtra has 28 chapters. The Calcutta edition adds one chapter on *Karmavipāka* after chapter 19. In many places Gautama unmistakably refers to his own previous *dicta*; e. g. Yathoktam vā (23. 16) refers to 23. 10; 23. 26 refers to 17. 8-26; 17. 18 refers to 15. 18. The following are briefly the contents of the Gautamadharmasūtra :—1. Sources of dharma, rules about interpretation of texts, time of *Upanayana* for the four *varṇas*, the appropriate girdle, deer skin, cloth and staff for each Varṇa, rules about *śauca* and ācamana, method of approaching the teacher; 2 rules about those not invested with sacred thread, rules for the *brahmacārin*, control of pupils, period of study; 3 The four āśramas, the duties of *brahmacārin*, *bhikṣu*, and *vaikhānasa*; 4 rules about the house-holder, marriage, age at time of marriage, eight forms of marriage, sub-castes; 5 rules about sexual intercourse on marriage, the five great daily sacrifices, the rewards of gifts, *madhuparka*, method of honouring guests of the several castes; 6 rules about showing respect to parents, relatives (male and female) and teachers, rules of the road; 7 rules about the avocations of a brāhmaṇa, avocations for him in distress, what articles a brāhmaṇa could not sell or deal in; 8 the forty saṁskāras and the eight spiritual qualities (such as *dayā*, forbearance &c.); 9 the observances for a *snātaka* and householder; 10 the peculiar duties of the four castes, the responsibilities of the king, taxation, sources of ownership, treasure-trove, guardianship of minor's wealth; 11 Rājadharma, the qualities of the king's *purohita*; 12 punishments for libel, abuse, assault, hurt, adultery and rape, theft in the case of the several varṇas and rules about money-lending and usury and adverse possession, special privileges of brāhmaṇas as to punishments; payment of debts, deposits; 13 rules about witnesses, falsehoods when excusable; 14 rules of impurity on birth and death; 15 Śrāddha of five kinds, persons not fit to be invited at Śrāddha; 16 Upākarma, period of Vedic study in the year, holidays and occasions for them; 17 rules about food allowed and forbidden to Brāhmaṇas and other castes; 18 the duties of women, *niyoga* and its conditions, discussion about the son born of *niyoga*; 19 the causes and occasions of prāyaścitta, five things that remove sin (*japa*, *tapas*, *homa*, fasting, gifts), purificatory Vedic prayers, holy food for one who practises *japa*, various kinds of *tapas* and gifts, appropriate times and places for *japa* &c; 20 abandoning a sinner who does not undergo prāyaścitta and the way of doing it; 21 sinners of various grades, mahāpātakas, upapātakas

&c.; 22 prāyaścittas for various sins such as *brahmahatyā*, adultery, killing a Kṣatriya, Vaiśya, Śūdra, cow and other animals &c.; 23 prāyaścitta for drinking wine, and nasty things, for incest and unnatural offences, and for several transgressions by brahmacārin; 24 secret *prāyaścittas* for *mahāpātakas* and *upapātakas*; 26 the penances called Kṛcchra and Atikṛcchra; 27 the penance called Cāndrāyaṇa; 28 partition, strīdhana, reunion, twelve kinds of sons, inheritance.

The Gautama-dharmasūtra is written entirely in prose and it contains no verses either quoted or composed by the author himself, as is the case with the other *dharmasutras*. Here and there occur sūtras that look like portions of Anuṣṭubh verses e.g. 23. 27[61]. The language of Gautama agrees far more closely with the standard set up by Pāṇini than the *dharmasūtras* of Baudhāyana and Āpastamba. It is not very easy to account for this difference. It is obvious that commentators and generations of students that were brought up in the tradition of the Pāṇinean grammar tampered with the text and improved it in accordance with their notions of correct Sanskrit. But why this process should not have been carried out to the same extent in the case of Apastamba it is difficult to say. A conjecture may be hazarded that the Āp. Dh. S. being a well-knit component of the Āp. *Kalpa* and being studied as such was less liable to being tampered with than the Gautama Dh. S., which probably did not in its origin belong to any particular *kalpa*. The same commentator, Haradatta, explained both Gautama and Apastamba. Haradatta, who as will be seen later on, was a great grammarian, shows in several places that the current reading was ungrammatical from the Pāṇinean stand-point and that he preferred readings that were in consonance with Pāṇini's rules[62]. There are still a few un-Pāṇinean words, e.g. in 1. 14 ('dvāviṁśateḥ' for dvāviṁśāt') and 9. 52 (kulaṁkula). The Tantravartika (p. 99) appears

[62] e.g. on गौ. ध. सू. 16. 21 (ऋग्यजुषं च सामशब्दो यावत्) he says 'ऋक्च यजुश्च ऋग्यजुषम् । अचतुरेत्यादिना निपातः । षष्ठ्यन्तपाठस्तु (i.e. ऋग्यजुषां) नास्मभ्यं रोचते ;' on गौ. ध. सू. 25. 8 (प्रतिषिद्धवाङ्मनसापचारे) he says वाङ्मनसोरिति पाठोस्मभ्यं न रोचते । अचतुरेति समासान्तविधिप्रसङ्गात् । '

to discuss the various readings in Gautama (I. 45[63]). A few sūtras quoted from Gautama in the Mitākṣarā (e. g. the sūtra 'utpatyaiva arthsvāmitvam labhante), the Śmṛticandrikā ('dvyaṁśam vā pūrvajaḥ syāt) and other works are not found in the extant text. This fact along with the fact of an interpolation of one chapter makes it clear that the present text of Gautama is of somewhat doubtful authority.

The literature known to the Gautama-dharmasūtra was extensive. Besides the Vedic saṁhitās and Brahmaṇas it mentions the following works; Upaniṣads (19. 13), the Vedāṅgas (8. 5 and 11. 19), Itihāsa (8. 6), Purāṇa (8. 6 and 11. 19), Upaveda (11. 19), dharmśāstra (11. 19). That he borrows a chapter from the Sāma-vidhāna-brāhmaṇa has been mentioned above. He borrows the first six sūtras of the 25th chapter from the Taittirīya Āraṇyaka (11.18). The śramaṇaka (in Gautama III. 26) is, according to Haradatta, the Vaikhānasa-śāstra (either composed by Vikhanas or treating of the duties of hermits). Gautama refers to Ānvikṣiki (XI. 3). The only teacher of *dharma* he quotes by name in Manu (in 21. 7) who is cited for the proposition that there is no expiation for the three sins of *brahmahatyā*, drinking wine and violation of the bed of the *guru*. Haradatta says that in the extant Manusmṛti the same propositions are laid down about *brahmahatyā* and *surāpāna* (in Manu 11. 89 and 146 respectively), but that as to violation of *guru-talpa* a passage from the Manusmṛiti has to be searched out (i. e. such a passage is not found there). From this Bühler drew the conclusion that Gautama refers to the dharmasūtra attributed to Manu (and not to any versified Manu-smṛti). But Bühler is not right in drawing this inference. In the first place in spite of what Haradatta says there *are* verses in the extant Manusmṛiti (XI.104-105) which say that death is the expiation for violation of the *guru's* bed. In the second place there is nothing to show, even if Haradatta were correct, that Gautama refers only to a *dharmasutra* of Manu and not to a versified work. Besides Manu, Gautama frequently quotes certain views ascribed to the 'Acāryas' (e. g. III. 35, IV. 18). What teachers are meant by the word 'Ācāryāḥ' (which occurs in the Nirukta, in Kauṭilya and various other works), it is difficult to say.

63 It follows from the discussion in the तन्त्रवार्तिक that the ancient *pāṭha* in its day was 'लेपगन्धापकर्षणं शौचममेध्यलिप्तस्य' while the present text has 'ºशौचममेध्यस्य'. *Vide* वसिष्ठधर्मसूत्र III. 48 which reads 'ºकर्षणे शौचममेध्यलिप्तस्य' etc.

Probably the word means 'the general traditional view of most writers in that particular śāstra on a particular point.' In numerous places Gautama refers to the views of his predecessors in the words 'eke' (2. 15, 40 and 56, 3. 1, 4. 17, 7. 23 &c.) and 'ekeṣām' (28. 17 and 38). This proves that Gautama was preceded by great literary activity in the sphere of dharmaśāstra. Gautama 11. 28 seems to be a reminiscence of the Nirukta (II. 3)[64].

The earliest reference to Gautama as an author on dharma occurs in the Baudhāyanadharmasūtra. Baudhāyana discusses the authoritativeness of usages peculiar to the north or the south and quotes Gautama as saying that it is wrong to hold that certain customs must be held authoritative in certain countries (even though opposed to Vedic tradition and smṛti). This refers to G. Dh. S. 11. 20. In another place Baudhāyana gives it as his view that a Brāhmaṇa, if he cannot make a living by teaching, officiating as a priest or by gifts, should earn his livelihood as a Kṣatriya and quotes the views of Gautama as opposed to this[65]. The extant Gautama on the other hand teaches the same view as that of Baudhāyana[66]. Buhler made the plausible suggestion that the sūtra in the extant Gautama is an interpolation. Govindasvāmī, the commentator of Baudhāyana, suggests that another Gautama is referred to by Baudhāyana. It is possible to suggest that in the Ms. of Gautama used by Baudhāyana the sūtra about living as a *Kṣatriya* did not occur and the next sūtra about living as a Vaiśya alone occurred. Chapter 19 of the Gautamadharmasūtra which forms an introduction to *prāyaścittas* in Gautama seems to have been borrowed wholesale by Baudhāyana (III. 10) with slight changes. That Baudhāyana borrows follows from the fact that the chapter in Baudhāyana occurs in the middle of the discussion about prāyaścittas and not as an introduction, which is the case in Gautama. Baudhāyana treats of penances in several places (II. 1, III. 5. 10 and IV. 1. 4). There are besides many sūtras in both Gautama and Baudhāyana that exhibit a close correspondence, e. g.

64 'दण्डो दमनादित्याहुस्तेनादान्तान्दमयेत्.' The निरुक्त has दण्डो ददते...दमनादित्यौपमन्यवः'.

Gautama III. 25-34 and Baudhāyana II. 6. 17 about Vaikhānasa, Gaut. 3. 3 and 35 and Baud. II. 6. 29, Gaut. 15. 29 and Baud. II. 8. 2, Gaut. 23. 8-10 and Baud. II. 1. 12-14, Gaut. 24. 2 and Baud. II. 3. 8. The Āp. Dh. S. II. 6. 15. 25 speaks of Smṛti as laying down that up to *upanayana* there is no *adhikāra* for *homa*. This probably refers to Gautama II. 1-3. The Vasiṣṭhadharmasūtra also quotes the views of Gautama in two places (4. 34 and 36, impurity on death). The first refers to Gautama 4. 41 but the second cannot be traced in the extant Gautama. Chapter 22 of Vasiṣṭha is borrowed from the Gautamadharmasutra, chapter 19. There are besides many sutras that are the same or almost the same in Gautama and Vasiṣṭha, e. g. Gautama 3. 31-33 and Vas. 9. 1-3, Gaut. 3. 26 and Vas. 9. 10, Gaut. I. 44 and Vas. 3. 37, Gaut. 1. 40 and Vas. 3. 38, Gaut. 1. 45-46 and Vas. 3. 48, Gaut. 1. 28 and Vas. 3. 49, Gaut. 14. 5-7 and Vas. 4. 24-26. Gautama is referred to in the Manusmṛti (III. 16) as the son of Utathya. Gautama is one of the authors of *dharmaśastras* enumerated in Yājñavalkya (I. 5). Aparārka quotes a verse from the Bhaviṣyapurāṇa which speaks of Gautama's prohibition about drinking[67]. Similarly Kullūka (on Manu XI. 146) quotes a verse from the same Purāṇa which refers to Gautama 23.2. Kumārila in his Tantravārtika quotes over a dozen sūtras from Gautama which present the same text as we have[68]. Gautama 11. 29 and 12. 4 are quoted by Śaṅkara in his *bhāṣya* on Vedāntasūtra III. 1. 8 and I. 3. 38 respectively. Viśvarūpa in his commentary on Yajñavalkya quotes numerous sūtras from Gautama. In Medhātithi's *bhāṣya* on Manu the writer more frequently quoted than any other is Gautama (e. g. on Manu II. 6, VIII. 125 &c.).

The foregoing discussion about the literature known to the Gautama Dh. S. and the authors and works that mention Gautama or quote the dharmasutra helps us in arriving at the approximate age of the dharmasūtra. He is separated by a long interval from the Samavidhāna Brahmaṇa. He is later than Yāska and wrote at a time when Pāṇini's system was either not in existence or had not attained a pre-eminent position. The extant text was known to Baudhāyana and Vasiṣṭha and was in the same state long before 700 A. D. The sutra betrays no knowledge of the onslaught delivered on Brahma-

67 प्रतिषेधः सुरापाने मद्यस्य च नराधिप । द्विजोत्तमानामेवोक्तः सततं गौतमादिभिः ॥ भविष्यत्पुराण quoted by अपरार्क p. 1076.

nism by Buddha and his followers. He uses the term Bhikṣu (3. 10) instead of the term parivrājaka that occurs in Baudhāyana, Āpastamba and other sūtra works and lays down that a *bhikṣu* is to stay in one place in the rains, which reminds one of the Buddhist 'bhikkhu' and 'Vasso'. Gautama cites the opinion of some that Yavana is the offspring of a Kṣatriya male and a Śūdra female (4. 17). It is supposed by many scholars that the Yavanas became known to the Indians only at the time of Alexander's invasion and hence every work in which the word *yavana* occurs must be later than 320 B. C. Bühler (S. B. E. vol. II. Intro. LVI.) seems to suggest that the sūtra where the word Yavana occurs in Gautama may be an interpolation. This is not a satisfactory explanation. One may ask, if Bühler believes that the Indians borrowed their alphabet centuries before Alexander from the neighbours of the Greeks, why it is improbable that the Indians may not have heard of the word Yavana centuries before Alexander and why Yavanas may not have resided in India long before that date. Taking all these things into consideration the Gautama-dharmasūtra cannot be placed later than the period between 600-400 B. C.

Haradatta wrote a learned commentary on the Gautama-dharmasūtra called Mitākṣarā. For an account *vide* sec. 87 below. In numerous places he quotes the explanations of other commentators of Gautama (e. g. 9. 52; 10. 12, 56, 66; 11. 17; 12. 32; 21. 9 &c.). The *bhāṣya* of Maskari, son of Vāmana, is also a learned one, but may probably be later than Haradatta, since the interpretations which he quotes as given by others are found to be those of Haradatta (vide on Gaut. 12. 30, 13. 20-22).

Asahāya seems to have written a *bhāṣya* on Gautama; *vide* sec. 59 below.

The Mitākṣarā, the Smṛticandrikā, Hemādri, Mādhava, and other writers quote a śloka-Gautama. *Vide* Parāśara-Mādhavīya, vol. I, part I, p. 7. Aparārka, Hemādri and Mādhava quote Vṛddha-Gautama, while the Dattakamīmāṁsā (p. 72) quotes Vṛddha-Gaut. and Bṛhad-Gaut. side by side on the same point. These are later works. Jivānanda publishes a smṛti of Vṛddha-Gautama in 22 chapters and about 1700 verses (part II, pp. 497-636), where it is said that Yudhiṣṭhira asked Kṛṣṇa about the *dharmas* of the four castes. This smṛti seems to have been originally taken from the Āśvamedhikaparva of the Mahābhārata, as Mādhava and others cite

verses occurring in it as from that parva (vide Parāśaramādhavīya vol. I, part I, pp. 108-110).

6. The Baudhāyana Dharmasūtra.

This has been edited several times (text by Dr. Hultzsch at Leipzig in 1884, text in the Ānandāśrama collection of smṛtis and in the Mysore Government Oriental Series in 1907 with the commentary of Govindasvāmin; translated in S. B. E., Vol. 14, with an Introduction). The Mysore edition has been used in this work. Baudhāyana is a teacher of the Kṛṣṇayajurveda. A complete set of the Baudhāyanasūtras has not yet been recovered and has not been as carefully preserved as the sūtras of Āpastamba and Hiraṇyakeśin. Dr. Burnell arranges Baudhāyana's sūtras into six sutras, the Śrautasūtra in 19 praśnas (probably); Karmāntasūtra in 20 adhyāyas; Dvaidhasutra in four praśnas; Gṛhyasūtra in four praśnas; Dharmasūtra in four praśnas; Śulvasūtra in three adhyāyas. The commentators offer no indication as to the place originally assigned to the *gṛhya*, *dharma* and *śulva sūtras* in the whole collection. Dr. Caland in his monograph (A. D. 1903) 'Uber das Rituelle sūtra des Baudhāyana' gives on p. 12 the contents of the Baudhāyanasūtra as follows: Praśnas I-XXI Śrauta, XXII-XXV Dvaidha, XXVI-XXVIII Karmānta; XXIX-XXXI Prāyaścitta, XXXII Śulvasūtra, XXXIII-XXXV Gṛhyasūtra, XXXVI Gṛhyaprāyaścitta; XXXVII Gṛhyaparibhāṣā, XXXVIII-XLI Gṛhyapariśiṣṭa; XLII-XLIV Pitṛmedha, XLV Pravara, XLVI-XLIX Dharma. Dr. Caland edited nine *praśnas* of the Śrautasūtra for the B. I. Series (A. D. 1904). Dr. R. Shamsastri published for the Mysore University (in 1920) the Baudhāyanagṛhyasūtra with *paribhāṣā*, gṛhyaśeṣa, Pitṛmedhasūtra. The Gṛhyasūtra cites the view of Baudhāyana himself (I. 7). The Baudhāyana-dharma refers to the Gṛhya and presupposes it in several places (vide note 54). In the Baudhāyanagṛhya (III. 9. 6) we have a reference to *padakāra* Ātreya, Vṛttikāra Kauṇḍinya, pravacanakāra Kaṇva Bodhāyana, and Sūtrakāra Āpastamba.[68a] A similar passage

68a अथ दक्षिणतः प्राचीनावीतिनो वैशम्पायनाय फलिङ्गवे तित्तिरये उक्षायोरुयायात्रये आत्रेयाय पदकाराय कौण्डिन्याय वृत्तिकाराय कण्वाय बोधायनाय प्रवचनकारायापस्तम्बाय सूत्रकाराय सत्याषाढाय हिरण्यकेशाय वाजसनेयाय याज्ञवल्क्याय भरद्वाजायाग्निवेश्यायाचार्येभ्य ऊर्ध्वरेतोभ्यो वानप्रस्थेभ्यो वंशस्थेभ्य एकपत्नीभ्यः कल्पयामीति. The epithets must be understood as arranged above, since elsewhere the epithet सूत्रकार is specially appropriated to आपस्तम्ब. The हिरण्यकेशिगृह्य (II. 20. 1,

occurs in the Bhāradvāja Gṛhyasūtra. In the Baudhāyana-dharmasūtra (II. 5. 27 Ṛṣitarpaṇa) we have Kaṇva Bodhāyana, Āpastamba sūtrakāra and Satyāṣāḍha Hiraṇyakeśin one after another. These references show that Kaṇva Bodhāyana was an ancient sage when the Baudhāyana-dharmasūtra was written and that he could not have been the author of the gṛhya or the dharma sūtras of Baudhāyana. Baudhāyana may have been a descendant of this Kaṇva Bodhāyana. This surmise is supported by Govindasvāmin who explains Baudhāyana occurring in Baudhāyanadharmasūtra I. 3. 13, as Kāṇvāyana. In the dharmasūtra Baudhāyana is himself cited as an authority several times (e. g. I. 4. 15 and 24, III. 5. 8, III. 6. 20). In all these places the Mysore edition reads Bodhāyana, while the Ānandāśrama reads Baudhāyana. In one or two places he is styled 'bhagavān' (III. 6. 20). Several explanations are offered by the commentator Govindasvāmin (on I. 3. 13). He says that it is the practice of the Ācāryas to refer to themselves in the third person (as Medhātithi says on Manu [69]) or that the author of the dharmasūtra is a pupil of Baudhāyana as the Manusmṛti is promulgated by Bhṛgu, the pupil of Manu, or there was some other Baudhāyana whose works have not come down to us.

The following are the contents of the Baudhāyana-dharmasūtra:—*Praśna* 1:—Sources of *dharma*, who are *śiṣṭas*, *pariṣad*, different practices of northern and southern India, countries where śiṣṭas reside and where mixed castes reside, prāyaścitta for visiting countries of the latter type; 2. Studenthood for 48, 24 or 12 years, time of *upanayana* and the girdle, skin, staff appropriate to each caste, duties of *brahmacārin*, eulogy of *brahmacarya*; 3. The duties of the *snātaka* who has completed his studies and observances but has not yet married; 4. directions about carrying the earthen jar (in the case of the *snātaka*); 5. bodily and mental śauca, purification of various substances, impurity on birth and death, meaning of *sapiṇḍa* and *sakulya*, rules of inheritance, purification on touching a corpse or a woman in her menses or on dog-bite, what flesh and food was

allowed and forbidden ; 6. Purification from the point of view of sacrifice, purification of clothes, ground, grass, fuel, vessels, and articles used in sacrifice ; 7. Rules about the importance from the sacrificial point of view of sacrifice, of the sacrificial utensils, priests, the sacrificer and his wife, ghee, cooked offerings, the victim, *soma* and fires; 8. The four *varṇas* and the sub-castes ; 9. Mixed castes ; 10. the duties of kings, the five great sins and punishments for them, punishments for killing birds, witnesses ; 11. The eight forms of marriage, holidays ; *Praśna* II. 1. Prāyaścittas for *brahmahatyā* and other great sins, prayaścittas for a *brahmachārin* violating his vow of celibacy, for marrying a *sagotra* girl, for marrying before elder brother, sins lesser than the great ones, description of such penances as Parāka, Kṛcchra, Atikṛcchra; 2. Partition of heritage, larger share for the eldest, the several substitutes for an *aurasa* son, exclusion from inheritance, dependence of women, prāyaścitta for adultery by men and women, rules about *niyoga*, means of subsistence in distress, continuous duties of the house-holder such as Agnihotra &c.; 3. The daily duties of the householder such as bathing, ācamana, Vaiśvadeva, giving food; 4. *Sandhyā*; 5. Rules about the manner of bathing, of Ācamana, worship of the sun, and about the method of propitiating ('*tarpaṇa*') gods, sages and pitṛis; 6. The five great daily *yajñas*; the four castes and their duties; 7. regulations about dinner; 8. Śraddha; 9. eulogy of sons and spiritual benefit from sons; 10. rules about *saṃnyāsa*; *Praśna* III. 1 modes of subsistence for the two kinds of householders, Śālina and Yayāvara; 2 the means of subsistence called '*Ṣaṇnivartanī*'; 3. the duties of the forest hermit and his means of livelihood; 4. prāyaścitta for not observing the vows of *brahmacarin* or householder; 5. method of reciting *Aghamarṣaṇa*, the holiest of texts; 6. the ritual of *prasṛtayāvaka*; 7 the purificatory *homa* called Kūṣmāṇḍa; 9. the penance called *candrayaṇa*; 9 the recital of the Vedas without taking food; 10. theories about purifications for sin, purifying things; *Praśna* IV. 1. prāyaścittas of various kinds viz. for eating forbidden food or drink &c.; 2. *praṇayāmas* and *Aghamarṣaṇa* as purifiers in case of several sins; 3. secret prāyaścittas; 4. Various Vedic texts as prāyaścittas; 5. Means of securing *siddhi* by means of *japa, homa, iṣṭi* and *yantra:* the penances called Kṛcchra, Ati-Kṛcchra, Sāntapana, Parāka, Cāndrāyaṇa; 6 the muttering (japa) of holy texts, the iṣṭis; 7 praise of *Yantras,* various Vedic texts used in *homa*; 8 censure of those who enter on the means of *siddhi* out of great greed, permis-

sion to get these things done through another in certain circumstances.

The extant Dharmasutra does not appear to have come down intact. The fourth *praśna* is most probably an interpolation. Most of the eight chapters of that *praśna* are full of verses, the portion in prose being very small. The last three chapters (6-8) are entirely in verse. The style is quite different from that of the first two *praśnas*. The first five chapters of the fourth praśna dealing with prāyaścittas are more or less superfluous, the same subject having been dealt with in II. 1 and III. 4-10. Some of the sūtras in the earlier *praśnas* are repeated *verbatim* in the fourth, e. g. II. 1. 33-34 and IV. 2. 10-11 (avakīrṇi-prāyaścitta). The third *praśna* also is not free from doubt. The tenth chapter of the third *praśna* is as said above taken from Gautama. The sixth chapter of the third *praśna* agrees very closely in phraseology with the 48th chapter of the Viṣṇudharmasūtra. But it is rather difficult to say which is the borrower. Dr. Jolly (S. B. E. Vol. VII. p. XIX) is inclined to think that both borrowed from a common source. It seems more probable that Viṣṇu borrows from Baudhāyana, as the Viṣṇudharmasūtra uses the form 'punita' in place of 'punatha' (in Baud.) and as the Viṣṇu-Dharmasutra omits all reference to Rudra (Baud. III. 6. 12.) and omits the words "gaṇan paśyati, gaṇadhipatim paśyati ... bhagavān Bodhayanaḥ" (Baud III.6. 20.). In the Mysore edition all the four *praśnas* of the *Dharmasutra* are divided into *adhyāyas*, but the Mss used by Bühler appear to have divided the first two *praśnas* into kaṇḍikās and the last two into adhyāyas. There are many repetitions even in the first two praśnas, which therefore make one rather doubtful about the authenticity of the first two praśnas also in their entirety. For example II. 6. 11 and 31 are indentical; in II, 7, 22 and II. 10. 53 the same verse ("aṣṭau grāsa" &c.) is quoted. Such repetitions are frequent in the two last praśnas e. g. III.2.16 and III.3.23; III.4.5 and III.7.12. Some of the quotations ascribed to Baudhāyana in the Mitakṣara and other works are not taken from the *dharmasutra*, but from the Gṛhyasūtra or its supplements (e. g. the words 'ekaṁ śākhām-adhīte śrotriyaḥ" quoted in the Mit. on Yāj. III. 24, which are cited by Hultzsch (on p. 125) are taken from the Gṛhya (vide note 78 below).

The Dharmasūtra of Baudhāyana is somewhat loose in structure and is not concise. Govindasvāmin remarks (on I. 2. 19.) that

Baudhāyana does not aim at brevity.[70] Several subjects are treated of in two places and often without any logical connection with what precedes or follows. Rules of inheritance (dāya-bhāga) occur in the midst of rules about prāyaścitta (in II. 2.); rules about holidays (anadhyāya) occur immediately after the eight forms of marriage and the condemnation of the sale of a daughter (I. 11). Rules about *snātaka* occur in two places (I. 3 and II. 3. 10 ff.). Baudhāyana quotes at least 90 verses introduced by the words "athāpyudāharanti," more than 80 being from the first two praśnas alone. There are over two hundred other verses, about 80 of which occur in the first two praśnas and about ten are Vedic. Some of the verses even in the first two praśnas do not appear to be quotations e. g. I. 1. 16, II. 2. 1, II. 3. 50, II. 3. 52-54 and 56. A verse quoted is in the Vaṁśastha metre (IV. 3. 14); there are two verses in the Upajāti metre taken as a quotation (II. 3.18). There are some prose quotations introduced with the words "athapyudāharanti" (e. g. II. 4. 5 and II. 6. 30 which refers to the *asura* Kapila, son of Prahlāda). The language of the Baud. Dh. S. is archaic and often departs from the Pāṇinean standard. Baudhāyana employs such un-Pāṇinean forms as "grhya" (for grhītvā in II. 5. 1), pūjya (II. 9. 5.), "adhigacchānaḥ" (in II. 9. 9.), ānayitvā (III. 3. 6), "punatha" (in III. 6. 5, probably a quotation), "tebhiḥ" (for taiḥ in III. 2. 16, a quotation). In several places Baudhāyana states opposite views and then gives his own opinion on the point, e. g. Baud. I. 5. 105-109 (about impurity on birth); II. 1. 49-51.

As regards the literature known to Baudhāyana the following points may be noted. All the four Vedas are mentioned by name in II. 5. 27 (*tarpaṇa*). He quotes very frequently the Taittirīya Saṁhitā, Tai. Brahmaṇa and the Tai. Araṇyaka (in the Āndhra recension). Well-known hymns of the Ṛgveda such as the Aghamarṣaṇa, the Puruṣasukta and also simple '*ṛks*' are frequently referred to. In III. 10 (which is almost the same as Gautama 19) there is a sūtra enumerating the Upaniṣads, the Saṁhitās of all the Vedas and several *sāmans* as purificatory texts. There are long quotations taken from the Śatapatha-brāhmaṇa (XI. 3. 3. 1 ff and XI. 5. 6. 3) in Baud. (1.2.52 about *brahmacāri* and II.6. 7-9 about *brahmayajña*). It is noteworthy that in the *tarpaṇa* there is an invocation of the

70 ननु द्विजातिषु स्वकर्मस्थेषु इति सूत्रायितव्ये किमिति सूत्रद्वयारम्भः। सत्यं, अयं ह्याचार्यो नातिव ग्रन्थलाघवाभिप्रायो भवति।

Atharvaveda and immediately afterwards of the Atharvāṅgirasaḥ. The same is found in the Baudhāyanagṛhya also (III. 2. 9 and 22). In the Upaniṣads (Bṛhadāraṇyaka II.4.10, IV. 1.2) it is the word Atharvāṅgirasaḥ that stands for the Atharvaveda. Baudhāyana quotes a gāthā of the Bhāllavins (I. 1. 29) about the geographical limits of Āryāvarta. Vasiṣṭha adduces the same verse (I. 15) and says that it is taken from the Nidāna work of the Bhāllavins. The Nirukta also mentions a school of Vedic interpretation called Naidānāḥ. It is difficult to say what Nidāna works contained. *Itihāsa* and Purāṇa occur in the *tarpaṇa* (II. 5. 27). The *aṅgas* of the Vedas occur in I. 1. 8 and the six *aṅgas* in II. 8. 2. Whether the word "rahasya" in II. 8. 3 means the Araṇyakas (as Govindasvāmin explains) is doubtful. Baudhāyana mentions a Vaikhānasa-śāstra in II. 6. 16, which appears to refer to the work of Vikhanas on hermits and speaks of Śrāmaṇaka (the rites prescribed by Vikhanas for initiation as hermit), just as Gautama does. Among the authors on *dharma* mentioned by name are: Aupajaṅghani (II. 2. 33 for the view that only *aurasa* son was to be recognised and not the other kinds of sons[71]), Kātya (I. 2. 47), Kaśyapa (or Kāśyapa in other editions, I. 11. 20 on the point that a woman bought cannot be a *patnī*), Gautama (I. 1. 23 and II. 2. 70), Prajāpati (II. 4. 15 about failure in Sandhyopāsana, and II. 10. 71 about *sannyāsa*), Manu (IV. 1. 14 and IV. 2. 16), Maudgalya (II. 2. 61, about observances of a widow being restricted only to six months after her husband's death), Hārīta (II. 1. 50). Baud. I. 2. 7 quotes a verse, which Vasiṣṭha ascribes to Hārīta (Vas. II. 6). As to Gautama, *vide* p. 17 above. Manu is only mentioned in the fourth praśna, the authenticity of which, as said above, is very doubtful. Baudhāyana II. 2. 16 (about the efficacy of *Aghamarṣaṇa*) closely agrees with Manu XI. 260. The first reference to Manu's teaching cannot be traced in the Manusmṛti. Prajāpati (in III. 9. 21) seems to stand for god Brahmā and not for any real or mythical writer on *dharma*. One remarkable piece of information contained in Baudhāyana (II. 6. 30) is that he quotes from a work (of the Brāhmaṇa class in language) a prose passage wherein the division into four āśramas is ascribed to an *asura* Kapila, son of Pralhāda. In II. 2. 79 Baudhāyana quotes a *gāthā* from the

71 One of the verses (अप्रमत्ता रक्षत तन्तुमेनं) is referred to by शबरस्वामी on पू. मी. सू. I. 2.13 (अपराधात् कर्तुश्च पुत्रदर्शनम्).

dialogue between the daughter of Uśanas and the king Vṛṣaparvan[72], which is nearly the same as Mahābhārata I. 78. 10 and 34. Baud. quotes the view of *Ācāryas* (II. 6. 29) as Gautama does. In several places he refers to the views of his predecessors on *dharma* as "others" (*eke, apare*) e. g. I. 4. 23, I. 5. 16, I. 6. 105-106, II. 5. 2. In II. 3. 18 two verses in the Upajāti metre are quoted as sung by "*anna*" (food). From the numerous quotations in verse cited by Baudhāyana on topics of *dharma*, it follows that the Dharmasūtra was preceded by a considerable number of works on *dharma* in verse. Bühler (SBE vol. XIV, p. XLIII) says that Vijñāneśvara was the first writer who quoted the Baud. D. S. But there are writers who flourished centuries before Vijñāneśvara that regarded Baudhāyana as a writer on *dharma* and either quoted his words or pointedly referred to them. Śabara in his *bhāṣya* on Jaimini, I. 3. 3 says that the rule in the Smṛtis about the period of Vedic study being 48 years is opposed to the Vedic injunction "one who has begot sons and whose hair are dark should consecrate the sacrificial fires[73]." This must be regarded as referring to the words of Baudhāyana (I. 2. 1). Śabara uses the same word "Vedabrahmacarya" that Baud. employs. It is true that Gautama and Āpastamba both refer to the rule about 48 years, but they do not employ the word "*veda-brahmacarya.*" The Tantravārtike of Kumārila says that the words of Āpastamba (*II. 6. 15. 1*) *which seem to accept the validity of local and family* usages (even though opposed to Smṛti tradition) stand refuted by the words of Baudhāyana (I. 1. 19-24) who cites only such censured usages as are opposed to Smṛti. Kumārila appears to think that Baudhāyana attacks the extant work of Āpastamba, i. e. the present Baud. is later than the present Āpastamba. It is not necessary to follow

Kumārila implicitly as regards chronological details, where he is speaking of writers that flourished over a thousand years before him. But his opinion deserves weight. The Tantravārtika quotes a Smṛti passage which bears a close resemblance to Baudhāyana (II. 3.28)[75]. In the commentary of Viśvarūpa (who as we shall see below flourished about 800 A. D.) on Yājñavalkya, Baudhāyana is quoted at least nine times in the chapter on *ācāra* alone. Vide Viśvarūpa on Yāj. I. 21, 26, 29, 53, 64, 69, 72, 79, 195 (Trivandrum edition), where Baud. I. 5. 14, I. 2. 30, I. 5. 5, I. 1. 17, IV. 1. 15, IV. 1. 18, IV. 1. 22, IV. 1. 20 and I. 5. 47 are respectively quoted. There are very few variations from the present text and the only serious variation is as regards the last (I. 5. 47) which is in prose (while Viśvarūpa quotes a verse). It is remarkable that Viśvarūpa quotes several verses from the fourth *praśna*, which shows that even if the fourth praśna be an interpolation, it is comparatively an ancient one. The Mit. also (on Yāj. III. 306) quotes a long passage from the fourth praśna (IV. 1. 5-11). The words of the Śākuntala[76] that the first precept is that a girl is to be given away to a meritorious person are probably a reminiscence of Baud. IV. 1. 12. Medhātithi on Manu. V. 117 quotes Baudhāyana I. 5. 47 and on IV. 36 quotes Baud. I. 4. 2 (which is mutilated as printed). On Manu. V. 114 he says that all the rules about purification of substances are contained in Baudhāyana-smṛti. On Manu. V. 118, he quotes Baud. I. 5. 50.

About the home of Baudhāyana it is difficult to advance any positive conclusion. In modern times Baudhāyanīyas are mostly confined to the south. We know that Sāyaṇa, the great commentator of the Vedas, was a Baudhāyanīya. A grant of Nandivarma, a Pallava, of the 9th century mentions Brāhmaṇas of the *pravacana-sūtra* as recipients.[77] As Baudhāyana is called pravacanakāra in the Gṛhya-sūtras Bühler thinks (S. B. E. vol. 14 p. xlii) that the Brāhmaṇas

belonged to the Baudhāyanacaraṇa. Buhler is probably right. In the grant most of the donees are students of the Āpastamba Sūtra. First the Gotra, then the Sūtra and then the name of the donee are introduced in the grant. Therefore as some of the donees are said to be students of "pravacanasūtra," it follows that "pravacana" stands for some sūtra school. It appears that *sūtra* and *pravacana* are two different things, whatever the latter term may mean. Baudhāyana is called pravacanakāra and Āpastamba is styled sūtrakāra. We are told by the Baudhāyana-gṛhyasūtra[78] that a Brāhmaṇa who studied *sutra* and *pravacana* was styled "bhrūṇa." Bühler was inclined to hold that Baudhāyana was a southern teacher for several reasons. Baudhāyana mentions customs of the south and includes sea-faring as a custom peculiar to the north (I. 1. 20), while in another place he places sea-faring at the head of sins (*patanīyas*) lesser than the mortal ones (II. 1. 41). Therefore it is said that he was not a northern teacher. But as against this we have to remember that Baudhāyana (I. 1. 29) quotes with apparent approval a verse in which the countries of Avanti (Ujjain), Aṅga, Magadha, Surāṣṭra (Kathiawar) and Dakṣiṇāpatha are declared to be the home of mixed castes. Dakṣiṇāpatha was generally supposed to be the whole peninsula south of the Narmadā. Baudhāyana, if he was a native of the south, would not have spoken of his country as the home of mixed castes only, unless he put a restricted meaning on the word Dakṣiṇāpatha (which sometimes meant in later days Mahārāṣṭra). Vide J. B. B. R. A. S. for 1917 p. 620.

The extant Baudhāyanadharmasūtra is certainly later than Gautama, as it mentions Gautama twice by name and as one quotation at least is found in the extant Gautama. Besides Baudhāyana quotes by name several teachers on *dharma*, while Gautama quotes only one, Manu. Baudhāyana is far removed from the times of the Upaniṣads. Baud. (II. 7. 15) quotes a verse which is itself an adaptation of a passage from the Chāndogya-upaniṣad.[79] He

78 The whole passage is interesting 'उपनीतमात्रो व्रतानुचारी वेदानां किंचिदधीत्य ब्राह्मणः। एकां शाखामधीत्य श्रोत्रियः। अङ्गाध्याय्यनूचानः। कल्पाध्यायी ऋषिकल्पः। सूत्रप्रवचनाध्यायी भ्रूणः। चतुर्वेदादृषिः। अत ऊर्ध्वं देवः।' बा. गृ. सू. I. 7. 2-8.

quotes Harīta. It is uncertain whether the Hārītadharmasūtra, a manuscript of which was discovered by the late Vaman Śastri Islampurkar at Nasik, is the one intended. Bühler thought that the work of Baudhāyana was earlier than that of Āpastamba by a century or two. His first reason was that Kāṇva Baudhāyana receives homage in the *tarpaṇa* before Āpastamba and Hiraṇyakeśin and that the same order is observed in the Baudhāyana-gṛhyasūtra. But this reason is far from convincing. It may be conceded that Baudhāyana was regarded as the oldest (or the most authoritative or respectable) of the three schools of the Black Yajurveda. But from this it does not at all follow that the extant *dharma-sūtra* of the Baudhāyanīyas is earlier than that of the Āpastambīyas. For aught we know the sūtra compiled for the school of Baudhāyana may be later than the sūtra manual of the Āpastambīyas. We saw above that orthodox opinion, represented by Kumārila, regards Baudhāyana's work as later than Apastamba's. All the three founders of the three schools are mentioned in the Baudhāyanagṛhya and dharma sūtra. One may equally argue with good reason that both these works knew a sūtra work of Āpastamba and that the extant dharmasūtra of Apastamba is that work. Another reason assigned for the priority of Baudhāyana's work over Āpastamba's is that, though both have numerous sūtras that agree almost word for word, a comparison of the views of the two writers shows that Āpastamba lays down stricter and more puritanic (and therefore later) views on certain points than Baudhāyana. Gautama, Baudhāyana and Vasiṣṭha mention several secondary sons, while Āpastamba is silent about them. Gautama, Baudhāyana (II. 2. 17, 62), Vasiṣṭha and even Viṣṇu approve of the practice of *niyoga*, while Āpastamba condemns it (II. 6. 13. 1-9). Gautama and Baudhāyana (I. 11. 1) speak of eight forms of marriage, while Āpastamba speaks of only six and omits Prājāpatya and Paiśāca (II. 5. 11. 17-20 and II. 5. 12. 1-2). Baudhāyana (II. 2. 4-6) allowed a larger share to the eldest son on a partition, while Āpastamba condemns such a procedure (II. 6. 14. 10-14). The Baudhāyana-gṛhyasūtra (II. 4. 6) allows upanayana to *rathakāra*, while Āpastamba (gṛhya 4. 10. 1-4) does not do so (dharmasūtra I. 1. 1. 19). These points are hardly conclusive on the question of date. From very ancient times there was great divergence of opinion among the doctors of the law on most, if not on all, of these points. There is no hard and fast rule that these doctrines were up-

held by early writers and condemned by later ones. Baudhāyana himself quotes the views of an ancient writer, Aupajaṅghani, who condemned all secondary sons. The verses that Baudhāyana quotes on this point (II. 2. 34-36) are quoted by Āpastamba also but without the author's name (Ap. II. 6. 13. 6), there being variants only in the first verse. *Niyoga* was allowed by Manu (9. 56-63) and then condemned (9. 64-68) and Bṛhaspati refers to this attitude of Manu (vide Kullūka on Manu 9. 68). Even so late a writer as Yājñavalkya (II. 131) approves of *niyoga*. About the *rathakāra* being allowed to consecrate the sacred fires there is a discussion in the sūtras of Jaimini (VI. 1. 44 ff). Vedic passages supported both methods *viz*. equal division among sons and the bestowal of a larger share on the eldest. Even Yājñavalkya (II. 118) allows a larger share to the eldest son. Therefore hardly anyone of the circumstances relied upon by Bühler as indicating a later age for Āpastamba is conclusive or convincing. The third ground for placing Baudhāyana before Āpastamba is that the style of the former is simpler and older as compared with the latter's. That Baudhayana is simpler than Apastamba may be admitted. But this may be due to the fact that Baudhāyana has been tampered with more than Āpastamba. On the other hand Apastamba contains more un-Pāṇinean forms more uncouth constructions, more words in an archaic sense than is the case with Baudhāyana. All that is almost certain about the age of the Baudhāyana-dharmasutra is that it is later than the work of Gautama, that its style, its doctrines and its general out-look on different subjects do not compel us to assign it a later date than that of the other dharmasūtras. We have adduced evidence to show that long before the days of Śabara (whose latest date cannot be later than 500 A.D.) the Baudhāyana-dharmasūtra was an authoritative smṛti ; it follows that the dharmasūtra must be placed somewhere between 500-200 B. C. Numerous sutras are identical in Baudhāyana and Āpastamba e. g. Ap. I. 1. 2. 30 = Baud. I. 2. 40-41, Āp. I. 2. 6. 8-9 = Baud. I. 2. 39, Ap. I. 5. 15. 8 = Baud. I. 2. 31, Āp. I. 11. 31. 11 and 16 = Baud. II. 3. 39 and 32. There are several verses that occur in both *e.g.* Baud. II. 1. 42 = Ap. I. 9. 27. 11, Baud. II. 2. 34-36 = Āp. II. 6. 13. 6 (three verses condemning secondary sons), Baud. II. 10. 63 = Āp. 11. 9. 21. 10, Baud. II. 7. 22--23 = Āp. II. 4. 9. 13. (two verses), Baud. II. 6. 36. = Āp. II. 9. 24. 8. Besides these there are numerous Vedic quotations that are common to both. All this,

however, does not establish anything about their relative position. The Vasiṣṭha-dharmasūtra also has numerous quotations in common with Baud. Vide Vas. I. 15. = Baud. I. 1. 28, Vas. III. 5, 6, 11, 20, 56 = Baud. I. 1. 10, 12, 11, 8 and I. 5. 58 (respectively); Vas. 6. 20-21= Baud. II. 7. 22-23; Vas. VIII. 17 = Baud. II, 2, 1; Vas. XI. 27-28 = Baud. II. 8. 21-22; Vas. XVI. 34 = Baud. I. 10. 35, Vas. XVII. 73 = Baud. IV. 1. 17, Vas. XVII. 86 = Baud. I. 5. 102; Vas. XXII. 10 = Baud. I. 1. 33. It is to be noted that some of these quotations (Baud. II. 8. 21-22, I. 10. 35) occur in the extant Manusmṛti also (III. 125-126 and VIII. 98). There are a few prose sūtras in Vas. that are transformed into verse in Baud. and *vice versa* e. g. Vas. III. 41 (prose) = Baud. I. 5. 20 (quoted as a verse), Vas. III. 57 (quoted as a verse) = Baud. I. 6. 19-20. It is not likely that one borrows from the other. There are two other possible explanations, viz. that both Baud. and Vas. (and Manu also) quote from or adapt a common source or that the three works have been tampered with and interpolations introduced at every step. The latter alternative is too sweeping as the number of verses is very large and makes all the old sūtras except that of Gautama valueless for all chronological purposes. One cannot subscribe to the view that such extensive interpolations took place as the latter theory demands. The first alternative appears more reasonable. What that common source was, whether it was a regular work in verse or whether there was a floating mass of such popular verses as Bühler holds, are questions that present very great difficulties. It is not easy to believe that there were hundreds of floating verses on *dharma* no body knew by whom composed, on which writers of the centuries preceding the Christian era drew for supporting their opinions. That does not sound as a very likely procedure. It is more probable that such verses were contained in a work or works now lost. 151768

In the *tarpaṇa*, Baud. (II. 5. 21) mentions several appellations of Gaṇeśa, viz. Vighna, Vināyaka, Sthūla, Varada, Hastimukha,, Vakratuṇḍa, Ekadanta, Lambodara. But this affords no certain clue as to date. The worship of Vināyaka is found in the Mānavagṛhya also. In the *tarpaṇa* (II. 5. 23) we have the seven planets mentioned in the order of the days of the week and also Rahu and Ketu; besides the twelve names of Viṣṇu occur in II. 5. 24. In II. 1. 44 Baud. speaks of the profession of an actor or of a teacher of dramaturgy (Nāṭyācārya) as an upapātaka. Several

sūtras attributed to Baudhāyana on the subject of adoption in the Dattakamīmāṁsa and other later works are taken from the Baudhāyanagṛhyaśeṣasūtra (II. 6), the sūtras agreeing very closely with Vasiṣṭha (15. 1-9).

According to Burnell the oldest commentator on the Baudhyānaśrauta-sūtra was Bhavasvāmin, whom he placed in the 8th century. The commentary of Govindasvāmin on the Dharmasūtra is a learned one and is generally to the point. He appears to be a very late writer.

7. Dharmasūtra of Āpastamba.

This has been edited several times (*viz.* by Bühler in the Bombay Sanskrit series with large extracts from Haradatta's commentary called Ujjvala and also at Kumbhakonam with the complete commentary of Haradatta and translated by Bühler with an introduction in S. B. E. vol. II). The Āpastambakalpasūtra of the Taittirīya Śākhā of the black Yajurveda is divided into 30 *praśnas*. According to Bühler, the first 24 praśnas contain the treatment of Śrauta sacrifices; the 25th contains *paribhāṣās*, pravarakhaṇḍa, and Hautraka prayers to be recited by Hotṛ priests; 26th and 27th *praśnas* constitute the Gṛhyasūtra, the 28th and 29th Dharmasūtra and the 30th *praśna* is the Śulvasūtra. Bühler seems to be slightly inaccurate here. According to Cauṇḍappa, who commented on the Āpastambīya sūtras in the 14th century, the Āpastambīyamantrapāṭha forms the 25th and 26th praśnas of the Kalpasūtra and the Gṛhyasūtra forms 27th praśna.[80] The Śrauta-sūtra of Āpastamba was edited by Dr. Garbe in the B. I. series; the Gṛhya and Mantrapāṭha were edited by Dr. Winternitz. The Gṛhya with the commentary of Sudarśanārya has been edited in the Mysore Govt. Oriental series by Pandit Mahadeva Sastri (in 1893). It is divided into eight paṭalas and 23 khaṇḍas. According to the Caraṇavyūha, Apastamba (or "bha" as written in many southern mss.) is one of the five subdivisions of the Khāṇḍikīya school of the Taittirīyaśākhā of the Black Yajurveda. Whether the author of the Āpastambīya Śrauta, Gṛhya and Dharma sūtras is the same is difficult to determine. One sūtra in

[80] पंचविंशेथ षड्विंशे गृह्यमन्त्राः प्रपञ्चिताः। प्रश्नेथ सप्तविंशे स्याद्गृह्यनन्त्राविधिक्रमः॥ (Dr. Winternitz's edition of Āp. Mantrapāṭha p. IX). The editor further states (p. IX n. 2) that Paribhāṣās form part of the 24th praśna and not of the 25th, as Bühler says.

the Āpastambadharma (II. 2. 5. 17) is the same as Ap. Śrauta (III. 17. 8 and VIII. 4. 6). Oldenberg (S. B. E. vol. 30, p. XXXII) does not subscribe to Bühler's view (S. B. E. Vol. II, pp. XIII-XIV) that the authors of the Ap. *Śrauta* and *Dharma* were identical and gives it as his own view that another person of the same school might have imitated the style of the author of the Śrauta. Whatever may be said of the identity of the authorship of the Śrauta and Dharma sūtras, the Grhya and Dharma seem to be very closely related and both seem to be the compositions of the same author. The Ap. Grhya sūtra, as compared with the Aśvalayana-grhya or Gobhilagrhya, is extremely brief and leaves out many rules that are given in other Grhya works. For example, about the choice of a girl Ap. grhya gives only a single rule (1. 3. 19[81]). While it is the Dharmasūtra that tells us that the bride must not be *sagotra* nor *sapiṇḍa* (Āp. Dh. S. II. 5. 11. 15-16). The Ap. Grhya is silent about the forms of marriage, about holidays, about the duties of *brahmacārins* and such other subjects which are generally treated of in other Grhyasūtras. These subjects are dealt with in the Ap. Dh. S. and there are several places where the Dharmasūtra presupposes the existence of the Grhya and refers to it. Compare Ap. Dh. S. II. 1, 1. 10-11[82] with Ap. Gr. S. III. 7 (particularly sūtras 1, 17, 23). Vide note 54 above. Some sutras are identical in the Grhya and Dharma, e. g. Ap. Dh. S. I. 1. 2. 38 and Grhya IV. 11. 15-16 (about the staff of Brahmacārin); Ap. Dh. S. II. 4. 8. 7 and Grhya V. 13. 19. In some cases the Grhya-sūtra itself seems to refer to the teachings of the Dharmasutra, e. g. Grhya 8. 21. 1 and Dharma II. 7. 16. 6-7. All these facts make it highly probable, if not certain, that the Grhya and Dharma sūtras were composed by the same author and that the details of certain topics were purposely omitted in the

The contents of the Āpastamba dharma-sūtra are :—

1. the authoritative sources of *dharma* are the Veda and the usages of those who know *dharma*; the four *varṇas*, their precedence; definition of *ācārya* and his greatness; time for *upanayana* according to the *varṇas* and according to one's desire; prāyaścitta if proper time for *upanayana* is gone; he whose father, grand-father and great-grand-father have not undergone *upanayana* becomes *patita*, but he can be purified by prāyaścitta; the duties of *brahmacārin*, residence with teacher for 48 years, 36, 18 or as long as one desires to be a *brahmacārin*, his staff, girdle and garments, rules about begging for food, bringing fuel and offering to fire; duties of *snātakas* are his *tapas*, rules about saluting teachers and others according to *varṇas*; giving dakṣiṇā to the teacher at the end of study; rules for *snātaka*; rules about holidays and about the time and place for Vedic study; rules about holidays apply to study of the Veda and not to the use of *mantras* in Vedic rites; the five great daily *yajñas* to the *bhūtas*, men, gods, pitṛs, and sages, honouring men of higher castes, old men, parents, brothers and sister and others, method of inquiring about one's health &c. according to *varṇas*; occasions of wearing yajñopavīta; times and manner of *ācamana*; rules about forbidden and permitted food and drink; the avocation of a *vaṇij* not allowed to a Brāhmaṇa except in distress; rules forbidding the sale or exchange of certain things, grave sins (*pātakas*), such as theft, the murder of a Brāhmaṇa or other manslaughter, abortion, incest, drinking wine etc; other sins are not so grave, though they make the perpetrator impure; discussion of some metaphysical questions such as the knowledge of the soul, *brahman*, the moral faults that lead to perdition such as anger, avarice, hypocrisy &c; the virtues that lead to the highest goal, such as absence of anger or avarice &c. truthfulness, tranquility; compensation for killing a Kṣatriya, Vaiśya, a Śūdra and women; prāyaścittas for killing a Brāhmaṇa and an Ātreyī Brāhmaṇa woman, for killing a *guru* or a Śrotriya; prāyaścitta for violating the bed of a *guru*, for drinking wine and for theft of gold; prāyaścittas for killing several birds, cows and bulls, and for abusing those who should not be abused, for sexual intercourse with a Śūdra woman, for taking forbidden food

and drink &c.; rules about Krcchra for twelve nights; what constitutes theft; how one should act towards a fallen (*patita*) *guru* and mother; various opinions about prāyaścitta for violating *guru's* bed, prayaścitta for a husband who has intercourse with another woman and for wife's adultery; prayaścitta for killing a *Brāhmaṇa* (a learned brāhmaṇa); Brāhmaṇa was not to wield arms, except in self-defence against bodily injury; prayaścitta for *abhiśasti*; *prāyaścittas* for lesser sins; various views about *snātaka* (Vidyāsnātaka, Vratasnātaka and Vidyāvratasnātaka); the observances (*vratas*) of snātaka as regards garments, answering calls of nature, about scandalous talk, about not seeing the rising or setting Sun, avoiding moral faults such as anger; II (*praśna*) the householder's observances commence on marriage (*pāṇigrahaṇa*); rules of conduct for a householder about taking food and fasting, about sexual intercourse; all the *varṇas* attain unmeasured bliss by performing their duties and are re-born in conditions appropriate to their actions and by means of evil deeds are re-born in evil surroundings e. g. a Brāhmaṇa who is a thief or a murderer of a brāhmaṇa becomes a Caṇḍala, a similarly guilty *rājanya* becomes a *pukkaśa*, the three higher castes should after bathing perform Vaiśvadeva, Sudras may cook food for their masters of higher castes under the supervision of Āryas; offerings (*bali*) of cooked food; guests (*atithi*) should [illegible] food, then children, old men, sick persons and [illegible] women and [illegible] the householder himself); no one should [illegible] food which comes at the end of Vaiśvadeva; rules of receiving guests, such as unlearned brāhmaṇas, Kṣatriyas, Vaiśyas and Śudras; a householder should always wear an upper garment of his sacred thread may serve that purpose; in the absence of a Brāhmaṇa teacher, a Brāhmaṇa may learn from a Kṣatriya or Vaiśya teacher; duties of a married man when his [illegible] a guest; duty of a householder to eat and to observe [illegible] conduct laid down [illegible]; in case of doubt [illegible] guest's caste and [illegible] not to exceed; who is an *atithi*; praise of honouring an *atithi*; procedure [illegible] comes to a [illegible] who has consecrated [illegible] whom [illegible] [illegible] invited, the six [illegible] [illegible] [illegible]

brahmacārin, householder, hermit &c.; occasions for begging are the teacher, marriage, sacrifice, maintenance of parents and avoidance of the cessation of some worthy obervance (like *agnihotra*); the peculiar *karmans* of Brāhmaṇas and the other castes; rules of war; the king to appoint a *purohita* skilled in *dharma* and art of government, who is to carry out punishments and penances; punishments including death sentence according to the gravity of the offences, but a Brāhmaṇa was not to be killed or injured or to be made a slave; rule of the road; a man of the lower caste by practising his duties rises higher and higher when re-born and a man of the higher castes goes lower by *adharma*; one should not marry another wife, when the first has children and is helpful in the performance of *dharma*; rules about marriageable girl, i. e. she must not be *sagotra* and *sapiṇḍa* of the mother; six forms of maraiage, brāhma, ārṣa, daiva, gāndharva, āsura, rākṣasa; preference among the six; rules of conduct after marriage; sons born of wives of the same caste can perform the duties appropriate to the father's caste and inherit parent's property; the son of a woman who was once married or who is not married according to prescribed forms or who is not of the same caste is censured; whether the son belongs to the begetter (or to him on whose wife he is begotten); there can be no gift or sale of a child; partition during father's lifetime and equal division; exclusion from inheritance of the impotent, lunatics and sinners; the inheritance in the absence of son goes to nearest *sapiṇḍa*, then to the teacher and then to the pupil, or the daughter and ultimately to the king; the opinion of some that the largest share goes to the eldest son is opposed to the Vedas; no partition between husband and wife; usages of countries and families not to be followed if opposed to the Vedas; impurity on death of agnates, cognates &c; gifts to be made at proper time, place and to proper person; *śrāddhas;* times of *śrāddha*; materials required at śrāddha, food (including flesh) appropriate at *śrāddhas*; what Brāhmaṇas are to be called at *śrāddha*; the four *āśramas*; rules about *parivrāj* i. e. *sannyāsin*; the duties of forest hermit; praise of the meritorious and condemnation of evil-doers; special rules about kings; founding of his capital and palace; position of the *sabhā*; extirpation of thieves; gifts of land and wealth to Brāhmaṇas; protection of people; persons exempt from taxation, such as Śrotriyas, women of all castes, students and ascetics; punishment of young men for adultery; punishment varied according as the woman wronged was Ārya or

Śūdra; punishments for abuse and for homicide; punishments for various breaches of conduct; dispute between cowherd and master; the perpetrator, the abettor and one who approves of the act are all guilty; who are to decide disputes; in case of doubt decision by inference and by divine proof (ordeals); punishment for perjury; all other *dharmas* should be learnt, according to some, from women and people of all castes.

Each of the two *praśnas* of the Āpastamba-dharma-sūtra is divided into eleven *paṭalas*, there being 32 and 29 *khaṇḍikās* in the two *paṭalas* respectively. The Dharmasūtra is written in a more concise and compact style than that of Baudhāyana and has more archaic and un-Pāṇinean forms than any other extant Dharmasūtra. For example, the following are against the rules of Pāṇini; Adhāsana (for adha āsana) in I. 1. 2. 21, aglaṁsnu (I. 2. 3. 22), muhūṁśca (I. 2. 8. 22), agṛhyamāna (I. 4. 12. 8), sarvatopeta (for sarvata upeta) in I. 6. 19. 9, sakhim (for sakhīm) in I. 7. 21. 9. Haradatta points out in many places that the current reading was un-Pāṇinean and therefore he read differently (e. g. in II. 2. 5. 2 he reads 'viprakramaṇa', while the current reading was 'viprakramiṇa')[83]. This makes it probable that in the original text there must have been many more un-Pāṇinean forms than in the one preserved by Haradatta. There are many unfamiliar or rare words used by Apastamba, i. e. ananiyoga (I. 6. 19. 12), anaiścārika (I. 8. 22. 1), Kartapatya (I. 2. 5. 3), vyupatoda and vyupajāva (-'pa') in I. 2. 8. 15, brahmahasaṁstuta (I. 1. 1. 32). We meet with strange forms of certain words, such as paryānta (I. 3. 9. 21), praśāsta (II. 8. 19. 3), anātyaya (I. 1. 1. 21 for anatyaya), brahmojjham (for -ojjhaḥ) in I. 7. 21. 8, śvāviṭ (1. 5. 17. 37), ṣṭhevana (I. 11. 30. 19 for ṣṭhivana), ācāryadāre (for -dāreṣu) in I. 2. 7. 27. Though the Ap. *Dharmasūtra* is mainly in prose, there are verses here and there. Some of the verses are expressly stated to be taken from other sources by being introduced with the word "udāharanti" or with "athāpyudāharanti" e. g. I. 6. 19. 13 (two ślokas from a Purāṇa), I. 6. 19. 15 (compare Manu 8. 317 and Vas. 19. 44), I. 11. 31. 1, I. 11. 32. 24, II. 4. 9. 13 (two verses, same as Baud. II. 7. 22-23), II. 7. 17. 8, II. 6. 13. 6 (three verses almost the same as in Baud. II. 2. 34-36), II. 9. 23. 4-5 (two ślokas from a Purāṇa). Besides these there are several isolated verses, most of which

[83] 'प्रायेण मकारात्परमिकारमधीयते । तत्राप्येष एवार्थः । इकारस्तु छान्दसोपपाठो वा ।'.

seem to be quotations, though not introduced with words like "udāharanti". They are I. 4. 14. 25, I. 6. 19. 14 (the first pāda of which is Manu 4. 212), I. 9. 27. 10, I. 9. 27. 11 (same as Baud. II. 1. 42), II. 2. 4. 14 (compare Manu III. 101). Some of these verses are defective in metre, there being nine syllables in one anuṣṭubh pāda as in I. 9. 27. 10, II. 9. 23. 4-5, II. 2. 4. 14. One of the verses is in the classical Upajāti metre (II. 7. 17. 18), while another closely approaches that metre (I. 9. 27. 11). Besides these there are a few half-verses, II. 5. 11. 5-6 (same as latter half of Vanaparva 133. 1), II. 9. 21. 10 (Manu 6. 43 has the first pāda). Thus in all there are about twenty verses, of which at least six occur in Baudhāyana. Some sūtras that are printed as prose are parts of verses, e. g. I. 2. 5. 11. Besides these there are several verses in the paṭalas dealing with metaphysics (I. 8. 22. 4-8 and I. 9. 23. 1-3) that are pieced together largely from Upaniṣad passages. Āpastamba in several places employs the first person plural about himself[84], e. g. I. 1. 1. 27, I. 8. 22. 3, I. 8. 23. 4. Haradatta points out that in his day there was difference in the text as handed down in Northern and in Southern India.[85]

Āpastamba quotes, besides the *Saṁhitās*, the Brāhmaṇas very frequently (e. g., I. 1. 1. 10-11, I. 1. 3. 9, I. 1. 3. 26, I. 2. 7. 7, I. 2. 7. 11, I. 3. 10. 8). He quotes the Vājasaneyaka (I. 5. 17. 31) and the Vājasaneyi-brāhmaṇa (I. 4. 12. 3 on svādhyāya), he speaks of the Upaniṣads (II. 2. 5. 1), his quotations (II. 2. 3. 16-II. 2. 4. 1-9) from the Tai. Araṇyaka agree, according to Bühler, with the text current in the Andhra country. He speaks of the six *aṅgas* of the Veda (II. 4. 8. 10) and in the next sūtra enumerates Chandas, Kalpa, grammar, Jyotiṣa, Nirukta, Śikṣā, (phonetics) and Chandoviciti (metrics), which are seven (Śikṣā being probably intended to be included in grammar). There are passages in Āpastamba which agree with the Nirukta, e. g. the definition of ācārya[86].

84 'आषोडशाद् ब्राह्मणस्य...यथा ब्रवीतु समर्थः स्यादिति वक्ष्यामः।' आप. I. 1. 1. 27; तत्रात्मलाभीयान् श्लोकानुदाहरिष्यामः' I. 8. 22. 3; 'अथ भूतदोहोच्छ्वासदोषानुदाहरिष्यामः' I. 8. 23. 4.

85 On the sūtra अन्यत्र राहुदर्शनात् (II. 7. 17. 25) he says 'उदीच्यास्त्वेतत्प्रायेण न पठन्ति। तथा च पूर्वेण व्याख्यानम्'.

86 'यस्माद्धर्मानाचिनोति स आचार्यः' आप. ध. सू. I. 1. 1. 14; 'आचार्यः कस्मादाचारं ग्राहयति आचिनोत्यर्थानाचिनोति बुद्धिमिति वा' निरुक्त I. 4 and 'तस्मै स द्वेष्यतमश्चनाह' (quoted in निरुक्त II. 3).

He quotes the views of ten writers on *dharma* by name, viz. Eka (I. 6. 19. 7), Kaṇva (I. 6. 19. 3 and I. 10. 28. 1), Kāṇva (I. 6. 19. 7), Kuṇika (I. 6. 19. 7), Kutsa (I. 6. 19. 7), Kautsa (I. 6. 9. 4 and 7, I. 10. 28. 1), Puṣkarasādi (I. 6. 19. 7, I. 10. 28. 1), Vārṣyāyaṇi (I. 6. 19. 5 and 8, I. 10. 28. 2), Śvetaketu (I. 4. 13. 19 and I. 2. 5. 6), Hārita (I. 4. 13. 11, I. 6. 18. 2, I. 6. 19. 12, I. 10. 28. 1, 5 and 16, I. 10. 29. 12 and 16). Some of the names (viz. Kautsa, Vārṣyāyaṇi, and Puṣkarasādi) occur in the Nirukta. He quotes the view of Śvetaketu in Śvetaketu's own words (in I. 4. 13. 20) that even a married man should every year stay with his teacher for two months to refresh his studies and gives it as his own opinion that Śvetaketu's view is opposed to the Śāstras (the Vedas). In another place (I. 1. 4. 5-6) he speaks of Śvetaketu as an *ārāra* (a person belonging to later ages) and as one who on account of the remnant of his meritorious actions done in a former life or lives was able to grasp the four Vedas in a short time. It is usual to see in this a reference to Śvetaketu in the Chāndogya Upaniṣad (VI. 1. 1-2), where it is stated that Śvetaketu mastered all the Vedas in twelve years. But this identification is somewhat of doubtful value. Āpastamba quotes Śvetaketu as a teacher of *dharma*. The quotation from Śvetaketu given by Āpastamba has nothing corresponding to it in the Upaniṣad. Besides the Chāndogya Upaniṣad appears to make a distinction between two Śvetaketu's (in VI. 1 and VI. 8), one being called Āruṇeya and the other Āruṇi (son of Aruṇa). Hārita, whose views are cited so frequently, is quoted by Baudhāyana (II. 1. 50) and also by Vasiṣṭha (II. 6.). From the two sutras (I. 6. 19. 3 and 7) it follows that Kaṇva and Kāṇva are two distinct writers. The Kumbhakonam edition reads Kāṇva in I. 10. 28. 1, while Bühler reads Kaṇva there. Kāṇva Bodhayana is a teacher, whose name occurs in the *pitṛtarpaṇa* in many works. The view ascribed to Kāṇva by Āpastamba in I. 6. 19. 7 seems to be the same as that of the Baudhāyana-dharmaśūtra (I. 2. 19[87]). It has been shown above that there are close parallels in thought and expression

[87] 'क आश्यान्नः। य ईप्सेदिति कण्वः। ...शुद्धा भिक्षा भोक्तव्येककुणिकौ काण्वकुत्सौ तथा पुष्करसादि.।' आप.ध.सू. I. 6. 19. 2, 3 and 7. Here various views on the question as to whose food should be partaken by begging are set forth. Baudhāyana says 'ते ब्राह्मणाद्याः स्वकर्मस्थाः' which tallies with शुद्धा भिक्षा &c.

between Baudhāyana and Āpastamba. In several places Āpastamba seems to be controverting the views of Baudhāyana or similar views held by others. Āpastamba condemns the view of giving the paternal wealth to the eldest son as opposed to the Vedas and explains the Vedic text (Tai. S. II. 5. 2. 7 quoted above) about the eldest son being endowed with all wealth as a mere *anuvāda* and and not a *vidhi* (vide Āp. Dh. S. II. 6. 14. 6-13). Baudhāyana cites both the texts of the Tai. S. about equal division among sons and about the eldest son's larger share and seems to favour the latter view by putting it last (II. 2. 2-7.). Similarly the discussion in Āpastamba (I. 1. 4. 5-12) about a *brahmacārin* eating the leavings (ucchiṣṭa) of his *guru*, provided the things are not directly forbidden by Śruti, seems to be directed against Baudhāyana (II. 1. 25-26). Although Āpastamba does not expressly quote Gautama, he appears to have had before him the Gautama-dharma-sūtra. He speaks of a smṛti (II. 6. 15. 25) that lays down that *upanayana* confers *adhikāra* on a man for śāstric actions and that before *upanayana* one is free to do anything and to eat anything. This, as interpreted by Haradatta, refers to Gautama (II. 1)[88]. There are striking coincidences between Gautama and Āpastamba, e. g. Gaut. I. 19.=Āp. I. 1. 1. 41 (about some teachers prescribing the yellow robe to a *brahmacārin*), Gaut. I. 3 = Āp. 11. 6. 13. 7 (about the violation of *dharma* by the great in former ages), Gaut. 9. 52=Āp. I. 11. 31. 13), Gaut. 23. 9= Āp. 1. 9. 25. 2; Gaut. 16. 19 = Āp. I. 3. 9. 14-15). Āpastamba frequently refers to the views of his predecessors in the words 'eke' (I. 1. 2. 37, 38, 41: I. 1. 4. 17; I. 2. 5. 20; I. 2. 6. 4: I. 3. 9. 3: I. 3. 11. 3 &c.) and 'aparam' (II. 6. 15. 22). It is somewhat remarkable that in many of these cases (where 'eke' occurs), the views are those either held by Gautama or ascribed by him also to others, e. g. Āp. I. 1. 2. 38 about the staff of a *brahmacārin* refers to Gaut. I. 23; Āp. I. 1. 2. 41 is almost same as Gaut. I. 19, Ap. I. 2. 5. 20 seems to refer to Gaut. 1. 54-59, Āp. 1. 3. 9. 3 (the view of some that Vedic study lasts for four months and a half) seems to refer to Gaut. 16. 2, and Āp. I. 3. 11. 3 (about not studying after dining at a sacrifice for deities that are manuṣya-prakṛti) pointedly refers to Gaut. 16. 34 which contains the word 'manuṣyayajñabhojana'. Āpastamba twice

quotes verses from a Purāṇa (I. 6. 9. 13, II. 9. 23. 3) and in one place gives in prose the view of a Purāṇa (I. 10. 29. 7.)[89]. Āpastamba (II. 9. 24. 6) speaks of the view of a Bhaviṣyat-purāṇa (about creation of the world after a periodic dissolution). In one place Āpastamba (II. 11. 29. 11-12) says that 'the knowledge that exists (traditionally) among women and śūdras is the furthest limit of *vidyā* and it is said to be a supplement of the Atharvaveda.' Here he probably refers to Arthaśāstra, which according to the caraṇavyūha, is the Upaveda of the Atharvaveda. Āpastamba refers (II. 7. 16. 1) to Manu as founder of the institution of śrāddha. But this appears to be a reference to Manu, the mythical progenitor of mankind, and not to the Manusmṛti. It is noteworthy that Āpastamba (II. 7. 17. 8) quotes a verse, which is the same as Anuśāsanaparva 90. 46 (sambhojanī nāma &c.).

The Āpastambadharmasūtra stands in a peculiar relation to the Pūrvamīmāṁsā. It is the only extant Dharmasūtra that contains many of the technical terms and doctrines of the Mīmāṁsā. He says (I. 1. 4. 8) 'a positive Vedic text is more cogent than an usage which merely leads to an inference (of its being based on a Vedic text now lost[90]). This refers to Jaimini's rule (I. 3. 3) "if there is a conflict between an express Vedic text and Smṛti, the latter is to be disregarded: but if there be no conflict an inference (may be made that the Smṛti is based upon some Śruti)". In another place Āpastamba says (I. 4. 12. 11) 'where an action is done on account of finding pleasure therefrom (i. e. from a worldly motive), there is no (inference of its being based on) Śāstra'. This is the same as Jaimini's teaching (IV. 1. 2)[91]. He speaks of the

I. 10. 12) and Vasiṣṭha (III. 18) 'स्वाध्यायिनं कुले जातं यो हन्यादाततायिनम् । न तेन भ्रूणहा स स्यान्मन्युस्तं मन्युमृच्छति ॥' (Baud. has अध्यापकं कुले and भ्रूणहा भवति).

convention (*samaya*) of those who know Nyāya (i. e. Mīmāṁsā) that aṅgas (such as the Kalpasūtras are) cannot be designated the Vedas (which are the principal), which is clearly a reference to Pūrvamīmāṁsa (I. 3. 11-14)[92] and he says that those who know Nyāya lay down that a mere *anuvāda* (affirming or reciting) of what is well-known to all is not a positive rule (a *vidhi*), which is similar to Jaimini's rule[93]. The dictum of Āpastamba that the word "sale" (*kraya*) applied to a bride in some Vedic texts is merely figurative closely resembles Jaimini's[94] remarks on the same point. The remark of Āpastamba that the rules of *anadhyāya* only apply to Vedic study and not to the recital of *mantras* at sacrifices corresponds to a rule in Jaimini[95] almost in the same words. These examples show that in Āpastamba's day Mīmāṁsā doctrines had been far advanced and that works existed that dealt with Mīmāṁsā topics (Nyāyas). The correspondence in language with the Pūrvamīmāṁsāsūtra is so close that one is tempted to advance the view that Āpastamba knew the extant Mīmāṁsā-sūtra or an earlier version of it that contained almost the same expressions. It cannot be said that all these passages are later interpolations. They have all been explained by Haradatta and one of the sūtras referring to Mīmāṁsā topics occurs in so early a work as the commentary of Viśvarūpa (on Yāj. 1. 7) who quotes "Brāhmaṇoktā vidhayaḥ". (Āp. I. 4. 12. 10). The last passage is quoted by Medhātithi also (on Manu II. 6).

The dharmasūtra of Āpastamba has been quoted from very ancient times as authoritative. Śabara in his *bhāṣya* on Jaimini VI. 8. 18 quotes one sūtra of Āpastamba and a paraphrase of another.[96] The Tantravārtika refers to the sūtras of Āpastamba about local and

family usages,[97] about drinking wine and about the conflict between the views of Baudhāyana and Āpastamba (vide above page 26 also). Śaṅkarācārya in his *bhāṣya* on Brahmasūtra IV. 2. 14 quotes Āpastamba I. 7. 20. 3 (about the planting of trees for fruit as a meritorious act and the collateral benefits of shade and fragrance). He also cites (on Brahmasūtra II. 1. 1.) about the supreme soul a half verse from Apastamba (I. 8. 23. 2)[98]. In his bhāṣya on Bṛhadāraṇyaka, he cites Āp. Dh. S. I. 5. 15. 1 (upāsane gurūṇām &c.). The two *paṭalas* of Āpastamba (I. 8. 22 and 23) dealing with *adhyātma* (philosophy) were commented upon by Śaṅkarācārya, who, from the general style and method of the commentary (vide Trivandrum edition of the adhyātmapaṭala), seems to be the same as the great ācārya. Sureśvara in his *Vārtika* (I. 1. 97) on Śaṅkara's *bhāṣya* on the Bṛhadāraṇyakopaniṣad quotes the sūtra about the planting of mango (Āpastamba I. 7. 20. 3[99]) trees. Viśvarūpa, who according to Mādhava, was the same as Sureśvara,[100] quotes (Trivandrum edition) in his commentary on Yājñavalkya (ācāra and vyavahāra only) Āpastamba's sūtras about twenty times. The quotations show that the text of Āpastamba was identical with the one printed, barring a few variations that are no more than mere slips on the part of the scribes of Mss. In his commentary on Yāj. III 237 Viśvarūpa quotes eighteen sūtras of Āpastamba (I. 9. 24. 6-23) consecutively which are the same as those in the printed text. Medhātithi quotes Āpastamba II. 5. 11. 2, II. 4. 7. 16, II. 8. 19. 20, I. 4. 14. 30-31 on Manu II. 247, III. 102, III. 273 and VIII 357 respectively and appears to refer to Āpastamba I. 4. 13. 6 (about "om") on Manu II. 83. The Mitākṣarā has several quotations and Aparārka contains

about two hundred sūtras of Āpastamba, though rather in a mutilated form. But it is not necessary to refer to these and other later works in detail, since Haradatta's commentary, as will be shown later on, was wtitten about the time of Aparārka. Thus from the days of Śabara (500 A. D. at the latest) to 1100 A. D. we have a host of writers who vouch for the authenticity of the extant text of Āpastamba.

About the home and personal history of Āpastamba little is known. Āpastamba is not an ancient name. It does not occur in the Vedic texts. It occurs in the *gaṇa* "Bidādi" in Pāṇini IV. 1. 104. He speaks of himself as belonging to later ages (*avarā*). Vide Āpastamba[101] I. 2. 5. 4. and II. 6. 13. 9. In the *tarpaṇa* he is generally mentioned after Bodhāyana and before Satyāṣāḍha Hiraṇyakeśin (vide note 68a above). Therefore according to tradition his school was elder or more authoritative than that of Hiraṇyakeśin. In one place Āpastamba refers to a peculiar śrāddha usage of the *udīcyas* (II. 7. 17. 17).[102] Āpastamba must be supposed to have embodied in his work the usages of his own country. If he specially mentions the usages of a particular locality, it would follow that he did not hail from that locality. But the exact meaning of " Udīcya " is doubtful. Haradatta quotes a verse of the grammarians, according to which the country north of the Śarāvatī was called "Udīcya". According to the Mahārṇava quoted in the commentary on the caraṇavyūha the Āpastambīyas were to be found to the south of the Narmadā, in the south-east, that is, in Āndhra and the territory about the mouth of the Godāvarī. Therefore it is natural to suppose that Āpastamba's school had its origin in the south and probably in Āndhra. The Pallavas made land grants to Āpastambīyas. Vide I. A. vol. V. page 155.

The age of the Āpastamba-dharmasūtra can be settled within only approximate limits. It is probably later than the Gautama Dharmasūtra and also the Baudhāyayanadharmasūtra and before 500 A. D. it was an authoritative smṛti work according to Śabara. Āpastamba is enumerated by Yājñavalkya as a writer on *dharma* (I. 5)

and by Śaṅkha-Likhita. Its style and grammar (which is un-Paṇinean in the extreme) entitle it to great antiquity. There is no clear reference to Buddhism and other schisms anywhere. It appears to look upon Śvetaketu as not far removed from its own epoch. It was probably written at a time when Jaimini had founded his school. Hence we shall not be far wrong if we assign it to some period between 600--300 B. C. On several points his views are opposed to those of his predecessors, e. g. he rejects secondary sons, condemns *niyoga*, does not admit Paiśāca and Prājāpatya as valid forms of marriage (vide above page 29). There are other points also wherein Āpastamba differs from Gautama and the other sūtra-kāras. Gautama (IV. 14-17) and Baudhāyana (I. 8. 7-12) give long lists of mixed castes and Gautama includes Yavana among them. Āpastamba is silent on this point. But this has hardly any bearing on chronology. Even the Vedic works mention the Niṣāda and the Pūrvamīmāṁśāsūtra has a speçial adhikaraṇa (VI. 1. 51) devoted to him ; the Bṛ. Upaniṣad mentions (IV. 3. 22 and 37) such castes as Cāṇḍāla, and the Gītā mentions the Śvapāka. The Āp. Śrauta speaks of the Niṣāda (9. 14. 12-13). The Āp. Dh. S. (II. 1. 2. 6) mentions Cāṇḍāla, Paulkasa and Vaiṇa. Gautama (17. 30) forbids the eating of the flesh of cows and bulls, while Āp. (I. 5. 7. 30-31) seems to allow it and cites the Vājasaneyaka for support. In this connection it has to be noted that Vasiṣṭha also has a similar sūtra (14. 46). Āp. (I. 9. 27. 10) prescribes a penance for one who practises usury and lays down that one should not eat at the usurer's (I. 6. 18. 22), while Gautama appears to allow usury to a Brāhmaṇa as a calling if done through an agent (X. 6). Baudhāyana, on the other hand, quotes verses that condemn usury in strong language as even worse than brahmahatyā, holds that a Brāhmaṇa who is a usurer should be treated as a śūdra and allows the first two castes to practise usury only towards atheists, śūdras and such like persons (I. 5. 79-81). So these differences of Āp. from others are hardly conclusive as to his chronological position.

The commentary of Haradatta called Ujjvalā-vṛtti is the only one so far recovered. For an account of Haradatta, vide sec. 86. The Smṛticandrikā (I, page 25) quotes a passage from the *bhāṣya* of Āpastamba (II. 6. 15. 19-20) and (II. p. 300) quotes the explanation of the bhāṣyakāra on Āpastamba II. 6 14. 1. Both these passages

are not found in the commentary of Haradatta, though in the latter case, Haradatta holds the same view as that of the Bhāṣyakāra. Similarly the Vīramitrodaya (Vyavahāra, page 671) quotes the bhāṣyakāra of Āpastamba, but that quotation does not agree with Haradatta. Haradatta himself does not call his work *bhāṣya*, but *vṛtti*. Besides the Subodhinī on the Mitākṣarā (on Yāj. II. 132) quotes a passage from the Āpastambadharmavṛtti which is found in Haradatta on Āp. II. 6. 14. 1. Haradatta himself cites sometimes two or three other interpretations of the same sūtra (e. g. on Ap. I. 2. 5. 2; I. 3. 10. 6; I. 5. 15. 20; II. 2. 3. 16). So the *bhāṣyakāra* was probably one of his predecessors.

In Aparārka, Haradatta, Smṛticandrikā and other works there are numerous quotations in verse ascribed to Āpastamba. These quotations are concerned with topics of Āhnika, Śrāddha, and Prāyaścitta. The Smṛticandrikā (III. pp. 423 and 426) quotes a Stotrāpastamba. Haradatta on Gautama (22. 18) quotes several verses on prāyaścitta from Āpastamba. Three of these verses are found in the Āpastamba-smṛti in verse (Jivananda's collection vol. I pp. 567-584 chap. I verses 16, 19, 31). The Smṛti printed by Jivananda contains about 207 verses in ten chapters on prāyaścitta and purifications. But the quotations from the Smṛticandrikā and Aparārkra show that the verse Āpastamba was a much larger work and since they regarded the versified work as equally authoritative with the sūtra work, the versified smṛti must have been comparatively an ancient work.

8. Hiraṇyakeśi-dharmasūtra.

The Hiraṇyakeśi-dharmasūtra forms the 26th and 27th *praśnas* of the Hiraṇyakeśi-kalpa. The Śrauta sūtra has been published by the Ānandāśrama Press (Poona). The Hiraṇyakeśi-gṛhya-sūtra was edited with extracts from the commentary of Mātṛdatta by Dr. Kirste (Vienna, 1889). The Gṛhya forms the 19th and 20th *praśnas* of the Kalpa, each *praśna* being divided into eight paṭalas. The Śrauta-sūtra is largely based on the Śrauta-sūtra of Āpastamba. The Gṛhya-sūtra is indebted to the Gṛhya-sūtra of Bhāradvāja. The Dharmasūtra of Hiraṇyakeśin can hardly be called an independent work. Hundreds of sūtras are borrowed word for word from the Āpastamba Dharmasūtra. The Dharmasūtra of Hiraṇyakeśin is therefore the oldest voucher for the authenticity of Āpastamba's text and is very valuable for checking the latter.

The Hiraṇyakeśins form a sūtra-caraṇa of the Khāṇḍikeya section of the Taittirīyaśākhā and were formed later than the Āpastambīya School. In a grant of the Kongu kings dated in 454 A. D. Brāhmaṇas of the Hiraṇyakeśi School are mentioned (I. A. vol. V. page 136). According to the Mahārṇava quoted in the commentary of the caraṇavyūha, the Hiraṇyakeśins were to be found in the south-west between the Sahya mountain and the ocean and near Paraśurāma (i. e. in the Konkan). There are at present many Brāhmaṇas in the Ratnagiri District who call themselves Hiraṇyakeśins. The Dattaka-mīmāṁsā of Nanda-paṇḍita twice quotes passages from the commentary of Śabarasvāmin on the sūtra of Satyāṣāḍha. If he was identical with the great commentator of the Pūrva-mīmaṁsā (which is almost certain), then we have unimpeachable evidence for the existence of the works of the Hiraṇyakeśins long before the fifth century A. D.

Bühler in his second edition of the Āpastamba-dharmasūtra (1893) gave (in appendix II) the various readings of the Hiraṇyakeśi-dharmasūtra from two MSS. I secured a modern transcript of the Hiraṇyakeśi-dharmasūtra from the Deccan College collection (No 138 of 1881-82), which contains the text and also the commentary of Mahādeva thereon. There are 18 folios for the sūtra and 101 for the commentary. That ms. presents some readings which are not noticed by Bühler as found in the two mss. consulted by him. For example, the ms. reads " saptama āyuṣkāmamaṣṭame brahmavarcasakāmam (reversing the order of years in Āp. I. 1. 1. 21-22), omits the words " yadi snāyāt daṇḍavat plavet' (from Āp. I. 1. 2. 30.), reads 'vastrāṇyeva vasītobhaya &c.' (Āp. I. 1. 3. 9 omits vasīta), reads ' gurave ' for ' ācāryāya ' in Āp. I. 1. 3. 31. The ms. of the Hiraṇyakeśi-dharmasūtra contains certain additions to the sūtras of Āpastamba. For example, a sūtra ' kṣāralavaṇa-madhumāṁsāni ca varjayet ' is added after Āp. II. 9. 22. 14, a sūtra ' teṣām pūjā śreyasyātmanaḥ kāryā ' occurs after Āp. II. 9. 25. 8, and the sūtra ' sarva-dharmāṇām svadharmānuṣṭhānāniyameṣu ca yuktaḥ syāt ' occurs after Āp. II. 9. 25. 13. The manuscript contains a few verses, that are not found in the Āpastambadharmasūtra, introduced by the words ' athāpyudāharanti[103], ' (except in one case

[103] ' पशवश्च मुखादाना अश्मा चालवणोधृ (द्धृ)तः । एतद् ब्राह्मण ते पथ्यं तन्तुभ्यारजनीकृतः ॥ ' after आप. ध. सू. I. 7. 21. 4.; अन्यापकं कुले जातं वो इत्यादानताधिनम् ।

viz. 'putreṇa, &c.) The manuscript also omits certain sūtras found in Āp. e. g. 'varṇajyāyasām cetarair varṇaiḥ' (Āp. II. 5. 11. 8), 'anyatra rāhudarśanāt' (Āp. II. 7. 17. 25), 'athopanayanaṁ tata udakopasparśanam' (Ap. I. 1. 1. 36.). In the case of some sūtras the readings of Hiraṇyakeśin present a smoother and more classical Sanskrit than that of Āpastamba and are manifestly attempts to bring them in a line with the requirements of the śiṣṭas at the time when the Āpastambasūtras were taken over into the Hiraṇyakeśi school. Hiraṇyakeśisūtra has 'pādonam' and 'ardhonam' for 'padūnam' and 'ardhena' of Āpastamba (I. 1. 2. 13-14), 'asandarśane' for 'asandarśe' (Āp. I. 1. 2. 29), 'aglāniḥ' for 'aglāṁsnuḥ' (Āp. I. 1. 3. 22), 'prakṣālayet' for 'prakṣālayīta' (Āp. I. 1. 3. 36), 'kartṛpatyam' for 'kartapatyam' (Āp. I. 2. 5.3) 'yathāśakti' for 'śaktiviṣayeṇa' (Āp. II. 5. 12. 1). Another noticeable feature is that the arrangement of the sūtras into subsections is a good deal different in the two works. Bühler notes that from the 13th khaṇḍikā (6th paṭala) of the second praśna both the manuscripts consulted by him do not indicate the *paṭalas*. The Deccan College manuscript does not number them from the second paṭala in the second *praśna*. The number of paṭalas in the first *praśna* of Hiraṇyakesi is eight, while Āpastamba has eleven paṭalas in each of the *two praśnas*. The distribution of sūtras in the khaṇḍikās is therefore different in the two works. Hiraṇyakeśi has 31 khaṇḍikās in the first *praśna* and 20 in the second. Besides a few of the khaṇḍikās are differently placed. The first khaṇḍikā of Hiraṇyakeśi (first *praśna*) stops after Āp. I. 1. 2. 1, the third reaches up to Āp. I. 1. 4. 6; Āp. I. 8. 22 and 23 (the adhyātmapaṭala) come in Hiraṇyakeśi immediately after Āp. I. 6. 19 and are Hiraṇya. I. 6. 20; Āp. I. 7. 20 and 21=Hir. I. 6. 21-22; Āp. I. 9. 24 and 25. 1--4= Hir. I. 6. 23; Āp. Hir. I. 8. 30. In the second *praśna* the variance in distribution of sūtras into khaṇḍikās is still greater. Besides Āp. II. 4. 8-9 are placed in Hiraṇyakeśi before Āp. II. 3. 6-7 and Āp. II. 6. 13-15 before Āp. II. 5. 10-11. Sometimes a single sūtra of Āpastamba is split up into two and placed in two different khaṇḍikās, e. g. Āp. I. 9. 25. 4 is split into Hir. I. 6. 23. 31 and I. 7. 24. 1 (the portion from 'rājānam gatvā' being the first sūtra of Hiraṇyakeśi's 24th Khaṇḍikā.

The com. of Mahādeva Dīkṣita called Ujjvalā, is almost word for word the same as that of Haradatta's Ujjvalā. That one has borrowed from the other admits of no doubt and Bühler thinks that Mahādeva is the borrower. But there is hardly anything to turn the scale in favour of Haradatta. Sometimes Mahādeva's commentary contains more matter than Haradatta's (e. g. on the sūtras 'Saptame brahmarcasakamam &c. 'Upanayanam vidyārthasya śrutitaḥ', 'dvādaśāvarardhyam') and sometimes Haradatta contains more explanation (e. g. on 'tasmiṅsca vidyākarmāntam &c.; on 'nāpsu ślāghamānaḥ snāyāt', on 'pāṇisaṁkṣubdhenodakenaika &c.'). Mahādeva differs from Haradatta's explanation of the word 'atha', which the former takes in the sense of 'ānantarya or adhikāra', while the latter takes it only in the sense of 'ānaṇtarya'. That Mahādeva also is an early writer follows from the fact (noted by Bühler p. 117n) that portions of his commentary are contained in the Munich Ms. of Haradatta dated Vikrama-Saṁvat 1668 (1611-12 A. D.). It is to be noted that Haradatta after saluting Gaṇeśa at the beginning of his Ujjvalā does obeisance to Mahādeva (which may mean God Śiva or the author Mahādeva if he was the *guru* or father of Haradatta). Mahādeva often comments on the sūtras as found in Āpastamba and not on the readings of them as existing in the Hiraṇyakeśi school; e. g. he comments on 'padūnam', on 'adhāsanaśāyi' for ardhāsanaśāyī (the reading of the sūtra), on 'ātmasvastyayanārthena' (Āp. II. 5. 11. 9) for 'svastyayanārthena' of the ms. of Hir. The explanations of the two writers sometimes differ, as for example on 'ācaryādhīnas syād-anyatra patanīyebhyaḥ' (Āp. I. 1. 2. 19[104]). One more circumstance that is worthy of note is that the Ujjvalā of Haradatta does not contain many quotations from Smṛtis as com-

[104] हरदत्त explains 'आचार्याधीनो भवेत्युपनयनान्ते यत्संशासनं तत्सिद्धयेवाचार्याधीनतानूद्यते,' while महादेव makes it a विधि 'आचार्याधीनतया स्थातव्यमिति विधिः'.

pared with his commentary on the Gautamadharmasūtra. Although one may be inclined to hold that it is Mahādeva who borrows, it must be clearly recognized that there is hardly any positive evidence in support of such a view. There is a commentary called Vaijayantī on the Hiraṇyakeśi-śrauta-sūtra. This Mahādeva is very likely identical with the Mahādeva who commented upon the dharmasūtra.

9. Vasiṣṭha-dharmasūtra.

This *dharmasūtra* has been printed several times. The collection of Jivananda (part II, pp. 456-496) contains only 20 chapters and a portion of the 21st and so does the collection of Mr. M. N. Dutt (Calcutta 1908). The Ānandāśrama collection of smṛtis (1905, pp. 187-231) and the edition of Dr. Führer in the B. S. series (1916) contain thirty chapters. According to Dr. Jolly (R. u S., p. 6) some mss. give only six or ten chapters. The Vasiṣṭhadharmasūtra with the commentary called Vidvanmodinī was printed at Benares. In the following Dr. Fuhrer's edition has been used.

Kumārila (vide note 55 above) tells us that the dharmasūtra of Vasiṣṭha was specially studied by the students of the Ṛgveda, but that along with other dharmasūtras it is authoritative for all *caraṇas*. No śrauta and gṛhya sūtras of Vasiṣṭha, if they ever existed, have come down to us. We have therefore to fall back upon one of two hypotheses, *viz*. either the dharmasūtra of Vasiṣṭha is the solitary remnant of a school that might have once possessed a complete *kalpa* or that it was composed as an independent work on *dharma* and was subsequently seized upon by the students of the Ṛgveda, who had only śrauta and gṛhya sūtras of Āśvalāyana. For reasons given elsewhere I incline to the latter view. The *dharmasūtra* of Vasiṣṭha cites quotations from all Vedas and beyond the name Vasiṣṭha there is hardly anything special in the dharmasūtra to connect it with the Ṛgveda. It is true that in the 17th chap. several verses of the Ṛgveda (such as I. 21. 5, I. 124. 7, V. 4. 10 which occur in sūtras, 3, 16 and 4 respectively) and several passages from the story of Śunaḥśepa in the Aitareyabrāhmaṇa are quoted by the sūtra and that several hymns of the Ṛgveda, such as the *asyavāmīya* (Ṛg. I. 164), *haviṣpāntīya* (Ṛg. X. 88), *Aghamarṣaṇa* (X. 190), are referred to in the 26th chap. But there is nothing remarkable in this as some of the verses and *sūktas* are mentioned in the Baudhāyanadharmasūtra also. Besides the Vas. Dh. S. quotes several

passages from the Taittirīyasaṁhitā (as in Vas. V. 7-9, which quotes Tai. S. II. 5. 1. 6 and Vas. XI. 48 which quotes Tai. S. VI. 3. 10. 5), the Śatapatha-brāhmaṇa, the Maitrayṇīya-saṁhitā (in Vas. I. 37).

The contents of the Vas. Dh. S. are :— I Definition of *Dharma*, limits of Āryāvarta, who are sinners, the mortal sins, a brāhmaṇa can marry a girl of any of the three higher castes, six forms of marriage, the king was to regulate the conduct of people and to take the sixth part of wealth as a tax ; II. The four *varṇas*, the greatness of *ācārya*, before *upanayana* there is no authority for religious rites, the privileges and duties of the four castes, in distress a Brāhmaṇa could subsist by resorting to the calling of a Kṣatriya or Vaiśya, a Brāhmaṇa was forbidden to sell certain things, usury condemned, rates of interest allowed ; III. Censure of illiterate Brāhmaṇa, rules on finding treasure-trove, who are *ātatāyins*, when they could be killed in self-defence, who are *paṅktipāvanas*, constitution of a *pariṣad*, rules about *ācamana*, *śauca* and purification of various substances ; IV. The constitution of the four castes is based upon birth and the performance of *saṁskāras*, the duties common to all castes, honouring guests, *madhuparka*, impurity on birth and death ; V. dependence of women, rules of conduct for a *rajasvalā* ; VI. usage is transcendental *dharma*, praise of *ācāra*, rules about answering calls of nature, moral characteristics of a brāhmaṇa and the peculiar characteristics of a śūdra, censure of partaking food at the houses of śūdras, rules of etiquette and good breeding ; VII the four āśramas, and the duties of a student ; VIII. Duties of an householder, honouring guests, IX. rules for forest hermits ; X. rules for *saṁnyāsins* ; XI. six persons who deserve special honour, viz. the priest at the sacrifice, son-in-law, king, paternal and maternal uncles and a *snātaka* ; order of precedence in serving food, guests, rules about śrāddha, times for it, the brāhmaṇas to be invited at it, rules about *agnihotra*, *upanayana*, the proper time, staff, girdle &c. for it ; method of begging for alms, prāyaścitta for those whose *upanayana* is not performed ; XII. rules of conduct for a *snātaka* ; XIII. rules about the beginning of Vedic study, rules about holidays for Vedic studies, rules about falling at the feet of the *guru* and others, guiding principles in precedence as regards respect (learning, wealth, age, relationship, avocation, each prior deserving more consideration than each succeeding one), rule of the road ; XIV. rules about forbidden and permitted food, rules about the flesh of certain birds and animals ; XV. rules of adoption,

about excommunication of those who revile the Vedas or perform sacrifices of śūdras and for other sins; XVI. About administration of justice, king as guardian of minors, threefold *pramāṇas*, viz. documents, witnesses and possession; rules about adverse possession and about king's advisers; qualifications of witnesses; perjury condoned in certain cases; XVII. praise of *aurasa* son; conflicting views about *kṣetraja* son, viz. whether he belongs to the begetter or to him on whose wife he is begotten; twelve kinds of sons; partition between brothers, grounds of exclusion from partition, rules of *niyoga*, rules about grown-up unmarried girl, rules of inheritance, king as ultimate heir; XVIII. *pratiloma* castes such as cāṇḍāla, no Vedic studies for śūdras or in their presence; XIX. king's duty to protect and to punish; importance of *purohita*; XX. about prāyaścittas for various acts unknowingly or knowingly done; XXI. prāyaścitta for adultery by Śūdra and others with women of the Brāhmaṇa caste or for cow-killing; XXII. prāyaścitta for eating forbidden food and sacred texts that purify in case of sins; XXIII. penances for *Brahmacārin* having sexual intercourse, for drinking wine &c.; XXIV. Kṛcchra and Atikṛcchra; XXV. secret penances and penances for lesser sins; XXVI-VII. virtues of prāṇāyāma, Vedic hymns of Gāyatrī as purifiers; XXVIII. praise of women, eulogy of Vedic *mantras* like *aghamarṣaṇa* and of gifts; XXIX. rewards of gifts, *brahmacarya*, *tapas* &c.; XXX. eulogy of *dharma*, truth and *brāhmaṇa*.

The Vas. Dh. S. resembles in several respects the other dharmasūtras described above. It contains almost the same subjects and is similarly composed in prose interspersed with verses. The Vas. Dh. S. is in style like the Gautamadharmasūtra and has many sūtras identical with or closely resembling those of the latter. Vide. p. 18 above. It has also several sūtras closely corresponding with the sūtras of Baudhāyana. Grave doubts have been entertained about the authenticity of the whole of the text of the Vas. Dh. S. as the mss. contain varying numbers of chapters from 6 to 30, and as the text is hopelessly corrupt in several places (e. g. vide note 108 below). The Vas. Dh. S. contains many verses which bear the impress of a comparatively late age. Chapters 25-28 are entirely in verse, while there are other chapters (like III. 2-12, VI. 1-13, XI. 20-42) which contain many verses interposed between prose passages. In this respect Vasiṣṭha's work is on a par with Bau-

dhāyana's, in the fourth praśna of which there are chapters entirely consisting of verses. It has therefore been argued that the text of Vasiṣṭha was tampered with freely, particularly as regards the chapters at the end. But as shown below it will have to be admitted that the interpolations, whatever they may be, were made at a very early period. The Mitākṣarā quotes Vas. by name about 80 times and the quotations are taken from almost every chapter from the first to the last. For example, Mit. quotes Vas. 27. 1 on Yāj. III. 311, Vas. 27. 21 on Yāj. III. 324, Vas. 28. 7 on Yāj. III. 298, Vas. 28. 18, 19 and 22 on Yāj. III. 310. Even Medhātithi quotes Vasiṣṭha over twenty times. The quotations are mostly taken from the first chapter to the 21st. Only one quotation from the last few chapters (viz. 27. 16) has been found in Medhātithi (on Manu XI. 211) and that too is not quoted as Vasiṣṭha's, but is ascribed to 'others.' Viśvarūpa, who flourished about the first quarter of the 9th century quotes Vas. about thirty times in his commentary on the *ācāra* and *vyavahāra* sections of Yāj. These quotations hardly differ in any respect from the text of Dr. Führer's edition and are scattered over almost all chapters from the 1st to the 17th, six quotations being taken from chapters 3 and 17 each. In the prāyaścitta section Viśvarūpa quotes Vas. even more frequently. Besides several sūtras from the 1st, 4th, 10th and 11th chapters, he quotes here no less than 22 sūtras of the 20th chap. and 9 of the 21st. Moreover sūtras 37 and 39 of the 23rd chap. are quoted (on Yāj. III 281-282). What is more remarkable is that two verses (2-3) of the 28th chapter are ascribed to Vasiṣṭha and explained in detail (on Yaj. III. 256), while Vas. 28. 4 is quoted without the author's name. These facts make it certain that the Vas. Dh. S. contained in Viśvarūpa's day all the chapters from the first to the 23rd and also the 28th. Śaṅkara in his bhāṣya in Bṛ. Upaniṣad (III. 5. 1) quotes Vas. X. 4 and on Bṛ. Up. IV. 5. 15 he quotes Vas. VII. 3. The Vas. Dh. S. quotes numerous verses preceded by the words 'athāpyudāharanti', which is the case with Baudhāyana also. Several verses occur without these words being prefixed, but most of them seem to be quotations (e. g. Vas. II. 3 which combines Manu. II-169 and 170, IV. 6 which is Manu 5. 41, VI. 6 and 8 which are Manu IV. 157 and 158). Some of these verses introduced with the words 'athāpi' &c. as well as some of those not so introduced are in the regular classical Upajāti, Upendravajrā or Indravjrā (vide. I. 38, X. 20 for verses with *athapi* &c.

and VI. 9 and 25, X. 17, XVI. 36 for verses without them). Some of the verses are in the ancient Triṣṭubh form (e. g. VI. 3 and 30, VIII. 17, XVII. 71). In one verse (VI. 5) there are twelve letters in the first *pāda* and 11 in the rest. One quotation with the words "athāpi" &c. is in prose (II. 5). There are a few un-Pāṇinean forms like 'Vivadanti' in XIV.47 (vide Pāṇini I. 3.47). It looks as if the dharmasūtra once ended with the 24th chapter, where we have an injunction (in sūtra 6) against imparting the dharmasūtra to one who is not a son or pupil. The same sūtra occurs in Baudhāyana Dh. S. IV. 4. 9 and the succeeding sūtra is the same in both. But the words 'prāyaścitta has been described in the *rahasya* sections for playing false to the husband' (in Vas. V. 4) apparently refer either to chapters 25-28 (which contain *rahasya* penances) or to some prototype of those chapters now lost.

The Vas. Dh. S. quotes largely ftom the Ṛgveda and other Vedic *Saṁhitās*. Among the Brāhmaṇas, the Aitareya and Śatapatha are frequently cited. The Vājasaneyaka (Vas. 12. 31 and 23. 13) and the Kāṭhaka (Vas. 12. 24 and 30. 5) are mentioned by name. The Tai. Āraṇyaka is quoted in Vas. 23. 23. The Upaniṣads and Vedānta occur in 22. 9. Vasiṣṭha quotes a *gāthā* of the Bhāllavins from their Nidāna work about the extent of the home of Brāhmanism, which is quoted by Baudhāyana also (Dh. S. I. 1. 27). He speaks of the *aṅga*s of the Veda (3. 23 and 13. 7) and gives their number as six (3. 19). Itihāsa and Purāṇa are mentioned in 27. 6. The science of words (grammar), of omens and portents and of astrology and astronomy (Nakṣatravidyā) are referred to in 10. 20-21. He prohibits the learning of the language of the Mlecchas (in 6. 41). Vas. quotes a verse that states that the view holding the *aprāmāṇya* of the Vedas leads to perdition (12. 41). In Vas. II. 8–11 occurs the Vidyāsūkta in four verses that we meet with in the Nirukta (II. 4). Vasiṣṭha calls his own work dharmaśāstra (in 24. 6) and probably refers to other works on *dharma* in the words 'one who studies dharmas' (in 3. 19). The study of dharmaśāstra as a penance for even mortal sins is spoken of in 27. 19. Vas. quotes several authors on dharmaśāstra. He quotes a verse from Hārīta (in II. 6) which occurs in Baudhāyana also with slight variations (Baud. Dh. S. I. 2. 7), though without the author's name. The two halves of this verse are almost the same as the latter halves of Manu. 2. 171-172. Bühler is therefore not quite accurate when he

says without qualification that the verse attributed to Hārīta occurs in Manu (p. XX, S. B. E. vol. XIV). Vas. quotes Gautama twice (in 4. 35 and 37) about impurity on death, the first corresponding to Gautama (14. 41), while there is nothing in Gautama to correspond to the 2nd. Vas. quotes a verse (11. 20) which mentions Yama by name and embodies the latter's views. Vas. (18. 13-15) quotes three ślokas sung by Yama, one of which (14) is the same as Manu 4. 80 and another (15) is very similar to Manu 4. 81. Another śloka of Yama is quoted by Vas. (19. 48) which is almost the same as Manu 5. 93. From these facts and others Bühler draws the conclusion (S. B. E. vol. XIV, p. XX) that these verses were taken from the Mānavadharmasūtra, which occupied the same position in Vasiṣṭha's day as the Manusmṛti does at present. I demur to this conclusion, which will be discussed later on in detail (under Manusmṛti). Vas. (14. 30-32) quotes ślokas of Prajāpati, the first of which mentions Yama by name. Vas. 14. 16-19 and 24-27 are quoted as ślokas of Prajāpati, three of which (14. 16, 18 and 24) are practically the same as Manu. 4. 248, 249 and 5. 127. Vas. 14. 19 contains a *pāda* which occurs in Manu 4. 212. It is remarkable that the Vas. Dh. S. cites Vasiṣṭha himself with great reverence (as *bhagavān*) in 2. 50 (about the rate of interest), 24. 5 (about Kṛcchra penance), 30. 11. In numerous places the Vas. Dh. S. either refers to Manu by name or quotes the views of Manu (under the form 'iti Mānavam') or a śloka of Manu (with the words 'Mānavaṁ ślokam). All these passages have an important bearing on the age of the Manusmṛti and on the supposed existence of a Mānavadharmasūtra. They therefore deserve to be carefully examined. Vas. I. 17 is in prose (about local, family or caste usages) and summarises the views of Manu. The absence of the word 'iti' before 'abravīn' Manuḥ' and the form of the sūtra itself clearly establishes that Vas. is not directly quoting a sūtra of Manu. That sūtra is only a summary of our Manu I. 118. Vas. 3. 2 (which is preceded by the words 'Mānavaṁ ślokam') is Manu II. 168. And so are Vas. 13. 16, 20. 18, which are Manu 4.117 and 11.151 (with very slight variations). That the latter existed in Vasiṣṭha's text is vouched for by Aparārka (p. 1075). Vas. 4. 5 is in prose and cites the view of Manu that animals may be sacrificed only for worshipping and honouring the

manes, deities and guests [105]. There is hardly anything to show that it is a direct quotation from Manu and not a summary of Manu's views. The sūtra briefly summarises the views that we find expressed in our Manu 5. 22, 32, 41 and 42 (the words of 42 'eṣvartheṣu paśuṁ hiṁsan' are interesting and bear a close resemblance to 'paśum hiṁsyād' in Vas.). That sūtra is followed by a verse which is the same as Manu 5. 41. It is to be noted that the same verse occurs in the dharmasūtra of Viṣṇu (51. 64) which reads 'nānyatreti kathaṁcana' for 'nānyathetyabravīn Manuḥ'. This change appears to have been purposely made to keep up the impression that the Viṣṇu-Dh. S. emanated from Viṣṇu himself and so could not have borrowed from a human author. Vas. 4. 7 is very similar to Manu 5. 48. Bühler (S. B. E. Vol. 25, p. xxxi) is wrong in taking Vas. 4. 8 as a quotation from the Mānavadharmasūtra. There is nothing to show that it is so taken. It is more probably a quotation from or a summary of a Brāhmaṇa passage (compare a quotation in Aparārka on Yāj. 1. 109, which is similar). Vide note 46. Vas. 23.43 (where Manu is referred to as prescribing an easy penance called Śiśukṛcchra for children and old men) corresponds more or less with Manu 11. 211 and 219 and Vas. 26. 8 has evidently Manu 11. 260 in view. There are only two places in Vasiṣṭha where the name of Manu occurs for which it is not possible to point out a corresponding verse in the Manusmṛti. They are Vas. 12. 16 and 19 37. The latter is cited as a Mānavaśloka and is in the Upajāti metre.[106] Because this is not found in our Manu, Bühler and other Western scholars seem to think that the verse is taken from the Mānavadharmasūtra which once existed in mixed prose and verse and is now lost. But as will be shown elsewhere this hypothesis is based, to say the least, on very slender foundations. Besides these two that are not found in our Manu, there are about forty verses that are common to the Vas. Dh. S. and the Manusmṛti and about a dozen verses which, though not strictly identical, are more or less similar. There are several prose sūtras of Vas. which correspond to the

verses of Manu almost word for word.[107] The hypothesis that commends itself to me is that Vas. contains borrowings from the Manusmṛti or its purer ancient original in verse.

In the words 'Śrāmaṇakenāgnimādhāya' (Vas. 9. 10), the sūtra of Vikhanas seems to be referred to. Gautama (Dh. S. 3. 26) contains the same words. Vasiṣṭha's 22nd chap. is the same as Gautama's 19th and Baudhāyana's tenth in the 3rd *praśna* and seems to have been borrowed from Gautama. Vasiṣṭha refers to the views of others in the words 'eke' or 'anye' (Vas. 1. 12, 13, 25; 4. 10; 17. 66; 20. 2). Dr. Jolly (S. B. E. vol. VII, p. xviii) thinks that Vas. 28. 10–15 and 18–22 are borrowed from the Viṣṇudharma-sūtra chap. LVI and LXXXVII for its original the Kāṭhakadharma-sūtra. Dr. Jolly is not right with regard to both the places. Bühler has already pointed out his mistake as to the second passage (S. B. E. vol. XIV p. XXII). The verses in Vas. 28. 10–15 occur in several smṛtis (vide Śaṅkhasmṛti, 10th chap. in Jivananda's ed. part II. pp. 356–357 for the same verses). Besides Vas. 28. 11 occurs in Baud. Dh. S. IV. 3. 7. Hence it is hardly proper for any scholar to make the dogmatic assertion that one particular smṛti must have borrowed from any other. The rather very corrupt passage in Vasiṣṭha (16. 21-23[108]) very closely resembles a passage of Śaṅkha, which is cited by Viśvarūpa on Yāj. I. 305 and by the Kṛtya-kalpataru (I. O. Cat. Ms. No. 852, folio 8a).

Bühler is of opinion that the home of the school to which the Vas. Dh. S. belonged lay to the north of the Narmadā and the

'तेषां वेदमधीत्य वेदौ वेदान्वाविशीर्णब्रह्मचर्यो यमिच्छेत्तमावसेत्।' compare मनु 3. 2; वसिष्ठ 13. 61 'तृणभूम्यग्न्युदकवाक्सूनृतानसूयाः सतां गृहे नोच्छिद्यन्ते कदाचन।', compare मनु 3. 101; वसिष्ठ 16. 30 'क्षीणां साक्षिणः स्त्रियः कुर्याद् द्विजानां सदृशा द्विजाः शूद्राणां सन्तः शूद्राश्चान्त्यानामन्त्ययोनयः', compare with मनु 8. 68 'क्षीणां साक्ष्यं स्त्रियः कुर्युर्द्विजानां सदृशा द्विजाः। शूद्राश्च सन्तः शूद्राणामन्त्यानामन्त्ययोनयः॥'.

108 The printed Vas. reads 'वेधसो वा राजा श्रेयान् गृध्रपरिवारं स्यात्। गृध्रपरिवारं वा राजा श्रेयान्। गृध्रपरिवारं स्यान्न गृध्रो गृध्रपरिवारं स्यात्'. This hardly makes any sense. The कृत्यकल्पतरु presents a good reading (from शङ्खलिखित) 'न गृध्नुपरिवारः स्यात्। कामं गृध्रो राजा श्रेयान् हंसपरिवारः। परिवाराद्धि दोषाः प्रादुर्भवन्ति। तेऽलं विनाशाय।'.

Vindhya (S. B. E. vol. XIV p. XVI). When it is extremely problematical whether the Vas. Dh. S. was the product of a school, it is idle to speculate as to the home of the Vas. Dh. S. Bühler's is no more than a mere conjecture and it is better to admit that we know nothing positive at present on the point.

The earliest work to refer to Vasiṣṭha as an authority on *dharma* is our Manu (8. 140), saying that Vas. allowed 1/80th of the principal as interest per month. This appears to refer to the rule in Vas. 2. 50. We saw above that Vas. borrows from the Manusmṛti, which in its turn quotes a rule of Vasiṣṭha. The explanation of this is twofold. Both the Manusmṛti and Vas. have received later additions and further it is possible that the present Vas. Dh. S. is the work of some one who had received the teachings of Vas. through a succession of teachers and disciples. Yāj. mentions (1. 4) Vasiṣṭha as a writer on *dharma*. The Tantravārtika as seen above (note 55) remarks that the Vas. Dh. S. was studied by Ṛgvedins. The same work when speaking of works on dharma puts Manu, Gautama and Vasiṣṭha in the forefront.[108a] Viśvarūpa, Medhātithi and other early commentators largely quote from Vas. The verse 'agnerapatyam' (Vas. 28. 16) occurs in the Ragiṁ copperplate of Tīvaradeva of the last quarter of the 8th century (Fleet's Gupta Inscriptions No. 81). Therefore the existence of a work of Vasiṣṭha on dharma at least in the first centuries of the Christian era is vouched for with certainty and the authenticity of its text is supported by eminent writers from the 7th century downwards. Aparārka quotes passages from the Bhaviṣyapurāṇa which have in view the present text of Vas.[109] Some of the views held by Vasiṣṭha are very ancient. For example, he speaks of the twelve secondary sons, assigns a very inferior position to the Dattaka son (17th chapter), allows *niyoga* (17. 56 ff) and the remarriage of child widows (17. 74); like Āpastamba he mentions only six

108a 'प्रायेण मनुगौतमवसिष्ठादिप्रणीताः समानेष्वर्थेषु धर्मसंहिता वर्तन्ते । तेनाविगानात्ताभ्य एव श्रुतयः स्वनुमानाः । न च व्याकरणस्य तामिः समानार्थत्वम् ।' तन्त्रवार्तिक on जैमिनि I. 3. 24.

109 'वसिष्ठेन समाख्यातं ब्रह्महत्याव्यपोहनम् । द्वादशरात्रमब्भक्षो द्वादशरात्रमुपवसेत् ॥' अपरार्क p. 1067 (this is वसिष्ठ 23. 38); 'वसिष्ठेन तथोक्तं वै प्रायश्चित्तं सुरार्थिप । कामतो मद्यपाने तु न सुरायाः कदाचन ।' अपरार्क p. 1075 (this is वसिष्ठ 20. 19).

forms of marriage (1. 28-29), *brāhma, daiva, ārṣa, gāndharva, kṣātra and mānuṣa.* In some respects his views are different from those of early writers like Gautama and Baudhāyana. He prohibits the marriage of a Brāhmaṇa with a śūdra woman (I. 25-26). Vide Baud. Dh. S. I. 8. 2 for the contrary view.' He elaborates rules of adoption (15th chapter) which are not found in Gaut. or Baud. or Āpastamba. He speaks of documents as one of the three means of proof (Vas. 16. 10-15), while Gautama, Āpastamba and Baudhāyana are silent on the point, though in Gautama (13. 4) there appears to be a reference to documents. Taking all these things into consideration it may be said that Vasiṣṭha is later than Gautama, Āpastamba and Baudhāyana, but much earlier than the beginnings of the Christian era and may tentatively be assigned to the period between 300-100 B. C. It has been asserted by an eminent authority (Cambridge History of India vol. I, p. 249) that Vasiṣṭha 18. 4 (vaiśyena brāhmaṇyām-utpanno Rāmako bhavatītyāhuḥ) probably contains a reference to the Romans. This assumptiou is gratuitous and does not deserve serious consideration. The reading Romaka (on which the learned writer relies) is not supported by the best mss. and it is most hazardous to seize with avidity on a variant reading and to build an imposing structure of chronology thereon. The offspring of a Vaiśya male from a Brāhmaṇa woman is designated Rāmaka by Vasiṣṭha, while Gautama calls him Kṛta (4. 15) and Baud. Dh. S. (I. 9. 7) calls such an offspring Vaidehaka ; so Rāmaka has as much to do with the Romans as with Rameses. In the *nibandhas* there are several quotations ascribed to Vasiṣṭha which are not found in the printed Dharmasūtra. For example, Haradatta on Gaut. (22. 18) quotes a verse in the Upajāti metre which is not found in the present text [110].

So early a writer as Viśvarūpa cites (on Yāj. I. 19) the views of a writer called Vṛddha-Vasiṣṭha. The Mit. on Yāj. (II. 91) quotes the definition of a *jayapatra* (judgment) from Vṛddha-Vasiṣṭha and on III. 20 quotes him about impurity on miscarriage. The Smṛticandrikā quotes about 20 verses from Vṛddha-Vasiṣṭha on *āhnika* and śrāddha ; Bhaṭṭoji in his gloss on the Caturvimśatimata

110 The verse is न नालिकेरेण न शङ्खवालैर्न चापि मौञ्जेन न वल्कशूलैः । [illegible] न नियन्धनीया वधूजनस्तिष्ठेत् परशुं प्रगृह्य ॥ The same verse is quoted in मिताक्षरा (on याज्ञ. III. 264) without the author's name.

(p. 12) seems to quote a prose passage fron Vṛddha-Vasiṣṭha. From the above it follows that Vṛddha-Vasiṣṭha was an early compilation and dealt with almost all such topics (including Vyavahāra) as are dealt with by Yāj. The Mit. also quotes a Bṛhad-Vasiṣṭha. The Smṛticandrikā (III. p. 300) quotes a few verses from a Jyotir-Vasiṣṭha. The I. O. catalogue (No. 1339 p. 392) speaks of a Vasiṣṭha-smṛti in ten *adhyāyas* about the religious observances and duties enjoined on devotees of Viṣṇu.

That Yajñasvāmin wrote a commentary on the Vas. Dh. S. follows from Govindasvāmin's comment on Baud. Dh. S. (II. 2. 51), where he quotes Vas. 21. 13 and Yajñasvāmin's comment thereon.

10. Viṣṇudharmasūtra.

The Viṣṇudharmasūtra has been printed several times in India, viz. by Jivananda in his Dharmaśāstrasaṅgraha (1876 part I pp. 70-176), by the Bengal Asiatic Society (1881, ed. by Dr. Jolly with extracts from the commentary Vaijayantī), by M. N. Dutt (Dharma-śāstra texts, vol. II. pp. 541-666, Calcutta, 1909) and translated by Dr. Jolly (in the S. B. E. vol. VII with an Introduction). In the present work Dr. Jolly's edition has been used. The sūtra contains one hundred chapters. Though the number of chapters is so large, the sūtra is not very extensive. There are several chapters such as 40, 42 and 76 that contain only one sūtra and one verse. The first chapter and the last two are entirely in verse; the remaining chapters are in mixed prose and verse, the versified portion being generally at the end of each chapter. As pointed out by the Vaijayantī the sūtra is in close relation to one of the oldest schools of the Yajurveda, viz. Kaṭha. It also stands in a peculiar relation to the extant Manusmṛti. According to the Caraṇavyūha, Kaṭha and Cārāyaṇīya are two of the twelve sub-divisions of Caraka-śākhā of the Yajurveda. Dr. Jolly (S. B. E. vol. VII p. XII) says that the Viṣṇudharmasūtra has four chapters (21, 67, 73 and 86) in common with the Kāṭhak-gṛhya (except the final parts in 21, 67, 86) and that both drew from a common source. Bühler points out (West and Bühler's digest, 3rd ed. p. 35) that the Kāṭhakagṛhya found in Kashmir agrees closely with the Dharmasūtra of Viṣṇu and the *mantras* in the latter agree with the Kāṭhaka recension of the Yajurveda. But the Viṣṇudharma-sūtra is not the work of the same author that composed the Kāṭhaka Śrauta or Gṛhya sūtras, nor does it appear that it formed part of the

Kāṭhaka Kalpa. Dr. Jolly (R. u. S. p. 7) says that Govindarāja (12th century) in his Smṛtimañjarī cites a passage in prose from a Kaṭhasūtrakṛt on the penance for Brāhmaṇa murder which is wanting in our Viṣṇusmṛti (vide S. B. E. Vol. 25, p. xxi n for the passage).

The contents of the Viṣṇu-dharma-sūtra are :-1. The earth being lifted out of the surging ocean by the great Boar, went to Kaśyapa to inquire as to who would support her thereafter, and was sent by him to Viṣṇu who told her that those who would follow the duties of *varṇas* and *āśramas* would be her support, whereupon the earth pressed the great God to impart to her their duties; 2. the four *varṇas* and their *dharmas*; 3. the duties of kings (rājadharmāḥ); 4. the Kārṣāpaṇa and smaller measures; 5. punishments for various offences; 6. debtors and creditors, rates of interest, sureties; 7. three kinds of documents; 8. witnesses; 9. general rules about ordeals; 10-14. ordeals of balance, fire, water, poison and holy water (*kośa*); 15. the twelve kinds of sons, exclusion from inheritance, eulogy of sons; 16. offspring of mixed marriages, aud mixed castes; 17. partition, joint family and rules of inheritance to one dying sonless, re-union, strīdhana; 18. partition among sons of a man from wives of different castes; 19. carrying the dead body for cremation, impurity on death, praise of Brāhmaṇas; 20. the duration of the four Yugas, Manvantara, Kalpa, Mahākalpa, passages inculcating that one should not grieve too much for the departed; 21. the rites for the dead after period of mourning, monthly śrāddha, sapiṇḍīkaraṇa; 22. periods of impurity on death for *sapiṇḍas*, rules of conduct in mourning, impurity on birth, and rules about impurity on touching various persons and objects; 23. purification of one's body and of various substances; 24. marriage, forms of marriage, inter-marriages, guardians for marriage; 25. the *dharmas* of women; 26. precedence among wives of different castes; 27. the saṁskāras, garbhādhāna and others; 28. the rules for *brahmacārins*; 29. eulogy of ācārya; 30. time for the starting of Vedic study and holidays; 31. father, mother and ācārya deserve the highest reverence; 32. other persons deserving of respect; 33. the three sources of sin, viz. passion, anger, greed; 34. kinds of *atipātakas*, deadliest sins; 35. five *mahāpātakas*; 36. *anupātakas*, that are as deadly as the mahāpātakas; 37. numerous upapātakas; 38-42. other lesser sins; 43. the twenty one hells and the duration of hell torments for various sinners; 44. the various low births to which sinners are consigned for various sins; 45. the

various diseases suffered by sinners and the low pursuits they have to follow by way of retribution; 46-48. various kinds of kṛcchras (penances), sāntapana, cāndrāyaṇa, prasṛtiyāvaka ; 49. actions prescribed for a devotee of Vāsudeva and the rewards thereof; 50. prāyaścitta for killing a brāhmaṇa and other human beings, for killing cows and other animals; 51-53. prāyaścittas for drinking wine and other forbidden substances, for theft of gold and other articles, for incest and sexual intercourse of other kinds; 54. prāyaścittas for miscellaneous acts ; 55. secret penances ; 56. holy hymns like *Aghamarṣaṇa* that purge sin ; 57. whose society should be avoided, Vrātyas, unrepentant sinners, avoiding gifts; 58. the pure, variegated (mixed) and dark kinds of wealth ; 59. The duties of house-holders, *pākayajñas*, the five daily *mahāyajñas*, honouring guests; 60. the daily conduct of a householder and good breeding ; 61-62. rules about brushing the teeth, *ācamana*; 63. means of livelihood for a house-holder, rules for guidance, good and evil omens on starting on journey, rule of the road; 64. bathing and *tarpaṇa* of gods and Manes; 65-67. worship of Vāsudeva; flowers and other materials of worship, offering of food to deities and *piṇḍas* to ancestors and giving food to guests; 68. rules about time and manner of taking food; 69-70. sexual intercourse with wife and about sleep; 71. general rules of conduct for a *snātaka*; 72. value of self-restraint; 73-86. śrāddhas, the procedure of śraddhas, aṣṭakā śrāddha, the ancestors to whom śrāddha is to be offered, times of śrāddha, fruits of śrāddha on the several week days and the 27 *nakṣatras* and the *tithis*, materials for śraddha, brāhmaṇas unfit to be invited at śrāddha, brāhmaṇas who are *paṅkti-pāvana;* countries unfit for śrāddha, tīrthas, letting loose of a bull; 87-88. gifts of antelope skin, or a cow; 89. kārtika snāna; 90. eulogy of gifts of various sorts ; 91-93. works of public utility such as wells, lakes, planting gardens, embankments, gifts of food, flowers &c.; difference in merit according to the recipient ; 94-95. rules about forest hermit (vānaprastha); 96-97. about *saṁnyāsa*, anatomy of the bones, muscles, veins, arteries &c.; concentration in various ways 98-99. praise of Vāsudeva by the Earth and of Lakṣmī; 100. rewards of studying this Dharmaśāstra.

The Viṣṇudharma-sūtra somewhat resembles the Dharma-sūtra of Vasiṣṭha. Like the latter it is full of verses. But one feature which is peculiar to the Viṣṇu-dharmasūtra is that it professes to be a revelation by the supreme Being. None of the other dharma-

sūtras so far described assumes this role. The style of the Viṣṇudharmasūtra is easy and somewhat diffuse. It presents hardly any ungrammatical forms. The printed text is corrupt only in a few cases; the verses occur generally at the end of chapters. Sometimes the number of verses in a chapter is very large e. g, in chapter 20 there are 21 sūtras and 32 verses, in chapter 23 there are 24 verses, in chap. 43 there are 14, in chap. 51 there are are 20 verses. Some of the verses are in the classical Indravajrā (19. 23-24) and the Upajāti metres (23.61 and 59. 30) and a few are Triṣṭubhs (29. 9-10, 30. 47, 72. 77). The three Triṣṭubhs (29. 9-10, 30. 41) are three out of the four verses of the Vidyā-sūkta occurring in the Nirukta (II. 4). There is one verse (72. 6) which has eleven letters in the first *pāda* and twelve in the remaining three.

In determining the age of the Viṣṇudharmasūtra one is confronted with a difficult problem. Some of the chapters undoubtedly contain material which is comparatively old and on a level with the ancient Dharmasūtras of Gautama and Āpastamba. Such are the chapters about rājadharma and punishments (3 and 5), the rules about twelve sons and the mixed castes (15-16), funeral rites and mourning (21 and 22). But there are very large portions of the work that bear a clear impress of a later date. The Viṣṇudharmasūtra and the Manusmṛti have at least 160 identical verses. But this is not all. There are hundreds of sūtras which are merely the prose equivalents of verses from the Manusmṛti. For example, Viṣṇu 2. 3 and Manu 2. 16, Viṣṇu 3. 4 and 6 and Manu 7. 69-70, Viṣṇu 3. 7-10 and Manu 7. 115, Viṣṇu 3. 11-15 and Manu 7. 116-117, Viṣṇu 4. 1-13 and Manu 8. 132-137, Viṣṇu 5. 4-7, and Manu 9. 237, Viṣṇu 20. 1-21, and Manu I. 67-73, Viṣṇu 51. 7-10 and Manu 4. 209-212, Viṣṇu 59. 21-25 and Manu 3. 70, Viṣṇu 62. 224 and Manu 2. 59, Viṣṇu 71. 48-52 and Manu 4. 80, and Viṣṇu 96. 14-17 and Manu 6. 46 agree almost word for word. The verses that are identical in both are found in all the chapters of the Manusmṛti from the second to the last, the largest number (about 47) occurring in the 5th and chapters eleven, two, and three respectively contributing 25, 24, and 19 verses. Therefore the question whether the extant Viṣṇudharmasūtra borrows from Manu or *vice versa* or whether both borrow from a common original assumes very great importance. As the correspondence extends over several hundred verses of the Manusmṛti, the last hypothesis of borrowing from a common original does

not recommend itself to me. No such common source is known to have existed and to say that there were hundreds of floating popular verses whose authorship was unknown and which were drawn upon by both works appears to me to be an extremely gratuitous and unsatisfactory assumption. In my opinion it is the extant Viṣṇudharmasūtra that borrowed the verses *ad hoc* or adapted them from the Manusmṛti. There are several lines of reasoning that strengthen this hypothesis. There are some verses that are identical in both, in which the name of Manu occurs, which the Viṣṇudharmasūtra omits by making slight verbal changes. For example, Viṣṇu 23. 50 substitutes 'tat parikīrtitam' for 'Manur-abravīt' in Manu 5. 131 and Viṣṇu 51. 64 reads 'nānyatreti kathaṁcana' for Manu 5. 41 'nānyatretyabravīn-Manuḥ' (this last occurs in Vas. 4. 6). The reason for these changes is obvious. The Viṣṇu-dharmasūtra professes to be a direct revelation from Viṣṇu and it is in keeping with this assumed role that not one human author is mentioned by name in the sūtra. Therefore where the name of Manu occurred in any verse, it was purposely omitted. Another reason why the sūtra must be presumed to be the borrower is the character of the extant work itself. It is a kind of hotchpotch and contains verses that are identical with those of other works. For example, several verses of the Bhagavatgītā occur in the Viṣṇudharmasūtra. Viṣṇu 20, 48-49 and 51-52 are the same as Gīta 2. 13. 23, 24, 28; Viṣṇu 72. 7 and Gīta 13. 14-18 are almost identical. Viṣṇu 96. 97 and the first half of 98 are the same as Gīta 13. 1-2, except that in keeping with its character of a revelation to the Earth, the Viṣṇudharmasūtra substitutes 'vasudhe' for 'kaunteya' and 'bhāvini' for 'bhārata.' Several verses of the Yājñavalkya-smṛti are identical with those of the Viṣṇudharmasūtra. For example, Viṣṇu 6. 41 and Yāj. 2. 53, Viṣṇu 8. 38 and Yaj. II. 79, Viṣṇu 9. 33 and Yāj. 2. 97, Viṣṇu 17. 17 and Yāj. 2. 138, Viṣṇu 17. 23 (first half) and Yāj. 2. 210 (latter half), Viṣṇu 62. 9 and Yāj. 1. 21, Vi. 63. 51 and Yāj. 1. 117 are identical. Besides these there are hundreds of prose sūtras that are identical with passages of Yājñavalkya. For example, Vi. 3. 72-74 = Yāj. II. 1-4; Vi. 3. 82 = Yāj. 1. 318-320 (rules about land grants); Vi. 5. 65-69 = Yāj. II. 217-220, Vi. 5. 73 = Yāj. II. 221; Vi. 45. 3-12 = Yaj. 3. 209-211 (about diseases suffered by sinners); Vi. 60. 24 = Yāj. 1. 17; Vi. 96. 55-79 = Yāj. 3. 84-90 (about 360 bones of the body); Vi. 96. 80-88 = Yāj. 3. 100-102 (about the number of arteries, veins, muscles etc.); Vi. 96. 89-92 = Yāj. 3. 93-99. Dr. Jolly

thinks that Yājñavalkya borrows from Viṣṇu the whole of the anatomical section (vide S. B. E. vol. VII, p. XX). With great respect I differ from this opinion. There is nothing to show that the anatomical details were first given to the world by Viṣṇu. They must have first been embodied in works on medicine such as those of Caraka and Suśruta[111] and were probably copied by Dharmasūtra writers. But if there is any borrowing between Viṣṇu and Yājñavalkya I think from the character of the Viṣṇudharmasūtra that it is the sūtra that must be regarded as borrowing from Yājñavalkya. There are several matters in the extant Viṣṇudharmasūtra which are wanting in Yājñavalkya and which induce one to place the extant sūtra later than Yājñavalkya, viz. the name 'Jaiva' for Thursday (Vi. 78. 5), the long list of tīrthas (Vi. chap. 85) which include Śrīparvata and the five rivers of the south called southern Pañcanada, the importance of the conjunction of the moon and Jupiter on a full moon day (Vi. 49. 9-10), the vague definition of Āryāvarta[112] (Vi. 84. 4). The verse in Viṣṇu 54. 33 (about half prāyaścitta for boys and old men) is ascribed to Aṅgiras by the Mitākṣarā (on Yāj. III. 243).

Therefore the most probable conclusion is that the extant Viṣṇudharmasūtra borrows from the Manusmṛti, Yājñavalkya and other authors. It would be too much to assume that the Manusmṛti, the Bhagavatgītā and Yājñavalkya borrow from such a comparatively unimportant work as the Viṣṇudharmasūtra.

The above conclusion is further strengthened by certain other considerations. The Manusmṛti has been quoted with utmost reverence by a host of writers from the fifth century downwards, such as Śabara, Kumārila and Śaṅkarācārya. Yājñavalkya was commented upon by Viśvarūpa in the first half of the 9th century. Viśvarūpa in his commentary quotes scores of sūtras from Gautama, Āpastamba, Baudhāyana, Vasiṣṭha, Śaṅkha and Hārīta. But it is significant that Viśvarūpa in his commentary on Yājñavalkya does not quote even a single sūtra of Viṣṇu by name. It is true that Viśvarūpa (on Yāj. III. 66) says that

111 Vide चरक, शारीरस्थान chap. 7 and सुश्रुत, शारीरस्थान chap. 5; in the अष्टाङ्गहृदय of वाग्भट, शारीर chap. 3, we find 360 bones and 700 muscles.

112 चातुर्वर्ण्यव्यवस्थानं यस्मिन्देशे न विद्यते । स म्लेच्छदेशो विज्ञेय आर्यावर्तस्ततः परः ॥ It is to be noted that Yāj. (I. 2) lays down *dharmas* for the country in which the black deer moves about, following Baud. I. I. 28 and Vas. 1. 13.

the four forms of asceticism (*pārivrājya*) should be understood from other smṛtis like those of Viṣṇu[113]. This probably refers to chap. 97 of the extant Viṣṇudharmasūtra. Medhātithi (on Manu 3. 248) quotes Viṣṇu (21. 12) and on Manu 9. 76 quotes a sūtra of Viṣṇu which I could not trace in the printed Viṣṇu.[114] The Mitākṣarā mentions Viṣṇu about thirty times. The quotations are taken from chapters 19, 21, 22, 35-42, 50, 51, 52, 75 and 79 of the Viṣṇudharmasūtra, 18 sūtras of chap. 22 (on āśauca and kindred topics) being quoted on Yāj. III. 23, 24, 27, 29-30. But it is a remarkable fact that not one of the verses in the extant Viṣṇudharmasūtra is cited as Viṣṇu's in the Mitākṣarā. The only exception is a verse cited as Viṣṇu's on Yāj. III. 265, which has the same purport as Viṣṇu 52. 14 (a verse) and the first *pāda* of which is identical with that of the verse in the Viṣṇudharmasūtra.[115] A few verses that are quoted as Viṣṇu's in the Mitākṣarā could not be traced in the extant dharmasūtra.[116] It is not unlikely that the sūtra first contained mostly prose sūtras based on Manu and the Kāṭhakagṛhya and verses were tacked on later. Among later writers of *nibandhas* Aparārka quotes Viṣṇu most profusely and the Smṛticandrikā also quotes Viṣṇu about 225 times.

Many of the verses found in Vi. are quoted by Aparārka as Viṣṇu's, e. g. Vi. 84. 4 on Yāj. 1. 2; 68. 46-47 on Yāj. 1, 106; 67. 33 on Yāj. 1. 107; 5. 183 on Yāj. 2. 60; 10. 9-11 on Yāj. 2. 102. But there are numerous verses quoted as Viṣṇu's by Aparārka which are not found in the sūtra, e. g. on Yāj. I. 21, 53, 89, 100. Aparārka quotes almost whole chapters of Viṣṇu, e. g. Vi. 68 on Yāj. I. 106 and 90 on Yāj. I. 208, 70 on Yāj. 1. 114. It is to be noted that Vi. 70. 17 (a verse) is quoted by Aparārka as a prose sūtra (on 1. 114) with slight verbal changes. All these facts make one feel naturally sceptical about the authenticity of most of the verses in the extant Viṣṇudharmasūtra. They probably formed no part of the sūtra at the time when the Mitākṣarā was composed. At all events it cannot be gainsaid that the verses are a very late part of the sūtra.

The Viṣṇudhamasūtra contains quotations from all the Vedic saṁhitās and from the Aitareya-brāhmaṇa (as in Vi. 15. 45). It mentions the Vedāṅgas very frequently (30. 3 and 38, 28. 35, 83. 6), it speaks of Vyākaraṇa (83. 7), of itihāsa (3. 70, 30. 38, 83. 7), of Dharmaśāstras (3. 70, 30. 38, 73. 16, 83. 8), of Purāṇa (3. 70, 30. 38 &c.). About the close correspondence between Baud. III. 6 and Viṣṇu. 48 and between Vas. 28. 10-15 and 18-22 and Viṣṇu 56 and 87 vide remarks made above pp. 23, 57. The sūtra quotes several verses (called gāthās) and says they were sung by pitṛs; vide 78. 52-53, 80. 14, 83. 21, 85. 65-67. They bear close resemblance to the gāthās sung by the pitṛs quoted in the Anuśāsana-parva 88. 11-15 and a half verse 'eṣṭavyā bahavaḥ putrā yadyekopi Gayāṁ vrajet' is the same in Vi. 85. 67 and Anu. 88. 14. The Viṣṇusmṛti enumerates twenty one hells (43. 1-22), which are almost the same as Yājñavalkya's (3. 222-224). It mentions the names of the seven days of the week (78. 1-7), Thursday being called Jaiva, while Yājñavalkya mentions only the seven planets (with Rāhu and Ketu) in the same order (I. 296). It recommends the practice of *satī* (25. 14), speaks of *pustakas* (18. 44, 23. 56), a word which is not used by the other dharmasūtras so far described. It gives a long list of good and evil omens at the time of starting on a journey (63. 33-39). Among evil omens it includes the sight of yellow-robed ascetics (i. e. Buddhists probably) and Kāpālikas (63. 36). It prohibits speech with Mlecchas, Antyajas (71. 59) and journeys to Mleccha countries (84. 2). It contains special directions about the worship of Vāsudeva in chap. 49

and speaks of Śvetadvīpa as the reward of devotion to Vāsudeva (49. 4). Here and there, there are eulogies of Vāsudeva (1. 50-57, 65. 1, 97. 10, 98 which gives one hundred names of Viṣṇu). It speaks of the four vyūhas of Vāsudeva (67. 2) and of the Varāha incarnation. It gives a vague location of Āryāvarta as a country where the four varṇas exist (84. 4). It enumerates numerous sacred places (85. 1-52), among which Śrīparvata, Saptārṣa (modern Satara?), Godāvarī and southern Pañcanada deserve to be specially noted. Though it does not specifically enumerate the eighteen titles of law just as Yājñavalkya does not, yet it contains rules (in chapters 5-6) on almost all of them.

As Yājñavalkya enumerates Viṣṇu among the propounders of dharmaśāstras, it follows that a work of Viṣṇu existed in comparatively early times. What matters that work embraced it is difficult to say. It probably contained the topics found in the works of Gautama, Āpastamba and others. It may have included portions borrowed from the Kāṭhakagṛhya. When Dr. Jolly says that certain chapters of Viṣṇu agree closely with the Kāṭhakagṛhya, all that is meant is that some of the sūtras of Viṣṇu are the same or almost the same as those of the Kāṭhakagṛhya (e. g. compare Viṣṇu 21, 73 and 86 with Kāṭhakagṛhya V. 12, V. 9, and V. 3 respectively). But in all these places Viṣṇu contains more details than the Kāṭhakagṛhya. It may however be noted that in a few cases the views of the Kāṭhakagṛhya differ from those of Viṣṇu. For example, Viṣṇu (30. 1) speaks of Vedic studies for 4½ months only in the year when once they are started on the full-moon day of Śrāvaṇa or Bhādrapada, while the Kāṭhakagṛhya (I. 9. 10) gives three alternatives, viz. 4½, 5 or 5½ months; Viṣṇu prescribes that the proper year for the upanayana of a kṣatriya is the 11th from conception (27. 16), while the Kāṭhaka prescribes the 9th, without specifying whether it is from conception or birth (IV. 1. 2); Viṣṇu enumerates eight forms of marriage (24. 18), while the Kāthaka (II. 3 and 4) speaks of only two, Brāhma and Āsura, and is silent about the rest; Viṣṇu (46. 19-20) defines Sāntapana and Mahāsāntapana differently from the Kāṭhaka (I. 7. 3-4), but agrees with Yājñavalkya (III. 315-316). Here the recent Lahore edition of the Kāṭhakagṛhya by Dr. Caland has been used. As it used Kāṭhaka *mantras* and borrowed from the Kāṭhakagṛhya, the dharmasūtra may have been a text-book of the Kāṭhaka school and probably originated in Kashmir and Punjab which is the home

of the Kaṭhas. The date of the older portion of Viṣṇu may be placed between 300 B.C. to 100 B.C. But this is no more than a mere conjecture. It is to be noted that Kumārila does not mention the Viṣṇudharmasūtra among the sūtras studied by particular schools. Then several centuries later on the whole of the sūtra was recast from the Vaiṣṇavite point of view and received large additions both in prose and verse. When these additions were made we have no exact means of determining. It is probable that they were not made very long before Viśvarūpa. At all events the additions were made long after the Yājñavalkyasmṛti and after the 3rd century. The mention of the week days makes the sūtra comparatively a late work. The earliest epigraphic mention of a week day is in the Eran inscription of 484 A. D. (vide Fleet's Gupta inscriptions pp. 88-89) and Varāhamihira (6th century) knew the week days well. The Brahmapurāṇa (28. 55) mentions Sunday and the Padmapurāṇa mentions Thursday (Brahmakhaṇḍa chap. 11. 34). The Sūrya-siddhānta (XII. 6 and 78) speaks of the lords of days. Thus although the extant Viṣṇu-dharmasūtra is a late recast, it contains a few doctrines that were held in ancient times. For example it allows a Brāhmaṇa to marry a girl of anyone of the four castes (24. 1) and does not inveigh against *niyoga* as Manu does.

A few of the sūtras agree closely with Nārada. Vide Vi. 7. 10-11 and Nārada (Ṛṇādāna verses 136-137).

The Mitākṣarā quotes all the prose passages of chapters 35-42 and ascribes them to Bṛhadviṣṇu (on Yāj. 3. 242). Similarly on Yāj. 3. 261 it ascribes Vi. 35. 3-5 to Bṛhadviṣṇu. Similarly the Smṛticandrikā (II. p. 298) ascribes Vi. 17. 4 ff to Bṛhad-Viṣṇu. The Mitākṣarā (on Yāj. 3. 267) quotes a verse of Vṛddha-Viṣṇu which summarises some sūtras of Viṣṇu [117] (50. 6 and 12-14).

In the Ānandāśrama collection of smṛtis there is a Laghu-Viṣṇu-smṛti in five chapters and 114 verses dealing with the duties of the *varṇas* and the four āśramas. Aparārka in his commentary on Yāj. 3. 258 quotes four verses from Laghu-Viṣṇu, which are not found in the Ānandāśrama text. So Aparārka used some other work or perhaps a larger work. The Parāśara-Mādhavīya often quotes gadya-

117 The verse of वृद्धविष्णु is विप्रे तु सकलं देयं पादोनं क्षत्रिये स्मृतम् । वैश्येर्धमेक-पादस्तु शूद्रजातिषु शस्यते ॥ The sūtras are ब्राह्मणं हत्वा द्वादशसंवत्सरं कुर्यात् । पादोनं क्षत्रियवधे । अर्धं वैश्यवधे । तदर्धं शूद्रवधे ।

Viṣṇu and padya-Viṣṇu. The former from a quotation in vol. I. part 2, p. 234 seems to be the Viṣṇu-dharmasūtra itself. In the Sarasvatīvilāsa numerous sūtras of Viṣṇu with the explanations of Bhāruci thereon are quoted, which are not found in the printed Viṣṇu.[118]

The Viṣṇu-dharmasūtra was commented upon by Nandapaṇḍita, author of several works on dharmaśāstra, who wrote at Benares the commentary called Vaijayantī (according to certain mss.) in 1679 (i. e. 1622-23 A. D.) of the Vikrama era. Dr. Jolly publishes extracts from this commentary in his edition of the sūtra.

From the fact that the Sarasvatīvilāsa quotes several times the sūtras of Viṣṇu with Bhāruci's explanation, it looks probable that Bhāruci commented upon the Viṣṇudharmasūtra. For further information on Bhāruci vide sec. 61.

So far only the printed and well-known dharmasūtras have been passed under review. But there were nnmerous other dharmasūtras which are either now extant in rare mss. or are not yet discovered but are only to be reconstructed from quotations. It is now time to discuss them.

11. The Dharmasūtra of Hārīta

That Hārīta was an ancient sūtrakāra on *dharma* is quite patent from the fact that the dharmasūtras of Baudhāyana, Āpastamba and Vasiṣṭha quote him as an authority (vide pp. 25, 39, 54). Āpastamba quotes Hārīta more frequently than any other author. From this it may

118 e. g. para 637 यथाह भारुचिरेतद्विष्णुवचनव्याख्यानावसरे बीजशब्दः पिण्डवाचीति। (Viṣṇu's sūtra seems to have been बीजग्रहणानुविधायमंशं गृह्णीयात्); para 719 अत्र भारुचिः (on विष्णु's सूत्र 'पितृव्यपितृभ्रातृभिरेव संसर्गो नान्यैः) वैकल्पिकोयं संसर्गविधिरिति, para 736 अत्र भारुचिः भिन्नोदराणामिति निर्धारणे षष्ठी (on विष्णु's सूत्र 'भिन्नोदराणां संसृष्टिनो गृह्णीयुः'); para 847 contains a long sūtra of Viṣṇu 'आपित्र्यं गार्भं धार्मं मैत्रं वैद्यमाकस्मिकमादशाब्दं प्रविभाज्यमत ऊर्ध्वं सर्वमविभाज्यम्' and para 848 contains भारुचि 's explanation of it.

Vide pp. 32, 50, 165, 166, 243, 244 &c. of the recently published Mysore edition of the सरस्वतीविलास for sūtras of Viṣṇu which are not found in the printed text of Viṣṇu. It appears that the सरस्वतीविलास had a very much larger version of the sūtra before it.

be concluded that they belonged to the same Veda. The Tantravārtika (vide note 55 above) mentions Hārīta along with Gautama and other sūtrakāras on dharma. From Viśvarūpa down to the latest writers on dharmaśāstra Hārīta is most profusely quoted. From the quotations it appears that his dharmasūtra was perhaps the most extensive of all dharmasūtras.

The late Pandit Vamansastri Islampurkar discovered at Nasik a ms. of the Hārīta-dharmasūtra. It was not possible for me to make use of it for the present work. Dr. Jolly (in R. und S. pp. 8-9) gives an account of the ms. from which I give a summary. It is so faulty that an edition based on it alone cannot be thought of. The ms. contains thirty chapters. So far as the language and contents are concerned the work impresses one as ancient, but the material citations ascribed to Hārīta in later digests on court procedure and the law of crimes &c. are not found in the ms. The prose is mixed up with verses in Anuṣṭubh and Triṣṭubh metres, which are often introduced with the characteristic words " athāpyudāharanti " as in other dharmasūtras. The ms. quotes ' bhagavān Maitrāyaṇi ' and the verse " Śatadāyo vīro " which is Maitrāyanīya Saṁhitā I. 7. 5. Dr. Caland points out remarkable correspondence between the citations of Hārīta and the Maitrāyaṇīya Pariśiṣṭa and Mānavaśrāddhakalpa. All this tends to show that he was a sūtrakāra of the Black Yajurveda. The numerous quotations from Hārīta in Āpastamba and Baudhāyana are not however found in the ms. The ms. was found at Nasik, which is also the source of two mss. of the Maitrāyaṇīya Saṁhitā. The Kashmirian word 'kaphella' is cited in Hārīta and so the Hārīta-dharmasūtra probably originated there. Hemādri (caturvarga III. 1. p. 559) mentions a commentator (bhāṣyakāra[119]) of Hārīta.

From the numerous quotations from Hārīta in the *nibandhas* it appears that the dharmasūtra dealt exhaustively with the same topics as are dealt with in other dharmasūtras, viz. sources of dharma, brahmacārin of two kinds (upakurvāṇa and naiṣṭhika), *snātaka*, the householder, the forest hermit, prohibitions about food, impurity

119 The sūtra of Hārīta is ' पालङ्क्या-नालिका-पौतीक-शिग्रु-सृसुक-वार्ताक-भूस्तृण-कफेल्लु-माष-मसूर-रुतलवणानि च श्राद्धे न दद्यात्' on which हेमाद्रि says, ' कफेल्लुः आरण्यविशेषः काश्मीरेषु प्रसिद्ध इति हारीतस्मृतिभाष्यकारः.'

on birth and death, śrāddha, the paṅktipāvana, general rules of conduct, the five yajñas, Vedic study and holidays, duties of kings, rules of statecraft, court procedure, the various titles of law, duties of husband and wife, various kinds of sins, prāyaścittas, expiatory prayers &c.

According to Kullūka (on Manu 2. 1) the Hārīta-dharmasūtra opened with the words 'now then we shall explain *dharma*; dharma is based upon revealed texts (śruti); revealed texts are of two kinds, the Vedic and the Tāntric.[120]' The quotations show that this very style was pursued in the body of the work. Aparārka (on Yāj. III. 322) quotes a sūtra[121] in similar style about a penance 'tulāpuruṣa' said to have been promulgated by Śiva himself. The sūtra often introduces verses as quotations with the words "an author says thus" (evaṁ hyāha; *vide* Aparārka on Yāj. I. 83, I. 154, III. 135, Vivāda-ratnākara pp. 443, 626). Numerous passages quoted as Hārīta's are identical with passages from other dharmaśāstra works. The sūtra 'Jāyāpatyorna vibhāgo vidyate' is quoted as from Hārīta by the Smṛticandrikā (II. p. 268), which is the same as Āp. Dh. S. II. 6. 14. 16. The same work quotes 'pratyakṣavidhānād gārhasthyasya' as from Hārīta which is part of Gautama 3. 35. A verse about the enormity of usury quoted in the Smṛticandrikā (I. p. 177) as Hārīta's is almost the same as Baudhāyana (I. 5. 79) and Vasiṣṭha[122] (2. 42). A verse about atipātakins (quoted by Aparārka on Yāj. III. 231) is the same as Viṣṇu 34. 2. Manu is mentioned by name in several verses (*vide* Smṛticandrikā III. p. 426, Vivāda-ratnākara p. 552-553). Two verses are cited in the Vyavahāratattva of Raghunandana as found in Hārīta, Baudhāyana (I. 10. 30) and Manu (8. 18-19). A verse quoted by the Smṛticandrikā (II. p. 21) is almost the same as Manu 8. 95. Several times we have the words 'Prajāpativaco yathā' (vide Aparārkā on Yāj. I. 154 and Smṛticandrikā I. p. 181). Hārīta seems to have relied upon the views

120 'अथातो धर्मं व्याख्यास्यामः। श्रुतिप्रमाणको धर्मः। श्रुतिश्च द्विविधा वैदिकी तान्त्रिकी च ॥'. The Brahmayajña probably takes the words अथातो... स्यामः' from हारीत and not from the Vaiśeṣika-sūtra.

121 अथातस्त्रिनयनोक्तस्य तुलापुरुषस्य कल्पं व्याख्यास्यामः।

122 The verse is 'ब्रह्मघ्नं वृद्धिजीवं च तुलया समतोलयत्। अतिष्ठद् ब्रह्महा कोट्यां वृद्धिजीवस्त्वकम्पत ॥

of 'ācāryas' in several places.[123] He often quotes the views of others (eke, apare[124]) and sometimes refutes them.[125]

Hārīta refers to the Vedas, the Aṅgas, dharmaśāstra, metaphysics, and other branches of knowledge.[126] The quotations do not show that he belonged to any particular Veda, as he quotes from all the Vedas promiscuously. In this connection it is worthy of note that though Kumārila mentions Hārīta as an ancient dharmasūtrakāra, he does not assign him to any particular school, while he assigns Āpastamba and Baudhāyāna to the Taittirīya school.

Some of the doctrines of Hārīta are worth noting. He speaks of eight forms of marriage, but two of them are styled Kṣatra and Mānuṣa, while Ārṣa and Prājāpatya are omitted (vide Vīramitrodaya, Saṁskāraprakāśa, p. 84). Vasiṣṭha has the same nomenclature (I. 29). Hārīta speaks of two sorts of women (*brahmavādinīs* and *sadyovadhas*) and states that the former were entitled to have the Upanayana performed, to keep the sacred fire and to study the Vedas.[127] He speaks of the twelve kinds of sons (vide Haradatta on Gautama 28. 32). He looks down upon the profession of an actor and forbids the employment of a Brāhmaṇa actor in any śrāddha or rite for gods.[128] Aparārka (on Yāj. II.$\frac{3}{3}$32) quotes from Hārīta a lengthy passage in mixed prose and verse, where the worship of Gaṇeśa comes in.[129]

A very interesting question is the relation of the verse quotations from Hārīta with the prose quotations from Hārīta. The dharmasūtra was probably interspersed with verses as is the case more or less with all dharmasūtras except that of Gautama. But there are numerous verses ascribed to Hārīta in the *nibandhas*, which are manifestly modern. Both the Mitākṣarā and Aparārka (on Yāj. I. 86) quote Hārīta's verses eulogising the satī. The Smṛticandrikā (III. p. 344) quotes his verses that refer to the signs of the Zodiac. There are numerous verses containing elaborate rules of procedure, ascribed to Hārīta, which are quite foreign to the general atmosphere of the ancient dharmasūtras. All such verses must be ascribed to a comparatively later date. In the Śuddhimayūkha it is said that certain verses quoted from the Mahābhārata by Hārīta are not found in several copies of the Mahābhārata.

Dr. Jolly (in 1889) collected together most of the prose and verse citations from Hārīta on the Vyavahāra section. In Jivananda's collection, we have a Laghu-Hārīta smṛti (I. pp. 177-193) and a Vṛddha-Hārītasmṛti (I. pp. 194-409). The former contains seven *adhyāyas* and about 250 verses, dealing with the duties of the four castes and the *āśramas* and with Yoga. The latter is professedly a Vaiṣṇavite work, said to have been proclaimed by Hārīta to Ambarīṣa; it is divided into eight chapters and contains about 2600 verses, dealing with the *nitya* and *naimittika* rites of the *varṇas* and āśramas, the nature of the individual and supreme self and the means of attaining mokṣa. In the Ānandāśrama collection of smṛtis, Vṛddha-Hārīta is divided into eleven chapters, the first two of Jivananda's being split up into five. The Ānandāśrama collection contains a Laghu-Hārīta-smṛti in 117 verses which is different from the Laghu-Hārīta of Jivananda. The former deals with purification from pollutions of various kinds, with prāyaścittas, rules about impurity on birth and death, śrāddha and a few rules about inheritance, partition &c.

It is noteworthy that Aparārka (on Yāj. III. 254) quotes Vṛddha-Hārīta and Hārīta, both in prose, one immediately after another.

That the Vṛddha-Hārīta in verse is comparatively a late work follows from the fact that it distinctly recites that the smṛtis of Manu, Yājñavalkya, Nārada and Kātyāyana were known to it as authorities

on rāja-dharma.[130] Some of the quotations ascribed to Laghu-Hārīta in Aparārka and other works are found in the Laghu-Hārīta, e. g. the verse 'vinā yajñopavītena' (Laghu-Hārīta, Ānandāśrama, verse 25) is quoted by Aparārka on Yāj. III. 289. Some verses that are ascribed to Hārīta are found in the Laghu-Hārīta, for example, the verse 'snānam kṛtvā tu ye', cited by the Smṛticandrikā (I. p. 203), occurs in the Laghu-Hārīta (Ānandāśrama, verse 41). It appears that several compilations were made at different times, embracing different topics of *dharma* and ascribed to Hārīta, probably because they were based more or less on the Hārītadharmasūtra.

That some of the verses ascribed to Hārīta are very ancient follows from several considerations. For example, Viśvarūpa quotes (on Yāj. III. 246) a verse from Hārīta. The Sarasvatīvilāsa quotes from Hārīta a brief passage which appears to be a portion of a verse and Kātyāyana's explanation thereon.[131] It follows that long before the sixth century A. D. Hārīta existed in verse.

For Hārīta on Vyavahāra, vide sec. 56.

12. The Dharmasūtra of Śaṅkha-Likhita

From the Tantravārtika we learn (note 55 above) that the Dharmasūtra of Śaṅkha-Likhita was specially studied by the Vājasaneyins (the followers of the white Yajurveda). The Tantravārtika also quotes a few words from that dharmasūtra which constitute an Anuṣṭubh *pāda*.[132] The Mahābhārata (Śānti. chap. 23) contains the story of the two brothers Śaṅkha and Likhita. In the Śāntiparva (130. 29 and 132. 15-16) the word Śaṅkha-Likhita seems to be used in a double sense, Śaṅkha also meaning the forehead. Yājñavalkya (1. 5) mentions Śaṅkha-Likhita among the writers on dharmaśātra. The Parāśarasmṛti says (1. 24) that in the four ages of Kṛta, Tretā, Dvāpara and Kali, the ordinances of Manu, Gautama, Śaṅkha-Likhita and Parāśara are respectively of paramount authority

in matters of *dharma*. Viśvarūpa (on Yāj. III. 248) quotes a verse from an ancient author which says that Śaṅkha and Likhita pondered deeply over the *dharma* promulgated to the sages by Manu and drew upon the Veda[133] also. Commentators and *nibandhakāras* from Viśvarūpa downwards profusely quote Śaṅkha-Likhita. A considerable portion of these quotations is in prose. Hence it is quite clear that the dharmasūtra of Śaṅkha-Likhita is an ancient one, that it was largely if not entirely in prose and that it was once easily accessible though it has not yet been discovered. In the Annals of the Bhandarkar Oriental Research Institute (vol. VII-VIII) I made an attempt at a reconstruction of Śaṅkha-Likhita.

Jivananda (collection of smṛtis, part II., pp. 343-374) prints in 18 chapters and about 330 verses a smṛti of Śaṅkha and a smṛti of Likhita in about 93 verses (part II., pp. 375-382). The Ānandāśrama collection also prints the same text of the two smṛtis. The latter also contains a Laghu-Śaṅkha-smṛti in 71 verses and a Śaṅkha-Likhita-smṛti in 32 verses. All these, except perhaps the Śaṅkha-smṛti in 18 chapters, are late compilations. The smṛti in 18 chapters seems to have been compiled very early. About fifty verses from it are quoted by the Mitākṣarā. In the 11th and 12th chapters occur a few prose passages, one of which is quoted even by Medhātithi. The numerous prose quotations ascribed to Śaṅkha-Likhita do not however occur in these smṛtis. One point deserves special notice. Comparatively early writers sometimes ascribe the same text to Śaṅkha-Likhita or to Śaṅkha simply. The well-known sūtra about succession to a son-less man (athāputrasya svaryātasya bhrātṛgāmi dravyam &c.) is ascribed to Śaṅkha by Viśvārūpa and the Mitākṣarā, but to Śaṅkha-Likhita by Aparārka (on Yāj. II. 135-136). Similarly the sūtra 'pitaryaśakte kuṭumbavyavahārān jyeṣṭhaḥ' &c. is asaribed to Śaṅkha by Aparārka and to Śaṅkha-Likhita by the Vivāda-ratnākara, Dāyatattva and Madanapārijāta. Quotations ascribed to Likhita are few and far between. Some passages are ascribed by some writers to Śaṅkha and by others to Likhita. For example, a prose passage 'Uddhṛtya parīkṣitābhiḥ' &c. is ascribed to Likhita by Aparārka (on Yāj. I. 18) and to Śaṅkha by Viśvarūpa (on Yāj. I. 20) and by the Vīramitrodaya (Āhnikaprakāśa p. 68). Similarly the sūtra 'ubhābhyāmapi hastābhyām prāṅmukho devatīrthena kuryāt' is ascribed to Śaṅkha-Likhita by the Pārāśaramādha-

vīya (I. 1. p. 352) and to Likhita by Aparārka (on Yāj. I. 101). The relation of the Śaṅkha-smṛti in verse to the dharmasūtra of Śaṅkha seems to be this. The former is based upon the latter and is a versified paraphrase or adaptation of portions of the dharmasūtra.[134]

The versified Śaṅkha shows a tendency towards greater strictness. The dharmasūtra allows a Brāhmaṇa to marry a woman of any of the four castes, while the verse Śaṅkha restricts him to the first three castes.[135] It is not unlikely that the dharmasūtra contained a few verses as is the case with Baudhāyana, Āpastamba and Vasiṣṭha. Even so early a writer as Viśvarūpa looked upon the prose and verse portions as the composition of the same author (vide his comment on Yāj. III. 237, and Aparārka pp. 1149, 1154, 1161).

The dharmasūtra of Śaṅkha-Likhita was commented upon early. Lakṣmīdhara in his Kalpataru (Ghose's Hindu Law vol. II., p. 504) draws attention to the fact that the *bhāṣyakāra* of Śaṅkha read a well-known sūtra as 'sa yadyekaḥ syāt' instead of 'sa yadyekaputraḥ syāt'. Lakṣmīdhara flourished between 1100–1160 A. D. as he was a minister of Govindacandra of Kanauj. The Vivādaratnākara (1314 A. D.) also cites the bhāṣyakāra of Śaṅkha-Likhita. The Vivādacintāmaṇi (p. 67) quotes from the bhāṣyakāra of Śaṅkha-Likhita.

The dharmasūtra of Śaṅkha-Likhita would appear, from the quotations in the *nibandhas*, to have closely resembled the other extant sūtras on dharma in style and contents. It embraced almost all the topics treated of in Gautama or Āpastamba. It agrees very closely with the words of Gautama and Baudhāyana in several places.[136] It is curious to note that a quotation from Śaṅkha

134 Compare उद्धृत्य परिपूताभिरद्भिरिवोक्षिताभिरक्षाराभिरनधिश्रिताभिरफेनाभिरबुद्बुदाभिः (quoted as Śaṅkha's by the वीर०, आह्निकप्रकाश, p. 68) with शङ्खस्मृति 9. 6 'आद्भिः समुद्धृताभिस्तु हीनाभिः फेनबुद्बुदैः। वह्निना चाप्यदग्धाभिरङ्गुलीभिरुपस्पृशेत्॥

135 The दायभाग (ed. of 1829, p. 210) quotes 'भार्याः कार्याः स्वजातीयाः श्रेयस्यः सर्वेषां स्युरिति पूर्वकल्पः। ततोनुकल्पश्चतस्रो ब्राह्मणस्यानुपूर्व्येण'; the शङ्खस्मृति (4. 7) says 'ब्राह्मणी क्षत्रिया वैश्या ब्राह्मणस्य प्रकीर्तिता॥

136 Compare 'नाब्राह्मणोतिथिर्ब्राह्मणस्य' (quoted in वीर०, आह्निक०, p. 452) with गौ. ध. सू. 5. 39–42; 'दन्तवदन्तलग्नेषु' (quoted by अपरार्क on याज्ञ. I. 195) with गौ. ध. सू. I. 41–43; 'न तिष्ठन्न प्रणतो नाङ्गुलीभिः' (चतुर्वर्ग० III. 1, p. 977) with बौ. ध. सू. I. 5. 15.

containing the names of writers of smṛtis cites Śaṅkha-Likhita as authority.[137]

The dharmasūtra seems to have permitted *niyoga*, speaks of twelve secondary sons, and did not favour (like Āpastamba) the claims of females to succeed to males. On certain points the dharmasūtra of Śaṅkha marks a more advanced state of opinion than is the case with Gautama or Āpastamba. Śaṅkha speaks of several kinds of ordeals and appears to have contained elaborate prose rules about them (vide Aparārka on Yāj. II, 95; Smṛticandrikā II., p. 112, Vīramitrodaya, p. 270). As regards partition and inheritance, Śaṅkha-Likhita gives more detailed information than Āpastamba or Baudhāyana. The limits of Āryāvarta[138] stretched over wider areas according to Śaṅkha (i. e. to the east of Sindhu-Sauvīra and to the west of Kāmpilya) than is the case with Baudhāyana (I. 1. 25) or Vasiṣṭha (I. 8-9). The style of Śaṅkha reminde one of Kauṭilya rather than of Gautama. The quotations hardly exhibit any ungrammatical forms. It is noteworthy that Yājñavalkya is included among the authors of smṛtis by Śaṅkha (vide note 137 above). If it is the extant Yājñavalkya-smṛti that is meant to be referred to, then the dharmasūtra of Śaṅkha will have to be assigned to a late date. But this does not seem to be likely. From the fact that the Yājñavalkya-smṛti itself enumerates Śaṅkha-Likhita among ancient authors on *dharma*, from the general style of the work, from the development of the legal conceptions it presents and from its doctrines about the rights of women, it appears almost certain that the extant Yājñavalkya-smṛti is much later than the dharmasūtra of Śaṅkha. There are close correspondences between Śaṅkha and Yājñavalkya.[139]

The prose quotations from Śaṅkha-Likhita refer to the Vedāṅgas, Sāṅkhya, Yoga, dharmaśāstra. Śaṅkha recognised eight forms of marriage. The views of Śaṅkha about the status of the offspring of mixed marriages differed from those of Baudhāyana (I. 8. 6) and Manu (X. 6) and were intermediate between the latter two.[140] The *tarpaṇa*[141] (which resembles the one in Baudhāyana, though it is more elaborate) refers to the six Vedāṅgas, Bhārata (but not Mahā-bhārata), to twenty writers on *dharma* and contains numerous details about geography, mythology, and cosmogony which are generally found in the Purāṇas. The dharmasūtra frequently cites the opinions of others. It mentions by name the views of Prajāpati, Āṅgirasa and Uśanas (Vivādaratnākara p. 537), Prācetasa (Vivādarat. p. 557-560), Vṛddha-Gautama (Madana-pārijāta pp.701-2). The verse quotations ascribed to Śaṅkha further mention Yama, Kātyāyana, and Śaṅkha himself. But in drawing chronological conclusions it is better to leave the verse quotations out of account. The same verses are ascribed to Manu and Śaṅkha[142] and a few sūtras closely resemble the Manusmṛti.[143] Six identical verses occur in the Vasiṣṭha-dharmasūtra (28. 10-15) and in the Śaṅkha-smṛti (10th chap.).

All these circumstances lead to the conclusion that the dharmasūtra of Śaṅkha is probably later than Gautama and Āpastamba but earlier than the Yājñavalkya-smṛti and so must be assigned to some date between 300 B. C. to 100 A. D.

13. Mānavadharmasūtra—Did it exist ?

Following the orthodox view of Western Sanskrit scholars that most of the dharmasūtras are older than almost all, if not all, the metrical smṛtis, I gave the first place of honour to the dharmasūtras of Gautama and others. But my own views differ to a great extent from those of the orthodox school of Sanskritists represented by Max Müller and Bühler. It is high time to state here my views about

the existence of a Mānava-dharma-sūtra supposed to be the original of our extant Manu.

Some western scholars, particularly Max Müller and Weber, started the ingenious theory that the extant Manusmṛti was a recast or remodelling of an ancient Mānavadharmasūtra. Max Müller went so far as to enunciate the bold generalisation "There can be no doubt, however, that all the genuine dharma-śāstras which we possess now, are *without any exception* nothing but more modern texts of earlier sūtra works on *kuladharmas* belonging originally to certain Vedic caraṇas" (H. A. S. L. pp. 134-135). For this sweeping generalisation there were very few data when it was made, as is admitted by Bühler. This theory of Max Müller was as hasty, as unfounded and as uncritical as several other theories of his such as that about the renaissance of Sanskrit Literature in the early centuries of the Christian era, about the absence of the art of writing in India before Pāṇini and about the uniform employment of the śloka for literary purposes in his so-called sūtra period and earlier. Western Scholars had to give up such theories before the stern logic of facts, but they have tenaciously clung to the theory about the Manusmṛti being a recast of the Mānavadharmasūtra. One of the main planks of Max Müller's edifice was the now exploded theory about the non-employment of the *anuṣṭubh* during the sūtra period (which he tentatively placed between 600 B. C.–200 B. C.) for continuous composition. In spite of the fact that one of the main planks has totally collapsed Bühler makes strenuous efforts to rehabilitate Max Müller's theory by additional *á priori* arguments (S. B. E. vol. 25, pp. xviii-xxiii and xxxi-xxxix). The main points brought forward by Bühler are:- (I) The Vasiṣṭha Dh. S. (IV. 5-8) contains four sūtras, the first of which is 'The Mānava says that one may kill an animal only in honouring the Manes, gods and guests.' There follow two verses and a passage in prose with *iti* at the end. Bühler argues that all the four sūtras are quotations and as the extant Manusmṛti is in verse, they must be regarded as taken from the Mānavadharmasūtra. (II) There are other quotations in Vasiṣṭha attributed to Manu which either contradict the present Manusmṛti or have no counterpart in the latter. Bühler draws special attention to the fact that Vasiṣṭha (19. 37) quotes a Mānava śloka which is not in the anuṣṭubh metre and which has nothing corresponding to it in the extant Manusmṛti.

(III) A fragment of Uśanas quotes an opinion of Manu about impurity, which is in prose.[144] Bühler himself points out that here one ms. reads 'Sumantuḥ' for 'Manuḥ'. Therefore this argument is of very little use in establishing the existence of a Mānavadharmasūtra. Besides, it is possible that the mutilated passage is not a quotation at all, but a mere summary of Manu's views. There is no 'iti' at the end to show that it is a quotation. (IV) Kāmandakīya-nītisāra (II. 3) says that according to the Mānavas the *vidyās* to be studied by a king are three, viz. the three Vedas, Vārtā, and Daṇḍanīti and that what is called Ānvīkṣikī is but a branch of *trayī*; while the Manusmṛti (7. 43) appears to regard the four as distinct *vidyās*.[145] Kāmandaka (XI. 67) says that Manu prescribed that the council of ministers should consist of twelve;[146] while Manu (7. 54) says that the '*sacivas*' should be seven or eight. Bühler therefore argues that Kāmandaka has in mind the Mānavadharmasūtra and not the Manusmṛti and on the word 'Mānavāḥ' makes the following observations 'It is a very common practice of Indian authors to refer in this manner to the books restricted to special schools. But I know of no case where the doctrines of the Mānavadharmaśāstra or of any other work, which is destined for all Aryans and acknowledged as authoritative by all, are cited in the same or similar way' (S. B. E. vol. 25, p. XXXVIII). In the first place it has to be noted that Kāmandaka is only paraphrasing the words of Kauṭilya in the above two places.[147] Further it is note-

144 In No. 644 of Viśrambag (I) in the Deccan College there is a fragment of Uśanas where we read उपस्पृश्य... (gap) मनुराह। बाले देशान्तरस्थे चानग्निके वोराण्याने (?) अनाशकेग्निप्रवेशे युद्धहते च सद्यः शौचम्. The words बाले देशान्तरस्थे occur in Manu 5. 78 in the same connection. For the rest, compare Manu 5. 93 and 95. We must probably read देशान्तरस्थे च साग्निके. No. 191 of A 1881–82 is another fragment of Uśanas which contains the same passage. Bühler's mss. read सद्यः शौचानष्टपतिताभितनिन्दिताचौरैर्न सह संवसेत् and he proposes शौचामिष्टमिति.

145 The words of the मनुस्मृति are त्रैविद्येभ्यस्त्रयीं विद्यां दण्डनीतिं च शाश्वतीम्। आन्वीक्षिकीं चात्मविद्यां वार्तारम्भांश्च लोकतः॥

146 कामन्दक says 'द्वादशेति मनुः प्राह षोडशेति बृहस्पतिः। उशना विंशतिरिति मन्त्रिणां मन्त्रिमण्डलम्॥

147 'त्रयी वार्ता दण्डनीतिश्चेति मानवाः। त्रयीविशेषो ह्यान्वीक्षिकीति' कौटिल्य I. 2; 'मन्त्रिपरिषदं द्वादशामात्यान् कुर्वीतेति मानवाः षोडशेति बार्हस्पत्याः विंशतिमित्यौशनसाः' कौटिल्य I. 15.

worthy that Kāmandaka employs the word 'Manuḥ' while Kauṭilya uses the word 'Mānavāḥ' (about the number of ministers). Therefore according to the Kāmandakīyanītisāra there was no difference between the two, viz. the words 'Manuḥ' and 'Mānavāḥ' denoted the same thing, a work. What Bühler means by his emphasis on the word 'Mānavāḥ' is not quite clear. Early writers like Kumārila and Viśvarūpa employ the word 'Mānavam' with reference to the Manusmṛti just as they use the word Vāsiṣṭham to denote the Vaṣiṣṭhadharmasūtra (vide Tantra-vārtika pp. 80, 115, 642 and Viśvarūpa on Yāj. III. 245 and 257). Śaṅkara in his bhāṣya on Bṛ. Upaniṣad I. 4. 17 applies the word 'mānava' to the Manusmṛti 'mānave ca sarvā pravṛttiḥ kāmahetukyeveti' (referring to Manu II. 4). Besides, there is hardly any conflict between the views of the Mānavas and the Manusmṛti on the point of the number of the *vidyās*. The Mānavas knew that Ānvīkṣikī was counted as a fourth *vidyā* but said that it was really comprehended in the study of the Vedas. The Manusmṛti only lays down from whom the *vidyās* were to be learnt. As regards the number of ministers, we cannot afford to forget that the Manusmṛti (7. 60) allows more ministers than seven or eight. Another explanation also is possible. In the final remodelling of the Manusmṛti from its original in verse it is not unlikely that a few changes were made. (V) On the strength of the preservation of the complete set of the sūtra works of Āpastamba on śrauta, gṛhya and dharma (also of Baudhāyana and Hiraṇyakeśin), it is urged that the Mānava *caraṇa* had a sūtra on dharma. The Mānavaśrautasūtra (parts 1-5 edited by Dr. Knauer and the *chayana* by Miss Gelder at Leipzig in 1921) and the Mānava-gṛhyasūtra (edited by Dr. Knauer in 1897 and recently in the Gaikwad Oriental Series) are extant. Bühler admits (S. B. E. vol. 25, p. XXXVIII) that the main pillars of his arguments are the quotations ascribed to Manu in the Vasiṣṭhadharmasūtra.

The four sūtras of Vasiṣṭha (IV. 5-8) which are the sheet anchor of Bühler's argument have been dealt with above under Vasiṣṭha (pp. 53-56). If, as Bühler says, the four sūtras are one quotation, since 'iti' occurs at the end of the 8th sūtra, then we have here a quotation within a quotation, as 'iti' occurs also in sūtra 5. But this would be absurd. Besides sūtra 8 is really summarised from some Brāhmaṇa passage, as indicated above. The proper construction of the four

sūtras is as follows :— The fifth sūtra merely summarises the views of the Manusmṛti to be gathered from Manu V. 41 and 48. The word 'Mānavam' stands for the Manusmṛti just as it does in the Tantravārtika and in Viśvarūpa. Then the two verses of Manu are quoted. In the 8th sūtra a Brāhmaṇa passage is cited in support of the position that sacrificing an animal is not 'killing' (that leads to sin).

As regards the few quotations which cannot be found in the extant Manusmṛti the following points deserve consideration. The Vasiṣṭhadharmasūtra contains numerous verses identical with those of the Manusmṛti. Most of the quotations attributed to Manu are found in the Manusmṛti. Hence even if a few quotations are not found in our Manu, we cannot at once jump to the conclusion that Vasiṣṭha had before him not the Manusmṛti, but the Mānavadharmasūtra. Besides Bühler is not right in saying that Vasiṣṭha 11. 23, 12. 16 and 23. 43 either contradict or find no counterpart in our Manu (S. B. E. vol. 25 p. XXXIV). Vasiṣṭha 11. 23 corresponds with Manu 3. 245-246.[148] None of the three contradict anything contained in the Manusmṛti. Vasiṣṭha 23. 43 (about Śiśukṛcchra) has nothing corresponding to it word for word in our Manu, but it seems to be an echo of Manu 11. 211.[149] In Vasiṣṭha 12. 16 (paryagnikaraṇam

148 'प्राक्संस्कारात्प्रमीतानां स्ववंश्यानामिति स्थितिः। भागधेयं मनुः प्राह उच्छिष्टोच्छेषणे उभे ॥ वसिष्ठ 11. 23. Should we not read स्ववश्यानाम्, which would correspond to the word दासवर्ग in Manu? मनु reads 'असंस्कृतप्रमीतानां त्यागिनां कुलयोषिताम्। उच्छिष्टं भागधेयं स्याद् दर्भेषु विकिरश्च यः ॥ उच्छेषणं भूमिगतमजिह्मस्याशठस्य च। दासवर्गस्य तत्पित्र्ये भागधेयं प्रचक्षते ॥' 3. 245-246, The close correspondence between Vas. and Manu in ideas and phraseology should be specially marked.

149 वसिष्ठ (23. 43) 'अहः प्रातरहर्नक्तमहरेकमयाचितम्। अहः परार्कं तन्त्रैकमेवं चतुरहो परौ ॥ अनुग्रहार्थं विप्राणां मनुर्धर्मभृतां वरः। बालवृद्धातुरेष्वेवं शिशुकृच्छ्रमुवाच ह ॥'; मनु 11. 245. 'त्र्यहं प्रातस्त्र्यहं सायं त्र्यहमद्यादयाचितम्। त्र्यहं परं च नाश्नीयात्प्राजापत्यं चरन् द्विजः ॥. It would be noticed that the शिशुकृच्छ्र comes to one-third of the प्राजापत्यकृच्छ्र, as the शिशुचान्द्रायण (मनु. 11. 218) is a milder edition of the चान्द्रायण. The प्रायश्चित्त for minors and women was one half or one third of that for adult males (vide बौ. ध. सू. II. 1. 51. and आङ्गिरसस्मृति verse 33). बौ. ध. सू. (II. 1. 65) describes the four day's observance as the कृच्छ्र for women, minors and old men. याज्ञ. III. 319 calls it पादकृच्छ्र.

hy-etan-manurāha Prajāpatiḥ) there is nothing that contradicts our Manu; that half and the preceding verses bear a close correspondence to Baudhāyana Dh. S. I. 4. 2. Similarly Bühler's argument about Mānava śloka in the Triṣṭubh metre is not quite sound. The text of Vasiṣṭha is far from satisfactory. On the non-occurrence of that verse or a corresponding śloka in our Manu no superstructure can be built. Vasiṣṭha quotes (4. 37) a sūtra or opinion of Gautama which is not found in the extant Gautamadharmasūtra. Verses ascribed to Vasiṣṭha in the nibandhas are not found in the printed text of Vasiṣṭha (*vide* n. 108 above.)

The analogy of the works of the schools of Āpastamba and others can furnish no proof. There are on the other hand weighty grounds for discarding that analogy altogether. It is a remarkable fact that excepting the three *caraṇas* (of the Black Yajurveda) of Āpastamba, Baudhāyana and Hiraṇyakeśin that arose and flourished in the southern portion of India, no *caraṇa* of any of the other Vedas has an extant dharmasūtra ascribed to the founder of the *sūtra-caraṇa*. An explanation is suggested in the following lines. The Brāhmaṇas in southern India were in the very early days of their colonisation surrounded by an alien culture and by alien customs. It was necessary therefore to formulate distinctly the rules of general conduct for the Aryan community in southern India, that studied the Black Yajurveda. The same necessity did not exist in northern India, where the members of the *sūtracaraṇas* knew their ordinary every day duties very well, and were more or less a homogeneous community with the same ideals and culture. Therefore in the beginning when manuals of śrauta and gṛhya ceremonies were first composed, it was not thought necessary to compose set treatises on *dharma* for each *caraṇa*. Some of the rules of conduct were embodied in the gṛhya sūtras because they were germane to the subjects treated of in them (such as the duties of Brahmacārins and householders, holidays etc.). Works, however, dealing with the general usages prevalent among the Aryan community in various parts of northern India must have been composed early enough. When the knowledge of the existence of the complete set of the sūtra works in the Āpastamba and other *caraṇas* of the Yajurveda in southern India permeated to northern and central India, the leaders of the *caraṇas* cast about for works that would complete the works of their *caraṇas* and bring

them in a line with those of Āpastamba and others. Therefore the various *caraṇas* seized upon several dharmasūtras and adopted them in their schools for study. This must have occured at a comparatively early date. For Kumārila, as we saw above, enlightens us as to what dharmasūtras were specially studied in which Vedic schools. The fact that, though Gautama and Vasiṣṭha are said to have been specially studied by the students of the Sāmaveda and the Ṛgveda respectively, there is hardly anything in these dharmasūtras that specially connects them with the two Vedas affords some corroboration of the above hypothesis. This assimilation of independent dharmasūtras into individual *sūtracaraṇas* probably took place before or in the first centuries of the Christian era. Śabara (on Jaimini I. 3.4) seems to make fun of the dharmasūtras when he says that the direction to observe *brahmacarya* for forty-eight years was a device of those who wanted to hide their impotence (Gautama 2. 52, Āp. Dh. S. I. 1. 2. 11-12, Baud. Dh. S. I. 2. 1. speak of *brahmacarya* for 48 years). This shows that these dharmasūtras could not have been regarded as very authoritative by all early writers. Jaimini I. 3. 11 (according to Śabara) denies the independent authority of Kalpasūtras. It appears that the Mānava school, which according to the caraṇavyūha was a subdivision of the Maitrāyaṇīya, dwindled in numbers very early. Kumārila, who was a most learned and profound student of the various branches of Sanskrit literature, nowhere mentioned the Mānavadharmasūtra as studied by followers of the Black Yajurveda, though he mentions Baudhāyana and Āpastamba as studied by them. He places the Manusmṛti even higher than the Gautamadharmasūtra and betrays no knowledge of the existence of the Mānavadharmasūtra. Viśvarūpa who is generally identified with Sureśvara, the pupil of Śaṅkara, remarks that the Mānavacaraṇa is not existent (or found).[150]

The foregoing discussion will, it is hoped, induce every impartial critic to endorse the conclusion that on the materials so far available the theory that the Mānavadharmasūtra once existed and that the extant Manusmṛti is a recast of that sūtra must be held not proved.

14. The Arthaśāstra of Kauṭilya

This epoch-making work was first published by Dr. Shamasastri in 1909 in the Mysore Sanskrit Series and was also translated by him. Pandit T. Ganapati Sastri of Trivandrum has published the work

with his own commentary called Śrīmūla. Dr. Jolly and Dr. Schmidt edited the text with a valuable introduction and the commentary, called Nayacandrikā, of Mādhavayajvan on portions of the text in the Punjab Sanskrit series at Lahore. In this work the edition of 1919 by Dr. Shamasastri has been used. This work has given rise to frequent and furious controversies about its authorship, its authenticity and its age and it cannot be said that we have heard the last of this din of controversy. Moreover this work has inspired besides numerous articles in journals several monographs, some of which have somewhat high sounding titles, such as Narendranath Law's 'Studies in Ancient Indian Polity,' Dr. P. Banerji's 'Public Administration in Ancient India,' Ghosal's 'History of Hindu Political Theories,' Majumdar's 'Corporate Life in Ancient India,' Benoy Kumar Sarkar's 'Political Institutions and Theories of the Hindus,' Jayasval's 'Hindu Polity,' Prof. S. V. Visvanathan's 'International Law in Ancient India (1925)'. It is not possible to discuss at great length all the problems about Kauṭilya here. Only a brief statement can be attempted. For fuller study reference may be made to the following works and papers :— Hillebrandt's 'über das Kauṭilyaśāstra und Verwandtes' (Breslau 1908), Z D M G vol. 67, pp. 49-96 (Dr. Jolly), Z D M G vol. 68, pp. 345-359 and vol. 69, p. 369 ff; J R A S 1916, pp. 130-137 (Prof. Keith), I. Meyer's 'Das altindische Buch vom Welt- und Staatsleben das Arthaśāstra des Kauṭilya' (Leipzig, 1925) and Prof. N. C. Bandopadhyaya's exposition of the social ideal and political theory of Kauṭilya. The Indian Antiquary for 1925 (pp. 175 and 201) gives an exhaustive bibliography on the date of Kauṭilya.

The Kauṭilīya is the oldest extant work on Arthaśāstra. Though Arthaśāstra and Dharmaśāstra are often contradistinguished on account of the difference of the two śāstras in ideals and in the

methods adopted to reach them, Arthaśāstra is really a branch of Dharmaśāstra as the former deals with the responsibilities of kings for whom rules are laid down in many treatises on *dharma*.[151] For this reason and the further reason that the Kauṭilīya contains two sections (called dharmasthīya and kaṇṭakaśodhana) on the administration of justice, the Arthaśāstra of Kauṭilya deserves careful consideration in this work. According to the Caraṇavyūha of Śaunaka, Arthaśāstra is an Upaveda of Atharvaveda. The purpose of this Śāstra as stated in the Kauṭilīya itself is 'to prescribe means for securing and preserving (power over) the earth '.[152] Yājñavalkya distinctly states (II. 21) that in case of conflict between Dharmaśāstra and Arthaśāstra, the rule is that the former prevails [153]. Nārada also (I. 39) says the same thing.[154] From comparatively ancient times Cāṇakya *alias* Kauṭilya or Viṣṇugupta has been credited with the composition of a work on Arthaśāstra. The Kāmandakīyanītisāra [155] pays a glowing tribute of praise to Viṣṇugupta, who, singlehanded, brought about the downfall of Nanda, bestowed the earth on Candragupta and distilled from the ocean of Arthśāstra the quintessence, his work on politics. Kāmandaka further tells us that he looked upon Viṣṇugupta as his *guru*.[156] The Tantrākhyāyikā (H. O. S. vol. 14) which is certainly not later than 300 A. D. pays homage to Cāṇakya the Great as one of the authors of treatises on Politics. [157] Daṇḍin in his Daśakumāracarita

(section VIII, p. 131, 2nd edition B. S. Series) says that the teacher Viṣṇugupta compressed Daṇḍanīti for the sake of the Maurya king into six thousand ślokas and quotes passages from Cāṇakya.[158] Bāṇa associates the work of Kauṭilya with harsh and cruel expedients.[159] The Pañcatantra identifies Cāṇakya and Viṣṇugupta and speaks of Cāṇakya as the author of Arthaśāstra (*vide* part I. p. 2 ed. by Kielhorn part II. p. 65 and part III. 50 ed. by Bühler). Kauṭilya figures very largely in the Purāṇas (vide Pargiter's 'dynasties of the Kali age' pp. 69-70 and Viṣṇupurāṇa 4. 24. 26-28). He has a prominent place in the Bṛhatkathā of Guṇāḍhya, as appears from the works of Kṣemendra and Somadeva. The Mṛchhakaṭika (I. 39 B. S. series) refers to Cāṇakya. The Mudrārākṣasa identified Cāṇakya and Kauṭilya and suggests the derivation of the latter name from 'Kuṭila' (crooked).[160] Some of the above items of information are supported by the personal references contained in the Arthaśāstra itself. At the end of the first chapter of the first *adhikaraṇa*, Kauṭilya is said to be the author of the Śāstra and at the end of the 10th chapter of the second *adhikaraṇa* Kauṭilya is said to have laid down the rules for royal edicts for the sake of the king.[161] The last verse[162] tells us that he who impatiently wrested the earth from the Nanda king composed the work and after the colophon a verse tell us that seeing the differing interpretations of bhāṣyakāras on the Arthaśāstra, Viṣṇugupta himself composed the sūtra and the bhāṣya.

The first question that arises for consideration is the authenticity of the work, that is, the question whether it can be the work of the

famous minister of Candragupta Maurya, who was a contemporary of Alexander, and who must therefore have flourished about 320 B.C. This question very largely depends upon the age of the work. But other considerations, more or less of a subjective character and depending upon the absence of certain things from the Kauṭilīya, must be dealt with first. Jolly, Keith and Winternitz hold that the extant Kauṭilīya is not the work of the Maurya minister. One argument, viz. that a person like Cāṇakya who had to build a vast empire such as that of Candragupta and who was bent down with the cares of the empire could not have found time to write such a work, may be brushed aside as entirely futile, being a purely subjective argument. Some persons may say that he could have found time, just as Sāyaṇa and Mādhava could find in later days, to write such a work in the midst of all cares, while others may deny the possibility of such a thing. Similarly most of the arguments from the silence of the Kauṭilīya are also quite unconvincing and lead to no certain and universally acceptable conclusion. The non-mention of Pāṭaliputra or of the empire of Candragupta is of very little use in deciding the question of the authenticity of the work. The argument of Stein and Winternitz that in Megasthenes' account of India no great person named Cāṇakya or Kauṭilya appears and that the former's account of the condition of India does not tally with that presented by the Kauṭilīya is of very little weight. We have no means for finding out what proficiency Megasthenes had acquired in the languages of India so as to be able to hold conversation with all sorts and conditions of men. Besides it is well known that Megasthenes' writings have been handed down in a fragmentary state and that he often spins his own yarns. Megasthenes declares the Indians to be unacquainted with writing. But no Western scholar would now subsribe to the view that writing was unknown in India about 320 B. C. Dr. Jolly himself has to remark that the idealising tendency in Megasthenes greatly impairs the trustworthiness of his statements (p. 40, Introduction to Kauṭilīya). This question of the authenticity of the work is bound up with the question whether it can be the work of an individual author or whether it is the product of a school. Hillebrandt vehemently argues that it is the product of a school and Jacobi as vehemently repudiates that hypothesis. The great stumbling block according to many scholars in the way of regarding Kauṭilya as the author of the work is the fact that the views of Kauṭilya are cited by name about 80 times in the work

itself almost always in opposition to the views of other teachers. But there is nothing specially to be wondered at in this. In order to avoid looking too egotistic, ancient authors generally put their own views in the third person as said by early writers like Medhātithi and Viśvarūpa.[163] It has to be admitted that the first person singular also is used by ancient writers, though rarely.[164] Jacobi (I. A. for 1918 p. 188) and Keith are both wrong in thinking that the view of Kauṭilya is criticized by Bhāradvāja in V. 6. Kauṭilya states his position first and then mentions the view of his predecessor.[165] Dr. Jolly (Intro. to Kauṭilīya p. 44) is wrong in his explanation of Apadeśa (in XV. 1.[166]). That word is applied to passages which mean 'this or that author says this or that' and the Kauṭilīya cites from his own work a case of the statement of various views on a certain point. These words do not at all indicate that according to the Arthaśāstra Kauṭilya was a stranger. Keith thinks (J. R. A. S. 1916 p. 135) that as Kauṭilya is derived from Kuṭila, an author will not cite his own views under such an epithet. It is not unlikely that Cāṇakya acquired the epithet Kauṭilya on account of his methods in dealing with the Nandas and that as he did so from no purely selfish motives but for ridding the country of such tyrants as the Nandas are represented to have been, he might have come to relish the name given to him by the people. It has to be noted in this connection that many of the writers quoted in the Kauṭilīya bear nicknames (such as Piśuna, Vātavyādhi, Kauṇapadanta). This leads to the question as to whether the name is Kauṭilya or Kauṭalya. Hillebrandt seems to imply that all mss. employ the first form, while Pandit T. Ganapatisastri says his mss. support the latter form though in the first few pages he prints Kauṭilya. Mss. of the Kādambarī, the Pañcatantra and other works support the form Kauṭilya and the Mudrārākṣasa does the same by pointedly hinting at the etymology.

A com. on the Kāmandakīyanītisāra styles the Kauṭilīya as Kuṭalabhāṣya and Kuṭala is said to be a *gotra*. The form Kauṭalya is said to occur in an inscription at Ganesar in Dholka dated Vikrama Saṁvat 1291 (i. e. 1234-35 A. D.). Vide Indian Historical Quarterly vol. I. p. 786. It is very difficult to decide between the rival claims of the two forms, but it appears that the form of the name, Kauṭalya, is due to a later attempt to solve the difficulty of an author parading his views as those of a man nicknamed "crooked". Whether Kuṭala or Kauṭalya was known as a gotra ṛṣi in ancient times is extremely doubtful. Neither the Āśvalāyana-śrauta-sūtra (Uttaraṣaṭka, 6th chap., 10th Kaṇḍikā) nor the Āpastamba-śrauta-sūtra (24. 5-10) mentions Kuṭala among the several gotra groups. In later works on *gotras*, we find the name in several forms. In the Pravaradarpaṇa of Kamalākara Kauṭali is said to be one of the Jāmadagnya-Vatsa group of the Bhṛgus (p. 156, edited by P. Chentsalrao, Mysore) and Kauṭilya is assigned to the Yaska group of the Bhṛgus (p. 158). The Pravaramañjarī enumerates the Kauṭilyas (p. 32, of the edition by P. Chentsalrao, Mysore) among the Yaska group of the Bhṛgus, also among the Śaradvanta group of the Gautamas, a branch of the Āṅgirasas, (p. 161) and Kauṭili as one ot the Bhṛgus (p. 42). We have to remember that so early a writer as Kāmandaka (who was well known to Bhavabhūti and Vāmana's Kāvyālaṅkārasūtra-vṛtti) who is assigned to the third centery A. D., and the Tantrākhyāyikā distinctly assign a work on politics to the minister of Candragupta. No weighty arguments have been advanced so far why this tradition vouched for so early should be disregarded. Keith finds it impossible that in the words 'six thousand ślokas' used by Daṇḍin the word śloka could mean a unit (in prose) of 32 letters. But Daṇḍin is evidently repeating the words that occur in the Arthaśāstra itself at the end of the first chapter.[167]

Before proceeding to discuss the age of the Kauṭilīya, it is advisable to say a few words on the form, style and contents of the work. The work is divided into 15 adhikaraṇas, 150 chapters, 180 topics and contains 6000 ślokas (i. e. units of 32 letters). The work is in prose interspersed with a few verses. Each chapter has

[167] शास्त्रसमुद्देशः पञ्चदशाधिकरणानि सपञ्चाशद्ध्यायशतं साशीतिप्रकरणशतं षट्श्लोक-सहस्राणीति । These words of the Kauṭilīya must mean 6000 units of 32 letters and nothing else.

at the end at least one verse and sometimes more. A few verses occur also in the midst of some chapters as in I. 8, I. 15, II. 10, II. 24, V. 6, VII. 5, VII. 6, VII. 9, VII. 13, X. 3, XIII. 4. There are about 340 verses excluding *mantras*. Almost all these verses are in the Anuṣṭubh metre, only eight verses being in the classical Indravajrā or Upajāti metres (in II. 9, II. 10 and X. 3). In our utter ignorance about the literature on Arthaśāstra prior to Kauṭilya it is impossible to say how many of these verses are borrowed and how many are of his own composition. There can be no doubt that some of these verses were composed by him (e. g. the two verses in I. 10, where the views of Ācāryas are given, and the words 'etat Kauṭilya-darśanam' occur). It appears that some verses are clearly quotations. For example, the verse 'nāsya guhyam' at the end of I. 15, and the verse 'saṁvatsareṇa patati' at the end of IV. 7 are Manu 7. 105 and 2. 180 respectively. The last occurs in Baud. Dh. S. II. 1. 62 and also in Vas. I. 22. The two verses in the Upajāti metre in X. 3 'yān yajñasaṅghaiḥ' and 'navaṁ śarāvam' occur respectively in the Parāśaradharmaśāstra (chap. III. p. 12 of Jivananda, part II) and in the Pratijñā (IV. 3[168]). It is noteworthy that they are introduced with the words 'apīha ślaukau bhavataḥ' and follow a quotation from or summary of a Vedic passage. Twelve verses in VII. 9 are introduced with the words 'tatraitad bhavati' and may be quotations. A few of the verses bear a close resemblance to verses of other works; e. g. the verse 'pṛṣṭaḥ priyahitam brūyāt' (in V. 4) which is very similar to Manu. 4. 138. In some cases he connects verses with his own words, e. g. the words 'kurvataśca' with 'nāsya guhyam' (at the end of I. 15) and the last verse of II. 25. The style of the Kauṭilīya is simple and direct. It is not concise like that of the Vedānta or Vyākaraṇa sūtras. It resembles the dharmasūtras of Gautama, Hārīta and Śaṅkha-Likhita, but is not as archaic as that of Āpastamba. According to the commentaries the several headings of the prakaraṇas are sūtras and the contents of them the bhāṣya (vide Nayacandrikā pp. 137, 143-44 &c., edited by Dr. Jolly). It abounds in numerous technical and rare terms. It is generally in

[168] The manner in which the गाम्रसेवक brings in this verse does not show that it is the author's own. The verse is preceded by the words मृण्वन्तु ब्रुवन्तः and is probably put in as a weighty utterance from some ancient source.

accordance with Pāṇini's grammar, though such un-Pāṇinean words as 'pāpiṣṭhatama' (in VII. 11) rarely occur. It employs the word 'avyaya' in the masculine (II. 10), while Pāṇini (I. 1. 37) employs 'avyayam'.

The whole work on account of its careful arrangement of topics and unity of design impresses one as the product of a single brilliant mind. The Kauṭilīya sheds such valuable light on the social, economic, political and religious life of ancient India and contains information on so many topics that it is not possible to convey any idea of its contents in a brief summary. The subjects of the fifteen *adhikaraṇas* are :— I. the discipline of the king, sciences to be learnt by him, the place of Ānvīkṣikī and politics, qualifications of ministers and purohita and their temptations, the institution of spies, council meetings, ambassadors, protection of princes, duties towards harem, king's personal safety; II. about superintendents of various state departments, founding villages, pastures and forests, forts, duties of the chamberlain (sannidhātā), the commissioner for revenues from forts, country, mines, forests, roads &c.; accountant-general's office; embezzlement of public funds; royal edicts; examination of precious stones for the treasury and mines; superintendent of gold (i. e. of coins issued from the mints); superintendent of store-house (of agricultural produce &c.), of commerce, of forests, of arms, of weights and measures, of tolls, of weaving, of liquor houses, of slaughter houses, of prostitutes, of shipping, of cows and horses, of the capital and cities; III. Administration of justice, rules of procedure, forms of marriage, duties of married couples, strīdhana, twelve kinds of sons; other titles of law; IV. removal of thorns, protection of artisans, merchants, remedies against national calamities such as fires, floods, pestilence, famines, demons, tigers, snakes, etc; suppression of those who live by foul means; detection of juvenile crime; arrest of criminals on suspicion, accidental or violent deaths, torture to extort confessions; protection of all kinds of state departments; fines in lieu of cutting off of limbs, sentence of death with or without torture; intercourse with maidens; punishment of fine for various wrongs; V. conduct of courtiers, award of punishment for treason, replenishing of treasury in case of emergency; salaries of state servants, qualifications of courtiers, consolidation of royal power; VI. constitution of the maṇḍala, seven elements of sovereignty, qualities of king, peace and arduous work

as the source of prosperity; sixfold royal policy; threefold *śakti*; VII. circle of states is the field for the employment of the six lines of policy; the six *guṇas* (saṁdhi, war, neutrality, marching, taking shelter and dvaidhībhāva); causes leading to the dwindling and disloyalty of armies; combination of states; saṁdhi for the acquisition of a friend, gold or land; an enemy in the rear; recouping of lost strength; a neutral king and a circle of states; VIII. about *vyasanas* (vices and misfortunes) of the several elements of sovereignty; troubles of the king and the kingdom; troubles of men and of the army; IX. work of an invader, proper time for invasion, recruitment of the army, accoutrements, internal and external trouble, disaffection; traitors, enemies and their allies; X. about war; encamping the army, march of the army, battle-fields, work of infantry, cavalry, elephants &c.; array of troops for battle in various formations; XI. concerning corporations and guilds; XII. concerning a powerful enemy; sending an envoy; intrigues, spies with weapons, fire and poison and destruction of stores and granaries; capture of the enemy by stratagems; final victory; XIII. capture of forts; sowing dissensions; enticing of king by stratagem; spies in a siege; restoring peace in a conquered country; XIV secret means, strategems for killing an enemy, producing illusive appearances; medicines and incantations; XV division of this work into sections and their illustrations.

It would be interesting to say a few words separately on the chapter about judicial administration. Dr. Jolly has collected together the passages of the Kauṭilīya on judicial administration that bear a very close resemblance to the several works on ancient Indian Law (vide Z. D. M. G. vol. 67, pp. 51-90). It will be seen therefrom that there is the greatest correspondence between the Kauṭilīya and Yājñavalkya. It is no doubt true that many passages from Manu and Nārada agree closely with those of the Kauṭilīya but not to the same extent as those of Yājñavalkya. A few striking examples are quoted below.[169] The question then arises whether there is

borrowing and if so who the borrower is. The agreement in phraseology is so close that it must be regarded as a case of borrowing and in my opinion it is the Yājñavalkyasmṛti that borrows. The reasons are many. Yājñavalkya represents on numerous points of law a very great advance upon the doctrines of Kauṭilya. Kauṭilya does not contain distinct directions upon the four stages of a law suit (plaint, reply, proof and judgment) nor upon the threefold aspects of proof (documents, witnesses, prescription). Yājñavalkya goes into all these matters. The Kauṭilīya does not recognise the widow or mother as heir to a sonless man ; Yājñavalkya does so. Kauṭilya does not mention the *bandhus* as heirs ; he hardly says anything about re-union.[170] The Kauṭilīya divides the strīdhana of a woman dying during her husband's lifetime among her sons and daughters, while Yāj. prefers the daughters to the sons.[171] It is not necessary to multiply examples. It goes without saying that Yājñavalkya represents a far too advanced stage of juristic principles than the Kauṭilīya and so must be later than the latter by several centuries. The Kauṭilīya agrees very closely with Manu also, but considerations of space prevent me from going into the points of agreement. There are however numerous fundamental points on which Manu and the Kauṭilīya disagree.

Kauṭilya allows *niyoga* even in the case of Brāhmaṇas (last verse of III. 6 and at the end of I. 17 about kings). Manu first speaks of *Niyoga* and then condemns it (vide 9. 57-63 and 9. 64-68). As Bṛhaspati refers to this fact in Manu's work,[172] it appears that the

passages condemning *niyoga* were put in probably earlier than the fitst centuries of the Christian era. Though Kauṭilya speaks of almost the same 18 titles as those in Manu (8. 4-7) almost under the same names, there is a slight difference. Manu has no such title as *Prakīrṇaka*. Kauṭilya speaks of upanidhi and extends the same rules to Nikṣepa, while Manu speaks of the title as Nikṣepa. The ancient dharma-sūtras do not give the technical names of the eighteen titles of law, though some of them do occur therein. Vāk-pāruṣya and daṇḍapāruṣya occur in G. Dh. S. (12. 1) and Vas. (17.61). Baud. seems to have known the term 'Strīsaṅgrahaṇa' (Dh. S. II. 2.54). *Steya* occurs in all. Gautama speaks of *nidhi* (Dh. S. 12. 39). Manu positively says (9. 155) that the son of any member of the first three *varṇas* from a Śūdra woman does not inherit his father's wealth (though the preceding verses 151-154 seem to lay down different rules), while Kauṭilya allows such a son a share when there are sons born to a Brāhmaṇa from wives of higher castes or one third when he has no other sons (III. 6). Manu expressly mentions the mother and paternal grandmother as heirs (9. 217), while Kauṭilya appears to ignore them. Manu prohibits the remarriage of widows (V. 161-165), while Kauṭilya allows not only widows to remarry, but also wives whose husbands have not been heard of for a year or more according to circumstances (III. 4). Kauṭilya allows a wife to desert her husband, if the latter is of a bad character, has become a traitor to the king, endangers her life or has become an outcaste or impotent[173] (last verse of III. 2). Kauṭilya further seems to have allowed divorce which is unknown to any other known lawgiver, but he bases it only on the ground of mutual hatred and says that a marriage in the approved forms cannot be dissolved[174] (III. 3). Manu is very harsh upon gamblers and asks the king to supress gambling and banish gamblers (9. 221-224), while Kauṭilya only brings gambling under the control of the king for the purpose of detecting thieves &c. (III. 20). Manu first allows a Brāhmaṇa to marry even a Sūdra woman and then condemns such a thing (III. 13-19), while Kauṭilya does not condemn such unions. These divergences and others lead us to conclude

that the Kauṭilīya is much older than the extant Manusmṛti, which is in many matters carried away by puritanic zeal, while its older portion is more in harmony with the spirit of the Kauṭilīya. Therefore the Kauṭilīya is long anterior to the time when the extant Manusmṛti took its present form. The Kauṭilīya refers to the opinion of the Mānavas in five places. Two of the views ascribed to the Mānavas by Kauṭilya are the sama as those which Kāmandaka (II. 3 and XI. 67) ascribes to Manu. According to the Mānavas, the *vidyās* to be studied by a prince were three, viz. trayī, vārtā and daṇḍanīti, what is called ānvīkṣikī being but a branch of trayī; and the council of ministers was to consist of twelve. The Manusmṛti (7. 43) appears to regard the *vidyās* as four and lays down (7. 54) that the Council should consist of seven or eight *sacivas*. Bühler and others on account of this difference in the views of the Mānavas and the Manusmṛti thought that Kauṭilya was referring to the Mānvadharmasūtra. In my humble opinion the evidence for the existence of a Mānavadharmasūtra is practically nil, as detailed above in section 13. From the references to Svāyaṁbhuva Manu and Prācetasa Manu contained in the Mahābhārata, particularly in the Śānti and Anuśāsana *parvans* it appears that there were two works in verse on *dharma* and politics attributed to these two or there was one work containing both. These works were subsequently recast as the Manusmṛti. It is therefore that some difference is noticed between the views ascribed to the Mānavas aud the extant Manusmṛti. Besides there is no real conflict in the matter of *vidyās*. The Manusmṛti does not positively say that the *vidyas* are four and not three; it simply says from whom trayī and the other three are to be learnt. The Manusmṛti (in 7. 60) allows more ministers than seven or eight. It is possible that in recasting several changes were made. The third opinion of the Mānavas quoted by Kauṭilya is about the fine to be imposed upon officers of the state occasioning loss of revenue (II. 7). The other two views of the Mānavas quoted are concerned with the fine to be imposed on false witnesses and for forcible seizure of jewels[175] &c. It must be admitted that in the extant Manusmṛti there is nothing exactly corresponding with these views. But from this fact no one conclusion alone can be drawn. There may be a mistake in quoting, or there may be inter-

polations, it may be that some of the verses in the original Manu-smṛti have dropped out or that Kauṭilya is quoting not the Manu-smṛti itself, but the views of works based on or explanatory of Manu. It is noteworthy that Bṛhaspati[176] contains a verse very similar to the views on sāhasa attributed to the Mānavas. We shall see below that Bṛhaspati's work was more or less a supplement of Manu. The only authors or schools, besides the Mānavas, cited by name in the dharmasthīya section are the Bārhaspatyas and the Auśanasas. It is remarkable that the well-known and ancient Dharmasūtrakāras like Gautama, Āpastamba, Baudhāyana, Vasiṣṭha, Hārīta are nowhere quoted by name. It is noteworthy that in the dharmasthīya section Kauṭilya several times quotes the views of ācāryas and of some others under the word "apare". Some of these views correspond closely with the discussions in the ancient dharmasūtras. One of these is the question as to whom the child belongs, to the begetter or to him on whose wife it is begotten. Kauṭilya first quotes the view of the ācāryas that it belongs to the husband of the mother of the child, then says that some hold that it belongs to the begetter, while Kauṭilya holds that it belongs to both.[177] It is to be noted here that both Baud. and Āp. say that according to the Brāhmaṇas the sons belong to the begetter, while Vasiṣṭha says there is a dispute on the point, both views being supported by ancient authorities. Gautama speaks of both views and at last (18. 13 "dvayorvā") seems to come to the same conclusion as Kauṭilya. It is not unlikely that Kauṭilya has in mind this discussion in the Dharmasūtras and also in Manu (9. 48–54 where the view is that the child belongs to the husband of the woman). Some of the other views attributed to ācāryas are that a woman could visit the houses of her husband's relations, of prosperous men, of village headmen, of female ascetics &c. (III. 4); that very poor men could divide even waterpots at a partition (III. 5); that the master who did not employ a servant ready to work according to agreement had to

pay the wages agreed upon as if the work had been finished (compare Viṣṇu V. 157); he who forcibly confined a man or woman or who by force released another from imprisonment was to be fined between 500 and 1000 (III. 17); that disputes of a remote date shall not be complained of and that he who is the first to complain wins, since one runs (to court) as one cannot bear the pain (III. 19); that in a complaint by one gambler against another, the successful party has to pay the fine called pūrvasāhasa and the defeated party the fine called madhyasāhasa (III. 20).

The foregoing discussion about the dharmasthīya section shows that in the sphere of the administration of justice, Kauṭilya is far in advance of the dharmasūtras of Gautama, Āpastamba and Baudhāyana and so is much later than these (though in certain matters such as the rights of women to succeed to males he closely agrees with Gautama and Āpastamba), while he is earlier than the extant Manusmṛti (though not earlier than the oldest kernel of the Manusmṛti) and very much earlier than Yājñavalkya.

The question of the date of the Kauṭilīya can be settled only approximately and for that we have to rely only on the internal evidence. The external evidence does not carry us far; we can only say that the Kauṭilīya is certainly not later than the 2nd century A. D., since Kāmandaka, the Tantrākhyāyikā, and Bāṇa, speak of it with admiration. No one claims it to be earlier than 300 B. C. Even Keith who assigns it a late date and cannot place it earlier than 100 B. C. at the most has to admit (J R A S 1916, p. 135) that for a precise date we have no real ground.

The Kauṭilīya quotes five schools by name: Mānavāḥ (five times), Bārhaspatyāḥ (6 times), Auśanasāḥ (7 times), Pārāśarāḥ (4 times), Āmbhīyāḥ (once) and the following individual authors; Kātyāyana (1), Kiñjalka (1), Kauṇapadanta (4), Ghoṭakamukha (1), (Dīrgha) Cārāyaṇa (1), Parāśara (2), Piśuna (6), Piśunaputra (1), Bāhudantiputra (1), Bhāradvāja (7, once as Kaṇiṅka Bhāradvāja), Vātavyādhi (5), Viśālākṣa (6). He either differs from all these authors or they differ from each other in all the places where they are cited. All the individual authors that are cited only once occur on the same page (except Bāhudantiputra). He quotes the views of *ācāryas* over fifty times and in each case differs from them. "Ācāryas" means the ancient authors on the śāstra

collectively. Even the Nirukta quotes certain views as those of ācāryas. Kauṭilya is cited about 80 times. The Kāmasūtra of Vātsyāyana mentions a Ghoṭakamukha and a Cārāyaṇa. Whether they are identical with the authors cited by Kauṭilya is extremely doubtful. The Mahābhārata mentions among writers on Daṇḍanīti the following who occur in the Kauṭilīya also :—Bṛhaspati, Manu, Bhāradvāja, Viśālākṣa, Śukra (the same as Uśanas) and Indra (probably Kauṭilya's Bāhudantiputra), whose abridgment of Brahmā's work is called Bāhudantaka in the Śāntiparva (chap. 59).

According to the Nayacandrikā, Piśuna, Bhāradvāja, Kauṇapadanta and Vātavyādhi stand for Nārada, Droṇācārya, Bhīṣma and Uddhava respectively (pp. 73, 69, 74, 91).

The Mahābhārata mentions other writers on politics, viz. Gauraśiras, Kaśyapa, Utathya, Vāmadeva, Vasuhoma, Kāmandaka, (Śāntiparva 123. 11) and a few others which are not found in the Kauṭilīya.

The Kauṭilīya knows the four Vedas, the charms and incantations of the Atharvan, the six *aṅgas*, includes under itihāsa, Purāṇas, Dharmaśāstra and Arthaśāstra ; it knows the Sāṅkhya, Yoga and Lokāyata[178] schools of thought. It mentions Mauhūrtikas, Kārtāntikas (astrologers), Jupiter and Venus. It refers to dhātuśāstra (Metallurgy). Sanskṛit was the official language and in the Śāsanādhikāra it mentions such *guṇas* of composition as mādhurya, audārya, spaṣṭatva, which show the beginnings of the Alaṁkāra śāstra. There is nothing to wonder at in this. In the second century A. D. we have the inscription of Rudradāman, which enumerates the guṇas of Kāvya. The Kauṭilīya does not mention edicts on stone or copper. It refers to Vaiśikakalājñāna (II. 27). The Kauṭilīya closely agrees with the Kāmasūtra in several respects, and the two works contain several identical passages (such as the list of kings that fell victims to intrigues and about *trivarga*). Keith argues from this that the Kauṭilīya and the Kāmasūtra are not separated by a long interval and that it is a late work. Dr. Jolly also is of the same opinion (p. 24 Intro. to Arthaśāstra). If the Kāmasūtra held up the Kauṭilīya as its model, then the two works would certainly look very much alike. There are points of difference

178 लोकायत occurs in the महाभाष्य on वर्णका तान्तवे (पा. VII. 3. 45). Vide Kielhorn vol. III., pp. 325-326.

between the two works, e. g. they differ in their attitude towards flesh-eating and the Kāmasūtra speaks of planetary influence and *lagna*, while the Kauṭilīya is silent on these points and only condemns in general terms the consulting of stars. We must note here that the Kauṭilīya (IX. 4) speaks of consulting *nakṣatras*, which were known from the earliest Vedic period and some of which were looked upon as auspicious for sacrificial purposes even in the Śatapatha Brāhmaṇa (S. B. E. vol. 44, pp. 1-2) and the Śrauta and Gṛhya sūtras. The Kauṭilīya follows the Vedāṅga Jyotiṣa in the system of a *yuga* of five saṁvatsaras, in prescribing two intercalary months in a *yuga* and in saying that at the end of one *ayana* the variation between the length of the day or the night comes to six muhūrtas (vide II. 20). Keith argues that the ślokas in the Kauṭilīya are more classical than even those of the Rāmāyaṇa and that it contains correct Triṣṭubh stanzas which are wanting in the Bṛhaddevatā (a work of the 4th century B. C.). But this argument can produce no impression on those scholars who ascribe the Rāmāyaṇa to the 5th century B. C. or earlier. Nor is the date of the Bṛhaddevatā beyond the pale of discussion. There is no consensus of opinion among scholars as to the exact time when classical ślokas and correct Triṣṭubhs first came into vogue. It is to be noted that the Kauṭilīya defines *pada* as varṇasaṅghāta and not as in Pāṇini (sup-tiṅantaṁ padam).

Among the countries and peoples frequently mentioned by Kauṭilya, several are interesting. He speaks of silks from the land of the Cīnas[179] and blankets from Nepal. Keith says that the name Cīna being derived from the Thsin dynasty in China (which began its rule in 247 B. C.) this would show that the Kauṭilīya could not have been composed about 300 B. C. No one however knows how the word Cīna was derived and besides as Keith admits the passage may be an interpolation. He speaks of the *Saṅgha* of the Vṛṣṇis (1. 6) and the *Śreṇis* (corporations) of Kṣatriyas in the countries of Kāmbhoja and Surāṣṭra that lived by vārtā (agriculture and trade) and by the profession of fighting and the corporations of the Licchcivika, Vṛjika, Mallaka, Madraka, Kukura, and the Kurupañcālas that live on the title 'rāja' (XI. 1). Some of these tribes such as the Licchavis, Vṛjis (Vajjis in Pāli) and Mallas are well-known from ancient Buddhist works. What is meant by 'rājaśabdopajīviṇaḥ'

179 तथा कौशेयं चीनपट्टाश्च चीनभूमिजा व्याख्याताः । कौ. II. 11.

is not quite clear. It probably means that the organisation of the Licchavis and others was on democratic lines and that there was very keen competition for the honour of being elected the chief or president of those corporations, the latter being designated 'rāja'.[180] The Nayacandrikā explains that they bear the proud designation of 'rāja' but are penniless (and so can be easily employed in military service as mercenaries). We are told that the breed of horses from Kāmbhoja, Sindhu, Āraṭṭa and Vanāyu was the best and that Bāhlīka, Pāpeya, Sauvīra and Taitala breeds were of middle quality. The Kauṭilīya speaks of Mleccha tribes and tells us that among them one's own children could be sold or pledged without incurring punishment (III. 13).

There is hardly any distinctive reference to things Buddhist except one passage (III. 20) where a fine of one hundred (*paṇas*) is prescribed for him who invited to dinners in honour of gods or Manes a Buddhist (Śākya), an Ājīvaka, a śūdra ascetic.[181] This shows that the work was written at a time when Buddhism was yet not a widespread religion and had not secured an honourable place among the people. The Ājīvika was a well-known sect in ancient India, said to have been founded by Makkhali Gosāla (vide V. A. Smith's Aśoka, pp. 134, 198 of edition of 1909, I. A. 1912, p. 286, 'Dialogues of Buddha' I, p. 71, n. 1, Journal of Bihar & Orissa Society, 1926, pp. 53-62). Aśoka bestowed some caves on them. Kauṭilya says that weights should be made of iron or of stones from Magadha and Mekala (country near the sources of the Narmadā).[182]

It is extremely doubtful whether the Kauṭilīya knew the extant text of the Mahābhārata. Most of the stories used as illustrations in the Kauṭilīya occur in the Mahābhārata (e. g. Aila, Duryodhana, Haihaya Arjuna, Vātāpi, Agastya, Ambarīṣa, Suyātra i. e. Nala). But in some cases there is slight divergence between the two works, e. g. Janamejaya is said to have perished through having attacked Brāhmaṇas in anger, while the Mahābhārata (XII. 150) gives a different version; Kauṭilya says (IV. 8) that Māṇḍavya, though not a thief, declared

180 In the Jātakas (Fausböll vol I., p. 504 and vol. III., p. 1) reference is made to the 7707 *rājas* of the Licchavis in Vesāli.

himself to be a thief while the Mahābhārata (I. 107. 9) says that he spoke nothing; Kauṭilya mentions Jayatsena as the opponent of Nala (VIII. 3) in gambling, while the Mahābhārata gives his name as Puṣkara; the Mahābhārata and the Rāmāyaṇa do not know that a Jāmdagnya ruled long as a king.[183] Kauṭilya seems to have known the Purāṇas. He says (III. 7) that *sūta* and māgadha of the Purāṇas are quite different[184] from members of the mixed castes called sūta and māgadha and includes Purāṇa (I. 5) among the subjects of royal study grouped under the head of *itihāsa*.

Kauṭilya exhibits a wonderful knowledge of herbs and drugs and Dr. Jolly thinks that his *Materia Medica* is more extensive than even Suśruta's. But the dates of Caraka and Suśruta are far from being settled and no approximately certain conclusion can be drawn from the drugs mentioned in the Kauṭilīya. Kauṭilya speaks of 'rasada' (one who administers mercurial poison) and prescribes banishment for those who trade in or administer 'rasa' for money in order to do away with a person secretly (IV. 4.) In II. 13 he speaks of gold that is 'rasa-viddha' (amalgamated with mercury) and in II. 12 of liquids containing gold (rasāḥ Kāñcanikāḥ) and of Hinguluka. Dr. Jolly thinks that this knowledge of metallurgy and alchemy is of Graeco-Syriac origin and so the Kauṭilīya is a work of the third century A. D.

It is of great importance to note that Kauṭilya lays down (II.4) that in the midst of the fort were to be constructed the temples of Śiva, Vaiśravaṇa, the Aśvins, Lakṣmī and Madirā (Durgā ?) and niches were to be set apart for Aparājita, Apratihata, Jayanta and Vaijayanta and that the tutelary deities of the gates were to be Brahmā, Indra, Yama and Senāpati (i. e. Skanda). We know from the Mahābhāṣya[185] (Kielhorn Vol. II. p. 429) on Pāṇini (V. 3. 99 'jīvikārthe cāpaṇye') that the Mauryas set up images out of greed for money and that in its day images of Śiva, Skanda and Viśākha were worshipped.

The foregoing discussion clearly shows that the Kauṭilīya has certainly an ancient atmosphere about it, and that all that has so far been gathered from it agrees with its traditional date of 300 B. C. and no cogent arguments have been yet brought forward that would compel us to assign it a date later than the above by six centuries.

Two commentaries on the Kauṭilīya have been brought to light so far, one composed by Bhaṭṭasvāmin being called Pratipadapañcikā and the other the Nayacandrikā of Mādhavayajvan. Both are fragments. The first was published in the Journal of the Bihar and Orissa Research Society (1925-1926, vol. XI and XII) by Messrs. K. P. Jayasval and A. Banerji-sastri. The com. is incomplete and begins with the 8th adhyāya of the 2nd adhikaraṇa and reaches up to the 36th adhyāya of the adhikaraṇa. The commentary on the whole work must have been very extensive, as the portion already printed on a part of the 2nd adhikaraṇa alone occupies 214 pages. This commentary quotes the explanations of previous commentators in the words 'anye', 'apare'. It quotes several ślokas of Bṛhaspati on the blemishes of diamonds and on prakāśa-taskaras. The commentary Nayacandrikā contained in Dr. Jolly's edition (Lahore) also is incomplete and begins with the 7th adhyāya of the 7th adhikaraṇa and breaks off in the 4th adhyāya of the 12th adhikaraṇa. It also refers to the views of its predecessors in the words 'kecit' &c. (vide pp. 35, 61, 62, 104, 115, 131, 191). It discusses various readings (pp. 136, 183, 188, 193 &c.).

Dr. Shamasastri includes in his edition 571 sūtras attributed to Cāṇakya. Their relation to the Kauṭilīya is a subject which requires careful investigation. In my own opinion they are later than the Kauṭilīya. It would be beyond the scope of this work to enter into details. Vide Dr. Jacobi's article in Indian Historical Quarterly, vol. III., pp. 669-676.

There are several *nīti* collections attributed to Cāṇakya and published several times in different parts of India. All of them are later than the Kauṭilīya and are compilations of maxims and fine sayings. One of them the Cāṇakya-rājanītiśāstra (published in Calcutta Oriental series, 1921, 2nd edition) contains 660 verses and was compiled under Bhojarāja. Several other compilations pass under the names Vṛddha-Cāṇakya, Laghu-Cāṇakya &c. All these are passed over here from considerations of space and utility.

15. Vaikhānasa-dharma-praśna

This work has beem published in the Trivandrum Sanskrit Series by Pandit T. Ganapati Sastri (1913).

Mahādeva in his commentary called Vaijayantī (Ānandāśrama ed.) on the Satyāṣāḍha Śrautasūtra speaks of six Śrauta sūtras of the Black Yajurveda, viz. Baudhāyana, Bhāradvāja, Āpastamba, Hiraṇyakeśin, Vādhūla and Vaikhānasa, and frequently cites passages from the Vaikhānasa-śrautasūtra. In the Caraṇavyūha of Śaunaka, Vādhūla and Vaikhānasa are not mentioned. But that Vaikhānasa was a very ancient writer follows from the references contained in the ancient dharma works. In Gautama the word 'Vaikhānasa' occurs (Dh. S. III. 2) as the name for the order of forest hermits (vānaprastha) and in another sūtra (III. 26) he lays down that fire was to be consecrated according to the Śrāmaṇaka,[186] which latter is explained by Haradatta as Vaikhānasa Śāstra. Baudhāyana (Dh. S. II. 6. 17) has the same sūtra[187] and defines a Vaikhānasa as one who follows the rules of conduct laid down in Vaikhānasa Śāstra (Dh. S. II. 6. 16). The Vasiṣṭha Dh. S. (9. 10) also has the same sūtra as Gautama (Dh. S. III. 26). The Manusmṛti (VI. 21) speaks of the Vānaprastha as one who abides by the views of Vaikhānasa (Vaikhānasamate sthitaḥ).

The Vaikhānasadharmapraśna is divided into three praśnas, each praśna being subdivided into khaṇḍas. There are in all 41 khaṇḍas. The work is a small one. The contents of the work are :- 1. the four *varṇas* and their privileges, and the four *āśramas*; duties of *brahmacārin*; four kinds of *brahmacārins*; duties of the householder; four kinds of gṛhastha, *vārtāvṛtti* (subsisting by agriculture), śālīna, yāyāvara and ghorācārika; forest anchorites; vānaprasthas are either sapatnīka (accompanied by their wives) or apatnīka (not so accompanied); Sapatnīka are of four sorts, Audumbara, Vairiñca, Vālakhilya and Phenapa; apatnīka Vānaprasthas; of four kinds of *bhikṣus*, viz. kuṭīcaka, bahūdaka, haṁsa and paramahaṁsa; sakāma (performed with desire of wordly gain) and niṣkāma (not so performed) *karma*; pravṛtti and nivṛtti; three kinds of

Yogins and their subdivisions ; II. the details of the śrāmaṇaka rites of the vānaprastha (khaṇḍas 1-4); duties of the forest hermit ; details of joining the order of saṁnyāsins (khaṇḍas 6-8); age for saṁnyāsa (above seventy or when childless or widower) ; every day duties and observances of saṁnyāsins ; about *ācamana* and Saṁdhyā ; saluting (abhivādana) of all relatives, male and female ; holidays for study (anadhyāya) ; bath and Brahmayajña ; rules about taking food ; forbidden and permitted food ; III. rules of conduct for gṛhastha (khaṇḍas 1-3), rules of the road ; purification of golden and other metallic things ; purification of other things ; about vānaprastha ; *bhikṣu* ; burial of a saṁnyāsin ; Nārāyaṇabali on the death of a saṁnyāsin, *tarpaṇa* in the case of saṁnyāsins with twelve names of Viṣṇu, Keśava &c. and with water ; *anuloma* and *pratiloma* ; the intermediate castes ; *Vrātyas*, their origin ; name and means of subsistence (khaṇḍas 11-15).

The Vāikhānasadharmapraśna appears by its style and its contents to be a work of comparatively later date than the dharmasūtras of Gautama and Baudhāyana. It is probably a recast of older materials. It contains the names of more mixed castes than the dharmasūtras and than even some of the later smṛtis. The present work seems to have been either written or retouched by a devotee of Viṣṇu. Faith in and devotion to Viṣṇu or Nārāyaṇa loom very large here (I. 5. 5 nārāyaṇa-parāyaṇāḥ, I. 7. 6 and 9 ; II. 4-5 bhaktyā Viṣṇuṁ dhyāyan, III. 7. 3 Nārāyaṇaparaṁ brahmeti śrutaḥ, III. 9. 3 Viṣṇorālayapārśve). It speaks of the eight *aṅgas* of Yoga (I. 10. 9), of the Āyurveda with its eight *aṅgas* and of some treatise on evil spirits (bhūtatantra III. 12. 7). It refers to the views of some in the word 'eke' (I. 7. 4. and II. 9. 10). It speaks of the Śrāmaṇaka fire (in I. 6. 2 and I. 7. 3-4). It does not allow *saṁnyāsa* to Kṣatriyas (I. 1. 11). Vikhanas is cited as an authority (II. 5. 9 and III. 15. 14).

Bühler found a ms. of the Vaikhānasasūtra, consisting of a gṛhya in seven praśnas, three praśnas of dharma (the same as described above) and a fourth on pravaras. In the gṛhya a reference to Budhavāra occurs (R. and S. p. 9). Dr. Caland in his paper on Vaikhānasa-sūtra holds that the Manusmṛti borrows from Vaikhānasagṛhya and that the author of the latter was saturated with the idiom of Dravidian languages (vide Prof. Keith's review in Bulletin of the School of Oriental Studies, 1927, p. 623). Dr. Caland's

view about Manu is entirely wrong as will appear from the section on Manu. Vide Th. Bloch in 'über das Gṛhya-und Dharmasūtra der Vaikhānasa' (Lipzig, 1896).

Other Sūtra Works on Dharma.

It will be proper to say a few words about some other sūtra works on dharma thar are only available in mss. or are to be reconstructed from quotations in the digests. It is by no means to be supposed that these works that will be spoken of here were composed as early as those of Gautama, Āpastamba and others or were composed before the extant Manu and Yājñavalkya. But as the chronology of all ancient works on dharma is somewhat in a nebulous state, it is best to treat here of all works written in the sūtra style, even though in individual cases they may really belong to a later age than the works composed entirely in verse. They will be taken up in alphabetical order (Sanskrit).

16. Atri

That Atri was an ancient writer on *dharma* follows from a refer ence to him in Manu (III. 16) as holding the view that a *dvijāti* taking as wife a śūdra woman became fallen (*patita*). In the Deccan College collection there are several mss. (Nos. 185-187 of A 1881-82) of the Ātreyadharmaśāstra in nine *adhyāyas*. They treat of gifts, prayers (*japya*) and *tapas* by which men are freed from all sins. Some of the chapters are in mixed prose and verse. The first three chapters are entirely in verse and some of the verses (such as ekākṣaraṁ param brahma) occur in the Manusmṛti. The fourth opens with a long sūtra, which, in style, resembles later bhāṣyas and commentaries.[188] The 5th also is in verse and contains several verses found in Vāsiṣṭha (Dh. S. 28. 1, 4, 6). The sixth speaks of the specially holy hymns and verses of the Veda. Some of the verses here are the same as Vasiṣṭha (28. 10-11). The seventh refers to secret prāyaścittas and the very first sūtra after the opening words speaks of several non-Aryan tribes such as the Śakas, Yavanas, Kām-

bhojas, Bālhīkas, Khaśas, Vaṅgas and Pāraśa (Persians?) &c. It is to be noted that the same sūtra (with slight variations) is quoted as Atri's by Aparārka (on Yāj. III. 266 p. 1123). The 7th and 8th chapters are in mixed prose and verse. The 9th is in verse and speaks of Yoga and its *aṅgas*. It refers to the fact that Śiśupāla, son of Damaghoṣa, because in his hatred of Govinda he always thought of the latter, went to heaven. The same sūtra work is noticed in I. O. Cat., pp. 380-81, Nos. 1305 and 1306.

There are several works styled Atri-smṛti or saṁhitā in the mss. One of them is in six chapters on secret prāyaścittas, gifts, pitṛmedha and ācāra (vide I. O. Cat., p. 381, No. 1308). There is another work styled Atrisaṁhitā printed in Jivananda's collection (part I. pp. 13-46). It contains about 400 verses and deals with the following topics :— importance of honouring *guru*, duties of four castes; purifications of several *malas*; virtues of Brāhmaṇās such as śauca, anasūyā; definition of *iṣṭa* and *pūrta*, ten yamas and niyamas; importance of sons; adopted sons, prāyaścittas for taking forbidden food or drink and for other transgressions, impurity on birth and death; cāndrāyaṇa, Kṛcra, Sāntapana; gifts; purifications from avoidable contacts with rajasvalā &c.; Śrāddha and the Brāhmaṇas to be invited for it.

In this work Atri is himself cited as an authority. Other authors and works quoted are : Āpastamba (p. 30), Yama (p. 41), Vyāsa (p. 24), Śaṅkha (pp. 22, 35), Śātātapa (p. 35). The Vedānta, Sāṅkhya, Yoga, Purāṇas, Bhāgavatāḥ (p. 45) are mentioned. It contains (on p. 14) the verse ' sadyaḥ patati māṅsena ' which is found in Vasiṣṭha Dh. S. (2. 27) with the words 'athāpyudāharanti'. There are other verses also which occur elsewhere e. g. 'atha cenmantravid' occurs in Vasiṣṭha 11. 20, 'tryahaṁ sāyaṁ tryahaṁ prātaḥ' (p. 23) is also Manu XI. 211. On p. 26 occur the words ' atrāpyudāharanti ' and so what follows is a quotation. On p. 32 there are three verses in another metre.

Atri's verse about adoption [190] is quoted as the first authority on adoption in the Dattakamīmāṅsā. He mentions the seven *antyajas* to be the washerman, the shoemaker, *naṭa*, *buruḍa*, kaivarta

(fisherman), meda, and *bhilla* (p. 29). He further says[191] that there is no question of untouchability in fairs, marriage seasons, in Vedic sacrifices and in all festivals. He says that Brāhmaṇas from Magadha, Mathurā and three other places are not honoured (at a śrāddha) though as learned as Bṛhaspati.[192]

The work mentions the signs of the Zodiac, Kanyā and the Scorpion (p. 43), and hence was not composed before the first centuries of the Christian era.

In Jivananda there is a Laghu-Atri (part I, pp. 1-12) in 6 chapters and about 120 verses, dealing with the means of being freed from sins (such as prāṇāyāma, sacred formula, gifts &c.), with purifications from impurity on death and birth, with gifts. It mentions Manu. In the fourth chapter there are about ten lines in prose. There are numerous verses that occur also in the Vasiṣṭha-dharmasūtra, e.g. Vas. 26. 8-9 and 16-18 occur on p. 3; Vas. 28. 11-16 occur on pp. 4-5. It is difficult to say who the borrower is.

There is a Vṛddhātreyasmṛti in Jivananda (part I. pp. 47-59) in five chapters and about 140 verses. This closely resembles the Laghu-Atri-smṛti described above. In the commencement both have the same six verses beginning with 'bhagavan kena dānena' and the works have many verses in common. In the fourth chapter of both the same prose passages occur.

Viśvarūpa on Yāj. (III. 257) quotes two verses from Atri on prāyaścitta which are found in none of the three works described above.[193]

In the Mahābhārata (Anuśāsana 65. 1) Atri is credited with the view that those who make a gift of gold give (practically) all

objects. This bears a close resemblance to two verses that occur in Laghvatri (Jivananda part I. p. 5) and Vṛddhātri (part I. p. 51).[194]

17. Uśanas.

That Uśanas wrote a work on politics follows from several circumstances. The Kauṭilīya quotes the Auśanasāḥ seven times. It is almost certainly referring to a work. That work contained directions on the administration of justice also, as Kauṭilya speaks of Auśanasa method of partition (in allowing a tenth additional share to the eldest son, III. 6), as Auśanasāḥ prescribed fines in cases where witnesses proved stupid &c. (III. 11) and fines for forcible seizure of jewels &c. (III. 17). The Mahābhārata, Śāntiparva[195] (chap. 56, 29-30 and 57. 3) refers to a work on politics by Uśanas and quotes three verses, the last being found in Sabhā 55. 14. In other places also we have a Nītiśāstra ascribed to Bhārgava (Śānti 210. 20) and certain verses are ascribed to him (Śānti 57, 40-41 and 139, 70-71). *Vide* also Anuśāsana 39, 8-9 and Sabhā 62. 11-12. The Nītiprakāśikā of Janamejaya refers to a succession of teachers of politics from Brahmā down to Janamejaya and says that Śukra was

The verses in the two Atris are अग्नेरपत्यं प्रथमं सुवर्णं भूर्वैष्णवी सूर्यसुताश्च गावः। लोकास्त्रयस्तेन भवन्ति दत्ता यः काञ्चनं गां च महीं च दद्यात्॥ सर्वेषामेव दानानामेकजन्मानुगं फलम्। हाटकक्षितिधेनूनां सप्तजन्मानुगं फलम्॥ The first verse occurs in Vas. 28. 16, in Vanaparva 200. 28, in the Rajim plate of Tīvaradeva (Fleet's Gupta inscriptions No. 81).

one of those who abridged the enormous extent of rājaśāstra.[196] The Mudrārākṣasa (I. p. 71 Telang's ed.) also speaks of Auśanasī Daṇḍanīti. Viśvarūpa (on Yāj. I. 307) asks the king to appoint ministers in accordance with the views propounded in the śāstras of Bṛhaspati and Uśanas and quotes a long passage in prose from Bṛhaspati in which the śāstras of Manu, Bṛhaspati and Uśanas are joined together. This work on politics probably contained verses also. Medhātithi on Manu (7. 15) quotes two verses speaking of eight activities of a king.[196a] So also on Manu 8. 50 Medhātithi cites from Uśanas the words 'prakṛtīnām balaṁ rājā,' which are an Anuṣṭubh *pāda*. This sūtra work on politics by Uśanas has not yet been discovered. The Tāṇḍya-Mahābrāhmaṇa says that Kāvya Uśanas was the purohita of the Asuras (7. 5. 20).

In the Deccan College collection there are two mss. of an Auśanasa-dharmaśāstra in prose with a few verses, *viz*. No. 644 of Visrambag (i) and No. 191 of A 1881-82. The first contains only two folios (2 and 4) and the available portion begins in the midst of the 2nd chapter. In the second ms. also the first folio is wanting and there are gaps in the fourth chapter. It is noteworthy that the second folio of the second ms. begins just at the beginning of the 2nd folio of the first. The work is a brief one (8 folios) in seven adhyāyas. Their contents are:—II. impurity on birth and death ; purification of certain things in certain ways such as with water, ashes &c.; III. the four varṇas and the mixed castes such as Rathakāra, Ambaṣṭha, Sūta, Ugra, Māgadha &c, the Vrātyas ; IV. no bodily injury to be done to Brāhmaṇa ; prāyaścittas for killing a Brāhmaṇa or a man of the other varṇas and for other Mahāpātakas, prāyaścitta for eating

the flesh of certain animals and for eating certain plants like garlic, prāyaścitta for adultery; discussion whether a Brāhmaṇa could marry a śudra woman; prāyaścittas for killing various beasts and birds; fourteen vidyās; V. śrāddhakalpa; what Brāhmaṇas are *pankti-pāvana*; details of śrāddha, food and flesh at śraddha; who are unfit to be invited at śrāddha; VI. what things a Brāhmaṇa could not sell; VII. punishments for the Mahāpātakas; what are pure things at all times. Some of the views of the Auśanasa-dharmaśāstra are worth special notice. The son of a Brāhmaṇa, Kṣatriya or Vaiśya from a wife of the varṇa immediately next to it belonged to the caste of the father.[197] No sin or punishment attached to one if one killed an *ātatāyi* armed Brāhmaṇa. The fourteen vidyās are said to be the six *aṅgas* and the four Vedas, Mīmāṁsā, Nyāya, dharmaśāstra and Purāṇa.[198]

The work very often quotes the views of others with the words 'eke'; for example it says 'the impurity on birth is ten nights for the parents of the child, but according to some only for the mother.'[199] The son of a Brāhmaṇa from a śūdra woman is called *pārāśava*, but according to some he is *niṣāda*. The whole of the portion in the ms. about the mixed castes bears a very close resemblance to Baudhāyana (Dh. S. I. 9) except in a few particulars.[200] At the end of all chapters from the second (except the third) there are verses and also in the midst. There are verses introduced with the words 'there is a śloka on this point' (bhavati cātra ślokaḥ) or with the words 'api codāharanti'.

I. 5. 105-109, where Baudhāyana's own view is that both are impure for ten days, but according to some the mother and according to others the father has to observe impurity for ten days.

200 The ms. (3rd chap.) has तत्र सवर्णासु सवर्णाः। ब्राह्मणेन क्षत्रिया ... सः। वैश्यायामम्बष्ठः। शूद्रायां पारशवो निषाद इत्येके। क्षत्रियेण वैश्यायां क्षत्रियः शूद्रायामुग्रः। वैश्येन शूद्रायां वैश्यः। शूद्रेण वैश्यायामायोगवः क्षत्रियायां क्षत्ता ब्राह्मण्यां चण्डालः &c.

There are about 45 verses in the work, the 7th and last chapter being almost entirely in verse. As the mss. are corrupt and full of gaps, it is often difficult to find out whether a particular passage is prose or verse. In several verses the words 'Manur abravīd' occur and in one place 'tan manor anuśāsanam'. The latter closely agrees with Manu. Several verses are common to Manu and Uśanas. The verse 'gurutalpe bhagaḥ kāryaḥ' (Manu 9. 237) occurs in the ms. So also the verse 'yena yena cidaṅgena' occurs in both.[202] The words of Manu (V. 78) 'bāle deśāntarasthe' are expressly quoted with the words 'Manur-āha'. There are many other verses which, though not cited expressly as from a particular author, are found in other ancient works. For example, the verse 'āpaḥ śuddhā bhūmigatāḥ' is Manu 5. 128 and Baud. Dh. S. I. 5. 57. The half verse 'kāruhastaḥ śucir nityam' is Manu 5. 126 and Baud. Dh. S. I. 5. 48. The verse 'yadekarātreṇa karoti pāpam' occurs in Āp. Dh. S. (I. 9. 27. 11) and Baud. Dh. S. II. 1. 42. The verse 'tryaham prātas tryaham naktam' is Manu XI. 211. It is a remarkable fact that some of the verses in this dharmasūtra agree closely with the verses in the Uśanas-smṛti in verse, published by Jivananda, e. g. the verse 'dattvā tu Vedānatyartham' occurs on p. 525 and the verse 'nimantritastu yo vipro adhvānaṁ saṁprapadyate' on p. 527. Even the prose passages bear a close resemblance to the versified smṛti on many points, e. g. the prose passages about the duration of the satisfaction of the Manes by the offerings of the flesh of various animals occur almost in the same words in the versified smṛti of Uśanas (Jivananda, part I, p. 522).

The Auśanasa-dharmasūtra contains several passages in prose which are the same as some verses in Manu.[203] The sūtra

201 The ms. reads 'दृशस्थानानि दण्डस्य चात्मनो (तन्मनो ?)रनुशासनम् । त्रिषु वर्णेषु सामान्यं ब्राह्मणस्त्वक्षतो भवेत् ॥ '; while मनु (8.124) is दश ... दण्डस्य मनुः स्वायंभुवोब्रवीत् । त्रिषु वर्णेषु यानि स्युरक्षतो ब्राह्मणो व्रजेत् ॥

202 The ms. reads येन येन हि चण्डेन (चिदङ्गेन ?) हिंस्याच्छ्रेयांसमन्त्यजः । तदेव तस्य छेत्तव्यं छिन्ने निर्विषहो भवेत् ॥ ; in मनु (8. 279) the last pāda is तन्मनोरनुशासनम्.

203 The ms. has (in chap. II) रहःसु स्त्रीमुखं शुचिः । शुचयः फलपातने पक्षिणः । प्रसवे वत्सः । शृङ्ग (मृग ?)ग्रहणे श्वा । ऊर्ध्वं नाभेः पुरुषः । गौर्मेध्या पृष्ठतः । पुरस्ताद्वजः । स्त्रियः सर्वतः । हृदयमासामशुचि । Compare मनु I. 92, बो. ध. सू. I. 5. 49 and वसिष्ठ 3. 45.

quotes in one place the divergent views of Vasiṣṭha,[204] Hārīta, Śaunaka, and Gautama on the question whether a Brāhmaṇa could marry a śūdra woman. The view of Vasiṣṭha (as quoted in the ms.) is that a Brāhmaṇa could take to wife girls of all the four castes, but in the printed text of Vasiṣṭha (I. 24) a Brāhmaṇa is allowed to marry girls of the three higher castes only. It is possible that the ancient reading of Vasiṣṭha's text was 'catasraḥ' (as quoted in the Auśanasa) which was changed into 'tisraḥ'. The passage reminds us of Manu III. 16 (Śūdrāvedī patatyatreḥ), but the views ascribed to Śaunaka and Gautama in the ms. differ from those ascribed to them in Manu. In another passage Vasiṣṭha's views seem to be quoted.[205]

From quotations in Haradatta's commentary on Gautama and from the Smṛticandrikā it appears that they had access to a sūtra work of Uśanas dealing with all branches of *dharma*, viz., ācāra, vyavahāra and prāyaścitta. For example, the Smṛticandrikā quotes prose passages of Uśanas on *anadhyāya* (I. p. 59), on *dantadhāvana* (I. p. 106) and Haradatta quotes a prose passage on *anadhyāya* (on Āp. Dh. S. I. 3. 10. 1) and a prose passage on the fine for a kṣatriya abusing a śūdra (on Gau. Dh. S. 12. 10) and on *Niyoga* (on Gau. Dh. S. 18. 5). These passages are not found in the ms. But there are others that are found. For example, the Smṛticandrikā quotes two passages, which occur in the mss.[206] It

204 The ms. (chap. IV) has पतितो वृषलीपतिरित्याचक्षते। न पततीत्येके। ब्राह्मणस्य कल्पविहिताश्चतस्रो-(स्रो?)नुपूर्वेण भार्या भवन्तीति वसिष्ठ आह। पतति न पततीति संशयः। वृषलीं पतीति (वृषलीं गत्वा पततीति?) हारीतः। जननात्पततीति शौनकः। तदपत्यः पततीति गौतमः। The words of वसिष्ठ are 'तिस्रो ब्राह्मणस्य भार्या वर्णानुपूर्वेण द्वे राजन्यस्य एकेका वैश्यशूद्रयोः। शूद्रामप्येके मन्त्रवर्जं तद्वत्। तथा न कुर्यात्। I. 24-26. It should be noted that one ms. of वसिष्ठ omits the words 'वर्णानु ...कुर्यात्'.

205 यस्तु पुनर्ब्राह्मणो धर्मपत्नीमृतुस्नेन मैथुनं सेवेत स दुष्यतीति वैवस्वतः (वै वसिष्ठः?) प्राजापत्येन शुध्यतीति हारीतः (chap. 4); compare वसिष्ठ 12. 23. and Manu XI. 67 and 173. The reading वैवस्वतः also is explicable. वैवस्वत may stand for मनु.

206 The passages are 'तत्र गोमयोदकैर्भूमिभाजनभाण्डशौचं कुर्यात्' (chap. V, about śrāddha) and 'श्वविड्वराहमार्जारकुक्कुटनकुलशूद्रराजस्वलाशूद्रीभर्तारश्च दूरमनपायितव्याः (०मपनेतव्याः). They occur in स्मृतिचन्द्रिका (III. p. 409 and p. 411).

appears therefore that the mss. either contain a portion only of the complete Auśanasa-dharma-sūtra or an independent sūtra work. The former alternative looks more probable. The foregoing discussion has shown that the sūtra work is later than the dharma-sūtras of Gautama and Vasiṣṭha and also than the Manusmṛti, which it probably knew in a very ancient version slightly differing from the extant one.

In Jivananda's collection of smṛtis there is an Auśanasa-dharma-śāstra in 51 verses (part I. pp. 497-501). It deals with mixed castes and their avocations, such as sūta, māgadha, cāṇḍāla, śvapaca, pulinda &c. The same work occurs in the Ānandāśrama collection, pp. 46-48. The Mit. (on Yāj. 1. 94) remarks that the means of livelihood for the mixed castes should be sought for in the works of Uśanas and Manu.[207] It is probably this smṛti that is meant. Kullūka on Manu X. 49 says that the sale of hides and working on hides were the means of livelihood for Dhigvaṇas according to the Auśanasa.

In the same collection (part. I. pp. 501-554) there is another smṛti ascribed to Uśanas in 9 chapters and about 600 verses. It treats of Upanayana, daily observances like *ācamana*, Vedic study, occasions of *anadhyāya*, the dharmas of *snātaka* ; śrāddha, proper Brāhmaṇas for śrāddha, impurity on birth and death, rites after death, prāyaścittas for the mortal sins and lesser sins.

This smṛti quotes Uśanas himself, also Manu, Bhṛgu (Bhṛgu-putra III), Prajāpati and speaks of dharmaśāstras, Purāṇas, Mīmāṁsā, Vedānta, Pāñcarātras, Kāpālikas and Pāśupatas. Numerous verses from the Manusmṛti are found in it (e. g. Manu II. 42, 49, 50, 125) occur in the first chapter alone. There is a brief prose passage towards the end of the 9th chapter. It speaks of Kāpālikas, Pāśupatas and atheists together (p. 525).

None of these smṛtis in verse contains the passages in verse on vyavāhara ascribed to Uśanas that occur in the Mitākṣarā, Smṛti-candrikā and other works.

The Mit. (on Yāj. III. 260) and Aparārka (e. g. p. 158, 192, 255) contain prose passages ascribed to Uśanas and the same works contain numerous verses ascribed to Uśanas most of which are not

[207] एतेषां च वृत्तय औशनसे मानवे च द्रष्टव्याः । मिता.

found in the two smṛtis in Jivananda. Some of the verses in Aparārka ascribed to Uśanas are found in the Auśanasasmṛti (e. g, Aparārka p. 418 'kuryād-aharaḥ śrāddham' is Jivananda I. p. 521).

In other cases the verses quoted from Uśanas in Aparārka, though not quite identical, bear a very close resemblance (e. g. the four verses in Aparārka p. 450 closely resemble Jivananda I. p. 525 and have some verses in common).

Among the views on Vyavahāra quoted from Uśanas are some interesting ones. It was he who said that a son was not bound to pay his father's debt, if it was a fine or unpaid toll or what is not vyāvahārika.[208] He holds that even blind, deaf or old men, women, minors could be witnesses in charges of *sāhasa* (Aparārka p. 671). He is quoted also on ordeals, on svāmipālavivāda and on steya.

A work styled Śukranītisāra was edited by Oppert (Madras 1882) and by Jivananda (Cal. 1892) and translated by Benoy Kumar Sarkar in S. B. H. Series. That work is a very interesting one, but is comparatively of a late date.

18. Kaṇva and Kāṇva

From the Āp. Dh. S. it appears that Kaṇva and Kāṇva were two distinct writers on dharma. In I. 6. 19. 2 Āpastamba starts the question as to the persons, food at whose house was permitted. He states various views on that point and says that Kaṇva was of opinion that food may be taken at anybody's house provided the latter offered it with a request (I. 6. 19. 3) and that the opinion of Eka, Kuṇika, Kāṇva, Kutsa and Puṣkarasādi (I. 6. 19. 7) was that only that food that was offered by a pure and religious man should be partaken. In another place (I. 10. 28. 1) Āpastamba gives it as the opinion of Kautsa, Hārīta, Kaṇva and Puṣkarasādi that a man became a thief if in any case whatever he appropriates another's belongings. The Kumbhakonam edition of Pandit Halasyanatha reads Kāṇva for Kaṇva.

Kaṇva is quoted a few times in the Smṛticandrikā on Āhnika (daily duties) and śrāddha. One of these quotations is in prose (I. p. 97).[209] Haradatta in his commentary on Gautama cites

[208] दण्डो वा दण्डशेषो वा शुल्कं तच्छेषमेव वा। न दातव्यं तु पुत्रेण यच्च न व्यावहारिकम्॥ मिता. and अपरार्क on याज्ञ. II. 47.

[209] अभ्यरे वेदेतिहासपुराणानीति व्याचक्षाणेन ब्राह्मणेन तीर्थेनौद्वयोः सलोमदेशमुन्मृजेत्।

verses of Kaṇva in several places (e. g. Gautama Dh. S. 21. 3, 23. 3 and 11).[210] The first verse bears a close resemblance to Manu XI. 180 and Baud. Dh. S. II. 1. 62. Kaṇva is quoted in the Ācārmayūkha and the Śrāddha-mayūkha.

The Mit. (on Yāj. III. 58) quotes a verse of Kāṇva on the length of the stay of a *saṁnyāsin* in a village or town. On Yāj. III. 260 the Mit. quotes a verse of Kaṇva stating the prāyaścitta for a Brāhmaṇa having intercourse with the Kṣatriya wife of his teacher.

In the Madras Govt. Oriental Library there is a ms. of Kaṇva (vol. V, p. 1929 No. 2624).

19 Kaśyapa and Kāśyapa.

Baudhāyana (Dh. S. I. 11. 20) cites a verse which contains the view of Kaśyapa that a woman who is bought cannot be a *patnī* and that she is not authorised to take part in religious (daiva) rites or rites for the Manes.[211] This verse is ascribed to Kātyāyana in the Smṛticandrikā (I. p. 87). The Vanaparva quotes *gāthās* of Kāśyapa on forbearrance (29. 35-40). Whether Kaśyapa and Kāśyapa are two different writers of dharmasūtras it is rather difficult to say. Probably they are identical. It appears that the dharmasūtra of Kāśyapa comprised all the usual topics of dharmasūtras, such as daily duties, śrāddha, āśauca, prāyaścitta. This sūtra has been quoted by all eminent writers from Viśvarūpa downwards. Viśvarūpa quotes Kāśyapa (in prose) on the prāyaścitta for contact with caṇḍālas[212] and for killing a cow when the sinner is a Brāhmaṇa or a member of another caste.[213] The Mit. (on Yāj. III. 23) quotes a prose passage from Kāśyapa on freedom from impurity on death.[214]

210 The verse is संवत्सरेण पतति पतितेन समाचरन्।

214 बालानामदन्तजातानां त्रिरात्रेण शुद्धिः।

The quotations in the Smṛticandrikā on āhnika and śrāddha are all in verse. Haradatta on Gautama (22. 18) quotes a sūtra on the prāyaścitta for *govadha*,[215] which is also quoted by Viśvarūpa. Haradatta (on Gaut. 23. 26) quotes a very long sūtra on the prāyaścitta for eating several things and doing several forbidden acts.[216] Haradatta (on Āp. Dh. S. II. 6. 13. 2) quotes several verses mentioning the seven kinds of punarbhūs. The Hāralatā quotes a sūtra from Kaśyapa on āśauca. Aparārka quotes several sūtras and a few verses under both names Kaśyapa and Kāśyapa (vide Yāj. I. 64, III. 265, I. 222-25, III. 251, 288, 290, 292 for verses).

In the Deccan College collection there are two mss. (No. 200 of 1884-87 and No. 122 of A. 1881-82) which contain a Kāśyapa-smṛti in prose (4 folios having 8 lines on each side). It begins 'athātaḥ Kāśyapīyān gṛhasthadharmān vyākhyāsyāmaḥ'. It deals with the duties of householders, with prāyaścittas for doing mischief to wells, dikes, ponds, temples and houses of Brāhmaṇas, for killing a cow and other beasts and birds, with rules on mourning after death and impurity on birth, with prāyaścittas for eating garlic and other similar things, with the five mortal sins, with prāyaścittas when such portents as earthquakes, lightning flashes occur, or for such accidental occurrences as the breaking of the milk pot, with purification of vessels of wood, metals, with the visible physical sins of sins committed in previous lives, with the seven *punarbhus*.

In this work some of the sūtras quoted as Kāśyapa's in the commentaries are found, (e. g. the quotation No. 216 'laśuna' &c. above). So also the verses about punarbhūs of seven kinds quoted by Haradatta are found in the mss. In this smṛti, Kāśyapa is frequently cited as an authority.

It is to be noted that Kāśyapa is not mentioned by Yāj. as one of the dharmaśāstraprayojakas, though Parāśara (chap. I) mentions Kāśyapā dharmāḥ. The Smṛticandrika (I. p. 1) and the Sarasvatī-vilāsa (p. 13) speak of 18 Upasmṛtis in which Kāśyapa's is included.

20. Gārgya

Viśvarūpa (on Yāj. I. 4-5) quotes a verse of Vṛddha-Yājñavalkya in which Gārgya is enumerated among the expounders of Dharma (dharmavaktāraḥ). He quotes two sūtras, one from Gārgya (on Yāj. I. 72[217]) and the other from Vṛddha-Gārgya[218] (on Yāj. I. 195). Therefore it seems that a sūtra work of Gārgya on dharma did exist. The Mit. (e. g. on Yāj. III. 326), Aparārka and the Smṛticandrikā quote several verses of Gārgya on āhnika, śrāddha and prāyaścitta. Parāśara also mentions Gārgya among writers on dharma. Aparārka contains (pp. 124, 190, 368, 544) verses from Gārgya on topics of dharma. It seems that the two writers are identical. Aparārka also quotes several verses from Gārgya of astronomical import (e. g. p. 547 on the nomenclature of the months as *Caitra* in connection with the signs of the zodiac). This was probably an independent work. Fragments of a Gārgī saṁhitā on astronomy and astrology have been recovered and it contains valuable historical information (vide Kern's preface to Bṛhat-saṁhitā pp. 33-40 and Mr. Jayasval in JBORS. vol. 14, p. 397 ff). A Jyotir-Gārgya and a Bṛhad-Gārgya are quoted in the Smṛticandrikā. The Nityācārapradīpa (p. 20, BIS) mentions Garga and Gārgya separately as smṛtikāras.

21. Cyavana

The Mit., Aparārka and other works cite several sūtras and some verses from Cyavana. Aparārka quotes a very long prose passage from Cyavana (on Yāj. I. 207) about the procedure of making the gift of a cow and about the *mantras* to be recited in that ceremony. The Mit. (on Yāj. III. 30) and Aparārka both cite a sūtra of Cyavana on the prāyaścitta for coming in contact with a dog, a śvapāka, a corpse, smoke from a funeral pyre, wine, wine-vessel &c. Aparārka cites prose passages of Cyavana on the prāyaścitta for killing a cow (on Yāj. III. 264-265), for touching, carrying or burning the corpse of one who commits suicide (on Yāj. III. 292), on the method of the purification of houses, vessels, articles of food when touched by cāṇḍālas (on the same verse).

22. Jātūkarnya

Viśvarūpa on (Yāj. I. 4-5) quotes a verse of Vṛddha-Yājñavalkya in which Jātūkarṇa is mentioned as an expounder of

[217] पतिताः स्त्रियस्त्याज्या भर्तृवधप्रतिज्ञार्था च ।

[218] अनेकोद्धारे काष्ठाशैले भूमिसमे ।

dharma.[219] The name is variously written as Jātukarṇi or Jātūkarṇya or as Jātukarṇa. The Smṛticandrikā quotes a passage from Aṅgiras in which Jātūkarṇya is enumerated among writers of Upasmṛtis. Viśvarūpa quotes prose passages from Jātūkarṇya a number of times.[220] On Yaj. I. 1, he gives a sūtra about "pratilomas"; on Yāj. I. 2 there is a sūtra sying that a pupil should not all of a sudden put a question to his teacher in an assembly of people, on Yāj. I. 29 about a Kṣatriya and Vaiśya wearing an Upavīta of hemp and wool when initiated for sacrifice, on Yāj. I. 37 as to the age when a Brāhmaṇa became a vrātya, about the prohibition of marrying another wife of a different caste when one has already married a savarṇa wife (on Yāj. I. 79), about the time for śrāddhas (on Yāj. I. 215). These quotations show that Jātūkarṇya composed a sūtra work on ācāra and śrāddha, which was comparatively ancient. The quotations of Jātūkarṇya in Mitākṣarā Haradatta, Aparārka, and later writers are in verse and so it appears that by that time the work had been lost or forgotten. Aparārka (p. 423) quotes a verse of Jātūkarṇya which refers to the zodiacal sign Virgo. This would place the verse Jātūkarṇya not very much earlier than the 3rd or 4th century A. D.

23. Devala

In the Mit. there are several prose passages quoted from Devala, e. g. on Yāj. I. 120 there is a sūtra on the dharmas of the śūdra and the avocations open to him;[221] on Yāj. I. 128 there is a sūtra dividing householders into Yāyāvara and Śālīna and describing each of them.[222] In Aparārka and the Smṛticandrikā there are several

prose quotations from Devala. On Yāj. III. 58 Aparārka quotes a long prose passage on the rules of conduct for a yati; on Yāj. III. 109 Aparārka cites a very long passage, in which Sāṅkhya and Yoga are defined, reference is made to extensive *Tantras* on the two systems and a brief résumé is given of the Śāṅkhya system, which greatly resembles the Tattvasamāsa. On Yāj. III. 227 Aparārka has a prose quotation from Devala about *patitas*. In the Smṛticandrika (I. p. 63) there is a lengthy passage from Devala on the daily duties of the *brahmacārin*, a sūtra (I. p. 52) is quoted about *brahmacarya* for 48 years and in another place there is a prose passage about the wife's duties.[223]

In the Mit., in Haradatta, Aparārka and the Smṛticandrikā there are numerous quotations in verse from Devala on ācāra, vyavahāra, śrāddha, prāyaścitta and other topics. That seems to have been an independent work. In the Ānandāśrama collection of smṛtis there is a Devalasmṛti in 90 verses dealing with purification and prāyacittas for contact with Mleñcchas. This appears to be a late compilation. Some of the verses contained therein are ascribed to other authors, e. g. verses 17-22 are ascribed to Āpastamba by Aparārka (on Yāj. III. p. 1200) and verses 30-31 are ascribed by the Mit. (on Yāj. III. 290) and Aparārka to Viṣṇu.

The Mahābhārata ascribes the view to Devala that in man there are three *jyotis*, viz. offspring, *karma*, and learning.[224]

Aparārka and the Smṛticandrikā cite verses from Devala on partition, inheritance, on woman's power over strīdhana. These show that Devala, the jurist, flourished about the same time as the great jurists Bṛhaspati and Kātyāyana.

24. Paiṭhīnasi

Though not enumerated in Yājñavalkya, Paiṭhīnasi seems to have been a comparatively ancient sūtrakāra on dharma. On Yāj. III. 262 Viśvarūpa quotes a sūtra of Paiṭhīnasi on the prāyaścitta for killing a cow. Dr. Jolly (R. und S. p. 12) following Dr. Caland (Ahnencult &c. pp. 99, 109) thinks that Paiṭhīnasi belongs to the Atharvaveda as the prose quotations on śrāddha agree with the ritual of

[223] पतिशुश्रूषा सहधर्मचर्या तत्पूज्यमानपूजनम्।

[224] त्रीणि ज्योतींषि पुरुष इति वै देवलोऽब्रवीत्। अपत्यं कर्म विद्या च पतः पुत्राः प्रजास्ततः॥ समापर्व 72. 5.

the Atharvans. The Mit. (on Yāj. I. 53) quotes a sūtra of Paiṭhīnasi to the effect that a person should marry a girl who is beyond the third degree on the mother's side and beyond the fifth on the father's side.[225] On Yāj. III. 17 the Mit. quotes two sūtras relating to impurity on death.[226] The Smṛticandrikā, Aparārka, Haradatta and other writers quote numerous sūtras of Paiṭhīnasi. The Smṛticandrikā has a prose quotation on the duties of women.[227] In another place the Smṛticandrikā (II. p. 263) cites a sūtra on partition.[228] Aparārka (p. 112) quotes two verses of Paiṭhīnasi recommending the practice of *satī* to women of all castes except Brāhmaṇa women. Aparārka (p. 239) quotes a sūtra saying that the food of astrologers, bell-makers and grāmakūṭas is poison.[229] Aparārka quotes (on p. 744) a sūtra of Śaṅkha-Likhita and Paiṭhīnasi about inheritance to a deceased sonless man.[230] Aparārka quotes another important prose passage[231] "the wealth of (a heirless) *śrotriya* goes to the *pariṣad* and not to the king, the king should not appropriate the wealth of temples and guilds, deposits and the wealth of minors and women." Then the sūtra quotes a verse on the same topic, which seems to refer to Manu 9. 194 in the word 'of sixfold origin' (ṣaḍāgama). Another sūtra quoted by Aparārka (p. 754) says 'when an appointed daughter dies, her husband does not take her wealth; if she be issueless, her mother or mother-in-law should receive it.' Aparārka quotes a verse of Paiṭhīnasi (p. 921) 'at the time of marriage, famines, sacrifices, fairs and pilgrimages there is no impurity due to birth or death.'

25. Budha

This sūtrakāra is not mentioned by Yāj. nor by Parāśara. He is very rarely cited. Aparārka on Yāj. 1. 4-5, Kalpataru (quoted in Vīra-mitrodaya, Paribhāṣā p. 16), Hemādri,[232] Jīmūta-vāhana's Kālaviveka are probably the earliest writers to mention him. In the Deccan College Collection there are two mss. of a Budha-dharma-sāstra in prose (No. 507 of 1881-82 and No. 145 of 1895-1902, 2 folios). The work is very brief[233] and speaks of *upanayana*, marriage, eight forms of marriage, the saṁskāras from garbhādhāna to Upanayana, the five daily great *yajñas*, śrāddha, pākayajñas, haviryajñas, somayāga, the means of subsistence for a Brāhmaṇa, the duties of Vaiśyas and Śūdras, the orders of forest hermits and *sannyasins*, removal of thorns by the king, administration of justice, king's duties.

The work does not produce the impression of being early. It is in the nature of a summary of larger works on dharma. All quotations in Hemādri cited from Budha are not found in the mss.

26. Bṛhaspati

That Bṛhaspati was an ancient teacher of Arthaśāstra follows from the Kauṭilīya, wherein the Bārhaspatyas are cited six times. In the Mahābhārata (Śāntī, chap. 59. 80-85) Bṛhaspati is said to have compressed into 3000 chapters the work on dharma, artha and kāma composed by Brahmā. The Vanaparva (32. 61) speaks of Bṛhaspati-nīti. The Mahābhārata several times cites verses (*gāthās* or *ślokas*) said to have been sung by Bṛhaspati[234] (vide Śānti. 23. 25, 56. 38-39, 57. 6-7). *Vide*

232 चतुर्वर्ग० (दानखण्ड p. 527) says 'आदेशब्दाच्च बुधदेवलसोमप्रजापतिवृद्धशातातप-पैठीनसिछागलेयव्यवनभरीचिवत्सपारास्करपुलस्त्यपुलहक्रतुऋष्यशृङ्गत्रेयाणां ग्रहणम्'.

233 The Budha sūtra opens as follows:—अथातो बुधधर्मशास्त्रं व्याख्यास्यामः। श्रेयोभ्युदयसाधनो धर्मः। गर्भाष्टमे ब्राह्मणो वसन्त आत्मानमुपनयेत्। एकादशे क्षत्रियो ग्रीष्मे। द्वादशे वैश्यो वर्षासु। मेखलाजिनदण्डकमण्डलूपवीतानि धारयेत्। &c. हेमाद्रि (परिशेष, काल, p. 309) quotes this as Budha's from स्मृति-महार्णव.

234 भूमिरेतौ निगिरति सर्पो बिलशयानिव। राजानं चाविरोद्धारं ब्राह्मणं चाप्रवासिनम्॥ शान्ति. 23. 15. This verse (with the reading द्वाविमौ ग्रसते भूमिः सर्पो &c.) is ascribed by शान्तिपर्व 57. 3. to Uśanas; vide note 195 above. बार्हस्पत्ये च

also Śānti. 58. 13-16, 69. 23-24. The Anuśāsana (39. 10-11) speaks of the Arthaśāstra composed by Bṛhaspati and others. In some of these places there are distinct references to a śāstra or *mata* of Bṛhaspati and sections of his work are referred to (as e.g. rājādhikāra). The Śāntiparva (170. 12) describes how a king could, according to Bṛhaspati's views, secure his goal in four ways.[235] In the Vanaparva (150. 29) men are said to be upheld by the *nayas* proclaimed by Bṛhaspati and Uśanas. Vide also Sabhā 50. 9, 55. 6, 73. 7-8, Udyoga 33. 71-72, 55. 66. The Kāmasūtra repeats the tradition that Brahmā composed a work in one hundred thousand chapters on *dharma*, *artha* and *kāma* and that Bṛhaspati dealt with a portion of that work, viz. on *artha*.[236] Vide note 196 above. Aśvaghoṣa (Buddhacarita I. 46) speaks of the rājaśāstra of Śukra and Bṛhaspati. According to the Arthaśāstra of Kauṭilya some of the special views of Bṛhaspati's school were that there were only two vidyās for kings viz. vārtā and daṇḍanīti and that the council of ministers should comprise 16 members. According to Kāmandaka and the Pañcatantra (II. 41) 'aviśvāsa' was the sheet-anchor of royal policy according to Bṛhaspati. The Yaśastilaka (p. 13) says that the nīti of Bṛhaspati had no place for Gods.[237] The commentary on the Nītivākyāmṛta gives the first verse of Bṛhaspati.[237a] Viśvarūpa contains several prose quotations which from their context must have been taken from Bṛhaspati about the qualifications of a senāpati, pratīhāra, dūta, &c. It is somewhat strange that in this quotation the *mantrin* is required to be deeply conversant with the śāstras of Manu, Bṛhaspati and Uśanas. For similar prose quotations, *vide*

Viśvarūpa on Yāj. I. 323, II. 154. That Bṛhaspati also wrote a sūtra work on vyavahāra and other topics of dharma follows from the quotations contained in Viśvarūpa and Haradatta. For example, Viśvarūpa cites a prose passage from Bṛhaspati (on Yaj. II. 38) about the duty of the king to restore property stolen from his subjects if he could not recover it from the thief, about the rising scale of the rates of interest according to the castes, about the debts of a deceased man being payable by those who took his wealth, by his wife or by his son, about a surety being made to pay when the principal died, about the illegitimate son of a śūdra getting a share on his father's death and about his taking the whole estate with the king's permission if there were no legitimate issue of the śūdra.[238] Haradatta on Gautama 22. 18 quotes a prose passsage from Bṛhaspati on the prāyaścitta for killing a cow. These quotations establish that Bṛhaspati wrote a sūtra work on dharma also (i. e. at least on vyavahāra and prāyaścitta). Viśvarūpa also quotes a few verses from Bṛhaspati on vyavahāra and prāyaścitta and in one place at least indicates that the verse he attributes to Bṛhaspati occurred in the same work in which a prose passage quoted by him occurred.[239] From this it follows that the sūtra work of Bṛhaspati on dharma contained verses also in Viśvarūpa's time. Whether the two works on arthaśāstra and dharma were composed by the same Bṛhaspati cannot be determined. It looks probable that they were composed by different authors. Yāj. (I. 4-5) mentions Bṛhaspati among the expounders of dharma. He is probably referring to the sūtra work on dharma disclosed by quotations from Viśvarūpa.

239 on याज्ञ. III. 262 विश्वरूप says 'बृहस्पतिना तु द्वादशाहेन, गोघाती तस्मात्पापात्प्रमुच्यते। क्षीराहारो भवेत्तत्र क्षीरदध्यशनोपि वा॥' तथेदमन्यत् 'गायत्र्या दशसाहस्रं &c. In the Mit. and other commentaries and nibandhas over seven hundred verses on vyavahāra and a few hundred more on ācāra and prāyaścitta are cited from Bṛhaspati. That seems to have been an independent work composed between 300 and 500 A. D., which will be discussed later on (vide sec. 37).

In Jivananda's collection (part I. pp. 644-651) and in the Ānandāśrama collection there is a Bṛhaspatismṛti in 80 verses in which Bṛhaspati is represented as instructing Indra about gifts. Several mss. in the Deccan College Collection contain this smṛti, but in an abridged form in 70 and 49 verses (No 130 of 1884-86 and No 147 of 1895-1902). Vide also I. O. cat. p. 386 No. 1324, 1325-1328. Aparārka quotes (p 1225) verse 7 of this smṛti (in verse) and the Dānaratnākara quotes verses 6 and 7 as from Dāna-Bṛhaspati.

The Bārhaspatya Arthaśāstra edited by Dr. F. W. Thomas (Lahore, 1921) is a later work and does not deserve more than a passing notice. In six chapters it deals with the conduct, duties, studies of kings, omens, rules of policy &c.

27. Bharadvāja and Bhāradvāja

There is a Śrauta sūtra and a Gṛhya sūtra attributed to Bhāradvāja. The Ms. of the śrauta in the Bombay University Library contains nine praśnas and a portion of the 10th and begins 'darśapaurṇamāsau vyākhyāsyāmaḥ'. It quotes Ālekhana and Āśmarathya frequently. The Gṛhya has been edited by J. W. Salomons. It appears from quotations in Viśvarūpa and other early commentators that a sūtra work on dharma attributed to Bharadvāja or Bhāradvaja was in existence. The forms Bharadvāja and Bhāradvāja probably refer to the same work. On Yāj. (I. 15) Viśvarūpa quotes a prose passage from Bhāradvāja prohibiting the learning of *mleccha* tongues and calling upon the preceptor to teach his pupil pure words, observance of Saṁdhyā and the kindling of fire;[239a] on Yāj. I. 32 Bhāradvāja is quoted as prescribing a penance for even thinking of causing harm to beings;[239b] on Yāj.I.185 a lengthy sūtra of Bharadvāja on the purification of certain things is quoted, wherein is cited the view of some that boys are purified by a mere bath

when touched by *antyajas*;[240] on Yāj. I. 236 a prose passage of Bharadvāja forbids in śrāddhas the use of certain cereals as food.[241] Aparārka quotes a long prose passage (p. 1155) from Bharadvāja in connection with the prāyāścitta for cessation of gṛhya fires for various periods.

In the Smṛticandrikā, in Haradatta and in several other works verses of Bhāradvāja are quoted, which appear to be taken from a smṛti in verse.

That Bhāradvāja was an ancient writer on arthaśāstra follows from the Kauṭilīya, wherein the views of Bhāradvāja are cited seven times and of Kaṇiṅka Bhāradvāja once. Some of the views of Bhāradvāja as described in the Kauṭilīya are that a king should choose his ministers from amongst his fellow-students, that the king should consider his line of policy alone in secret, that the princes should be punished secretly when they manifest no love for the king their father, that the minister should set one prince against another when the king is on his death-bed, that when calamities befall the king and the minister, the former is the lesser of two evils, that one should bow down before the strong. This last view occurs in the Mahābhārata in the same words.[242] The Śāntiparva (chap. 140) contains a dialogue between Bhāradvāja and king Śatruñjaya of Sauvīra in which daṇḍa is said to be the most pre-eminent among the expedients. The same parva (chap. 58. 3) mentions Bhāradvāja in a list of writers on rājaśāstra. The Yaśastilaka[243] (4th Āśvāsa p. 100, Nirṇayasāgara ed.) quotes two verses of Bhāradvāja from his treatise on the topic of the six *guṇas*. This shows that Bhāradvāja's work on politics was available in the 10th century and contained verses (probably intermixed with prose).

[240] यत्तु भारद्वाजः–'न शौचं शयनासनकटप्रस्तरयानप्रस्तरगण्डोपधानकशिपुकम्बलकुगृहधान्यमणिफलकशिलासहस्रशरोष्णामनिस्नातानां च काष्ठानां तृणपलालदाम्नां कुमाराणामन्यत्र प्रोक्षणादन्यस्पर्शने स्नानं कुमाराणामेके' इति ।

The Parāśara-Mādhavīya (vol. III. p. 231) quotes a verse of Bharadvāja which divides a pledge into four varieties. A few quotations from Bharadvāja on matters of vyavahāra are cited in other works. For example, the Sarasvatī-vilāsa cites a verse of Bharadvāja that a compromise, an exchange and a partition, if fair and equal, could be annulled only for ten days, but could be annulled till the 9th year, if unfair.[244] It appears that the verses of Bharadvāja on vyavahāra are taken from a work other than the ancient work on politics.

28. Śātātapa

Śātātapa is enumerated among the expounders of dharma by Yāj. (I. 4-5) and by Parāśara. Viśvarūpa, Haradatta and Aparārka quote several prose passages of Śātātapa on prāyaścitta. Viśvarūpa (on Yāj. III. 236) tells us that Śātātapa spoke of only eight upapātakas and that without dealing with śrāddha as a principal topic he spoke of some of the subsidiary details of śrāddha.[245] The latter passage quoted from Śātātapa is a half verse. So Viśvarūpa had a prose work of Śātātapa before him, mixed with verses. Haradatta on Gaut. (Dh. S. 22. 18) quotes a prose passage of Śātātapa about the penance for killing a cow. In the Mit., the Smṛticandrikā and other works numerous verses of Śātātapa are quoted on ācāra and śrāddha. This wotk of Śātātapa in verse is most probably a different one from the sūtra work. It appears that there are several smṛtis ascribed to Śātātapa. In Jivananda's collection there is a smṛti of Śātātapa called Karmavipāka in six chapters and about 231 verses. Its contents are: certain diseases are concomitants of certain sins; gifts of land, cows &c.; eulogy of Brāhmaṇas; penances for killing a Brāhmaṇa, a cow &c., penances for drinking wine, for incest and forbidden sexual intercourse of various sorts, for thefts; rites for those who meet with violent and accidental death. The last verse declares that the Smṛti was promulgated by Śātātapa to his pupil Śarabhaṅga. It is a late production. It prescribes the reading of the Harivaṁśa (II. 30) as a penance for infanticide.

No. 1362 of the I. O. catalogue (and cat. of Madras Govt. mss. vol. V. pp. 1994-96) is a Śātātapa-smṛti in twelve chapters dealing with prāyaścittas for mahāpātakas, prāyaścittas fot injuries to various beings, marriage, vaiśvadeva, śrāddha, pitṛtarpaṇa, rules about taking one's dinner, prāyaścitta for dogbites and similar matters; impurity on birth and death, rules of conduct (ācāra).

No. 1361 of the I.O. catalogue is a treatise in mixed prose and verse on prāyaścittas for the Mahāpātakas and Upapātakas. Several verses of Manu (such as III. 8, 11, 171) occur therein. It contains 139 verses. In Mitra's Notices (II. p. 4) there is a ms. called Karmavipāka in 87 chapters and 2376 verses, of which the work in Jivananda's collection seems to be a part or abridgment.

Aparārka in several places quotes the views of Śātātapa immediately followed by quotations from Vṛddha-Śātātapa or *vice versa* (e. g. on Yāj. I. 190, on III. 292 p. 1195 and p. 1201).

No. 205 of A. 1882-83 of the Deccan College Collection is a Vṛddha-Śātātapa smṛti in 64 verses on prāyaścittas for doing various things, on śrāddha, on washing the teeth. I. O. Cat. No. 1360 p. 398 is a Vṛddha-Śātātapa-smṛti in 97 verses on defilement and purifications. The Ānandāśrama collection contains a Vṛddha-Śātātapa smṛti in 68 verses (pp. 232-235) on prāyacittas, purification from various defilements and other miscellaneous matters. There are two prose passages therein.

Hemādri mentions a Vṛddha-Śātātapa along with several other smṛtikāras (vide note 232 above). In the Vyavahāramātṛkā of Jīmūtavāhana (p. 305) Vṛddha-Śātātapa is cited on the six kinds of *uttara* (defendant's reply).[246] This shows that Vṛddha-Śātātapa wrote on Vyavahāra also.

The Mit. (on Yāj. III. 290) cites a Bṛhat-Śātātapa.

Hemādri (III. 1. 801) speaks of a bhāṣyakāra of Vṛddha-Śātātapa.

29. Sumantu.

From Viśvarūpa, Haradatta and Aparārka it follows that Sumantu composed a sūtra work on *dharma*, particularly on ācāra and prāyaścitta. Viśvarūpa quotes prose passages from Sumantu on upapātakas,[247]

[246] बृद्धशातातपवचनं तु बहुक्षाजीर्णकृतनिबन्धेस्माभिर्दृष्टं न पुनर्भोजदेवे ।

[247] एवं सुमन्तुः ' क्षीरजतगोस्तैल्यं गोश्च गमनं नाशकं भूम्यनृतं क्षत्रियवैश्यगोघ्नता परिवित्तिताधकीर्णिता प्रतिरूपकवृत्तिश्चेत्युपपातकानि ' इति । विश्वरूप on याज्ञ. III. 239-236.

on prāyaścitta for Brāhmaṇa-murder (on Yāj. III. 237), for drinking wine (on Yāj. III. 250), for theft of gold (on Yāj. III 252), for incest (on Yāj. III. 253-54), for killing a cow and about ātatāyin (on Yāj. III. 261). In one quotation from Sumantu cited by Viśvarūpa the views of ācāryas and of Āṅgirasa are mentioned.[248] The prāyaścittas for Brāhmaṇa-murder and for killing a cow contained in Viśvarūpa occur in Haradatta (on Gaut. 22. 13 and 18). Most of the quotations cited by Viśvarūpa occur in Aparārka also. The Hāralatā (p. 68) quotes sūtras of Sumantu on āśauca. One well-known sūtra of Sumantu is ' no prāyaścitta (or blame) is incurred by killing an ātatāyin, except cows and brāhmaṇas '.[249] Aparārka quotes sūtras from Sumantu condemning marriage with maternal uncle's or paternal aunt's daughter and recommending the abandonment of a young wife in certain circumstances.[250] In the Sarasvatīvilāsa a prose passage of Sumantu is cited on the seven constituents of rājya.[250a]

These quotations from Viśvarūpa and others establish that a prose work on dharma by Sumantu existed early enough. It appears however that the work was not a very ancient one. Neither Yājñavalkya nor Parāśara mentions Sumantu among the propounders of *dharma*. On the other hand the name of Sumantu is an ancient one. In the Bhāgavatapurāṇa (XII. 6. 75 and 7. 1). Sumantu is said to have been a pupil of Jaimini and a promulgator of the Atharvaveda. Vide Śāntiparva 341. 19 for Sumantu and other pupils of Vyāsa. In the daily *tarpaṇa* the name of Sumantu occurs along with Jaimini, Vaiśampāyana, Paila.

Numerous verses on dharma are also cited from Sumantu by Aparārka, the Smṛticandrikā and other works. This may probably be a different work from the sūtra work of Sumantu. In one verse of Sumantu (Aparārka on Yāj. I. 223) occur the words 'Śaṅkhasya vacanaṁ yathā' and in another (Aparārka on Yāj. I. 217-218) the Kanyā sign of the zodiac is referred to.

It is remarkable that the Mit. and Aparārka contain no verses of Sumantu on vyavahāra. The Sarasvatī-vilāsa is rich in quotations from Sumantu on vyavahāra. A compromise, exchange or partition, if fair, could be annulled up to the tenth day, but if unfair up to the 9th year (vide note 244 above). 'If even as much as a *māṣa* went from the buyer to the seller, that would support the sale of the land (sold) just as a small dose of poison permeates the whole body and when no purchase-money is paid or only a portion is paid, then the purchase is called *avākraya* and is liable to be set aside if the price is not paid in (good time).' Sumantu prescribes a fine for selling and purchasing land without the consent of the neighbouring members of the family and says that in case of pre-emption, the neighbours on the east are preferred to all and those on the south come last.[252] Sumantu defines a mortgage by conditional sale (called 'uktalābhakraya') and a sale for arrears of revenue by the king's orders (called ājñākraya).[253]

30. The Smṛtis

The word smṛti is used in two senses. It is applied to all ancient orthodox non-Vedic works such as Pāṇini's grammar, to the śrauta, gṛhya and dharma sūtras, to the Mahābhārata, to Manu, Yājñavalkya and others. In a narrower sense smṛti and dharma-

[251] माषमात्रमपि द्रव्यं क्रेतुर्विक्रेतरि स्थितम् । व्याप्नोति सकलां भूमिं कायमल्पं विषं यथा ॥ अर्धदत्तमदत्तं तु क्रयमाहुरवक्रयम् । अवक्रयो निवर्तेत यदि काले न दीयते ॥ सरस्वती० p. 321.

[252] ज्ञात्यादीनननुज्ञाप्य समीपस्थानतन्द्रिनाम् । क्रयविक्रयकर्तारौ तत्समं दण्डमर्हतः ॥ सरस्वती० p. 322; 'चतुःसामन्तसांनिध्ये प्राची दिग्बलवत्तरा । उदीची च प्रतीची च सर्वाभावे तु दक्षिणा ॥ p. 323.

[253] किंचिच्च द्रव्यमादाय काले दास्यामि ते क्वचित् । नो चेन्मूलमिदं त्यक्तं केदारस्येति यः क्रयः ॥ स उक्तलाभ इत्युक्त उक्तकालेऽप्यनर्पणात् ॥ सरस्वती० p. 324; मूल्यस्य पादमर्धं वा मूल्यमाक्राक्रये स्थितम् । मूल्यं तदाप्तमखिलं दत्त्वा क्षेत्रं समाप्नुयात् ॥ आ त्रिभोगात् ततः क्रेतुः परतो दृढतामियात् । p. 323.

śāstra are synonyms, as Manu says.[254] The word smṛti occurs in Taittirīya Āraṇyaka (I. 2). Gautama (Dh. S. I. 2) and Vasiṣṭha (Dh. S. I. 4) speak of smṛti as one of the sources of dharma. Āp. Dh. S. (II. 6. 15. 25) employs the word smṛti and has in view Gautama's dharmasūtra according to Haradatta. In the Pūrva-mīmāṁsā-sūtra the word smṛti occurs (vide VI. 8. 23 and XII. 4. 42).[255] In the Vedāntasūtras the word smṛti is employed in a wide sense, in one place as referring even to the sāṅkhya system.[256] In that work the word is used according to Śaṅkara with reference to the Mahābhārata or the Manusmṛti (Vedāntasūtra II. 3. 47, III. 1. 14 and 21, IV. 2. 14).

In ancient times the number of smṛtis (i. e. works on dharma-śāstra) must have been very small. Gautama mentions by name no smṛtikāra except Manu, though he speaks of dharmaśāstras (XI. 19). Baudhāyana names seven (besides himself) authors on dharma, viz. Aupajaṅghani, Kātya, Kāśyapa, Gautama, Prajāpati, Maudgalya and Hārīta. Vasiṣṭha names only five authors, Gautama, Prajāpati, Manu, Yama, and Hārīta. Āpastamba mentions a large number, viz. ten, some of whom like Eka, Kuṇika and Puṣkarasādi are no more than mere names to us. Manu speaks of only six (besides himself) viz. Atri, the son of Utathya, Bhṛgu, Vasiṣṭha, Vaikhānasa (or rather Vikhanas) and Śaunaka. But in all these works the writers are mentioned only casually and there is no regular enumeration or list of writers on dharma in one place. Aparārka quotes (p. 7) a sūtra of Gautama (not found in the printed G. Dh. S.) in which sixteen authors of dharmaśāstras including himself are enumerated.[257] The same sūtra with slight variations is ascribed to Śaṅkha-Likhita in the Vīramitrodaya (Paribhāṣā-prakāśa p. 16). Yājñavalkya is probably the earliest writer who enumerated in one place (I. 4-5) twenty expounders of dharma (including himself and counting Śaṅkha and Likhita as two distinct persons). It will be noticed that Yāj. omits Baudhāyana. Parāśara also gives a list of 19 expounders of dharma (excluding

himself), but his list differs slightly from that of Yāj. Parāśara omits Bṛhaspati, Yama, and Vyāsa and adds Kāśyapa, Gārgya and Pracetas. The Tantra-vārtika (p. 125) of Kumārila speaks of eighteen dharmasaṁhitās. Viśvarūpa quotes a verse of Vṛddha-Yājñavalkya, who adds ten names to the list of Yājñavalkya (vide note 219 above), The Caturviṁśatimata is a work which professes to give the views of 24 sages on dharmaśāstra, viz. all those listed by Yāj. (except Kātyāyana and Likhita) and six more, viz. Gārgya Nārada, Baudhāyana, Vatsa, Viśvāmitra, Saṅkha (Śāṅkhyāyana ?). Aṅgiras as quoted in the Smṛticandrikā (I. p. 1), Hemadri (Dānakhaṇḍa p. 528), the Sarasvatīvilāsa (p. 13) and other works mention Upasmṛtis.[259] There is a smṛti called Ṣaṭtriṁśanmata quoted by the Mit., Aparārka and other works. Paiṭhīnasi as quoted in the Śmṛticandrikā, the Saṁskāramayūkha and other works enumerates 36 smṛtis.[260] Aparārka says that the Bhaviṣyatpurāṇa speaks of 36 smṛtis and his enumeration of them is slightly different from that of Paithīnasi.[261] The Vṛddhagautamasmṛti (Jivananda part II. pp. 498-499) gives a list of 57 dharma-śāstras. The Prayoga-pārijāta as quoted in the Vīramitrodaya enumerates 18

principal smṛtis, 18 upasmṛtis and 21 other smṛtikāras.[262] If all the smṛtis cited in the later *nibandhas* such as the Nirṇayasindhu, the Mayūkhas of Nīlakaṇṭha and the Vīramitrodaya be taken into account, the number of smṛtis will be found to be about 100.

The smṛtis thus relied upon are the products of different and and widely separated ages. Some of them are entirely in prose or in mixed prose and verse, while the large majority are in verse. A few of them are very ancient and were composed centuries before the Christian era. Such are the dharmasūrras of Gautama, Āpastamba, Baudhāyana, and the Manusmṛti. Some were composed in the first centuries of the Christian era such as the smṛtis of Yājñavalkya, Parāśara, Nārada. Most of the smṛtis other than the above fall between the period from 400 A. D. to 1000 A. D. The chronology of all these smṛtis presents perplexing problems. Some of the metrical smṛtis are remodellings of older sūtras as in the case of Śaṅkha. There are sometimes as many as two or three different smṛtis going under the same name, e. g. Śātātapa, Hārīta, Atri. Then the confusion is worse confounded by the fabrications of sectarian zeal, such as the Hārītasmṛti which is full of Vaiṣnavaite teachings. There are several works going under the names of well-known smṛtikāras with the prefixes Vṛddha, Bṛhat, Laghu. In many cases the works going under these names are different from the smṛtis that are without these prefixes and this differentiation took place at a very early date in certain cases, for example, so early a writer as Viśvarūpa distinguishes between Yājñavalkya and Vṛddha-Yājñavalkya, Gārgya and Vṛddha-Gārgya. Similarly Viśvarūpa quotes (on Yāj. I. 69) Vṛddha-Manu and (on Yāj. I. 19) Vṛddha-Vasiṣṭha, which latter probably was different from the Vasiṣṭhadharmasūtra, as the latter does not contain the details given

262 The 18 principal स्मृतिकार[s] according to the प्रयोगपारिजात are मनु, बृहस्पति, दक्ष, गौतम, यम, अङ्गिरस्, योगीश्वर, प्रचेतस्, शातातप, पराशर, संवर्त, उशनस्, शङ्ख, लिखित, अत्रि, विष्णु, आपस्तम्ब, हारीत. The उपस्मृति[s] have been enumerated above (in n. 259). The other 21 smṛtis are: वसिष्ठो नारदश्चैव सुमन्तुश्च पितामहः। विष्णुः काण्वाजिनिः सत्यव्रतो गार्ग्यश्च देवलः॥ जमदग्निर्भारद्वाजः पुलस्त्यः पुलहः क्रतुः। आत्रेयश्च गवेयश्च मरीचिर्वत्स एव च॥ पारास्करश्चर्ष्यशृङ्गो वैजवापस्तथैव च। इत्येते स्मृतिकर्तार एकविंशतिरीरिताः॥ वीर०, परिभाषाम० p. 18.

by Viśvarūpa.[263] In some cases the works designated Vṛddha or Bṛhat are larger and in all cases later than the works without those prefixes. For example, Parāśara and Bṛhat-Parāśara (Jivananda part II. pp. 55-310), Gautama and Vṛddha-Gautama (Jivananda part II. pp. 497-638). Some of the works with the prefix Vṛddha are versified compilations of prose works, e. g. Mit. on Yāj. III. 267 quotes a verse from Vṛddha-Viṣṇu which is merely the versified equivalent of Viṣṇu-dharmasūtra chap. 50. 6, 12-14. It appears that sometimes the same work is cited with the prefix Vṛddha or Bṛhat, e. g. the Mit. on Yāj. II. 135 quotes a passage from Bṛhad-viṣṇu which is the same as the Viṣṇudharmasūtra 17. 4-7.

As most of the writers of digests quote from memory and had recourse to mss. and not to standard editions, even well known verses are ascribed to different authors in different works. The verses 'bhrātṛṇām-aprajāḥ' &c. which are quoted as Nārada's (Nārada 16.25-26) in the Vyavahāramayūkha are attributed to Śaṅkha in the Madanapārijāta (p. 680). The three verses about *bandhus* are ascribed to Baudhāyana by Mādhava and to Vṛddhaśātātapa by the Madanapārijāta (p. 674).

In spite of all these drawbacks, an attempt will be made in the following pages to arrange some of the leading versified smṛtis in chronological order beginning from the Manusmṛti.

All these smṛtis are not equal in authority. Most of them are obscure and are only rarely cited by ancient commentators. Exclusive of the dharmasūtras hardly a dozen smṛtis have found commentators. If we are to judge of the authority of a smṛti by the commentaries thereon, then the Manusuṛti stands pre-eminent. Next to it is the Yājñavalkyasmṛti.

31. The Manusmṛti

So many editions of this work have been published in India since 1813 (when the Manusmṛti was first published at Calcutta), that it is not possible to name them. In this work the Nirṇaya-sāgara edition with the commentary of Kullūka has been used throughout. Another edition of Manu well known on this side of India is that of the late V. N. Mandlik who published several com-

mentaries snch as those of Medhātithi, Govindarāja and others. The Manusmṛti has been translated into English several times. The best known translation is that of Dr. Bühler in the S. B. E. series (vol. 25). Dr. Bühler also added an exhaustive and very scholarly introduction to his translation and dealt with numerous problems connected with the Manusmṛti.

In the Ṛgveda Manu is spoken of as the father of mankind (Ṛg. I. 80. 16, I. 114. 2, II. 33. 13) and a Vedic poet prays that he may not be led away from the ancestral path of Manu.[264] Another Vedic bard says that Manu was the first to offer sacrifice (Ṛg. X. 63. 7). In the Taittirīya Saṁhitā and the Tāṇḍya-mahā-brāhmaṇa it is said 'whatever Manu said is medicine.'[265] Taittirīya-Saṁhitā (II. 1. 5. 6) also says that mankind is Manu's (Mānavyo hi prajāḥ). In the Taittirīya Saṁhitā (III. 1. 9. 4-5) and the Aitareya Brāhmaṇa (V. 14) we have the story of Manu dividing his wealth among his sons and of the exclusion of his son Nābhānediṣṭha. The Śatapatha-brāhmaṇa (S. B. E. vol. 12 p. 216) gives us the story of Manu and the deluge. In the Nirukta (chap. III) there is a discussion about the rights of sons and daughters. One of the views there propounded is that children of both sexes take their father's wealth and a *ṛk* and śloka are cited in support of that position.[266] The śloka refers to the opinion of Manu Svāyaṁbhuva. It is noteworthy that that śloka is opposed to a *rik*, which means that the śloka is not Śruti but is Smṛti. So before Yāska wrote there were smṛti texts in verse in which Manu was spoken of as a lawgiver. We have seen how Gautama and Vasiṣṭha quote the views of Manu and how Āpastamba connects Manu with the promulgation of śrāddhas (II. 7. 16. 1). The Mahābharata in numerous places speaks of Manu, sometimes as Manu simply, sometimes as Svāyaṁbhuva Manu (Śānti 21. 12) and also as Prācetasa Manu (Śānti 57. 43). In the Mahābhārata (Śānti. chap. 336. 38-46) we are told how the supreme being composed a hundred thousand ślokas

on *dharma*, how Manu Svāyaṁbhuva promulgated those *dharmas* and how Uśanas and Bṛhaspati composed *śāstras* based on the work of Manu Svāyaṁbhuva.[267] In another place the account is slightly different and Manu does not figure therein. Śānti-parva (chap. 59. 80-85) describes how the original work of Brahmā on the three, *Dharma*, *Artha*, and *Kāma*, in 100000 chapters was successively reduced to 10000, 5000, 3000 and 1000 chap. respectively by Viśālākṣa, Indra, Bāhudantaka, Bṛhaspati and Kāvya (Uśanas). The prose introduction to the Nārada-smṛti says that Manu composed in 100000 ślokas, 1080 chap. and 24 *prakaraṇas* a Dharmaśāstra and imparted it to Nārada, who abridged it into 12000 verses and taught it to Mārkaṇḍeya, who in his turn compressed it into 8000 ślokas and passed it on to Sumati Bhārgava, who again reduced it to 4000 ślokas. The Nārada-smṛti then gives the first verse[268] of that work which is a combination of the extant Manu I. 5-6 and says that vyavahāra was the 9th prakaraṇa out of 24 in the original work of Manu. It will be noticed how this version differs from that of the Mahābhārata wherein Nārada is altogether ignored. The extant Manusmṛti (I. 32-33) narrates how from Brahmā sprang Virāj, who produced Manu, from whom were born the sages including Bhṛgu and Nārada, how Brahmā taught the śāstra to Manu, who in his turn imparted it to the ten sages (I. 58), how some great sages approached Manu and sought instruction in the *dharmas* of the *varṇas* and the intermediate castes and how Manu told them that his pupil Bhṛgu would impart to them the śāstra (I. 59-60). This appearance is kept up throughout the work. The sages interrupt Bhṛgu's discourse in several places (as in V. 1-2 and XII. 1-2). Manu is said to be omniscient (II. 7) and Manu is mentioned by name dozens of times in the work with the words "Manurāha" (IX. 158, X. 78 etc), or "Manur-abravīd" or "Manor-anuśāsanam".

Manu I. 5 is quoted as the verse of a स्मृतिकार by कमलशील in his comment on शान्तरक्षित's तत्त्वसंग्रह (कारिका 3118) in the middle of the 8th century A. (VIII. 139, 279, IX. 239, etc). That the introductory words in the Nārada-smṛti are not spurious or a later addition follows from the remark of Medhātithi that, according to the Nāradasmṛti, Prajāpati composed a work in 100000 ślokas which was abridged by Manu and others.[269] No one should take very seriously these varying accounts even in the Mahābhārata and in the Nāradasmṛti, as they are intended to glorify some particular text or texts. According to the Bhaviṣya-purāṇa as quoted in Hemādri, the Saṁskāra-mayūkha and other works, there were four versions of the Svāyaṁbhuva śāstra composed by Bhṛgu, Nārada, Bṛhaspati and Aṅgiras.[270] So early a writer as Viśvarūpa cites verses from Manusmṛti as those of Svayaṁbhū (vide com. on Yāj. II. 73, 74, 83, 85, where Manu 8. 68, 70-71, 380 and 105-6 are respectively quoted as Svayaṁbhū's), while quotations from Bhṛgu cited by Viśvarūpa (on Yāj. I. 187 and 252) are not found in the Manusmṛti. In the same way most of the verses quoted from Bhṛgu by Aparārka are not found in the Manusmṛti. One verse which Aparārka quotes from Bhṛgu (on Yāj. II. 96) speaks of the view contained therein as that of Manu.[271]

It is almost impossible to say who composed the Manusmṛti. It goes without saying that the mythical Manu, progenitor of mankind even in the Ṛgveda, could not have composed it. What motives could have induced the unknown author to palm it off in the name of the mythical Manu and to suppress his identity it is difficult to say. One motive may have been to invest the work with a halo of antiquity and authoritativeness. Bühler following Max Müller says (SBE vol. 25 p. XVIII) that the Manusmṛti is based on or is a recast of an ancient dharmasūtra, viz. that of the Mānavacaraṇa. The question whether the Mānavadharmasūtra existed has been discussed above (sec. 13, pp. 79-85). Bühler himself candidly admits (SBE vol. 25, p. XXIII) that the recovery of the writings of the Mānavas has not only not furnished any facts in support of the alleged relation between the Mānavadharmasūtra and the

Manusmṛti, but on the contrary has raised difficulties as the doctrines of the Mānavagṛhyasūtra (edited by Dr. Knauer) differ very considerably from those of the Manusmṛti. To take only a few examples, Mānava Gṛ. S. II. 12. 1-2 are opposed to Manu 3. 1; Mānava Gṛ. S. I. 4. 7 to Manu 4. 95; Mānava Gṛ. S. I. 20. 1 to Manu 2. 34; Mānava Gṛ. S. I. 21. 1 to Manu 2. 35; Mānava Gṛ. S. I. 22. 1 to Manu 2. 36; Mānava Gṛ. S. II. 12. 1-2 to Manu 3. 84-86. Besides there is nothing in our Manu corresponding to the Vināyakaśānti in the Mānavagṛhya (II. 14) nor to the tests for selecting a bride prescribed in Mānava Gṛ. S. I. 7. 9, which corresponds to Āśvalāyana Gṛ. S. I. 5. 5-6. Dr. Caland points out (R. und S. p. 17) that though single verses of the Manusmṛti tally with the Śrāddhakalpa of the Mānava School, yet the descriptions of funeral rites widely differ in the two works. There are no doubt some parallels as pointed out by Bradke (in ZDMG, vol. 36, pp. 417-477). There is one circumstance about the authorship of the Manusmṛti that deserves to be noted. The Mahābhārata seems to distinguish between Svāyaṁbhuva Manu and Prācetasa Manu. The former is said to be the promulgator of dharmaśāstra and the latter of arthaśāstra (or politics). For example Śānti 21. 12 speaks of Svāyaṁbhuva Manu and Śānti 57-43 and 58-2 speak of *Prācetasa* as an author on *rājaśāstra* or *rājadharma*. In some places Manu alone without any epithet is associated with *rājadharma* or *arthavidyā*. It is not unlikely that originally there were two distinct works, one on dharma and the other on arthaśāstra attributed to Manu. When the Kauṭilīya speaks of the Mānavas, he probably refers to the work on politics attributed to Prācetasa Manu. It is extremely doubtful whether Rājaśekhara, when he mentions the several views on the number of vidyās (including that of the Mānavas that they were three), had the Arthaśāstra of the Mānavas before him or only copied a passage from Kauṭilya (vide Kāvyamīmāṁsā p. 4). It is not unlikely that the work on *dharma* attributed to Manu may have contained general directions on the duties of kings. It is therefore (i. e. because there were two different works on dharma and arthaśāstra attributed to Manu) that the views ascribed to the Mānavas by the Kauṭilīya are not found word for word in the extant Manusmṛti. One may

[272] अश्रौषीस्त्वं राजधर्मान्यथा वै मनुरब्रवीत् । वनपर्व 35. 21; वेदं षडङ्गं वेदार्थमर्थविद्यां च मानवीम् ॥ द्रोणपर्व 7. 1.

hazard the conjecture that the author of the Manusmṛti, whoever he might have been, combined in his work the information contained in the two works on *dharma* and *arthaśāstra* and supplanted both the earlier works and that this result had not been either accomplished at the time when the Kauṭilīya was composed or was then quite recent. In the extant Manusmṛti, the work is ascribed to Svāyaṁbhuva Manu and then six other Manus of whom Prācetasa is not one are enumerated (I. 62).

The extant Manusmṛti is divided into twelve *adhyāyas* and contains 2694 ślokas. Dr. Jolly's edition (published in 1895) prepared after collating numerous mss. and printed editions contains only one śloka more. The Manusmṛti is written in a simple and flowing style. It generally agrees with Pāṇini's system, though it contains some deviations from it as in the verse ' sākṣiṇaḥ santi metyuktvā ' (8. 57). The foregoing pages have sufficiently shown how it agrees closely with the doctrines contained in the Dharmasūtras of Gautama, Baudhāyana, Āpastamba. We have also seen how numerous verses are common to the dharmasūtras of Vasiṣṭha and Viṣṇu and the Manusmṛti. The Kauṭilīya also exhibits remarkable agreement with the Manusmṛti in phraseology and doctrines.[273] What conclusions are to be drawn from this will be discussed later on. Some verses are repeated, e. g. V. 164-165 are the same as IX. 30 and 29. The contents of the Manusmṛti may be briefly summarised as follows :--(I) Sages approach Manu for instruction in the *dharmas* of the *varṇas* ; Manu describes the creation of the world from the self-existent God more or less in the Sāṅkhya manner ; the creation of Virāj, of Manu from Virāj, of ten sages from Manu ; creation of various beings, men, beasts, birds etc. ; Brahmā imparts dharmaśāstra to Manu, who teaches the sages ; Manu bids Bhṛgu to instruct the sages in *dharma* ; six other Manus sprang from Svāyaṁbhuva Manu ; units of time from *nimeṣa* to year, the four *yugas* and

The extent of the literature known to Manu was considerable. He mentions the three Vedas and the Atharvaveda is spoken of as the Atharvāṅgirasī Śruti (XI. 33). He refers to Āraṇyaka (IV. 123). The Vedāṅgas are said to be six (III. 185) and they are often referred to without stating the number (II. 141, IV. 98). He speaks of dharmaśāstra (II. 10) and also knew many dharmaśāstras (III. 232). By dharmapāṭhaka (XII. 111) he probably means one who has studied dharmaśāstras. He mentions several authors on dharmaśāstra, viz. Atri, the son of Utathya (i. e. Gautama according to commentators), Bhṛgu and Śaunaka (all these in III. 16), Vasiṣṭha (on the rate of interest in VIII. 140 which agrees with Vasiṣṭhadharmasūtra II. 50), Vaikhānasamata (in VI. 21). He mentions Ākhyānas, Itihāsas, Purāṇas and Khilas (III. 232). He speaks of *brahma* as described in the Vedānta (in VI. 83 and 94) and is probably thinking of the Upaniṣads. That he knew some generally accepted works opposed to the teaching of the Vedas is quite clear from his reference to 'Vedabāhyāḥ smṛtayaḥ' (XII. 95). He is probably referring to the writing of the Bauddhas, Jainas and others. He speaks of heretics and their guilds (IV. 30 and 61). He refers to atheism and calumny of the Vedas (IV. 163) and of various tongues spoken among men (IV. 332). He frequently refers to the views of others in the words "kecit", "apare", "anye" (as in III. 261, X. 70, IX. 32).

Numerous interesting and difficult problems are connected with the Manusmṛti. Bühler in his elaborate introduction (S B E vol. 25) exhaustively deals with these problems. It is not possible to go at great length into those questions here. A separate volume would be required to deal with the problems raised by Bühler and to examine the arguments of Bühler, Hopkins and others who have written on them. Only a brief discussion of some of these problems can be attempted.

Bühler takes considerable pains to refute the claims of Manu to be regarded as the first legislator (S. B. E. vol. 25 pp. XXIII-XXX). But no serious refutation of the claim is really needed. The very extent of the literature known to the Manusmṛti and the mention of several writers on dharmaśāstra by name are sufficient to negative that claim.

Bühler devotes a great deal of space to the consideration of the question as to what circumstances led to the substitution of a universally binding Mānava-dharmaśāstra for the manuals of the Vedic schools (S. B. E. vol. 25 pp. XLVI-LVI) and as to why the special law schools selected just the Mānavadharmasūtra among the large number of similar works for the basis of their studies (ibid. pp. LVII-LXV). Bühler then considers the question how the Mānavadharmasūtra was converted into the present Manusmṛti. Bühler concedes that the last is a problem of great difficulty and admits of an approximate solution only. The discussion of all these questions by Bühler is extremely thought-provoking and brilliant in many places, though it must be said with great respect that the arguments are often *à priori* and savour more or less of special pleading. As I question the very foundation of Bühler's edifice (viz. the actual existence of a Mānava-dharmasūtra), it would be futile for me to enter into a discussion of the problems referred to above.

I shall now address myself to the discussion of the age of the Manusmṛti from external and internal evidence. That question is bound up with other problems, viz. whether there are earlier and later strata in the extant Manusmṛti, whether the Manusmṛti was recast several times or once only, what relations exists between the Manusmṛti and the Mahābhārata.

First the external evidence may be taken up. The bhāṣya of Medhātithi is the earliest extant commentary on the Manusmṛti and was composed about 900 A. D. as will be shown later on (sec. 36). The text commented upon by Medhātithi was the same (barring a few various readings) as the one we now possess. Therefore long before 900 A. D. the Manusmṛti was the same as now. Viśvarūpa in his commentary on Yāj. quotes over two hundred verses of the Manusmṛti either wholly or in part from all the twelve chapters beginning with the very first verse. The text that Viśvarūpa had before him was the same as the present Manusmṛti and the verses

were arranged in the same order as at present. Viśvarūpa quotes eight verses (Manu XI. 108–115) from Manu (on Yāj. III. 262). Śaṅkarācārya in his Vedāntsūtra-bhāṣya quotes the Manusmṛti very frequently. For example, he quotes Manu I. 5 and 21 (on V. S. I. 3. 28), I. 27 (on V. S. IV. 2. 6), II. 87 (on V. S. III. 4. 38), X. 4 and 126 (on V. S. I. 3. 36), XII. 91 and 105-6 (on V. S. II. 1 and 11). In his bhāṣya on the Bṛ. U. he quotes Manu dozens of times and calls the Manusmṛti[274] 'Mānavam' (on Bṛ. U. I. 4. 17). He looks upon the Manusmṛti as one of the authorities on which the author of the Vedāntasūtra relies.[275] The Tantravārtika of Kumārila stands in a special relation to the Manusmṛti. *Vide JBBRAS for 1925 pp. 98–100.* He places Manu at the head of all smṛtis, even higher than the dharmasūtra of Gautama. He cites numerous quotations from the first chapter of the Manusmṛti to the last. He looks upon all parts of the extant Manusmṛti as equally authoritative and regards the Manusmṛti as the highest authority on matters of *dharma*. The Mṛcchakaṭika[276] (9. 39) refers to the ordinance of Manu that a Brāhmaṇa sinner was not to be sentenced to death, but was to be banished. An inscription of the Valabhi king Dharasena dated in the year 252 of the Valabhi era (i. e. 571 A. D.) speaks of a king as one who obeyed the rules composed by Manu[277] (I. A. vol. 8. p. 303 = Gupta Inscriptions p. 165). *Vide* also I. A. vol. IV. p. 105 where the same words occur in an inscription from Valabhi dated 216 of the Valabhi era (i. e. 535 A. D.). Śabarasvāmin, the bhāṣyakāra of Jaimini's sūtras, who cannot be placed later than 500 A. D. and may be a few centuries earlier still, says " Manu and others have given

instruction[278] " and quotes a verse as a smṛti passage which is practically the same as Manu IX. 416 and similar to Udyoga-parva[279] 33. 64. Aparārka and Kullūka point out how the Bhaviṣyapurāṇa expounds passages of the Manusmṛti (vide Kullūka on Manu XI. 72, 73, 100 and Aparārka pp. 1071, 1076).[280] It will be shown below that Bṛhaspati must have composed his work before 500 A. D. Bṛhaspati says that the Manusmṛti occupies a pre-eminent position because it correctly represents the sense of the Veda and that a smṛti which is in conflict with Manu is not esteemed.[281] Bṛhaspati in numerous places pointedly refers to the present text of the Manusmṛti. One such quotation about *niyoga* has been cited above (note 172). Bṛhaspati says " Manu has spoken of quantities (units of weights) beginning from the mote in the sun-beam to the kārṣāpaṇa.[282] " This is obviously a reference to Manu 8. 132-136. Bṛhaspati says " Manu enumerated thirteen sons and just as in the absence of clarified butter, oil is a substitute, so in the absence of an *aurasa* son or a *putrikā*, the eleven kinds of son are a substitute.[283] " This has in view Manu 9. 158-160, 180, 127-130, where Manu speaks of the twelve sons, out of whom eleven are substitutes and

advocates that a sonless man should appoint a daughter (*putrikā*, who then is the 13th kind of son). In another place Bṛhaspati declares "Manu forbade gambling as it destroys truth, purity and wealth; but others allowed it provided a share was given to the king (in the gains of gambling[284])." This very aptly describes the attitude of Manu (9. 224) and of Yāj. (II. 201-203). Bṛhaspati says "If a man kills a cow with a weapon &c., he should perform the penance laid down by Manu, but if he kills a cow by forcible restraint, then he should perform the penance laid down by Aṅgiras or Āpastamba." The reference is to Manu XI. 108-115, Āpastamba Dh. S. I. 9. 26. 1 and Āṅgirasa verse 27 (Jivananda, part I p. 556). In one place Bṛhaspati seems to criticise Manu (9. 219) when he says "those who declared clothes and other things to be impartible have not considered the position that the wealth of the rich may consist of clothes and ornaments.[285]" In another place Bṛhaspati says "Bhṛgu spoke of sale without ownership after deposit; listen to it attentively, I shall speak of it with more details.[286]" This keeps in view Manu 8. 4 and clearly shows that Bṛhaspati was well aware of Bhṛgu's connection with the extant Manusmṛti. Aṅgiras as quoted in the Smṛticandrikā (I. p. 7) speaks of the dharmaśāstra of Manu. In the Vajrasūci of Aśvaghoṣa (ed. by Weber) several verses are quoted as from the 'Mānavadharma' which occur in the extant Manusmṛti,[287] though it must be admitted that there are others that

do not occur. In the Rāmāyaṇa also there are verses cited as from Manu which occur in the extant Manusmṛti; vide Kiṣkindhā 18.30-32 (Gujarati Press, 1915-1920) where two verses are quoted as 'sung by Manu' which correspond to Manusmṛti VIII. 318 and 316 respectively.

The foregoing discussion of the external evidence shows that writers from the 2nd century onwards (if not earlier) looked upon the extant Manusmṛti as the most authoritative smṛti. This position it could not have attained unless several centuries intervened between it and these writers. Therefore it must be presumed that the Manusmṛti had attained its present form at least before the 2nd century A. D. Even the Mahābhāṣya contains a verse which is Manu II. 120.[288] But as the verse occurs also in the Anuśāsana (104. 64-65) no chronological conclusion can be drawn therefrom. The Pratimānāṭaka (after V. 8) speaks of "mānavīya-dharmaśāstra' and 'Prācetasa śrāddhakalpa,' but as it is in controversy whether that work can be ascribed to the ancient Bhāsa, this reference will serve no useful purpose.

The next question is whether the Manusmṛti contains earlier and later strata. There can be no doubt on this point. On numerous points the Manusmṛti contains conflicting doctrines. In Manu III. 12-13 a Brāhmaṇa is allowed to have a *śūdra* woman as wife, while in III. 14-19 it is emphatically asserted that a śūdra woman cannot be the wife of a Brāhmaṇa and heavy disabilities are prescribed for him who breaks the injunction. In III. 23-26 there are contradictory statements about the appropriate forms of marriage for the several castes. In one breath Manu seems to permit *niyoga* (9. 59-63) and immediately afterwards he strongly reprobates it (9. 64-69). The lengthy discussion on flesh-eating in Manu V. 27-56 discloses different mentalities. At several places the work seems even to recommend flesh-eating in sacrifice, *śrāddhas* and *madhuparka* (V. 31-32, 35, 39, 41), while elsewhere it recommends total abstinence from meat on all occasions whatever (V. 48-50). In

one śloka (Manu II. 145) the father is said to be equal to a hundred ācāryas, while in the next verse the ācārya is said to be superior to the father. In V. 1 Bhṛgu is said to have sprung from fire, while in I. 35 he is said to be one of the ten sons of Manu Svāyaṁbhuva. Vide also IX. 32-56.

Bühler devotes considerable space to this question (S B E vol. 25. pp. LXVI-LXXIII). He arrives at the conclusion that the cosmological and philosophical portions in the first and 12th books, the philosophical disquisition in II. 89-100, the classifications of *pitaraḥ* in III. 193-201, the means of subsistence for Brāhmaṇa in IV. 1-24, verses 1-4 of the fifth book, the rules about mixed castes (X. 1-74) and the duties of castes that are repeated in X. 101-131 were put in when the work was versified from the Mānavadharmasūtra. Though one may not agree with all the details of Bühler's examination and with his theory about the versification of the Mānavadharmasūtra, it may be admitted that most of the passages pointed out by him have rather the flavour of comparative modernism about them. My own position is that the original Manusmṛti in verse had certain additions made in order to bring it in a line with the change in the general attitude of people on several points such as those of flesh-eating, *niyoga* &c. But all these additions must have been made long before the 3rd A. D., as the quotations from Bṛhaspati and others show.

Another problem is whether the Manusmṛti has undergone several recasts. This does not seem likely and the evidence adduced in support of the theory that the Manusmṛti suffered several recasts is quite inadequate for the purpose. The occurrence of several conflicting passages can as well be explained on the theory of a single recast and it has also to be borne in mind, as Bühler points out, that Sanskṛit writers down to the most recent times are in the habit of placing side by side conflicting opinions without actually preferring a particular view to others. The tradition of the Nāradasmṛti that the śāstra of Manu was successively abridged by Nārada, Mārkaṇḍeya and Sumati Bhārgava is, as has been observed above, not worth much, since it is merely intended to glorify Nārada's work. The other traditions given above either ignore Nārada altogether or assign him a secondary position. The present Manusmṛti is put into the mouth of Bhṛgu. Nārada's smṛti is clearly based upon Manu, though the former diverges from the latter on many points. Bṛhaspati

generally takes Manu as his text and amplifies the dicta of the Manusmṛti (as the verses quoted above in notes 281-86 show) and so his work may by analogy be regarded as a Vārtika on Manu, as Dr. Jolly puts it. Aṅgiras also looks upon Manusmṛti as most authoritative. It is therefore that the Pauranic account (note 270 above) regards Bhṛgu and other works as the redactions of the original Manusmṛti. The quotations cited from Vṛddha-Manu and Bṛhan-Manu do not establish that the original Manusmṛti underwent many recasts. Quotations cited under these names are later than the Manusmṛti. Viśvarūpa (on Yāj. I. 69) quotes the views of Vṛddha-Manu on *niyoga*, who allows it only to śūdras. The Mitākṣarā quotes a verse from Vṛddha-Manu about the widow of a sonless man being entitled to all her husband's wealth, while Manu is silent on that point.[289] The Mitākṣarā quotes a verse from Bṛhan-Manu also (on Yāj. III. 20). Mādhave quotes a verse from Bṛhan-Manu about *sapiṇḍa* and samānodaka relationship which are expansions of Manu[290] (V. 60). The fact that many quotations ascribed to Manu in several works are not found in the extant Manusmṛti is explicable in several ways and not only by the theory of several recasts. For one thing the authors quoting from memory may be found tripping. For example, in an inscription of the Badami Cālukyas of the 7th century two verses that occur in most grants of lands are ascribed to Manu, but are not found in the extant Manusmṛti.[291] No one can for a moment doubt that the extant Manusmṛti was an authoritative work in the 7th century. Therefore there is hardly any reliable evidence to support the theory that the Manusmṛti suffered several recasts.

Turning now to the internal evidence, the extant Manusmṛti seems to be much older than Yājñavalkya, since the rules of judicial procedure are incomplete and awkward in Manu as compared with Yāj., since there is no reference to documents as evidence in Manu,

as ordeals are not treated of in Manu, as legal definitions are almost absent in Manu, while frequent in Yāj. and as Manu is silent about the widow's rights, while Yāj. gives her the first place among the heirs of a sonless man. So the Manusmṛti will have to be placed some centuries earlier than the third century A. D., the latest date to which the Yājñavalkya smṛti can be assigned with any show of reason. In X. 44 Manu mentions the Yavanas, Kāmbojas, Śakas, Pahlavas and Cīnas[292] and in X. 48 Medas and Āndhras. This shows that the extant Manusmṛti could not be much earlier than the 3rd century B. C. The Yona, Kāmboja and Gāndhāra people are mentioned in the 5th rock edict of Aśoka. Manu forbids Brāhmaṇas to dwell in the kingdom of a Śūdra (IV. 61) and condemns the appointment of a śūdra as a judge (VIII. 20-21). The former is possibly a reference to the Mauryas, though one cannot be certain of it. Mr. Jayasval (Calcutta Weekly Notes, vol. 15, p. CCC) goes too far in supposing that in the word ' senāpatya ' occurring in Manu (XII. 100) there is a reference to Senāpati Puṣyamitra. The extant Manusmṛti in its arrangement and doctrines is much in advance of the ancient dharmasūtras, such as those of Gautama, Baudhāyana and Āpastamba. Taking all these things into consideration Bühler (S B E vol. 25 p. CXVII) was certainly right in saying that the extant Manusmṛti was composed between the second century B. C and 2nd century A. D. But the question of the date when the original Manusmṛti to which additions were made between the 2nd century B. C. and 2nd century A. D. was composed presents very great difficulties. That question is largely bound up with the relation of the Mahābhārata to the Manusmṛti.

This question is an extremely intricate one. The late V. N. Mandlik (Intro. to the Vyavahāramayūkha XLVII) held that the Manusmṛti borrowed from the Mahābhārata. Bühler after an elaborate examination of the question (S B E vol 25, pp. LXXIV-XCVIII) came to the conclusion that it was indisputable that the 12th and 13th *parvans* of the Mahābhārata knew a Mānavadharma-śāstra which was closely connected with but not identical with the present Manusmṛti. Bühler expresses himself very cautiously and it seems to me that the great scholar was unduly prepossessed

[292] पौण्ड्रकाश्चोड्रद्रविडाः काम्बोजा यवनाः शकाः । पारदाः पह्लवाश्चीनाः किराता दरदाः खशाः ॥

in favour of the Mahābhārata as against the Manusmṛti. Bühler somewhat contradicts himself when he says that the author of the epic only knew the dharmasūtras (S B E vol. 25, p. XCVIII). Hopkins (Great Epic of India p. 21-22) seems inclined to hold that the 13th book which alone, according to him, recognises the śāstra declared by Manu, knew the present Manusmṛti, though the earlier books cannot be held to have known a śāstra of Manu even when they employ such expressions as " Manu said. " He thinks that there was a floating mass of verses containing philosophical and other lore attributed to the mythical Manu on which the earlier books of the Mahābhārata and the Manusmṛti both drew and that the matter that is common to both works was not borrowed from any systematic treatise. Bühler accepts this view with the slight modification that the floating mass of verses was not all attributed to Manu (S B E vol. 25 p. XC). Before giving my individual views on this vexed question as against the array of such eminent scholars as Bühler and Hopkins some facts must be clearly set forth. The Mahābhārata is nowhere mentioned by name in the Manusmṛti though the word " itihāsa " (in the plural) occurs in Manu (III. 232). The Manusmṛti mentions many historical and legendary personages, about most of whom the Mahābhārata contains similar stories. The following are the persons so mentioned in the Manusmṛti. Āṅgirasa (in II. 151-152, addressing his elders as ' putrakāh '), Agastya (V 22, in connection with sacrificing animals), Vena, Nahuṣa, Sudās Paijavana and Nimi (all in VII. 41, coming to grief through insolence), Pṛthu, Manu, Kubera and the son of Gādhi (VII. 42, benefiting by their good conduct), Vasiṣṭha (in VIII. 110, taking an oath before king Paijavana), Vatsa (in VIII. 116, undergoing fire ordeal), Akṣamā and Sāraṅgī (in IX. 23, though of low birth respectively were united to Vasiṣṭha and Mandapāla), Dakṣa (in IX. 128-129, gave his daughters to Dharma, Kāśyapa and Soma), Ajīgarta (in X, 105, who was ready to sacrifice his own son), Vāmadeva (in X, 106, desired dog's flesh to save his life), Bharadvāja (in X. 107. who accepted the gift of many cows), Viśvāmitra (in X. 108, who took from a cāṇḍāla's hand a dog's leg). Pṛthu is also mentioned (in IX. 44) as the husband of the earth and in IX. 314 Brāhmaṇas are credited with having made fire all-devourer, the ocean undrinkable and the waning (pthisical) moon to wax. Most of the names mentioned here go far back into Vedic antiquities.

For example, Vasiṣṭha's oath occurs in Ṛgveda (VII. 104. 15[293]) and the Bṛhaddevatā (VI. 32-34), Ajīgarta figures in the Aitareya-brāhmaṇa (VII. 16) and Āṅgirasa's story occurs in the Tāṇḍya-mahā-brāhmaṇa (13. 3. 24). Besides the Manusmṛti does not say that the stories are taken from the great epic. The Mahābhārata also was not the first to originate these stories but is only a storehouse and encyclopaedia of the numerous popular traditions that were current in ancient India. When our Manu (9. 227) says that gambling was seen to have produced in former ages deep-rooted enmities, it is unnecessary to suppose that there is a reference to the Mahābhārata, for from Vedic times the evil effects of gambling were known (vide Ṛgveda X. 34) and even the Mahābhārata contains the same verse (Udyoga 37. 19), though this fact was not noticed by Bühler. On the other hand there are numerous passages in the Mahābhārata scattered over almost all the *parvans*, where occur such expressions as, ' Manur-abravīd, ' ' the rājadharmas of Manu, ' ' the *śāstra* of Manu ' etc. Some of these passages agree with the extant Manusmṛti, while some do not. Besides there are hundreds of verses in the Mahābhārata that are identical with the verses of the Manusmṛti, though they are not expressly attributed to Manu. Dr. Bühler says that in the Vana, Śānti and Anuśāsana *parvans* alone he could identify either wholly or partly 260 verses with those of our Manu. What then is the conclusion ? *Prima facie* it should be, on account of all these abovementioned facts, against the Mahābhārata and in favour of the Manusmṛti being the earlier of the two. Hopkins at all events holds that the Anuśāsana-parva knew a Manusmṛti essentially the same as we have now. Bühler expresses himself more cautiously and says that the Śānti and Anuśāsana *parvans* knew a Mānava-dharmaśāstra closely connected with the extant one, though not identical. Both are agreed that the earlier books when they speak of Manu are either referring to the Mānava-dharmasūtra or to the floating mass of popular verses, but not to our Manu.

We must now closely examine the data. The Anuśāsana-parva distinctly speaks of 'a śāstra declared by Manu.'[294] In the Śāntiparva

[293] अया मुरीय यदि' यातुधानो अस्मि &c.

[294] मनुनाभिहितं शास्त्रं यच्चापि कुरुनन्दन । अनु. 47. 35.

are quoted two ślokas 'sung by Manu in his own dharmas,' one of which is identical with Manu[295] (9. 321). In another place the Śāntiparva speaks of the 'rājadharmas of Prācetasa Manu' and quotes two verses therefrom.[296] In the Droṇaparva (7. 1) 'Mānavī arthavidyā' is referred to (vide note 272 above) and in Vanaparva the rājadharmas as proclaimed by Manu are referred to (vide note 272 above). In another places, the words 'Manu Svāyaṁbhuva said' occur (e. g. Śānti 21. 12, Anuśāsana 114. 12, Vanaparva 180. 34-35, Ādiparva 73. 9, 120. 32-36, Udyoga 37. 1-6). In most cases the words 'Manu said occur' without the appellation 'Svāyaṁbhuva' or 'Prācetasa' (e. g. Śānti 78. 31, 88. 14-16, 121. 10-12, 152. 14, 152. 30, 266. 5; Anuśāsana 44. 18 and 23, 65. 1 and 3, 67. 19, 68. 31, 88. 4, 115. 52-53; Vanaparva 32. 39, Udyogaparva 40. 9-10, Ādiparva 41. 31, 74. 39). The words 'Manor-anuśāsanam' occur in a few cases as in Anuśāsana 61. 34-35. Hopkins says that the words 'the śāstra of Manu' occur only in the Anuśāsana-parva and so only that *parvan* knew the Manusmṛti, while in the other *parvans* we have the expression 'Manu said,' and therefore these other books did not know the Manusmṛti but are only referring to floating verses attributed to the mythical Manu. This, however, is not a reasonable conclusion. The words 'śāstra of Manu' occur only once even in the Anuśāsana, while in about ten places in the same *parvan* we come across only the words 'Manu said'. If the words 'Manu said' in the Anuśāsana indicate in the Anuśāsana a reference to the extant Manusmṛti, there is no cogent reason why the same words in other *parvans* should not be regarded as referring to the Manusmṛti. Besides in the Śāntiparva also we meet with the words 'Dharmas or rājadharmas of Manu' and in Ādiparva the word 'dharma-darśane' (120. 32). That is obviously a reference to some work of Manu. Hopkins further says (Great Epic of India, p. 21) that all the

express citations of Manu in the Anuśāsana, except one, agree very closely with our Manu, while in the other *parvans* the citations agree only up to one-third or one-half. In the first place I demur to the latter statement. The agreements of the citations in the other books are as close and almost as frequent as in the Anuśāsana, e. g. excepting Śānti 21. 12 and 57. 43-45 all citations of Manu therein, referred to above, agree closely with Manu 7. 89, 9. 225-26, 9. 17-19 and 27, 6. 33 and 81, 11. 259-60, 5. 43 and 45 and 48-49. The same is the case with the few citations of Manu in the Vanaparva. Bühler says that the Mahābhārata knew only of the dharmasūtras. But there is positively not one express citation attributed by name to the well-known writers of dharmasūtras, such as Gautama, Baudhāyana, Āpastamba, Vasiṣṭha or Śaṅkha-Likhita. That the Mahābhārata knew several dharmaśāstras is clear from over a dozen references to dharmaśāstras, often in the plural (e. g. Śānti 167. 4, 298. 40, 341. 74 ; Anuśāsana 19. 89, 45. 17-20, Vanaparva 207. 83, 293. 35, 313. 105 ; Ādiparva 3. 32 and 77 etc.). The only place where a sūtrakāra is cited on matters of *dharma* is Anu. 19. 6 ; but no name is mentioned.[297] Hastisūtra, Aśvasūtra are mentioned in Sabhā 5. 20, but no dharmasūtra or Nītisūtra occurs any where. On the other hand Bühler is not prepared to admit that the views expressly attributed to Manu in the Mahābhārata are taken from a treatise and refers them to a floating mass of verses the authorship of which was unknown and was fathered upon the mythical Manu. Distrust of ancient Indian authors could go no further. Bühler's assumptions are, to say the least, gratuitous and are prompted by his unwillingness to assign an early date to a versified smṛti of Manu. Not only are there identical verses in Manu and the Mahābhārata, but some verses of the latter (e.g. Udyoga 35. 31 and Śānti 111. 66) occur in the Nāradasmṛti (pp. 103 and 26 respectively). In my humble opinion the following seems to be the relation of the Mahābhārata and the Manusmṛti. I must state frankly that it is a mere theory, a conjecture which may be taken for what it is worth. Long before the 4th century B. C., there was a work on Dharmaśāstra composed by or attributed to Svāyaṁbhuva Manu. This work was most probably in verse. There was also another work on Rājadharma attributed to Prācetasa Manu, which also was prior to the

निरिन्द्रिया ह्यमन्त्राश्च स्त्रियोनृतमिति स्थितिः ।

4th century B. C. It is not unlikely that instead of there being two works there was one comprehensive work embodying rules on *dharma* as well as politics. There is one circumstance that points in this direction. The Mahābhārata quotes a saying (vacana) of Prācetasa which is almost the same as our Manu[298] (3. 54). It is to these works (or work) that Yāska, Gautama, Baudhāyana, and Kauṭilya refer whenever they cite the opinions of Manu or the Mānavas. The Mahābhārata also (particularly in the earlier portions) probably refers to the same. This work was the original kernel of the present Manusmṛti. Then between 2nd century B. C. and 2nd century A. D. the Manusmṛti was finally recast, probably by Bhṛgu. That work must have compressed the older works in some cases and expanded it in others. This hypothesis would explain why some of the verses and views quoted as Manu's occur in the extant Manusmṛti and why some do not.[299] In my opinion the extant Mahābhārata is later than the extant Manusmṛti. When Nārada mentions the tradition that Sumati Bhārgava compressed the vast work of Manu into 4000 verses, he is somewhat obscurely hinting at the truth. The extant Manusmṛti contains only about 2700 verses. Nārada probably arrives at the larger figure by including the verses attributed to Vṛddha-Manu and Bṛhan-Manu. The influence of the Manusmṛti spread even beyond the confines of India. In A. Bergaigne's 'Inscriptions Sanscrites de Campā et du Cambodge' (p. 423) we have an inscription in which occur verses,[299a] one of which is identical with Manu (II. 136) and the other is a summary of Manu (III. 77-80).

299 It is to be noted that so early a writer as शान्तरक्षित in his तत्त्वसंग्रह (कारिका 3584, G. O. S.) expressly attributes the verse (पुराणं मानवो धर्मः साङ्गो वेदश्चिकित्सितम् । आज्ञासिद्धानि चत्वारि न हन्तव्यानि हेतुभिः) to मनु which was not commented upon by मेधातिथि and later commentators. शान्तरक्षित flourished about 750 A. D. i. e. a century earlier than मेधातिथि.

The Burmese are governed in modern times by the *dhammathats* which are based on Manu. Vide Dr. Forchhammer's essay on the sources and development of Burmese Law (1885, Rangoon). Dr. E. C. G. Jonker (Leyden 1885) wrote a dissertation on an old Javanese lawbook compared with Indian sources of law like the Manusmṛti (which is still used as a lawbook in the island of Bali).

Manu had numerous commentators. As to Medhātithi, Govindarāja and Kullūka, vide below sections 63, 76, 88. Besides these Nārāyaṇa, Rāghavānanda, Nandana and Rāmacandra also wrote commentaries on Manu. Mr. Mandlik published all these commentaries. Dr. Jolly published (in 1885 for Bengal Asiatic Society) extracts from all these commentaries (except Kullūka's and Rāmacandra's) and from an anonymous Kashmirian commentary on the first three chapters. Asahāya seems to have written a commentary on Manu (vide below section 58). The Vivādaratnākara quotes a commentary on Manu by Udayakara (pp. 455, 560, 583, 590). The same work seems to suggest that Bhāguri wrote a commentary on Manu.[300] For the predecessors of Medhātithi vide sec. 63. Kullūka on Manu 8. 184 tells us that Bhojadeva arranged the four verses of Manu 8. 181-184 in a particular manner and therefore suggests that Bhojadeva probably commented on Manu. He also names a commentator Dharaṇīdhara on Manu 2. 83 and says that he was later than Medhātithi. He is also referred to elsewhere by Kullūka (on Manu 4. 50).

The commentator Nārāyaṇa is certainly earlier than 1600 A. D. as his commentary is cited by Bhaṭṭoji in his commentary on the Caturviṁśatimata (vide p. 61 of the Benares Sanskrit Series edition, 1907). A ms. of Nārāyaṇa's commentary was written in 1497 A. D. and he appears to have been quoted by Rāyamukuṭa in 1431 A. D. (Jolly in R. und. S. p. 31). He is later than Govindarāja and flourished between 1100 and 1300 A. D. Rāghavānanda mentions by name Medhātithi, Govindarāja, Nārāyaṇa, and Kullūka and so is later than about 1400 A. D. When Nandana flourished it is difficult to say. But he is a late writer. There are several other commentators.

300 On मनु 8. 198 the विवादरत्नाकर (p. 104) remarks कल्पतरुकारस्तु अपसरत्यनेन स्वामिनः सकाशादुनामिति प्रतिग्रहादिर्धनोपायः अपसरः स न विद्यते यस्य तथा। एतच्च भागुरिमेधातिथिवृत्तिकाराणामनुमतमित्याह।

mentioned in the catalogues of mss. who may be passed over for want of space.

Viśvarūpa (on Yāj. I. 69), the Mitākṣarā, the Smṛticandrikā, the Parāśaramādhavīya and other works quote dozens of verses from Vṛddha-Manu on *āhnika*, *vyavahāra*, and *prāyaścitta*. The Mitākṣarā (on Yāj. III. 20) and other works cite a few verses from Bṛhan-Manu. No independent works going under these names have yet been unearthed. Those works, if they ever existed independently, appear to have been later than our Manu. For example, our Manu is silent about the widow's right to inherit to her husband, but Vṛddha-Manu recognises the right of a chaste widow to take the entire wealth of her husband (Mit. on Yāj. II. 136); similarly Bṛhan-Manu (according to the Mit.) seems to refer to Manu's view about the meaning of 'samānodaka' (Manu 5. 60) and modifies it. It is not unlikely that those verses which were not recognised as Manu's by ancient commentators like Medhātithi and were yet found in the mss. of the Manusmṛti were regarded as Vṛddha- or Bṛhan-Manu.

32. The Two Epics

The two epics, particularly the Mahābhārata, contain in numerous places passages bearing on dharmaśāstra and are relied upon as authoritative Smṛtis in later works. The Mahābhārata is styled a dharmaśāstra in the Ādiparva (2. 83).

The Rāmāyaṇa is pre-eminently a kāvya; yet on account of its noble ideals it was almost as popular as the Mahābhārata and is relied upon as a source of *dharma* in the *nibandhas* though much less frequently than the other great epic. The Ayodhyā-kāṇḍa (canto 100) and the Āraṇya-kāṇḍa (33) contain disquisitions on politics and state administration. The Smṛticandrikā (I. p. 57) quotes the well-known verse of the Rāmāyaṇa (Sundara 59. 31) about cessation of study on the first day of a month.[301] The Smṛticandrikā (I. p. 193 and III. p. 416) quotes two verses on *tarpaṇa* and *śrāddha* from the Rāmāyaṇa.[302] The Hāralatā (pp. 64 and 152) quotes

301 सा प्रकृत्येव तन्वङ्गी तद्वियोगाच्च कर्शिता । प्रतिपत्पाठशीलस्य विद्येव तनुतां गता ॥

302 पादशौचमनभ्यङ्गं तिलहीनं च तर्पणम् । सर्वं तत्र जले तुभ्यं यच्च श्राद्धमदक्षिणम् ॥
इक्ष्वदैर्वदरैर्बिल्वै रामस्तर्पयते पितॄन् । यदन्नः पुरुषो भवति तदन्नास्तस्य देवताः ॥
The second verse is almost the same as Ayodhyā 103. 30 and Ayodhyā 104. 15 calls it लौकिकी श्रुति.

verses from the Rāmāyaṇa. Aparārka on Yāj. III. 8-10 quotes four verses from the Rāmāyaṇa on sorrow for the dead.

For considerations of space it is impossible to enter into any discussion as to the age of these two epics, as to the earlier and later strata in them and other allied questions. These questions are passed over here as more appropriate to separate treatises on the epics. The following works will give some idea of the problems connected with these two great heirlooms of Indian antiquity :— Das Mahābhārata seine Entstehung, sein Inhalt, seine Form, by Oldenberg (Göttingen, 1922); Das Mahābhārāta als Epos und Rechtsbuch, by Dahlmann (Berlin 1895); Zur Geschichte und Kritik des Mahābhārata by Holtzmann (Kiel, 1892-94); Mahābhārata, a criticism by Mr. C. V. Vaidya (1903); das Rāmāyaṇa, Geschichte und Inhalt, by Dr. Jacobi (Bonn 1893); The Riddle of the Rāmāyaṇa by Mr. C. V. Vaidya (1906, Bombay).

In these pages the Bombay oblong edition of the Mahābhārata with the com. of Nīlakaṇṭha has been used.

In the following table an attempt is made, though not exhaustive, to indicate where dharmaśāstra topics occur in the Mahābhārata.

Abhiṣeka (coronation)—Śānti 40.

33. The Purāṇas.

The Purāṇas as a class of literature existed from very ancient times. Tai. Ār. (II. 10) speaks of "Brāhmaṇas, Itihāsas, Purāṇas, and Nārāśaṁsī gāthās."[303] In the Chāndogya Upaniṣad (VII. 1. 2 and 4) "itihāsa-purāṇa" is spoken of as the fifth Veda and the Bṛhadāraṇyaka (IV. 1. 2) speaks of "Itihāsa and Purāṇa." The Gautama Dh. S. (8. 6 and 11. 19) refers to "itihāsa" and "Purāṇa." It is not unlikely that there was originally a single work called Purāṇa. The words of the Matsya that in former ages there was a single Purāṇa probably embody a tradition that has a substratum[304] of truth. The Mahābhāṣya of Patañjali (vol. I. page 9.) speaks of Purāṇa in the singular. The Āp. Dh. S. quotes the views of a Purāṇa, twice cites two verses from a Purāṇa, and summarizes the view of a Bhaviṣyat-purāṇa.[305] The quotations show that the Purāṇa or

Purāṇas contained verses and were composed in a somewhat archaic language. The extant Purāṇas are recasts made of the ancient Purāṇas during the first centuries of the Christian era, when there was a revival and restatement of the ancient Brahmanical religion, philosophy and literature after the onslaughts of Buddhism and Jainism had abated in their strength and fury. The Mahābhārata (Vana. 191. 16) speaks of the Purāṇa promulgated by Vāyu (i. e. the Vāyupurāṇa). Bāṇa in his Harṣacarita refers to the recitation of the Vāyupurāṇa. Kumārilabhaṭṭa in his Tantravārtika (vide J. B. B. R. A. S. for 1925, p. 122) refers to the subjects dealt with by many of the extant purāṇas and quotes passages that occur in the Viṣṇu and Mārkaṇḍeya purāṇas. Thus it is clear that at any rate some of the extant purāṇas, if not all, are much earlier than the 6th century A. D.

The orthodox number of the principal purāṇas is 18 and there are 18 Upapurāṇas also. There is considerable divergence about the names of the 18 principal purāṇas. For example, the Matsya-purāna (chap. 53) enumerates them as follows :—Brāhma, Padma, Viṣṇu, Vāyu, Bhāgavata, Nāradīya, Mārkaṇḍeya, Āgneya, Bhaviṣya, Brahmavaivarta, Liṅga, Varāha, Skanda, Vāmana, Kūrma, Matsya, Garuḍa and Brahmāṇḍa. The Viṣṇu-purāṇa (3. 6) on the other hand omits Vāyu from the above list and adds Śaiva. The Sarasvatī-vilāsa (p. 14) follows the Viṣṇu-purāṇa. Vide Bhāgavata-purāṇa XII. 13. 4-8 and commentary thereon for the Purāṇas and Upa-purāṇas.

Among comparatively early commentators and writers of digests, it is Aparārka, Ballālasena and Hemādri that quote most profusely from the purāṇas as sources of dharma. We saw above (p. 146) that Kullūka describes passages of the Bhaviṣya-purāṇa as glosses on Manu. The Matsya-purāṇa is pre-eminently a work containing much dharmaśāstra material. For example, chapters 16-22 deal with śrāddha, chapters 55-57 and 59-82 with vratas, chap. 54, 83, 278 with gifts, chap. 93 with śāntis, chap. 102 with tīrthas. Similarly in chapters 216-243 the Matsya speaks of rājadharma. The Viṣṇupurāṇa (in III, chap. 8-16) contains a good deal of information on the duties of the varṇas and āśramas, nitya and naimittika acts, good manners for a house-older, the five great yajñas, Jātakarma and other saṁskāras, impu-on death, śrāddha &c. Viṣṇudharmottara (Veṅkaṭeśvara Press) 2nd khaṇḍa contains several chapters dealing with matters of

dharma, e. g. chap. 24 gives the qualifications of state officers, chap. 65-72 speak of rājadharma, expedients of policy, punishments, 73-74 deal with prāyaścittas, 75 with impurity on death and birth, 79 with purification of dravyas, 80-81 with the four varṇas and mixed castes, 60 with various purely legal matters. The Agni-purāṇa also in chapters 220-225, 227, 233-242 contains a disquisition on rājadharma. Almost the whole of the vyavahāra section in the Yājñavalkyasmṛti occurs in chapters 253-258 of the Agnipurāṇa (Ānandāśrama edition) and many verses in chap. 253 are identical with verses of the Nārada-smṛti. The Garuḍapurāṇa (chap. 93-106) contains about 400 verses that are taken from the first and third sections of Yājñavalkya though not in the same order.

The chronology of the purāṇas is, like that of the epics, a subject full of perplexing problems and is hence passed over here.

The annexed table will give an idea as to what topics of dharmaśāstra are dealt with in the principal purāṇas.

The constitution of the original text of the purāṇas is a Herculean task which has not yet been attempted. Not only is there difference of opinion among the purāṇas about the names of the 18 Mahā-Purāṇas, but there is divergence as regards the extent of the several purāṇas. For example, the commentator Viṣṇucitta of the Viṣṇu-purāṇa says (on III. 6. 20-22) that the extent of the Viṣṇupurāṇa is variously given at 8000, 9000, 10000, 22000, 24000, but that he comments on a text of 6000 ślokas only. The Agnipurāṇa (272. 10-11) says that it contains 12000 ślokas, while the Bhāgavata (XII. 13), the Brahmavaivarta, the Padma (ādi. 62) say that it contains 15400 ślokas and the Skanda (V. 3) and the Matsya 53 give the extent of the Agni as 16000. The Kūrma, according to the Bhāgavata contains 17000, according to the Matsya 18000 and only 8000 according to the Agni (272. 19). Though there is a remarkable continuity in India as to religious thoughts and practices, yet the popular religion of modern Hindus is pre-eminently paurāṇic. The purāṇas contain thousands of ślokas on dharmaśāstra matters, they are a rich mine awaiting exploration by careful students of social and religious questions and shed a flood of light on the development of religious beliefs and practices in medieval and modern India. Therefore the re-constitution of the text of the purāṇas is a problem which will have to be tackled in the near future. Besides the several

पुनः सर्ग

purāṇas, eighteen Upapurāṇas also are enumerated in some of the Purāṇas. Vide Garuḍa (223. 17 ff), Skanda (V. 3. chap. I. 45-62 and VII. I. chap. 2), Padma (Pātāla-khaṇḍa chap. 111. 95-98) and Matsya (53. 59 ff) for Upapurāṇas.[305a] Besides the Mahāpurāṇas and Upapurāṇas, there are other works of the purāṇa class such as Gaṇeśa, Maudgala, Devī, Kalki &c. The Padmapurāṇa (Uttara-khaṇḍa chap. 263) divides the 18 purāṇas into three groups, *sāttvika*, *rājasa* and *tāmasa*, and says that the Viṣṇu, Nāradīya, Bhāgavata, Garuḍa, Padma, and Varāha are *sāttvika*. The Matsya (53) also speaks of this division. The Liṅgapurāṇa (39. 63-66) speaks of the twenty expounders of dharma just as Yājñavalkya does and quotes the two verses in the form in which the Mit. presents them (and not Viśvarūpa), while the Padma (Uttarakhaṇḍa 263. 86-89) divides the eighteen smṛtis into three groups of *sāttvika*, *rājasa* and *tāmasa*.[305b] It would be quite clear to any reader of the purāṇas and the smṛtis that most of the former in their extant form are later than the smṛtis of Manu, Yājñavalkya, Parāśara, Nārada &c.

The following table will give some idea as to how the eighteen principal purāṇas are rich in dharmaśāstra material. Besides the eighteen principal purāṇas, the Kālikā-purāṇa (Veṅkaṭeśvara press ed.) and the Saura-purāṇa (Ānandāśrama ed.) have been drawn upon. The Ānandāśrama edition of the Agni and Padma, the Nirṇayasāgara edition (1905) of the Bhāgavata, the Poona edition (1870 Jagaddhitecchu Press) of the Matsya have been referred to here and the Veṅkateśvara editions of all the other purāṇas.

34. The Yājñavalkyasmṛti

This Smṛti has been published dozens of times. In the following the Nirṇayasāgara edition edited by Śāstri Moghe (1892 A. D.) has been used and the Trivandrum edition when speaking of Viśvarūpa.

The name of Yājñavalkya is one of the most illustrious among Vedic sages. He is credited with having promulgated the White Yajurveda. In the Śāntiparva (chap. 312) we are told that there was a rupture between Vaiśampāyana and his pupil Yājñavalkya and that by worshipping the Sun the latter received the revelation of the White Yajurveda, the Śatapatha &c. The accounts in the Viṣṇu (3. 5), the Bhāgavata (XII. 6. 61–74) and other purāṇas differ somewhat from the one in the Mahābhārata, but all agree on the fact of the strained relations between Yājñavalkya and his teacher. The Śatapatha Brāhmaṇa in several places alludes to the dialogues of Yājñavalkya and king Janaka of Videha on agnihotra (S. B. E. vol. 44 p. 46). Vide Śatapatha (ed. by Weber) XI. 6. 2. At the end of the Śatapatha we are told that Vājasaneya Yājñavalkya promulgated the bright Yajus formulæ from the Sun.[306] In the Bṛhadāraṇyaka Upaniṣad Yājñavalkya appears as a great philosopher teaching the recondite doctrines of Brahma and immortality to one of his two wives, the philosophically minded Maitreyī (II. 4 and IV. 5). In the same Upaniṣad Yājñavalkya is represented as carrying away the one thousand cows set apart by Janaka for the most learned Brāhmaṇa (III. 1. 1-2) and Yājñavalkya is said to have imparted to Janaka the knowledge of the destiny of the soul after it is released from the bonds of flesh and worldly affections. Kātyāyana in his Vārtika on Pāṇini (IV. 3. 105)[307] speaks of the Brāhmaṇas of Yājñavalkya and very heated controversies have raged round the correct interpretation of the Vārtika and the Mahābhāṣya thereon (*vide* Max Müller's Ancient Sanskrit Literature p. 360, Goldstücker's Pāṇini, p. 132 ff and S. B. E. vol. 12 pp. xxxv-xxxviii). It is to be noted that in the Yājñavalkyasmṛti itself[308] (III. 110) the

author, whoever he may be, claims the authorship of the Āraṇyaka that he received from the Sun and the Yogaśāstra composed by him. This is simply put in to glorify the Yājñavalkya-smṛti as the work of a great and ancient sage, philosopher and yogin. From the style and the doctrines of the smṛti it is impossible to believe that it was the work of the same hand that gave to the world the Upaniṣad containing the boldest philosophical speculation couched in the simplest yet the most effective language. Even orthodox Indian opinion was not prepared to admit the unity of authorship in the case of the smṛti and the Āraṇyaka. The Mitākṣarā says at the beginning that a certain pupil of Yāj. abridged the dharmaśāstra in the form of a dialogue.[309] It will be shown later on that, though the sage who promulgated the Āraṇyaka and the author of the smṛti cannot be identical, yet the Yājñavalkya-smṛti is much more closely connected with the White Yajurveda and the literature particularly belonging to it than with any other Veda.

The Yājñavalkyasmṛti contains (in the Nirṇayasāgara ed. of 1892) 1010 verses, while the Trivandrum edition with the commentary of Viśvarūpa contains 1003 verses and Aparārka gives 1006 (Ānandāśrama edition). The difference in the number is mostly due to the fact that Viśvarūpa in the first section on ācāra omits five verses that occur in the Mitākṣarā.[310] As regards one of them (the verse 'rathyākardamatoyāni' I. 197 according to the Mit.) Viśvarūpa notices it and says that some read it after the verse "mukhajā vipruṣā" and that it adds nothing to what precedes. Aparārka explains that verse. In the second section on vyavahāra Viśvarūpa reads verses[311] which do not exist in the Mitākṣarā nor in Aparārka. On the other hand Viśvarūpa seems to doubt the authenticity of the well-known verse on re-union and reads it also

310 Viz. the verses आज्ञासंपादिनीं (1. 76), रथ्याकर्दमतोयानि (I. 197), यावद्वत्सस्य पादौ (1. 207), two half verses तथाच्छादनदानं च (I. 232) and अपहृता इति तिलान् (I. 234), दृष्ट्वन्नं (I. 289).

311 For example, the verse आगमेन विशुद्धेन भोगो याति प्रमाणताम् । अविशुद्धागमो भोगः प्रामाण्यं नाधिगच्छति । (Tri. ed. II. 29) and कुलानि जातयः श्रेण्यो गणान् जनपदानपि । स्वधर्माच्चालितान् राजा विनीय स्थापयेत्पथि ॥ (Tri. ed. II. 24) do not occur in the Mit. The first is नारद (ऋणादान 85) and also occurs in the अग्निपुराण 253. 56-57.

differently[312] (anyodaryasya saṁsṛṣṭī). Not only this but in some cases the arrangement of verses is not the same in both Viśvārūpa and the Mit. For example, verses 14-29 of the prāyaścitta section present very different sequences in both. What is verse 29 in the Trivandrum edition is verse 19 in the Mit. Besides the Mit. reads one verse (III. 23 ā dantajanmanaḥ &c.) which is wanting in Viśvarūpa and is also not commented upon by Aparārka. Viśvarūpa adds two half verses,[313] which do not occur in the Mit. and Aparārka. There is further a good deal of variance in the readings adopted by Viśvarūpa and the Mit., though the meaning is not often affected. For example, the two verses enumerating the names of writers on dharma are differently worded in both.[314] But Medhātithi favours the reading of Viśvarūpa.[315] Viśvarūpa reads "asvattaṁ lokavidviṣṭam" (I. 155) and notices a reading "asvantam", while the Mit. reads "asvargyam loka·&c.". Both the Mit. and Aparārka read "pitā pitāmaho bhrātā &c." (I. 63), while Viśvarūpa reads "pitā mātāmaho bhrātā", remarks that "mātāmaha" is put in earlier as a guardian for marriage for metrical reasons and then notices "pitā pitāmaho bhrātā" as a various reading. Even in the days of Viśvarūpa there were various readings in Yāj. (*Vide* com. on I. 1, 2, 51, II. 119, 179 etc.).

The Agnipurāṇa affords an excellent check for the consideration of the text of the Yājñavalkyasmṛti. A good-sized monograph will be required to deal exhaustively with the questions raised by the comparison of the vyavahāra portion of the Agnipurāṇa with Yājñavalkya's vyavahāra-kāṇḍa. I shall only briefly examine the materials and state the conclusions at which I have arrived. We know that Viśvarūpa, the first extant commentator of Yāj., flourished about 800-825 A. D. The author of the Mitākṣarā flourished about 250 years later. Interesting results follow by a comparison of the text that these two commentators had before them with the

Agnipurāṇa. I shall select chap. 256 of the Agnipurāṇa for a detailed examination. It contains 36 verses which all occur in Yāj. II. (verses 118-153 of Tri. ed. and verses 114-149 of the Mit.). It is found that the Agnipurāṇa agrees with the text of 12 verses word for word as contained in Viśvarūpa and 19 verses as contained in the Mit. Viśvarūpa puts three verses between the two verses 'pitṛdravyāvināśena &c' and 'kramādabhyāgataṁ dravyaṁ', while the Mit. brings the two verses together. Agnipurāṇa agrees with Viś. In several cases the readings of the Agnipurāṇa agree with Viśvarūpa's text and not with that of the Mit. For example, Agni. reads 'kāryāḥ patnyaḥ samāṁśikāḥ' with Viś. (119), reads 'bhūryā . . . dravyam-eva vā . . . putrasya cobhayoḥ' with Viś. (124), reads 'pitṛdravyāvināśena' (and not 'ºvyāvirodhena' as Mit. does) with Viś. (122), reads 'dadyāt-cāpaharec-cāṁśaṁ' with Viś. (142 b), reads 'patitas-tatsutaḥ klībaḥ' with Viś. (144 a), reads 'aprajāyāmatītāyām' with Viś. (148). The Agnipurāṇa however in a far larger number of cases agrees with the readings of the Mit. Agni (256. 8) reads with the Mit. (122) 'vibhakteṣu suto jātaḥ savarṇāyāṁ vibhāgabhāk,' Agni. (256. 10) reads 'mātāpyaṁśaṁ samaṁ haret' with the Mit. (123), while Viś. (127) reads 'mātāpyaṁśaṁ samāpnuyāt.' Viśvarūpa's reading leaves it undecided as to what the share of the mother is to be, while the Mit. makes it definite by stating that it is equal (to that of a son). Agni (256. 12) reads 'catustri-dvyeka-bhāgāḥ syuḥ' and 'vidjāstu dvyekabhāginaḥ' with the Mit. (125); Agni. (256. 21) reads '-rdhabhāgikaṁ' with the Mit. (134). Agni. (256. 27) reads 'andho'cikitsyarogādyā' with the Mit. (140), while Viś. (144) reads 'rogī ca.' The reading of the Mit. makes provision by the word 'ādya' for other persons like deaf-mutes mentioned in other smṛtis as not entitled to inherit, while Viś. has to put a forced interpretation on 'ca' as including such persons. The Agni (256.33) reads 'vyayaṁ dadyāc-ca sodayam' with the Mit. (146), while Viś. (150) reads 'dāpyaś-ca sodayam'. Agni (256. 36) reads 'vibhāgabhāvanā jñeyā gṛha-kṣetraiś-ca yautakaiḥ' with the Mit. (149), while Viś. (153) reads 'ºbhāvanādeyagṛha-kṣetrakayautakaiḥ'. Here the former reading is easy and gives a complete sentence. With Viś. we have to separate 'ºbhāvanā' and 'ādeya &c.'. Besides no predicate (like jñeyā or kāryā) is expressly mentioned in the verse if we take the reading of Viś. and the 'ka' in 'kṣetraka' is a redundancy. We find that the tendency of the readings of the Mit. is to smooth down

harsh or involved constructions and that the Agnipurāṇa presents most of the changes in the text found in the Mit. but not found in Viś. In the same direction points the fact that Agni (256. 35) reads 'na dattaṁ strīdhanaṁ yasyai' with the Mit. (148) and not 'yasyā' as Viś. (152) does, as 'yasyai' is grammatically more regular than 'yasyāḥ' with the form 'dattaṁ'. But as against this we may note that both Viś. and Agni read 'aprajāyāmatītāyām', while the Mit. reads 'atītāyāmaprajasi'. The reading 'aprajasi' is correct according to Pāṇini (V. 4. 122) and not 'aprajāyām'. Therefore the conclusion that follows is that the text of Yāj. preserved in the Agnipurāṇa is intermediate between the text of Viśvarūpa and that of the Mitākṣarā. As Viśvarūpa flourished about 800-825 A. D., the Agnipurāṇa represents a text of Yājñavalkya current somewhat later i. e. about 900 A. D. In my 'History of Sanskrit Poetics' (pp. III-V) I established, from the fact that the extant Agnipurāṇa quotes Daṇḍin and Bhāmaha and knew the theory of *dhvani*, that it was composed about 900 A. D. That date is strikingly corroborated by the evidence derived from the chapters on vyavahāra discussed above. It is no doubt true that the Agni presents some readings that are found neither in Viś. nor in the Mit. For example, it reads (256. 4) 'tābhya ṛte 'rpayet', while both Viś. and Mit. read 'tābhya ṛte'nvyaḥ'. It is probable that this is an error of the copyists or the reading may be due to the difficulty of understanding the meaning of 'anvayaḥ' there. Agni reads (256. 5) 'svayam - arjayet' for 'svayam - arjitam' (of Viś. and Mit.), and 'jātopi dāsyāṁ śūdrasya' (256. 20) for '°śūdreṇa' (of Viś. and Mit.). A detailed examination of the other chapters on vyavāhara will yield the same results. But it cannot be undertaken here. A few examples may however be cited. Viś. (II. 167) reads 'pālo yeṣām ca te mocyā daiva- rājapariplutaḥ', Agni (257. 14) 'pālo yeṣām tu te mocyā daivarājapariplutāḥ', while Mit. (163) reads 'pālo yeṣām na te . . . tāḥ'. Similarly Viś. (II. 179) and Agni (257. 26) read 'svakuṭumbāvirodhena deyam' while the Mit. (175) reads 'svam kuṭumbāvirodhena'. Viś. (II. 203) reads 'galat - sabhikavṛddhistu', while both Agni (257. 49) and Mit. (199) read 'glahe śatikavṛddhestu', which certainly is an easier reading. Agni 258. 45 occurs in Mit. (255), but is wanting in Viśvarūpa. Yāj. II. 228 in Viś. becomes in the Mit. verse 263, Agni. following the order of Viśvarūpa.

The total number of verses on vyavahāra in Agnipurāṇa, chap. 253-258, is 315. Out of this the first 31 are not taken from Yāj. All of them except the first half verse and verse 31 (chap. 253) occur in Nārada. Of the remaining 284 verses, only 4½ (Agni 253. 35, 255. 43a, 255. 49b and 50, 258. 83) do not occur in Yāj. (in both Viś. and Mit.). There are also a few verses that occur in the Agnipurāṇa and in Viśvarūpa, but not in the Mit. and also a few verses that are common to the Mit. and Agni but are not found in Viś. The first three verses of Yāj. II are compressed by the Agnipurāṇa into 1½ verses.

The Garuḍapurāṇa affords, like the Agnipurāṇa, material help towards examining the authoritativeness of the text of the first and third sections of Yāj. The Agnipurāṇa does not expressly say that it drew upon Yāj., but the Garuḍapurāṇa is explicit on the point. In chap. 93. 1. it is expressly said that the *dharma* formerly promulgated by Yājñāvalkya is being narrated 'Yājñavalkyena yat (yaḥ ?) pūrvam dharmam (dharmaḥ ?) proktam (°taḥ ?) katham Hare | tan me kathaya keśighna yathā tattvena Mādhava ||'. Chapters 93-106 contain dharmaśāstra material more or less taken from the Yājñavalkysmṛti. There are 376 verses in these chapters. Considerations of space forbid any detailed examination of this material. A few salient facts only are brought out here. Chapters 93-102 deal with the several topics (prakaraṇas) of the first kāṇḍa in the same order, the only exception being the topic of rājadharma (I. 309-368), which is omitted in the Garuḍapurāṇa. Chapters 102-106 treat of topics that occur in the third kāṇḍa of Yāj. and contain 121 verses only. In these chapters the order of the prakaraṇas in Yāj. is not observed at all, but Garuḍa speaks of them in the following order, vānaprastha-prakaraṇa, yati, karmavipāka, prāyaścitta, āśauca and āpaddharma (the last two being the first two prakaraṇas in Yāj.). A feature which strikes one as regards the Garuḍapurāṇa (particularly chap. 102-106) is that a few verses only of Yāj. are repeated word for word, that very often the Garuḍapurāṇa gives only a summary by omitting and transposing the words and phrases of the original and that sometimes it adds verses of its own. This may be illustrated by what the Garuḍa says on vānaprastha and yati (chap. 102-103, 12 verses in all). Chap. 102 begins 'vānaprasthāśramaṁ vakṣye tac-chṛṇvantu maharṣayaḥ | putreṣu bhāryām nikṣipya vanaṁ gacchet sahaiva vā ||.' The latter

half is a paraphrase of Yāj. III. 45a. Then III. 45b-46 (Mit.)= Garuḍa 102. 2-3a (with slight variations), III. 47 = Garuḍa 102-4 b-5a; III. 48 = 3b-4a; III. 49-50 = Garuḍa 5b ('pakṣe māsetha vāśnīyād-dantolūkhaliko bhavet, which summarises and retains some words of the original), III. 71 = Garuḍa 102. 6a (cāndrāyaṇī svapedbhumau karma kuryāt phalādinā, which includes a few words of III. 49b also), III. 52 = Garuḍa 6b-7a (the last pāda in Garuḍa is 'yogābhyāsāt dinam nayet', while in Yāj. it is 'śaktyā vāpi tapaś caret'), III. 53 = Garuḍa 102. 7. Chap. 203 contains only five verses. III. 56, 58-59 = Garuḍa 103. 1b-4a (with variants) and then Garuḍa adds 1½ verses which are not found in Yāj. (viz. 'bhavet-paramahaṁso vā ekadaṇḍī yamāditaḥ ॥ siddhayogas-tyajan deham-amṛtatvam-ihāpnuyāt । dātātithipriyo jñānī gṛhī śrāddhepi mucyate ॥'). The mere fact that a prakaraṇa is omitted in the Garuḍapurāṇa should cast no doubt on the existence of that prakaraṇa in the original Yāj. We do not know on what principles the borrowing took place. Besides we find that such prakaraṇas as Vināyakaśānti and grahaśānti are included in the Garuḍa (chap. 100-101), while rājadharma-prakaraṇa is omitted. We know that 'rājadharma' figures in the sūtras and Manu, but none of the ancient dharmasūtras, nor the Manusmṛti speaks of Vināyaka. Hence conclusions must be drawn only from what positively occurs in the Garuḍapurāṇa and not from the absence of any topic in it. The Garuḍapurāṇa sometimes follows the arrangement and form of the verses presented in Viś., sometimes it agrees with the Mit. and sometimes it is independent. For example, the two verses enumerating the authors of dharmaśāstras (Yāj. 1. 4-5 = Garuḍa 93. 4-5) follow the readings of Viś., but not those of the Mit. In the 3rd kāṇḍa, verses 14-19 of the Mit. are differently arranged by Viś., and Viś. omits (as does Aparārka also) one verse found in the Mit. (III. 23) as said above, while the Mit. omits two half verses that are found in Viś. (vide note 313). The verse 'ā danta &c.' occurs in the Garuḍapurāṇa and the two half verses in Viś. omitted by the Mit. are also omitted in Garuḍa. So far the Gāruḍapurāṇa agrees with the arrangement preserved in the Mit. But it does not agree entirely with the Mit. The verse 'ādanta &c' is III. 23 in the Mit. and occurs before 'ahastvadatta°' but in the Garuḍa it occurs before 'trirātram daśarātram vā' (which is III. 18 in the Mit.). Besides verse 22 of the Mit. is read differently in the Garuḍa (daśa dvādaśa varṇā-

nām tathā pañcadaśaiva ca | trimśad dināni ca tathā bhavati preta-sūtakam). It must therefore be said that the Garuḍapurāṇa represents an intermediate stage of readings between Viś. and the Mit. As the Garuḍapurāṇa was a popular work read by and recited for the benefit of slightly educated or illiterate people, it often introduces changes to suit their understanding. For example, the Mit. (I. 296) reads (as also Viś.) 'sūryaḥ somo mahīputraḥ somaputro bṛhaspatiḥ ', while Garuḍa reads (chap. 101. 2) 'sūryaḥ somo *maṅgalaś* ca *budhaś* caiva bṛhaspatiḥ,' thus substituting the well-known words Maṅgala and Budha for mahīputra and somaputra. The verse 'kṛtāgnikāryo bhuñjīta' (I. 31 in the Mit.) is placed by Viś. after ' ekadeśam - upādhyāya,' while the Mit. places it three verses earlier. The Garuḍapurāṇa here agrees with the Mit. In some cases Garuḍa strikes an independent path. For example, in Yāj. I. 11 Viś. reads ' māse'to jātakarma ca,' the Mit. reads ' māsyete jātakarma ca ' while Garuḍa (chap. 93. 11) gives the easy reading 'prasave jātakarma ca'. Mit. reads (Yāj. I. 76 b) ' tyajan dāpyas-tṛtīyāṁśam--adravyo bharaṇaṁ striyāḥ '; Viś. omits the whole verse, while Garuḍa omits I. 76a (of Mit.) and reads the other half as ' śuddhām tyajaṁstṛtīyāṁśam dadyādābharaṇaṁ striyāḥ ' (95. 23b). Verses I. 91-92 of the Mit. on the offspring of mixed marriages are differently read by Viś. (I. 90-91), while the Garuḍa (96. 1b) has the same half verse as the Mit. I. 91a and the same half verse (96. 3a) as Viś. (91b) and reads the two half verses between them as ' jāto'mbaṣṭhastu śūdrāyāṁ niṣādaḥ parvatopi vā ॥ māhiṣyaḥ kṣatriyājjāto vaiśyāyāṁ mlecchasaṁjñitaḥ '.

The foregoing makes it clear that the text that the Garuḍapurāṇa had before it could not have been older than that commented upon by Viśvarūpa and that it represents a stage intermediate between Viś. and the Mit.

The above gives rise to an important question whether one can detect several strata in the Yājñavalkyasmṛti. From the fact that the sūtra of Śaṅkha-Likhita cites Yājñavalkya among the promulgators of dharmāśāstras (vide note 137), while Yāj. himself includes Śaṅkha-Likhita among the propounders of dharma (note 258), it may be plausibly said that Śaṅkha-Likhita refer to an earlier Yājñavalkyasmṛti than the extant one. Beyond this there is no evidence to establish that there was an earlier version of the present smṛti. A comparison of the readings of Viśvarūpa and the Mit.

with those in the Agni and Garuḍa purāṇas has established that the text of the smṛti no doubt underwent slight verbal changes between 800 and 1100 A. D. and that a few verses were added and also omitted during these centuries. But the text remained in the main the same from 700 A. D. What the original smṛti contained, whether it was in prose or verse or both and whether it dealt with only ācāra and prāyaścitta sections are questions on which conjectures may be advanced, but there are no substantial materials for arriving at even tolerably certain conclusions.

Yājñavalkya's work is more systematic than that of Manu. He divides the work into three sections and relegates all topics to their proper positions and avoids repetition. He treats of almost all subjects that we find in Manu, but his treatment is always concise and he makes very great and successful efforts at brevity. The result is that for the 2700 verses of Manu, he requires only a little over a thousand. He often compresses two verses of Manu into one, e. g. Manu II. 243, 247-248 are equal to Yāj. I. 49, Manu III, 46-48 and 50 are concisely put in one verse by Yāj. (I. 79); vide also Manu IV. 7-8 and Yāj. I. 128 (contain almost same words also), Manu IV. 84-85 and Yāj. I. 141. In a few cases Manu and Yāj. convey the same meaning in one verse without compression, *e. g.* Manu III. 70 and Yāj. I. 102, Manu III. 119 and Yāj. I. 110, Manu VII. 171 and Yāj. I. 348, Manu VII. 205 and Yāj. I. 349. The correspondence of Yājñavalkya's words with the text of Manu is in most cases very close, so much so that one cannot help feeling that Yāj. had the Manusmṛti before him and purposely made an attempt to abridge the somewhat loose expressions of Manu. The passages set forth above as examples of compression will also serve as illustrations of this fact. The word Kāya (from Ka) is used by both in the sense of 'prājāpatya form of marriage' (Manu III. 38 and Yāj. I. 60); vide also Manu II. 109 and Yāj. I. 28, Manu III. 43-44 and Yāj. I. 62, Manu V. 26-27 and Yāj. I. 178-179, Manu VII. 56 and Yāj. I. 312 for further close agreement in phraseology. Yāj. adds some subjects which have either no counterpart in our Manu or which are only noticed in passing by Manu. The Manusmṛti contains nothing corresponding to the Vināyakaśānti and Grahaśānti of Yāj. (I. 271-308). Yāj. gives a detailed treatment of five kinds of ordeals (II. 95-113), while Manu makes only a cursory reference to the ordeals of fire and water (VIII. 114). Yāj.

contains considerable anatomical and medical matter (III. 75-108), which is wanting in Manu. On the other hand there are some subjects on which Yāj. is silent though they are dealt with in detail by Manu. This is the case with the account of the origin of the world.

The whole of the Yājñavalkya-smṛti is written in the classical Anuṣṭubh metre. Though the author's great aim has been to be concise, his verses are hardly ever obscure. The style is flowing and direct. There are not many un-Pāṇinian expressions, though he employs 'pūjya' in I. 293 and 'dūṣya' in II. 296. In the latter case both Viśvarūpa and Aparārka avoid the fault by reading differently. The verse 'kulāni jātayaḥ śreṇyo' is ungrammatical (Tri. ed. II. 34), as 'jāti', and 'śreṇi' must be in the accusative case. According to the Mit. Yājñavalkya addressed his words to Sāmaśravas and other sages (vide com. on I. 1. 178 and 330-333). In this the Mit. is probably drawing upon the Bṛ. Up. (III. 1. 2) where Yāj. asks Sāmaśravas to take away the 1000 cows. The sages interpose (vide III. 118, 129) as in Manu, while the great teacher is passing in review one topic after another. The teacher himself addresses his auditors (as in I. 178 'śruṇudhvam').

It is said that the sages approached Yājñavalkya in Mithilā and requested him to impart to them the dharmas of the varṇas, āśramas and others. The contents of the work may be briefly summarised as follows :— Kāṇḍa I. fourteen *vidyās* ; twenty expounders of dharma, sources of dharma ; constitution of a *pariṣad*, the *saṁskāras* from Garbhādhāna to marriage, upanayana, its time and other details, every day duties of brahmacārī, persons fit to be taught, what things and actions a brahmacārī was to avoid, period of studenthood ; marriage, qualifications of girl to be married, limits of *sapiṇḍa* relationship, intercaste marriages ; the eight forms of marriage and the spiritual benefits therefrom, guardians for marriage, Kṣetraja son, grounds of supercession of wife, duties of wife ; principal and intermediate castes, duties of householder and keeping sacred domestic fire, the five great daily yajñas ; honouring a guest, madhuparka, grounds of precedence, rule of the road, privileges and duties of the four varṇas, ten principles of conduct common to all, means of subsistence of a householder, and solemn vedic sacrifices ; duties of *snātaka*, days of cessation from study ; rules

about prohibited and allowed food and drink; rules about flesh-eating; purifications of various materials, such as metal or wooden vessels; gifts, who is fittest to accept them, who should accept gifts, rewards of gifts, gift of cow, rewards of other gifts, highest gift is knowledge; śrāddha, proper time for it, proper persons to be invited at it, unfit persons, the number of Brāhmaṇas to be invited, procedure of śrāddha, various śrāddhas such as pārvaṇa, vṛddhi, ekoddiṣṭa; sapiṇḍīkaraṇa; what flesh to be offered at śrāddha, reward of offering śrāddhas; propitiatory ceremonies as regards Vināyaka and the nine grahas; rājadharma, king's qualifications, ministers, *purohita*, royal edicts, king's duties of protection, administration of justice, taxation and expenditure, allotment of the day to various duties, constitution of maṇḍala, the four expedients, the six guṇas, fate and human effort, impartiality in punishment; units of measure and weight, grades of fine; Kāṇḍa II. members of hall of justice, judge, definition of vyavahārapada, rules of procedure, plaint, reply, taking security, indicia of a false party or witness, conflict of dharmaśāstra and arthaśāstra; means of proof, documents, witnesses, possession; title and possession, gradation of courts, force, fraud, minority and other grounds of invalidity, finding of goods; treasure trove; debts, rates of interest, debts of joint family, what debts of father son need not pay; devolution of debts; suretyship of three kinds, pledge; deposit; witnesses, their qualifications and disqualifications; administering oaths, punishment for perjury; documents; ordeals of balance, water, fire, poison and holy water; partition, time of it, wife's share on partition, partition after father's death, property not liable to partition, joint ownership of father and son; twelve kinds of sons; illegitimate son of śūdra, succession to a sonless man, re-union, exclusion; husband's power over wife's *strīdhana*; boundary disputes; dispute between master and herdsman; sale without ownership; invalidity of gift, rescission of sale; breach of contract of service; slavery by force; violation of conventions; non-payment of wages; gambling and prize fighting; abuse, defamation and slander; assault, hurt etc.; sāhasa; partnership; theft; adultery; miscellaneous wrongs; review of judgment; Kāṇḍa III. cremation and burial; offering of water to various deceased persons; for whom no mourning was to be observed and no water to be offered; periods of mourning for various persons; rules for mourners; impurity on birth; instances of immediate purification on death or birth; means of purification, such as time, fire, ritual,

mud etc ; rules of conduct and livelihood in distress ; rules for forest hermit ; rules for a *yati* ; how the individual soul is clothed in a body ; various stages of the fœtus, number of bones in the body, the various organs such as liver, spleen etc. ; the number of arteries and veins ; reflection over ātman, use of music in the path of *mokṣa* ; how the originally pure ātman is born among impure surroundings ; how some sinners are born as various kinds of animals or inanimate things ; how *yogin* attains immortality ; three kinds of actions due to *sattva, rajas* and *tamas ;* means of *ātmajñāna* ; the two paths, one to immortality and the other to heaven ; the various diseases from which sinners suffer ; purpose of prāyaścittas ; names of 21 hells ; the five mortal sins, and other acts similar to them ; upapātakas ; prāyaścittas for Brāhmaṇa murder or for killing other persons ; prāyaścittas for drinking wine, for other mortal and venial sins and for killing animals of various sorts ; greater or lesser expiation according to time, place, age, ability ; ostracising the non-conformist sinner ; secret expiations ; ten *yamas* and *niyamas* ; Sāntapana, mahāsāntapana, taptakṛcchra, parāka, cāndrāyaṇa and other expiations ; rewards of reading this smṛti.

Besides the four vedas, Yāj. refers to the Vedāṅgas as six and enumerates fourteen vidyās (four Vedas, six aṅgas, purāṇa, nyāya, Mīmāṁsā, dharmaśāstra). He refers to the Āraṇyaka and Yogaśāstra composed by himself. Āraṇyakas in general are spoken of in I. 145 and Śukriya Āraṇyaka in III. 309. The Upaniṣads are mentioned in III. 189, where purāṇas are mentioned in the plural. Itihāsas, Purāṇa, Vākovākya, and Nārāśaṁsī gāthās are mentioned in I. 45 (also I. 101 for purāṇa and itihāsa). He enumerates at the commencement nineteen authors on *dharma* besides himself. But it is remarkable that in the body of the work not one individual author of a dharma-śāstra is mentioned by name. He speaks of Ānvīkṣikī (Metaphysics) and Daṇḍanīti (I. 311). He lays down the dictum that where dharmaśāstra and arthaśāstra conflict, the former shall prevail (II. 21). He speaks of smṛtis in general (II. 5 and I. 154). In III. 189 he speaks of sūtras and bhāṣyas. What works are intended it is most difficult to say ; the only extant bhāṣya which can be said with certainty to be older than the extant Yāj. smṛti is that of Patañjali. He refers to other writers on dharma in the word ' eke ' (I. 36). The view referred to there occurs in Baud. Dh. S. 1. 2. 4.

Yājñavalkya agrees very closely with the Viṣṇudharmasūtra. What conclusions are to be drawn therefrom has been discussed above (see sec. 10). Similarly there is close correspondence between the Kauṭilīya and Yāj. If there is any borrowing at all, it must follow from the date above assigned to the Kauṭilīya that it is Yāj. who borrows. There are numerous passages in Yāj. that show remarkable agreement with the text of Manu. But there are several points on which Yāj. differs from Manu and shows in general a more advanced state of thought and feeling than the Manusmṛti. The following are the principal points wherein Yāj. differs from Manu. Manu seems to allow a Brāhmaṇa to marry a śūdra girl (III. 13), while Yāj. emphatically states it as his opinion that this is wrong (I. 59); Manu first describes the practice of *niyoga* and then severely condemns it (9. 59-68), while Yāj. does not condemn it (I. 68-69). Manu enumerates eighteen vyavahārapadas; Yāj. does not expressly enumerate them in one place, though he defines vyavahārapada and adds verses of a miscellaneous character (prakīrṇaka) in his section on vyavahāra. Manu is silent about the rights of inheritance of the widow of a sonless man and gives only a vaguely expressed order of succession, while Yāj. places the widow at the head of all heirs and enumerates several classes of heirs in a regular order. Manu condemns gambling outright (9. 224-226), while Yāj. brought it under state control and made it a source of revenue to the king (II. 200-203). There are several other matters which Yāj. treats at much greater length and more systematically than Manu, e. g. ordeals (as indicated above), means of proof in courts (Manu altogether ignoring documentary evidence, though he knew documents 8. 51-52), rules of procedure in courts (compare Manu 8. 53-56 with Yāj. II. 5-11 and 16-21), the doctrine of possession and prescription (Yāj. II. 24-29 and Manu 9. 44 and 54). All these points tend to show that the Yājñavalkya smṛti is much later than the extant Manusmṛti.

The Yājñavalkya-smṛti seems to have taken the section on Vināyakaśānti from the Mānavagṛhya-sūtra (II. 14); verses 281-283 of Yāj. (I) occur in the Mānavagṛhya II. 14, but in a different order.[316] The Mānavagṛhya takes the Vināyakas to be four, while Yāj. says that there is a single Vināyaka, whose appellations are Mita. &c.

[316] अथातो विनायकान् व्याख्यास्यामः । शालकटङ्कटश्च कूष्माण्डराजपुत्रश्चोस्मितश्च (पुत्रश्च मितश्च ?) देवयजनश्चेति । मानवगृह्य II. 14. 1-2 ; विनायकः कर्मविघ्नसिद्ध्यर्थं विनियोजितः।

The details of information about Vināyaka in Yāj. (I. 272-276) appear to be versified from the prose[317] of the M. Gṛ. S. The details of worship also and the *mantra* (Yāj. I. 291) are taken from the same work (*vide* M. Gṛ. S. II. 14. 30 for the *mantra*). At one time the section on Vināyakaśānti was thought to be a sure indication of the late date of Yāj. But since the discovery of the Mānavagṛhya that position had to be given up. In the Baudhāyana-dharmasūtra (II. 5. 21) we have Vināyaka and his several appellations (in the *tarpaṇa*). Aparārka on Yāj. I. 275 quotes a long passage from the Baijavāpa gṛhya which bears a very close correspondence in phraseology to the passage from the M. Gṛ. S. quoted above and which gives the names of the four Vināyakas as Mita, Saṁmita, Śālakaṭaṅkaṭa and Kūṣmāṇḍa-rājaputra.

The Yājñavalkya-smṛti stands in a very intimate relation to the white Yajurveda and the literature that clusters round it. Most of the *mantras* quoted (in part) or referred to by Yāj. occur in the Ṛgveda as well as in the Vājasaneya-saṁhitā (e. g. in Yāj. I. 22, 24, 229, 230, 238, 239, 247). But there are a few *mantras* that do not occur in the Ṛgveda, but only in the Vājasaneya-saṁhitā or other saṁhitās (e. g. 'yavosi' in Yāj. I. 230, which is Vāj. S. 5. 26, 'ye samānā in Yāj. I. 254 which is Vaj. S. 19. 45, 'imam deva' and 'udbudhyasva' in Yāj. I. 300 which are Vaj. S. 9. 40 and 15. 54, 'annāt pariśrutaḥ' and 'kāṇḍāt' in Yāj. I. 301 which are Vāj. S. 19. 75 and 13. 20). Verses (Yāj. III. 191-197) are a paraphrase of certain passages of the Bṛhadāraṇyaka Upaniṣad, so much so that the very words of the latter are used throughout in the former, as the

quotations given below will show.[318] Then again Yāj. very closely agrees with the Pāraskaragṛhyasūtra as was pointed out by Dr. Stenzler in his introduction to the edition of Yāj. (1849, Berlin) and in the journal of the German Oriental Society (VII. 527). Viśvarūpa points out that Yāj. I. 142-143 are based upon Pāraskara. The *mantra* 'ayaṁ me vajraḥ' in Yāj. I. 135 (Trivandrum ed.) is given in Pāraskara-gṛhya II. 7. 7. In the following also there is close verbal correspondence[319] between Yāj. and the P. Gṛ. S; Yāj. III. 1-2 and P.Gṛ. S. III. 10. 1, 5, 8-9 and 12; Yāj. III. 3 and P. Gṛ. S. III. 10. 16 and 19-20; Yāj. III. 4 and P. Gṛ. S. III. 10. 46-47; Yāj. III. 16 and P. Gṛ. S. III. 10. 26-27. Similarly the verses of Yāj. on śrāddha (I. 217-270) offer many points of contact with the śrāddha-kalpa of Kātyāyana edited by Dr. Caland (pp. 127-130 of his work 'Ahnencult &c.' From these facts Dr. Jolly concludes that Yājñavalkya's work goes back to a dharmasūtra of the White Yajurveda (R. u. S. p. 21). In another place Dr. Jolly hazards another conjecture based on the close correspondence between Yāj. and the Viṣṇudharmasūtra that he probably belonged to the Kāṭhaka sohool of the Black Yajurveda (Journal of Indian History, 1924, p. 7). Yāj. also shows great similarity to the Kauṭilīya and borrows the Vināyaka-śānti from

the Mānavagṛhyasūtra. From these facts one may argue at least with as much logic and force as underlies Dr. Jolly's guess-work that Yāj. probably belonged to the Mānava school of the Black Yajurveda or to the school of Kauṭilya. If Yāj. knew his business as a writer on Dharmaśāstra, he must have consulted the works of his predecessors and his work is bound to show traces of that fact. One may conclude at the most that the author of the Yājñavalkya-smṛti may have possibly been a student of the White Yājurveda and so the *mantras* of the White Yājurveda and the Gṛhyasūtra of Pāraskara were far more familiar to him than the other Vedas, sūtras, smṛtis, and other works. No such conclusions that there was a dharmasūtra of the White Yajurveda and that the Yājñavalkyasmṛti was based thereon are warranted by the facts so far discovered.

For settling the date of Yāj. we need not consider the evidence after the 9th century. For in the first quarter of that century (as we shall see later on) Viśvarūpa wrote his extensive commentary on Yāj. That he was separated from Yāj. by many centuries follows from several considerations. Not only had numerous various readings arisen in the text of Yāj. when he wrote, but various interpretations of the same words and verses of Yāj. had arisen. For example, he gives several meanings of the words 'putronanyāśritadravyaḥ' (in Yāj. II. 47), 'sāmudrāḥ' (II. 41); he gives different interpretations of I. 265, II. 160, II. 173 &c. He refers to the interpretations of his predecessors in several places by the word 'anye' (I. 3, 25, 155, 169; II. 21, 119, 121; III. 201, 209, 246 &c.). In several places he appears to be referring to two other interpretations than his own (vide on III. 250, the words 'kecittu' and 'anye tu' and the same words on III. 261 and 264). That Viśvarūpa had before him actual commentaries on Yāj. and was not merely giving scholastic interpretations started by himself is made very clear in several cases by his actually citing certain portions from those works. On I. 252 Viśvarūpa says 'others take from somewhere the following śloka (then the śloka is quoted), but this śloka is of no help, as its origin is not known'.[321] Similar words occur in the

comment[322] on Yāj. III. 222. On II. 193 he styles some predecessor as 'paṇḍitaṁmanya' and on III. 257 he ridicules a predecessor who regards the verse of Manu IV. 222 as an arthavāda by saying that that commentator wanted to show off that he knew the technical term arthavāda.[323] It is not unlikely that Viśvarūpa in this last passage refers to some ancient commentator of Manu such as Asahāya. In the Prāyaścittamayūkha,[324] Nīlakaṇṭha (Benares edition of 1879) says that Śaṅkara in his Bhāṣya on Brahmasūtra (III. 4. 43) explained the application of Yāj. III. 226. Unfortunately in the printed editions of Śaṅkara I could not find this. But from the Bhāmatī where Yāj. III. 226 is explained, it is clear that the passage must have occurred in the text of Śaṅkara used by the Bhāmatī. Dr. Jolly lays great emphasis in assigning a late date to Yāj. on the fact that Kumārila, who cites Manu, Gautama, Āpastamba, Baudhāyana frequently, ignores the Yājñavalkya-smṛti altogether. But this silence of the great mīmāṁsaka can only mean that he did not assign the same pre-eminent and venerable position to Yāj. that he assigned to Manu, Gautama and others. Dr. Jolly himself is prepared to place Yāj. three or four centuries earlier than Kumārila. It will be shown hereafter that Nārada and Bṛhaspati cannot be placed later than 500 A. D. and may have flourished two or three centuries earlier still. On a comparison of their doctrines with those of Yāj. it will have to be conceded that they represent a far greater advance in juristic principles and exactitude than Yāj. So the latter cannot be placed later than the 3rd century A. D. As Yāj. is shown above to have followed the Manusmṛti and the Kauṭilīya his smṛti cannot be placed earlier than the first century B. C. We shall not be therefore far from the truth if we place his smṛti somewhere between the first century B. C. and the third century of the Christian era. In the Laṅkāvatārasūtra (ed. by B. Nanjio, 1923,

Kyoto) gāthas 814-816 are 'Kātyāyanaḥ sūtrakartā yajñavalkastathaiva ca ... Valmīko Masurākṣaśca Kauṭilya Āśvalāyanaḥ ! ... '. From the context it appears that the author of the smṛti is referred to as Yajñavalka.

Dr. Jolly (R. u. S. p. 21) following Dr. Jacobi (Z D M G 30, p. 306) thinks that Yāj. shows an acquaintance with Greek astrology. Dr. Jacobi's position amounts to this that the naming of the week days after the planets was established among the Greeks towards the end of the 2nd century A. D. and as the names of the week days and the arrangement of the planets in correspondence with them was borrowed by the Indians from the Greeks, no Indian work which enumerates the week days or arranges the planets in the well-known sequence (of Sun, Moon, Mars &c.) could have been composed before the third century after the Christ. As is very often the case with Western Sanskrit scholars in matters of Indian chronology, this grand generalisation is based upon very slender data. The premises are mere assumptions without hardly any evidence worth the name to support them. No one knows exactly when the week-days were named and who were the people that first employed the current names of the week-days. It is well-known that as far back as the days of Herodotus the Egyptians had a presiding deity for each day and that in the times of Julius Cæsar there were days of Saturn (*vide* I. A. vol. 14, p. 1, General Cunningham's article for the Indian origin of week-days). At least from the third century B. C., as vouched for by the 13th edict of Aśoka, India was in close touch with Syria and Egypt, where Buddhist missionaries had been sent by Aśoka while Antiochus and Ptolemy ruled in the two countries respectively. Therefore, if Indians at all borrowed the week-days and the arrangement of planets from foreigners, there is nothing to prevent us from holding that they borrowed them from the Egyptians. The earliest dated Indian record wherein a week-day is mentioned is the Eraṇ Inscription of 484 A. D. (Gupta Inscriptions p. 89) where we have " Suraguror divase. " It is to be noticed that Yāj. does not mention the week-days. In I. 296 he mentions the nine *grahas* in order as the Sun, the Moon, Mars (the son of the earth), Mercury (the son of Soma), Jupiter, Venus, Saturn, Rāhu, Ketu. No one can gainsay that at least the Sun, the Moon, Bṛhaspati and Venus were known to the Ṛgvedic India. Bṛhaspati in the highest heaven is

spoken of in the Ṛgveda[325] and the conjunction of Jupiter and Tiṣya (constellation of Puṣya) is spoken of in the Tai. Brāhmaṇa.[326] We know so very little of the ancient astronomical science in ancient India that one must think twice before dogmatising. Yāj. nowhere mentions the zodiacal signs (rāśis) and probably did not know them. Not only so, in his day the *nakṣatras* were still arranged from Kṛttikā to Bharaṇī as was the case in the Tai. S. IV. 4. 10. Vide Yāj. I. 268 (Kṛttikādi bharaṇyantam). We know from Varāhamihira that in the 5th century A. D. the signs of the zodiac and the arrangement of *Nakṣatras* from Aśvinī to Revatī were established facts in all parts of India. Therefore Yāj. who uses the ancient arrangement of Nakṣatras cannot be placed so late as the 4th century A. D. When Yāj. (I. 80) speaks of "susthe indau" we should not, following such commentaries as the Mit., connect the words with the signs of the zodiac or the houses of the horoscope. Viśvarūpa does not speak of *rāśis* in this connection, but of Nakṣatras only. From very ancient times certain Nakṣatras had come to be regarded as auspicious or suitable for particular acts. The Tai. [327]Br. directs that one should not finish a thing or begin to sacrifice on a nakṣatra with an evil name. The same Brāhmaṇa says that ploughing was to be begun on the Maitra asterism (Anurādhā) and consecration of fire on the Āditya nakṣatra. Even the Ṛgveda speaks of auspicious days[329] and the Tai. Br. speaks of Deva-nakṣatras and Puṇyāhas, and says that a daughter should be given away in marriage on the Svāti nakṣatra if she was desired to be her husband's favourite.[330] Vide Baudhāyana Gṛhya (I. 1) for the marriage nakṣatras; also Āp. Gr. S. II. 15. 12-14, Gobhila Gṛhya 4. 4. 28 and 2. 1. 1. Therefore, when Yāj. speaks of planets being badly placed (I. 307), or of Vyatīpāta, Gajacchāyā and the passing

(saṅkrama) of the Sun (I. 218), we have no right to connect this with the *rāśis*. In III. 171 and 172 he speaks of only the conjunction of planets and of the passage (of them) through *tārās* and *nakṣatras*. The Baud. Dh. S. II. 5. 23 speaks of the nine *grahas* in the same order as that of Yāj. Therefore there is hardly any evidence to show that Yāj. knew more astrology than was current in the days of the Brāhmaṇas and the Gṛhyasūtras. Yāj. (in II. 240-241) speaks of the fine to be imposed on those who counterfeited "nāṇakas" (coins) and on those examiners of "nāṇakas" who falsely declared a good coin to be counterfeited and *vice versa*. Mr. Jayasval (Calcutta Weekly Notes, vol. 17, p. CLIX) says that nāṇaka is the gold coin of the Kushans bearing the picture of the Goddess Nanaia and that the Kushans did not rise to importance before 78 A. D. This would place Yāj. after 100 A. D. But it must be remembered that this connection between the Goddess Nanaia and the word "nāṇaka" is quite conjectural and that the chronology of the Kushans is far from being settled.

Yāj. speaks of the sight of yellow-robed people as an evil omen (I. 273), which is probably a reference to the Buddhists; though it has to be remembered that he prescribes old yellow (kāṣāya) robes for his seeker after *mokṣa* (III. 157). He speaks of the founding of monasteries of Brāhmaṇas learned in the Vedas (II. 185). The philosophical doctrines contained in the third section (verses 64-205) approach that phase of the Vedānta that was taught by Śaṅkara. *Vide* particularly III. 67, 69, 109, 119, 125, 140. He employs in elucidating the philosophy of ātman the well-known examples of ghaṭākāśa and of the reflection of the Sun in water (III. 144), of the various ornaments made from gold, of the spider spinning webs out of his own body (both in III. 147), of the actor representing various parts (III. 162). All these illustrations frequently occur in Śaṅkara's Śārīrakabhāṣya (e. g. ghatākāśa on II. 1. 14, spider on II. 1. 25). All these points, however, are of very little use in arriving at a definite age for the smṛti of Yāj. The foregoing discussion has established that Dr. Jolly's date (viz. 4th century A. D. in R. u. S., p. 21) is much later than the data warrant. There is nothing to prevent us from holding that the extant smṛti was composed during the first two centuries of the Christian era or even a little earlier.

Besides the Yājñavalkyasmṛti we have to reckon with three other works connected with the name of Yājñavalkya, viz. Vṛddha Yāj., Yoga-Yāj., and Bṛhad-Yāj. All these three works are comparatively ancient. Viśvarūpa quotes (vide note 219 above) two verses of Vṛddha-Yājñavalkya saying that many writers on dharma have been born and will be born and enumerating ten such writers. The Mit. and Aparārka quote Vṛddha-Yājñavalkya frequently. One quotation cited from Vṛddha-Yāj. by Mādhava refers to the means of proof in case of doubt whether there was a partition.[331] So Vṛddha-Yāj. wrote also on Vyavahāra. Most of the quotations occur in the prāyaścitta section. It is interesting to note that one of these quotations in Aparārka[332] regards the touch of Pārasīkas as on the same level with that of Cāṇḍālas, Mlecchas and Bhillas. The Dāyabhāga[333] says that Jitendriya cited the words of Bṛhad-Yājñavalkya (viz. "sodaro nānyamātṛjaḥ"). The Mit. cites Bṛhad-Yājñavalkya on prāyaścitta. So this also is a work that must be held to be earlier than 1000 A. D. Yāj. himself is styled Yogīśvara by the Mit. and other works, but Yoga-Yājñavalkya is a different work from the Yāj. smṛti and existed probably prior to the latter work. Yāj. (in III. 110) claims the Yogaśāstra to be his own work. So either Yāj. the author of the smṛti composed such a work or the author of the smṛti in order to glorify it claimed that he was the same as the author of a well-known Yogaśāstra ascribed to a Yājñavalkya. At all events Yoga-Yājñavalkya existed certainly much earlier than 800 A. D. Vācaspatimiśra in his commentary on the Yogasūtrabhāṣya quotes a half verse from Yogi-Yājñavalkya.[334] Vācaspati wrote his Nyāyasūcinibandha in 898 (of the Vikram era) i. e. 841-42 A. D. Aparārka quotes profusely from Yoga-Yājñavalkya. One of the quotations (on III. 198-201) is an Āryā

(on the duration of a mātrā[335]). The quotations refer to prāṇāyāma, Gāyatrī, bathing, tarpaṇa and jñāna. His position is that even a householder becomes *mukta* by performing his duties, by contemplating on *ātman* and by knowledge of the Vedānta, that the highest goal is reached by a combination of jñāna and *karma* and that the view that *mokṣa* results from knowledge alone is a sign of indolence.[336] The Parāśaramādhavīya quotes a verse from Yogi-Yāj. saying that only the Brāhmaṇas can pass through the four āśramas, the Kṣatriya through three (excluding the last), the Vaiśya through two and the Śūdra only through one (viz. that of householder).[337] Kullūka on Manu (3. 1) quotes the view of Yogi-Yāj. that Brahmacarya extended to twelve years or five for each of the four Vedas.[338]

In the Deccan College Collection there are two mss. of Yogi-Yājñavalkya (Nos. 91 and 388 of 1899-1915) in twelve chapters and about 495 verses. The colophon at the end of the first chapter in the latter ms. describes it in the style of the Bhagavadgītā.[339] Yājñavalkya is said to have learnt Yogaśāstra from Brahmā and expounds it to his wife Gārgī. The whole work deals with the eight aṅgas of *yoga*, their divisions and subdivisions. Out of the several quotations cited above from Yoga-Yāj. only one was found in this work. It contains a verse (I. 68 aṣṭau grāsā muneḥ proktāḥ &c) which is practically the same as Baud. Dh. S. II. 7.

22 and another verse (X. 19) which is a quotation from the Bhagavatgītā.[340] There is another ms. (No. 354 of 1875-76) in the same collection called Bṛhad-Yogi-Yājñavalkya-smṛti in twelve chapters and about 930 verses. Yājñavalkya in Mithilā is asked by Janaka and the sages and then expounds the following subjects:— how *mantras* are to be studied in connection with metre, deity, sage and viniyoga, about *oṁkāra* or praṇava; seven Vyāhṛtis; Gāyatrī; nyāsa of Gāyatrī; sandhyopāsana; snāna; Japa; prāṇāyāma; dhyāna; sūryopasthāna; eulogy of *yoga*; eulogy of Vedaśāstra.

From the above it is clear that Yoga-Yājñavalkya and Bṛhad-yogi-Yājñavalkya are entirely different works and that the latter is comparatively an early work, as quotations from it are cited by Vācaspatimiśra (9th century) and Aparārka. The latter work contains numerous quotations from the Bhagavadgītā and the Manu-smṛti and a few from the Yājñavalkyasmṛti (the verse about the 14 vidyāsthānas is the same in both). So it must have been composed between 200 and 700 A. D.

There are many commentaries on the Yāj. smṛti. Out of these those of Viśvarūpa, Vijñāneśvara, Aparārka and Śūlapāṇi are the most famous. For these see sections 60, 70, 79 and 95 below. On account of the paramount importance of the Mit. in modern Hindu Law as administered by British Courts in the whole of India, the smṛti of Yāj. has indirectly become the guiding work for the whole of India and this position it richly deserves by its concise but clear statement of principles, its breadth of vision and its comparative impartiality towards the claims of both sexes and the different varṇas.

35. The Parāśara Smṛti

This work has been published several times, but the edition of Jivananda (part II. pp. 1-52) and that in the Bombay Sanskrit Series with the voluminous gloss of the great Mādhava are the best known. In the following pages Jivananda's edition has been used.

The smṛti of Parāśara must have been an ancient one as Yāj. (I. 4) mentions him among the ancient writers on dharma. But it is doubtful whether we possess the ancient smṛti of Parāśara. The extant smṛti is probably a recast of it as it mentions Yāj. in the first

[340] यं यं वापि स्मरन्भावं &c. योगयाज्ञवल्क्य X. 19.

chap. (p. 2). The Garuḍapurāṇa in chap. 107 gives a summary in 39 verses of the Parāśara-smṛti. In doing so it takes parts of the latter and pieces them together. For example, verses 2-4 in the Garuḍapurāṇa (chap. 107) are 'śrutiḥ smṛtiḥ sadācāro yaḥ kaścid vedakartṛkaḥ । vedāḥ smṛtāḥ brahmaṇādau dharmā Manvādibhiḥ sadā ॥ dānam kaliyuge dharmaḥ kartāram ca kalau tyajet । pāpakṛtyaṁ tu tatraiva śāpam phalati varṣataḥ ॥ ācārāt prāpnuyāt sarvaṁ ṣaṭ karmāṇi dine dine । sandhyā snānam japo homo devātithyādipūjanam ॥'. These are taken *verbatim* or with slight changes from the Pārāśara-smṛti ; compare na kaścid vedakartā ca vedasmartā caturmukhaḥ । śrutiḥ smṛtiḥ sadācārā nirṇetavyāś ca sarvadā । tathaiva dharmaṁ smarati Manuḥ kalpāntarāntare । tapaḥ paraṁ . . . dānamekaṁ kalau yuge ॥ . . . tyajet-deśam kṛtayuge . . . kartāraṁ ca kalau yuge । . . . kṛte tū tatkṣaṇāt śāpaḥ . . . kalau saṁvatsareṇa tu ॥ chap. I. verses 20-21, 23, 25, 27 and vide 39 for verse 4 of the Garuḍa-purāṇa. This establishes that the Garuḍa regarded the Parāśara-smṛti authoritative and ancient. There is another problem to be considered. Kauṭilya mentions six times the views of Pārāśara or the Pārāśaras on various aspects of politics and state administration. Therefore it appears that there was a work of Pārāśara on politics, in which it is possible that vyavāhara also was dealt with.

The extant Pārāśarasmṛti is divided into twelve chapters and contains according to the last verse but one 592 verses. It deals only with ācāra and prāyaścitta. Mādhava introduced his disquisition on vyavahāra, which forms about a fourth of his extensive gloss, in an indirect way by regarding vyavahāra as a part of the duties of Kṣatriyas on which the Parāśarasmṛti has something to say.[341]

The name Parāśara is an ancient one. In the Tai. Araṇyaka (I. 1. 3. 37) we have a Vyāsa Pārāśarya. In the Vaṁśa that occurs in the Bṛhadāraṇyaka we have a Pārāśarya. The Nirukta

gives an etymology of Pārāśara.[342] Pāṇini attributes a bhikṣusūtra to Pārāśarya.[343]

The introductory verses of the smṛti say that sages went to Vyāsa and requested him to instruct them in the dharmas and conduct beneficial to mankind in the Kali age and that the great Vyāsa took them to his father Pārāśara, son of Śakti, in the Badarikāśrama, who then propounded the dharmas of the four *varṇas*. The first chaptar recites the smṛtis then known (19 in all) and lays down that in the four ages of Kṛta, Treta, Dvāpara, and Kali, the dharmas proclaimed by Manu, Gautama, Śaṅkha-Likhita and Parāśara were respectively to be the guiding ones. The following are briefly the contents of the Pārāśara smṛti :—

I. Introductory verses; Pārāśara imparts to the sages knowledge of dharma; the dharmas of the four *yugas*; differentiation of the four *yugas* from various points of view; six daily duties, viz. sandhyā, bath, *japa*, *homa*, Vedic study, worship of gods, Vaiśvadeva and honouring guests, eulogy of honouring guests, the proper means of livelihood for Kṣatriya, Vaiśya and Śūdra; II. duties of householder; agriculture; the five unconscious acts of injury to animal life; III. purification from impurity due to birth and death; IV. concerning suicide; punishment for wife deserting her husband though poor, foolish or diseased; definition and rules about Kuṇḍa, Golaka, Parivitti, and Parivitta; remarriage of women; rewards for chaste widows; V. expiation for minor things (such as dog-bite); about a Brāhmaṇa who has consecrated fires dying on a journey or committing suicide; VI. Expiation for killing various beasts and birds, for killing Śūdras, artisans, women, Vaiśyas, Kṣatriyas, sinful Brāhmaṇas; eulogy of Brāhmaṇas; VII. purifications of various articles (such as vessels of wood, metal &c); about a woman in her menses; VIII. Expiations for killing cows and oxen unwittingly in various ways; approaching a pariṣad for expiation, constitution of a pariṣad; praise of learned Brāhmaṇas; IX. proper thickness of sticks for beating cows and bulls; expiations for using thicker sticks and injuries to them; X. other expiations such as cāndrāyaṇa for intercourse with women with whom intercourse is forbidden; the expiation called Sāntapana; XI. expiation for partaking food from

Cāṇḍālas &c.; rules as to whose food may be taken and whose not; purification of wells &c. when animals fall in them; XII. bath prescribed after evil dreams, vomitting, shaving &c.; expiations for drinking wine and nasty things through ignorance; five kinds of bath; when bath at night allowed; what things should always be kept in the house or seen; definition of the unit of ground called gocarma; expiations for the deadly sins of Brahmahatyā, drinking liquor, theft of gold &c.

Parāśara contains several peculiar views. He speaks of only four sons (aurasa, kṣetraja, datta and kṛtrima) though he does not expressly negative a larger number (chap. 4 p. 14). He eulogises the practice of *Satī* (last two verses of chap. 4). The well-known verse of Nārada (Strīpuṁsa-yoga 97) "naṣṭe mṛte &c." is read at the end as " patir-anyo na vidyate " (p. 15). There are a few verses in the Indravajrā metre (e. g. on pp. 11-12 and 36). The Parāśarasmṛti quotes the views of several writers on dharma. Manu is frequently cited in the words " Manur-abravīd. " In the 7th chapter alone those words occur four times.[344] None of them corresponds exactly with any verse of the Manusmṛti. Yet Manu V. 133 may be compared with the first two. Besides these, in the 9th chapter Manu's view is quoted that on killing an animal the guilty party should restore a similar one to the owner or its price.[345] In the 10th he says that according to Manu uncooked food, milk or oil brought from a śūdra's house and used in cooking in a Brāhmin's house could be eaten by a Brāhmaṇa. This is similar to Manu IV. 223.[346] In the 12th chapter Parāśara cites the view of Manu that a Brāhmaṇa fed on food (cooked) from śūdras would become a vulture for twelve births, a pig for ten and a dog for seven.

There is nothing corrosponding to this in Manu. In the 9th Manu is spoken of as one who knows all śāstras.[347] The first verse of the 6th chapter says that Manu deals at length with expiation for killing animals.[348] This is probably a reference to Manu XI. 131-141. Numerous verses in the Parāśara-smṛti are word for word the same as those of the Manusmṛti. For example, Manu I. 85-86 occur in the first chapter of Parāśara, Manu V. 160 (about a widow remaining chaste) occurs with slight variations in the 4th; Manu XII. 114-115 (about *pariṣad*) occur in the 8th chap. (p. 29); Manu XI. 212 (about the definition of Sāntapana) is the same as Parāśara (10th chap. p. 40). Several verses are common to Baudhāyana and Parāśara, e. g. Baud. Dh. S. I. 1. 8, 11, 14 occur in the eighth chapter of Parāśara (pp. 29, 30). The verse "na nārikelair na ca śaṇabālair" occurring in Parāśara (9th chap. p. 35) is quoted as Vasiṣṭha's by Haradatta on Gautama (22. 18). Parāśara is mentioned by name several times (chap. III. 2, p. 8, chap. VI. 1. p. 18 and p. 23, chap. VII. 1. p. 24, chap. X. 12. p. 38). Uśanas is cited on p. 49 (chap. 12), Prajāpati (in IV. 3. p. 13), Śaṅkha (chap. 4 p. 15). Veda, Vedāṅgas, dharmaśāstras and smṛtis are spoken of on p. 23 (6th chap.). In the 11th chap. Parāśara refers to several Vedic *mantras*, most of which occur in the Ṛgveda, but two of them, "tejosi śukram" and "devasya tvā" are not found in the Ṛgveda, but in the Vāj. S. (22. 1 and 1. 24 respectively). Parāśara appears to have been a practical man. He exhorts his readers to save their bodies first in invasions, journeys, diseases, calamities and then care for dharma. He recommends the non-observance of rules of purity in times of difficulty and adherence to the strict rules of dharma when one is at ease.[349]

The Mit., Aparārka, Smṛticandrikā, Hemādri and other later works quote Parāśara very frequently. Most of these are found in the extant Parāśarasmṛti. For example, vide pp. 1169, 1177, 1180, 1191 &c. of Aparārka, all of which are traced in Parāśara pp. 42, 43, 42 and 16 respectively. Viśvarūpa quotes Parāśara several times

347 मनुना चैवमंकेन सर्वशास्त्राणि जानता। पराशर 9th.

348 अतः परं प्रवक्ष्यामि प्राणिहत्यासु निष्कृतिम्। पराशरेण पूर्वोक्तां मन्वर्थेपि च विस्तृताम्॥

349 देशभङ्गे प्रवासे वा व्याधिषु व्यसनेष्वपि। रक्षेदेव स्वदेहादि पश्चाद्धर्मं समाचरेत्॥; आपत्काले तु संप्राप्ते शौचाचारं न चिन्तयेत्। स्वयं समुद्धरेत् पश्चात् स्वस्थो धर्मं समाचरेत्॥ 7th chap., last three verses.

and these quotations can be verified ; e. g. on Yāj. III. 16 the verse "anātham" ascribed to Parāśara is found in Parāśara chap. III p. 10; on Yāj. III. 257 ten verses are cited by Viśvarūpa from Parāśara which occur in Parāśara with considerable variations (chap. VII. pp. 20-21); on Yāj. III. 262 the verse "gavām bandhana" is cited from Parāśara, which is the first verse of the 8th chapter. Therefore it is quite clear that in the first half of the 9th century the Parāśarasmṛti that we have now was considered to be authoritative and the work of an ancient sage. It seems to have known a work of Manu, as seen above. Therefore it must be assignad to some period between the first and the 5th century of our era. In the same direction points the fact that the Garuḍapurāṇa (chap. 107) seems to have known the introductory verses of Parāśara and as shown above (p. 191) combines passages of Parāśara in a summary of its teachings.[350] The Viṣṇu-dharmottara which is frequently quoted by Aparārka and other later works cites verses that are borrowed from Parāśara. For example, chap. 75. 1 of the former is the same as a verse of Parāśara.[351]

There is an extensive work called Bṛhat-Parāśara-saṁhitā (published by Jivananda, part II. pp. 53-309). It is divided into 12 chapters and the last verse says that it contains 3300 verses and that Suvrata proclaimed the śāstra imparted by Parāśara. The introductory verses contain the same story as that in the Parāśara-smṛti and many of the verses in the first chapter of the two works (such as those about the 19 writers on dharma &c.) are almost the same in both. The total of verses in the printed work comes to about 3000 and not 3300. It appears that the work is a recast of the Parāśarasmṛti made by Suvrata. The subjects of the twelve chapters are :—I. Introductory, the proper sphere of Āryas; summary of contents ; II. Disquisition on the 6 daily *karmas*, sandhyā, bath, *japa*, worship of gods, Vaiśvadeva and honouring guests ; Gāyatrī ; the dharmas of the *Varṇas*; III. duties and manners of a householder ; agriculture, honour to cows ; IV. forms of marriage ; duties of wives ; Jātakarma and other rites ; gifts ; proper persons to

receive gifts; V. concerning śrāddhas; VI. impurity on birth and death; prāyaścittas for various acts; VII. cāndrāyaṇa and other penances; VIII. gifts; IX. rites for propitiating Gaṇeśa and the planets, Rudra &c; X Rājadharma; dharmas of forest hermit and *yati*; XI. the different varieties of Brahmacārin, householder, forest hermit and yati; XII. prāṇayāma and other aṅgas of *yoga*.

This Bṛhat-Parāśara contains a considerable number of verses mostly in the Indravajrā metre and a few in tha Vasantatilakā (e. g. p. 134).

The Bṛhat-Parāśara appears to be a late work. It is a recast of the Parāśara-smṛti. It contains the Vināyakaśānti as elaborated by Yājñavalkya, since it speaks of only one Vināyaka (9th chap. p. 247) and not of four as in M. Gr. S. On p. 249 it quotes Yāj. I. 285 (about the names of Vināyaka) with the readings found in the Mit. It speaks of the rāśis (p. 244). It is not quoted by Viśvarūpa, the Mit. or Aparārka. It is mentioned in Bhaṭṭoji's comment on the Caturviṁśatimata (p. 138) and by Nandapaṇḍita in the Dattaka-mīmāṁsā, which quotes a verse (Bṛhat-Parāśara p. 153).[352]

A Vṛddha-Parāśara is quoted by Aparārka (on Yāj. II. 318) immediately after Parāśara and as holding a different view. Mādhava also quotes a Vṛddha-Parāśara (Parāśara-Mādhavīya vol. 1, part 1, p. 230). This seems to be a different work from the Parāśara-smṛti and the Bṛhat-Parāśara. Hemādri (Caturvarga. vol. III, part 2, p. 48) and Bhaṭṭoji in his gloss on Caturviṁśatimata (p. 138) quote a Jyotiḥ-Parāśara.

36. The Nārada-smṛti

There are two versions of Nārada on Vyavahāra, a smaller and a larger one. The smaller version was translated by Dr. Jolly in 1876 (Trübner & Co., London). The text of the longer version was published by the same scholar in the Bibliotheca Indica series (1885) and was translated by him in the Sacred Books of the East Series (vol. 33). The edition of the text is accompanied up to verse 21 of the 5th title 'abhyupetyāśusrūṣā' by extracts from the commentary of Asahāya as revised by Kalyāṇabhaṭṭa, who was encouraged in the task of revision by Keśavabhaṭṭa.

From verse 22 of the same title the printed text is the same as the smaller version. A verse quoted as Nārada's by Kṣīrasvāmin is not found in the larger version but is found in the smaller version.[353] An ancient Ms. of Nārada from Nepal dated 1407 A. D. contains two additional chapters on theft and ordeals. Dr. Jolly includes the first as an appendix and omits that on ordeals on the ground that it is not authentic. One of the colophons of the Nepalese Ms. describes it as 'iti Mānava-dharmaśāstre Nāradaproktāyāṁ saṁhitāyām &c' This corroborates what was said above (pp. 149, 156) as to the close connection between Manu and Nārada.

Nārada is not mentioned by Yājñavalkya in the list of ancient writers on dharma, nor does Parāśara mention him. Viśvarūpa however quotes a verse of Vṛddha-Yājñavalkya (on Yāj. I. 4-5), where Nārada is the first among ten expounders of dharma enumerated therein (vide note 219).

The printed Nārada contains three introductory chapters on the principles of judicial procedure (Vyavahāra-mātṛka) and on the judicial assembly (sabhā). Then the following titles of law are dealt with one after another :—ṛṇādāna (recovery of debts), upanidhi (deposit, lending, bailment), saṁbhūya-samutthāna (partnership), dattāpradānika (gifts and resumption thereof), abhyupetya-aśuśrūṣā (breach of contract of service), vetanasya-anapākarma (non-payment of wages), asvāmivikraya (sale without ownership), vikrīyāsaṁpradāna (non-delivery after sale), krītānuśaya (rescission of purchase), samayasyānapākarma (violation of conventions of corporations, guilds &c.), sīmābandha (settlement of boundaries); strīpuṁsayoga (marital relation); dāyabhāga (partition and inheritance); sāhasa (offences in which force is the principal element) such as homicide, robbery, rape &c.; vākpāruṣya (defamation and abuse) and daṇḍapāruṣya (hurt of various kinds); prakīrṇaka (miscellaneous wrongs). The appendix deals with theft, though a few remarks are made on that topic under the title of 'sāhasa.'

It will be noticed that Nārada follows the Manusmṛti to a considerable extent in the nomenclature and the arrangement of the

eighteen titles. Some of the titles are differently named by Nārada, e. g. he speaks of upanidhi, while Manu employs the word nikṣepa. Nārada seems to have included the svāmipālavivāda of Manu in vetanasya-anapākarma. He makes one title of dyūta and samāhvaya. Nārada includes strīsaṃgrahaṇa under sāhasa and adds three titles, viz. abhyupetya-aśuśrūṣā, vikrīyāsampradāna and prakīrṇaka. The smṛticandrikā expressly[354] says that it follows the work of Nārada in preference to that of Manu as regards the nomenclature and sequence of the titles of law. Nārada follows Manu in speaking of witnesses in the section on ṛṇādāna and in treating of theft after the eighteen titles have been dealt with (vide Manu IX. 256 ff.).

The printed Nārada contains 1028 verses (including 61 on theft in the appendix). About seven hundred of these verses occur in various *nibandhas* as quotations. Up to the 21st verse of the section 'abhyupetyāśuśrūṣā' the commentary of Asahāya furnishes a valuable check for the authenticity of the text. For the remaining portion, there are important data as to its authenticity, sequence and readings. Viśvarūpa, who belongs to the first half of the 9th century, quotes about fifty verses of Nārada (generally by name). The text that he had before him was essentially the same as that of the printed edition, except in a very few cases. Out of the seven verses of Nārada on 'samayasya-anapākarma' Viśvarūpa quotes five (on Yāj. II. 190 and 196) and expressly states that Nārada wound up his chapter on that topic with the verse 'doṣavat karaṇam &c'. as the printed text does. On Yāj. II. 226 Viśvarūpa distinctly says that the verse 'yameva hyativarteran' &c. is followed immediately by 'malā hyete manuṣyeṣu'. This is the case with the printed text also (dyūtasamāhvaya verses 13-14). On Yāj. III. 252 Viśvarūpa quotes a verse af Nārada about the three kinds of wealth, śukla, śabala and kṛṣṇa, which does not occur in that form in Nārada, though the latter contains similar dicta.[355] Viśvarūpa contains no quotation from Nārada on the topics of ācāra or prāyaścitta. The same is the case with Medhātithi and the Mitākṣarā. Medhātithi somewhat inaccurately summarises the

the introductory words (in prose) of Nārada (vide note 269 above). Medhātithi frequently quotes Nārada particularly from the sections on ṛṇādāna (vide on Manu 8. 47, 155, 149) and dāyabhāga (on Manu 8, 28, 29, and 207, 209, and 143). On Manu 8, 349 he quotes Nārada on partnership (verse 10), on 8. 216 he quotes Nārada (vetanasya-anapākarma verse 5). In some cases Medhātithi cites Nārada's verses without naming him e. g. on Manu 9. 76 he quotes the well-known verse 'nashṭe mṛte pravrajite &c.' (Nārada on marital relation, verse 97) as 'smṛtyantara'. It was shown above (p. 172) that the vyavahāra section of the Agnipurāṇa dates from about 900 A. D. Chap. 253 of the Agnipurāṇa contains thirty verses of the extant Nāradasmṛti, viz. Agni 253. 1b--9a= Nārada (vyavahāra-mātṛkā chap. I. 8-15); Agni 253. 9b--12 =Nārada (vyavahāra-mātṛkā chap. I. 26-29a); Agni 253. 13--30 are the verses defining the eighteen titles from ṛṇādāna to prakīrṇaha contained in Nārada and occur in the same order in both. The readings preserved in the Agnipurāṇa deserve some discussion. Agni (253. 3-4) reads 'dharmaś ca vyavahāraś ca ... uttaraḥ pūrva-sādhakaḥ', while Nārada has 'pūrvabādhakaḥ'. Agni reads 'caritraṁ saṁgrahe pūṁsāṁ rājājñāyāṁ tu sādhanam' (253. 5), while Nārada has 'caritraṁ pustakaraṇe rājājñāyāṁ tu śāsanam'. Agni (253. 15) reads 'dattvādravyaṁ ca samyag-yaḥ', while Nārada (dattāpradānika 1) reads 'dattvā dravyamasamyag-yaḥ'. The Agni (253. 11) reads 'Śaṅkā sadbhistu saṁsargāt tattvaṁ ṣoḍhābhidarśanāt' and avoids the rare word 'hoḍhābhi-' in Nārada 'Śaṅkāsatām tu saṁsargāt tattvaṁ hoḍhābhidarśanāt' (Vyavahāramātṛkā I. 27). For Nārada's 'akṣabradhnaśalākādyair &c.' (dyūtasamāhvaya I) Agni reads 'Akṣavajra &c.' (253. 29). The Mit. (on Yāj. II. 199) and Vīr. (p. 718) follow printed Nārada in the last case and also in the other cases. In the Smṛti-candrikā, Hemādri, Parāśaramādhavīya and other later *nibandhas* numerous verses of Nārada are quoted on topics of ācāra, śrāddha, prāyaścitta. For example, Hemādri (caturvarga vol. III. part 2, pp. 159, 183, 185, 223, 235) quotes several verses of Nārada on Ekādaśī and a verse of Nārada about the astrological *yoga* called padmaka. The Smṛticandrikā (I. pp. 198-199) quotes 26 verses on the worship of Nārāyaṇa, the last of which is the well known verse 'dhyeyaḥ sadā savitṛmaṇḍala-madhyavartī &c.' and the same work (on śrāddha p. 354) quotes a verse of Nārada in which Sunday and Saṁkrānti are mentioned. The question arises whether

these quotations of Nārada on ācāra and prāyaścitta and allied topics are the work of the same Nārada that wrote on Vyavahāra. From the fact that early writers like Viśvarūpa, Medhātithi and Vijñāneśvara do not contain a single quotation of Nārada on topics other than that of vyavahāra, it appears probable that the quotations on ācāra and prāyaścitta belong to a later date than the Nāradasmṛti on vyavahāra and either did not exist in the days of Viśvarūpa and Medhātithi or had not attained canonical authority in those days. There is in the India Office Library a ms. of Nāradasmṛti in three chapters and 322 verses dealing exclusively with ācāra and prāyaścitta (vide Jolly's Introduction p. 5 to edition of text).

The Nāradasmṛti, excluding the introductory passage in prose about the successive abridgments of the original work of Manu by Nārada, Mārkaṇḍeya and Sumati Bhārgava, is written in the śloka metre except in the case of two verses (verse 38 of the 2nd chap. of vyavahāra-mātṛkā and the last verse of the chapter on sabhā). Nārada himself is mentioned by name in connection with the ordeals (ṛṇādāna verse 253).[355a] The first person also occurs in 'ataḥ param pravakṣyāmi' (ṛṇādāna 343). Ācāryas are cited in 'dattāpradānika' (verse 5). Dharmaśāstra and arthaśāstra are mentioned (vyavahāramātṛkā, chap. I, 37 and 39) and Nārada lays down the rule as in Yāj. (II. 21) that in a conflict between the two the former should furnish the rule of conduct.[356] Nārada refers to Vasiṣṭha's rule about interest (ṛṇādāna 99). Two verses are quoted from a Purāṇa.[357] Manu is named in several places (ṛṇādāna verses 250, 251, 326).[358] The first passage about Manu is quoted by Viśvarūpa on Yaj. (II. 98) and corresponds closely with the teaching of Manu (8. 113). But the other passages

crediting Manu with dividing ordeals into five kinds and giving his view about poison ordeal have no corresponding passage in the extant Manu. Therefore Nārada had a version of Manu before him that was somewhat different in certain respects from our Manu or Nārada may be referring to Vṛddha or Bṛhat Manu. Besides this there is one remarkable fact to be noted about the relation of Manu and Nārada. There are about 50 verses that are common to Manu and Nārada. Manu 8. 12-14 and 18-19 are Nārada (sabhā, verses 8-10 and 12-13 in a different order), Manu 8. 140-141 = N. (ṛṇādāna 99-100), Manu 8. 148-149 =N. (ṛṇādāna 80-81), M. 8. 143 =N. (ṛ. 129, M. 8. 64=N. (ṛ. 177), M. 8. 72=N. (ṛ. 189), M. 8. 93 and 113 =N. (ṛ. 199, 201), M. 98-99=N. (ṛ. 208, 209 and Udyogaparva 35.33-34), M. 8. 89=N. (ṛ. 225), M. 8. 186-187, 189, 191= N. (upanidhi 10-13), M. 8. 232-233, 235 = N. (vetanasya-anapākarma 14-16 in a different order), M. 9. 47=N. (marital relation, verse 28), M. 8. 224-225= N. (marital relation, 33-34), M. 9. 357-358=N. (marital relation, 65-66 in reverse order), M. 9. 3=N. (dāyabhāga 31), M. 9. 216 = N. (dāyabhāga 44), M. 8. 267-269 = N. (vākpāruṣya 15-17), M. 9. 270-272 = N. (vākpāruṣya 22-24), M. 8. 281-284 = N. (daṇḍa-pāruṣya 26-29), M. 4. 87 = N. (prakīrṇaka 44).

Nārada (ṛṇādāna 158) 'śrotriyās-tāpasà vṛddhā ye ca pravrajità narāḥ | asākṣinas-te vacanān nātra heturudāhṛtaḥ' has probably Manu 8. 65 in view where we read 'na sākṣī . . . na śrotriyo na liṅgastho na saṅgebhyo vinirgataḥ'.

Besides these there are several cases where Nārada closely agrees with Manu though the verses are not identical, e. g. Nārada (sāhasa 19) may be compared with Manu 9. 271 and Nārada (appendix on theft, verses 1-4) may be compared with Manu (9. 256-260). These facts establish that Nārada is based on a version of Manu that was essentially the same as the extant text of Manu, though there was some difference here and there. Nārada contains several verses that occur in the Mahābhārata. For example, Śānti 111. 66 = N. (vyavahāra-mātṛkā 72),[359] Udyoga 35. 58 = N. (sabhā, verse 18), Udyoga 35. 31-32 = N. (ṛ. 202-203). There are several cases where the text of Kauṭilya agrees with

[359] तलवद् दृश्यते व्योम खद्योतो दृश्यवाडिव । न तलं विद्यते व्योम्नि न खद्योते हुताशनः ॥
M. D. 26.

Nārada.[360] In some of these cases the agreement is almost word for word.[361]

Though Nārada is based on Manu, he differs in several essential matters from Manu. We have seen the difference between them in the nomenclature of the titles of law. Manu only casually mentions the ordeals of fire and water (8. 114), while Nārada enumerates five kinds of ordeals, describes them at length and adds two more viz. *taṇḍula-bhakṣaṇa* and *taptamāṣa* (ṛṇādāna, verses 259-348). He allows *Niyoga* (marital relation, verses 80-88), while Manu strongly condemns it. He allows remarriage of women (Nārada, marital relation, 97), while Manu is against it. Manu mentions seven kinds of slaves (8. 415), while Nārada raises their number to fifteen (abhupetyāśuśrūṣā, verses 26-28); Manu condemns gambling outright (9. 221-228), while Nārada allows it under state control and as a source of revenue ; Nārada is further far more systematic than Manu and is full of divisions and subdivisions. For example, he divides property into three kinds, each of which is again subdivided into seven varieties (ṛṇadāna 44-47); Nārada divides the law of gift into four sections, which are further subdivided into 32; he subdivides the eighteen titles into 132 (vyavahāra-mātṛkā I. 25).

There are a few points which are almost peculiar to Nārada, such as the fourteen kinds of impotent persons (strīpuṁsayoga 11-13), the three kinds of *punarbhūs* and four kinds of svairiṇīs (ibid. verses 45-52).

Nārada is probably later than Yājñavalkya. Yāj. knows only five kinds of ordeals, while Nārada knows seven and the former's treatment of them is not so exhaustive as Nārada's. The rules of judicial procedure in Nārada are more systematic and exhaustive than those of Yāj. Nārada contains more definitions than Yāj. In some respects however Nārada is more conservative than Yāj. For example, Nārada nowhere recognises the rights of the widow to

succeed to her deceased husband as Yāj. does; Nārada gives no rules about the succession of *gotrajas* and *bandhus* as Yāj. does. In a few respects Nārada agrees with the views of Manu instead of with Yāj., such as allowing a Brāhmaṇa to marry a śūdra woman. Nārada regards sexual intercourse with a pravrajitā (female ascetic) as a mortal sin (strīpuṁsayoga 74-75), while both Manu (8. 363) and Yāj. (II. 293) treat it lightly. Taking all these things into consideration it may be said that Nārada flourished nearly at the same time as or somewhat later than Yāj.

Nārada contains several rare words such as "hoḍha" (in vyavahāramātṛkā I. 27, meaning 'one's property when lost or stolen'). He gives expression to certain principles of law and politics, such as that a man is master of his own house, in other words, a man's house is his castle;[362] he highly eulogises the office of king, almost assigning it a divine origin and exhorts the people to obey and honour even a weak and undeserving king.[363] Mr. Jayasval sees in this and in the fact that Nārada speaks of dīnāra while the Mṛcchakaṭika speaks of nāṇaka indications that Nārada belongs to the fourth century, is later than the drama, is propping up the authority of a new dynasty and flourished under the Imperial Guptas (C. W. N. vol. 17, p. CCLXXXV). He regards a person as minor till the sixteenth year.[364] This limit was probably first fixed by Nārada. Nārada further boldly says that in case of conflict between *dharmaśāstra* and usages, the latter have to be followed, as they are directly observed.[365]

As Nārada's is regarded as an authoritative smṛti by Viśvarūpa, Medhātithi and other later writers and as Asahāya, who is mentioned by name in the commentary of Viśvarūpa, wrote a comment on

Nārada, the Nāradasmṛti must be older by some centuries than the 8th century, the latest date to which Asahāya can be assigned. Bāṇa in his Kādambarī compares the royal palace to Nāradīya.[366] Ordinarily Nāradīya standing by itself would denote the Nārada-purāṇa (compare Viṣṇu-purāṇa 3. 6. 21 where we have the form Nāradīya for the purāṇa). The Nārada-purāṇa (Venkateśvara Press edition, Bombay) contains, however, no treatment of rājadharma. Bāṇa may have intended a violent pun, meaning 'the palace where the duties of kings were being expounded (āvarṇyamāna), like the Nāradīya in which rājadharma has not been set forth (avarṇyamāna).' European scholars like Dr. Jolly and Bühler hold that Bāṇa refers to the extant Nāradasmṛti. But on this explanation also the difficulty is not entirely got over. The extant Nārada can hardly be described as a treatise on rājadharma. It deals only in an indirect way with one aspect of the king's duties and is rather concerned with vyavahāra and the duties of the subjects towards each other from the strictly legal point of view. If we turn to the Mahābhārata and other works, we shall find that rājadharma meant something different from what is treated of in the Nāradasmṛti. Therefore Bāṇa's reference to the Nāradīya is of a doubtful character. The Rājanīti-ratnākara of Caṇḍeśvara frequently quotes Nārada on politics (pp. 3, 13, 79). These quotations are not traced in the printed Nārada. Therefore it is highly probable that Bāṇa refers to a distinct work of Nārada on politics which has not yet been recovered.

The Vyavahāramātṛkā of Jīmūtavāhana and the Parāśara-Mādhavīya (vol. III, part I, p. 203) quote a verse from Nārada, the latter half of which is the same as the latter half of a verse in the Vikramorvaśīya.[367] The doctrine attributed to Nārada is found in Yāj. (II. 20) and the Viṣṇudharmasūtra, (6. 22) but not in the same words. Unfortunately the date of Kālidāsa is far from being universally accepted, but the fourth or first half of the 5th century is often accepted as the probable date. There is further diffi-

367 अनेकार्थाभियुक्तेन सर्वद्रव्यापलापिना। विभावितैकदेशेन देयं यदभियुज्यते॥ अपरार्क (on याज्ञ. II. 20); व्यवहारमातृका of जी. pp. 310-11; हंस प्रयच्छ मे कान्तां गतिरस्यास्त्वया हृता। विभावितैं ... युज्यते॥ विक्रमोर्वशीय IV. 17 (Pandit's ed).

culty in the fact that the text of the Vikramorvaśīya has been largely tampered with. If the verse is a genuine part of the drama, it seems natural to suppose that Kālidāsa turns a well-known legal maxim to a somewhat humerous use. It is hard to suppose that Nārada would borrow the words of a dramatist for setting forth a legal maxim. This would push back the date of Nārada far beyond the 5th century. Nārada in two places uses the word "dināra", once in the sense of a golden ornament and again as a coin or unit of value also called "suvarṇa." In this last case he says that "dināra is equal to 48 Kārṣāpaṇas or twelve dhānakas." Jolly (R. u. S. p. 23) thinks that Indian *dināras* can scarcely be older than the 2nd century A. D., although in the times of the Indo-Scythian kings coins of the weight of dināra occur. Therefore Jolly is of opinion that Nārada is later than 300 A. D. Winternitz (History of Indian Literature, vol. II. p. 216 n. 4) follows him in this assumption that all Sanskrit works in which the word *dināra* occurs must be later than the 2nd or 3rd century A. D. It may be that the golden dināras most numerously found in India belong to the 2nd and 3rd centuries A. D. But as Keith points out (J. R. A. S. 1915 p. 504) Jolly's assumption is wrong and the introduction of *dināras* into India need not be later than the beginning of the Christian era. Golden *dināras* were first coined in Rome in 207 B.C. and the oldest Indian pieces corresponding in weight to the Roman Denarius were struck by Indo-Scythian kings who reigned from the first century B. C. (W. B. p. 44). Therefore there is nothing to prevent us from holding that Nārada flourished in the first centuries of the Christian era, i. e. between 100 and 300 A. D. Mr. Jayasval assigns him to the 4th century A. D. and after the Mṛcchakaṭika. Most scholars would not be prepared to assign to the Mṛcchakaṭika so early a date as the 3rd century A. D. Besides Mr. Jayasval builds his theory on very slender foundations. Because the drama employs the word nāṇaka and Nārada speaks of dināra only, no chronological conclusion as to the priority of the one to the other can be drawn. After both words became current in the language, one author, though later, may employ one word, while another, though earlier, may employ the other.

368 मणयः पद्मरागाद्या दीनारादि हिरण्मयम् । मुक्ताविद्रुमशङ्खाद्याः प्रवृत्ताः स्वामिगामिनः ॥ नारद, व्यवहारमातृका II. 34; कार्षापणोण्डिका गेया ताश्चतस्रस्तु धानकः । तद्-द्वादश सुवर्णस्तु दीनाराख्यः स एव च ॥ परिशिष्ट verse 60.

It is difficult to say anything as to the home of Nārada. In the appendix on theft Nārada in one place says that in the south a silver kārṣāpaṇa is current, that in the east it is equal to twenty paṇas and that he does not follow the standard of kārṣāpaṇa current in the land of the five rivers.[369] From these data and from the fact that the oldest mss. of Nārada come from Nepal and that an old commentary on Nārada in Newari was composed in Nepal, Dr. Jolly conjectures that Nārada's home was to be sought in Nepal. This is all pure guess-work. There is no reason why Nārada could not have hailed from central India. The places where the oldest and best mss. of a work are found can hardly ever be indications of the original home of an ancient author. Bhāmaha is by common consent a Kashmirian writer on Poetics, but the only mss. of his work so far found come from southern India.

Prof. Dr. Bhandarkar (Carmichael Lectures 1918, p. 90), probably following the Nayacandrikā, hazards the conjecture that the writer called Piśuna cited in the Kauṭilīya is another name of Nārada. Beyond the bare fact that Nārada is often credited in the purāṇas with the role of instigating feuds and quarrels and that the word piśuna means "wicked, back-biter", there is nothing to support this identification.

A Jyotir-Nārada is quoted by Bhaṭṭoji in his commentary on the Caturviṁśatimata (p. 11). A Bṛhan-Nārada is quoted by Raghunandana and a Laghu-Nārada in the Nirṇayasindhu and the Saṁskāra-Kaustubha.

In the Mahābhārata several opinions are attributed to Nārada. One of them condemns the eating of flesh.[370] The first half of the last verse is the same as Manu 5. 52. Nārada is credited with having divided utpātas (portents) into three varieties.[371] Nārada is said to have held the view that one must always be active.[372] It appears that all these views are taken from some work or works of a Nārada.

37. Bṛhaspati

Bṛhaspati as a sūtra writer on politics has been dealt with above (section 26). In this section Bṛhaspati the jurist will be spoken of. The complete smṛti of Bṛhaspati on law has not yet been discovered. It will be, when discovered, a very precious monument of ancient India, exhibiting the high-water mark of Indian acumen in strictly legal principles and definitions. Dr. Führer collected together 84 verses ascribed to Bṛhaspati in the legal treatises of Aparārka and others with German translation and notes (Leipzig, 1879) and Dr. Jolly collected about 711 verses of Bṛhaspati on law and translated them in the Sacred Books of the East (vol. 33).

Yāj. (I. 4-5) enumerates Bṛhaspati among the writers on dharma, but he is probably referring to Bṛhaspati's work on politics. The com. on the Nītivākyāmṛta (p. 7) quotes the first verse of Bṛhaspati's Nītiśāstra.

We saw above how Bṛhaspati closely follows the extant Manusmṛti, how he pointedly refers to the text of Manu (notes 282-286) and therefore might by analogy be styled a vārtikakāra of Manu. In many places Bṛhaspati explains and illustrates the laconic treatment of Manu. Manu (8. 153) speaks of four varities of interest (Cakra, Kāla, Kārita, and Kāyika), but does not explain these terms. Bṛhaspati explains them clearly.[373] Manu (8. 49) enumerates five modes of recovering a debt (dharma, vyavahāra, chala, ācarita, bala) but leaves them unexplained ; Bṛhaspati devotes several verses to the explanation of these terms (vide Kullūka on Manu 8. 49). Bṛhaspati gives elaborate rules regarding partnership. Bṛhaspati enumerates nine ordeals (of fire, water, poison, balance, kośa, taptamāṣa, taṇḍulas, dharmādharma, phāla); while Manu barely alludes to two. Manu devotes only three verses to saṁvidvyatikrama (8. 219-221), but Bṛhaspati must have devoted at least a score of verses to this topic, as Aparārka alone quotes 17 verses of Bṛhaspati on this title.

373 Vide कुल्लूक on मनु 8. 153: तासां स्वरूपमाह बृहस्पतिः । कायिका कायसंयुक्ता मासमाद्या च कालिका । वृद्धेर्वृद्धिश्चक्रवृद्धिः कारिता ऋणिना कृता ॥

The order in which the topics of law appeared in Bṛhaspati can be settled with tolerable certainty from the quotations in Aparārka, Vivādaratnākara, Vīramitrodaya and others works. It was as follows:—the four stages of a law-suit, proof (kriyā, human of three sorts and divine), witnesses (of 12 kinds), documents (ten kinds), bhukti (possession), ordeals (nine), 18 titles, ṛṇādāna, nikṣepa, asvāmivikraya, saṁbhūya-samutthāna, dattāpradānika, abhyupetyāśuśrūṣā, vetanasya-anapākarma, svāmipālavivāda, saṁvid-vyatikrama, vikriyāsaṁpradāna, sīmāvivāda, pāruṣya (of two kinds), sāhasa (of three kinds), strīsaṁgrahaṇa, strīpuṁdharma, vibhāga, dyūta, samāhvaya, prakīrṇaka (otherwise called 'nṛpāśraya vyavahāra,' wrongs for which proceedings are set on foot by the king).

Bṛhaspati was probably the first jurist to make a clear distinction between civil and criminal justice.[374] He divided the eighteen titles into two groups, those springing from wealth (14 titles) and those springing from injury to beings (4 titles). This distinction was probably dimly perceived by even Gautama, when he says that in disputes based on injury there is no hard and fast rule about witnesses (i. e. about their interest in the subject of dispute).[375] Bṛhaspati like Nārada lays down the rule that a legal decision should not be arrived at merely on the basis of śāstra and that when a decision is devoid of reasoning, there is loss of dharma, for even a good man may be held to be a bad one or what is good may be held to be sinful in a judicial proceeding, just as Māṇḍavya was held to be a thief on a decision without thoughtful reasoning.[376] Bṛhaspati gives such elaborate definitions and rules about procedure from the filing of the plaint to the passing of the decree that he can very well stand comparison with modern legislators on the same subjects.

II. 1; compare नारद (व्यवहारमातृका chap. I. 42): यात्यचौरोपि चौरत्वं चौरश्चायात्यचौरताम्। अचौरश्चौरतां प्राप्तो माण्डव्यो व्यवहारतः॥ For the story of माण्डव्य, who kept silent, vide Ādiparva 107.

Nārada and Bṛhaspati agree very closely in several respects. For example, both speak of three kinds of proof, four parts of a judicial proceeding, almost the same defects of plaints, four kinds of answer, four divisions of the law of gift and their subdivisions, five modes of recovering debts, four kinds of sāhasa.

We have seen that Nārada departs from Manu in several essential matters. On the other hand Bṛhaspati follows Manu very closely. But he too differs on some points from Manu, for example, we saw above how Bṛhaspati dissents from Manu on the question of the divisibility of clothes &c. (note 285). He appears to differ from Manu as to the maximum interest allowed on corn, fruit, wool and beasts of burden.[377] Manu and Nārada are both silent as to the widow's right to succeed to her deceased husband's estate. But Bṛhaspati agreeing with Yājñavalkya makes her the first heir of her sonless husband.[378]

These considerations make it clear that Bṛhaspati is certainly later than Manu and Yāj. It is difficult to state his exact relationship to Nārada. He agrees more closely with Manu than Nārada does, but in some respects such as definitions and the rights of women he shows great advance over Nārada. So he is probably a contemporary of or not much later than Nārada. He employs the word nāṇaka.[379] He defines a dināra, also called "suvarṇa", as equal to twelve dhānakas and says that a dhānaka was equal to four aṇḍikas, an aṇḍikā being a copper paṇa weighing a *karṣa* and bearing a stamp.[380] This agrees with what Nārada says about dināra.

Dr. Jolly (S. B. E. vol. 33 p. 276) assigns Bṛhaspati to the 6th or 7th century A. D. But this is much later by several centuries than the evidence warrants. Kātyāyana was looked upon as an authoritative writer along with Nārada and Bṛhaspati by Viśvarūpa and Medhātithi. This position he could not have attained in a century or two. So he cannot be placed later than the 6th century. Kātyāyana in several places quotes Bṛhaspati as an authority. Aparārka quotes Kātyāyana as saying that according to Bṛhaspati pastures, ways, clothes that are worn on the body, debts (or books for use according to others) and what is set apart for religious purposes should not be partitioned.[381] Kātyāyana says that according to Bṛhaspati, that wealth which a man acquires by means of his learning after refuting an opponent in a contest with a stake for the winner is styled " vidyādhana " and is not liable to partition[382]; and what is acquired through valour &c. by persons that were taught in the family or learnt under their father should be partitioned among the brothers, according to Bṛhaspati. If a man falsely denies his liability and if only a part of the claim is brought home to him, then he should be made to pay the whole.[383] That the statement of a witness may be relied upon on a matter under his direct perception owing to his being near the plaintiff and the defendant and not otherwise; so says Bṛhaspati.[384] The foregoing examples show that Kātyāyana looked upon Bṛhaspati as an authority who must therefore have flourished several centuries before. Therefore Bṛhaspati cannot be placed later than the 4th century A. D. As he knew the extant Manusmṛti, was later than Yāj. and probably than Nārada, Bṛhaspati must have flourished between 200 and 400 A. D. This conclusion is strengthened by the fact that Viśvarūpa quotes, without making any difference, prose and verse passages of Bṛhaspati and thereby shows that in his opinion the jurist Bṛhaspati

(in verse) was identical with the political writer Bṛhaspati and was a very ancient writer in his day. Medhātithi (on Manu 9.153) quotes the verse "na pratigrahabhūr" (ascribed to Bṛhaspati by others) as Smṛtyantara. Bṛhaspati is cited in a few cases as referring to his own views in the third person[385]; sometimes he uses the first person also.[386] Nothing can be said about his country at present. In a well-known passage Bṛhaspati refers to the usages of the southern people, of the people in the Madhyadeśa, of the eastern and northern people.[387] In a striking and beautiful passage Bṛhaspati compares vyavahāra with yajña,[388] the king with Viṣṇu, the successful party with the sacrificer and the defeated party with the victim, the plaint and the reply to food and the *pratijñā* to the sacrificial offering (prepared from food), the śāstras to the three Vedas and the *sabhyas* to the priests in a sacrifice. Bṛhaspati seems to have been very fond of such long-drawn metaphors.[389]

The Smṛticandrikā quotes about seventy verses of Bṛhaspati in the Āhnika portion and about forty on Śrāddha. In the later works like the Parāśara-Mādhavīya, the Nirṇayasindhu and Saṁskāra-Kaustubha, the number of verses quoted from Bṛhaspati is much larger than even those quoted by the Smṛticandrikā. Those verses are quoted on such saṁskāras as puṁsavana, nāmakaraṇa, caula, upanayana, vivāha and also on āśauca and purification of dravyas. Even the Mitākṣarā quotes several verses of Bṛhaspati on matters

other than vyavahāra. For example the Mit. on Yāj. I. 210 quotes a verse of Bṛhaspati that a nivartana (of land) is equal to 30 daṇḍas in area (daṇḍa being seven cubits in length) and ten *nivartanas* are equal to a *gocarma*.[390] On Yāj. III. 17 the Mit. quotes two verses of Bṛhaspati about impurity on birth or death &c. On Yāj. III. 21 the Mit. cites the definition of deśāntara given by Bṛhaspati.[391] On Yāj. III. 24 the Mit. quotes Bṛhaspati's opinion that the period of mourning on the death of one's maternal grandfather, ācārya or śrotriya is three days. On Yāj. III. 253 the Mit. quotes Bṛhaspati's rule as to prāyaścitta for consciously drinking wine.[392] Vide also Mit. on Yāj. III. 30, 250, 254, 260, 290 for other quotations from Bṛhaspati.

The foregoing therefore establishes that Bṛhaspati was known at least to the Mit. and later writers as an expounder in verse not only of vyavahāra but also of other topics of dharma as well. As over a thousand verses of Bṛhaspati (including about 800 on vyavahāra) are quoted it appears that his work must have been an extensive one comprising several thousand verses. Such a work of Bṛhaspati has yet to be recovered.

The Mit. on Yāj. III. 261 quotes a Vṛddha-Bṛhaspati on the nine varieties of saṁkara.[393] Kullūka on Manu (9. 181) cites a verse of Vṛddha-Bṛhaspati about the eleven subsidiary sons (vide note 283 above, where the verse is ascribed to Bṛhaspati). Hemādri (Caturvarga vol. III, part 2, p. 472) quotes a Jyotir-Bṛhaspati on the prohibition of a śrāddha on the thirteenth tithi of the dark half. Aparārka on Yāj. II. 3-4 quotes three verses from Vṛddha-Bṛhaspati

38. Kātyāyana

Nārada, Bṛhaspati and Kātyāyana form a triumvirate in the realm of the ancient Hindu Law and procedure. The work of Kātyāyana on vyavahāra, like that of Bṛhaspati, has yet to be recovered. The following account is based on the quotations from Kātyāyana contained in about a dozen works from Viśvarūpa to the Vīramitrodaya.

Kātyāyana is enumerated as one of the expounders of dharma by Śaṅkha-Likhita, Yājñavalkya (I. 4-5) and Parāśara. A Kātya. is quoted as an authority in the Baudhāyanadharmasūtra (I. 2. 47). A Śrautasūtra and Śrāddhakalpa of the white Yajurveda are ascribed to Kātyāyana.

Kātyāyana appears to have taken Nārada and Bṛhaspati as his models in the order and treatment of the subjects to be dealt with in vyavahāra. He closely follows both the writers in terminology and technique. On several points he presupposes Nārada and expounds and elucidates the latter's dicta. For example, Nārada (Intro. chap. I. 10-11) lays down that vyavahāra has four pādas, each later one prevailing over the preceding, viz. dharma, vyavahāra, caritra, rājaśāsana (note 361) and then Nārada very briefly in one verse explains these four terms. Kātyāyana on the other hand devotes at least nine verses to the elucidation of the rule as to each succeeding one prevailing over its predecessor.[394] Nārada contains very little on the topic of strīdhana (dāyabhāga chap. verses 8-9). He merely enumerates the six kinds of strīdhana and then lays down the rule of succession. Kātyāyana's treatment of strīdhana has attained classical rank. It appears that he was probably the first to carefully define the several kinds of strīdhana (such as adhyagni, adhyāvahanika, prītidatta, śulka, anvādheya, saudāyika), to lay down woman's power of disposal over the several varieties of strīdhana and to prescribe lines of devolution as to strīdhana. The verses on this topic occurring in the nibandhas number about thirty.

394 Vide पृ. मा. vol. III, part I, pp. 16-17, and वी. p. 9-10. 180-181.

The leading nibandhas contain only a few quotations from Bṛhaspati on strīdhana. Hence it may be surmised that Kātyāyana probably was the first smṛti writer to give elaborate rules on this topic.

It has been already shown (notes 381-384) how Kātyāyana often quotes the views of Bṛhaspati. A few more examples may be added here. According to Bṛhaspati, says Kātyāyana, when a man who stands surety with others on a joint liability goes abroad, his son would have to pay the whole debt, but if the man dies then the son would be liable for his father's share only.[395] When cattle stray into fields, gardens, houses or cowpens, they may be, according to Bṛhaspati, caught hold of (by the ear &c.) or beaten.[396] According to Bṛhaspati, a man of the kṣatriya, vaiśya or śūdra caste may employ one of his own caste to do the work of a dāsa (slave or serf), but even a Brāhmaṇa could never employ another Brāhmaṇa in the same way.[397]

About a dozen nibandhas on vyavahāra quote about 900 verses of Kātyāyana on vyavahāra, the Smṛticandrikā alone citing about 600 of them. In these verses Kātyāyana refers at least a score of times to the views of Bhṛgu. It is remarkable that only a few of the views ascribed to Bhṛgu are found in the extant Manusmṛti. Kātyāyana says, according to Bhṛgu, whatever (ancestral) wealth was concealed by one coparcener from others, whatever was badly divided should be divided in equal shares when afterwards discovered (Parāśara-Mādhavīya III, p. 566). This may well be compared with Manu 9. 215. Kātyāyana says according to Bhṛgu, it is not Brāhmaṇa-murder to kill an ātatāyin who is foremost by his austerities, learning and caste. This has in view Manu 8. 360. Kullūka distinctly says that Kātyāyana simply explains the verse of Manu by referring to it as Bhṛgu's. On the other hand there are several places where the views ascribed to Bhṛgu find no counterpart in the extant Manu. According to

395 एकच्छायाश्रिते सर्वं दद्यात्तु प्रोषिते सुतः। मृते पितरि पित्र्यंशं परणं न बृहस्पतिः॥ परा. मा. III, p. 251.

397 क्षत्रविट्शूद्रधर्मस्तु समवर्णे कदाचन। कारयेद् दासकर्माणि ब्राह्मणं न बृहस्पतिः॥ वि. र. p. 152.

Bhṛgu in all *sāhasas* of the worst type the truth should be found out by means of divine proof (ordeals &c.) even though there may be witnesses.[398] There is nothing in the Manusmṛti corresponding with this. According to Bhṛgu the ordeals of balance &c. are prescribed for those who are suspected to be in league with marauders and who have incurred popular censure, but in such cases there is no undertaking (by the complainant to pay fine).[399] The Manusmṛti has not a word on this point. Household paraphernalia, beasts of burden, cattle, ornaments, slaves should be divided when discovered; if they are (alleged to be) concealed, the ordeal of kośa should be resorted to ; so says Bhṛgu.[400] Another important circumstance deserves to be noted. Kātyāyana several times refers to the views of Manu. Kātyāyana says that the view of Manu was that in certain charges (such as the commission of mahāpātakas) the ordeals for the accused were to be performed by good men.[401] According to Manu if a woman deserted her son, though he may be able (to pay), her strīdhana should be seized and the paternal debt should be paid thereout.[402] Manu declared, says Kātyāyana, that if animals be killed, the offender should offer (to the owner) another similar animal or its proper price (note 345 above where Parāśara also quotes it as Manu's view). All these views attributed to Manu by Kātyāyana are not found in the extant Manusmṛti. In certain places Kātyāyana refers to the views of the Mānavas ; e. g. according to the Gārgīyas and Mānavas if a bribe had already been paid, the person receiving it should be made to repay it and should be fined eleven times as much ;[403] according to

the Mānavas thieves caught red-handed with their booty should be at once banished.[404] As regards both these references, the teaching of the Manusmṛti seems to be different ; vide Manu 9. 231 and 270 respectively. These facts about Kātyāyana's references to Bhṛgu and Manu raise several difficult questions, whether Bhṛgu and Manu stand for two entirely different works or for the same work and whether he refers to some other version of the Manusmṛti ascribed to Bhṛgu. In my opinion he is not referring to two separate works, and that he had before him a version of the Manusmṛti promulgated by Bhṛgu but somewhat different from and probably larger than the present Manusmṛti.

In the *nibandhas* several verses are ascribed to Kātyāyana along with Manu, Yājñavalkya and Bṛhaspati. For example, the well-known verse about the sixfold division of strīdhana (adhyagnyadhyāvahanikam &c.) is ascribed by the Dāyabhāga to Manu and Kātyāyana. The half-verse "varṇānāmānulomyena dāsyam na pratilomataḥ" is the same in both Yājñavalkya (II. 183) and Kātyāyana. The Vīramitrodaya (p. 140) ascribes a verse to Bṛhaspati and Kātyāyana, in which the opinion of Bṛhaspati is cited. There is very close agreement between the definitions proposed by the two last writers of dharma, vyavahāra, caritra, and rājaśāsana. Besides Manu (or Mānavas), Bṛhaspati and Bhṛgu, Kātyāyana cites the views of several other writers on dharma. For Gārgyas and Gautama vide notes 403 and 404 above. He says, according to Kauśika, powerful robbers were to be guarded by chains of iron, were to be low-fed and were to undergo hard labour for the state till death (Aparārka p. 849). He quotes the view of Likhita that where a woman is deprived of food, raiment and dwelling (by her husband's coparceners) she would be entitled to demand her own (strīdhana) and a share from the coparceners. In one case (Aparārka p. 755). a verse is cited as Kātyāyana's in which Kātyāyana himself is named (Parāśaramādhavīya III. p. 235).

Kātyāyana contains the same advanced views about law and rules of procedure as are found in Nārada and Bṛhaspati. He is even in

404 मानवाः सह एवाहुः सहोढानां प्रवासनम् । गौतमानामनिष्टं यत्प्राण्युच्छेदाद्विगर्हितम् ॥ वि. र. 332. It is not unlikely that the correct reading is प्रमापणं for प्रवासनं, as the immediately following view of गौतम suggests. The words of मनु are सहोढं सोपकरणं चातपेदविचारयन्.

advance of these two writers in certain matters, such as definitions in general and the elaboration of rules about strīdhana. He gives numerous definitions, such as those of vyavahāra, prāḍvivāka, stobhaka, dharmādhikaraṇa, tīrita and anuśiṣṭa, sāmanta &c. He seems to have been the first to invent some new terms. For example, he defines paścātkāra as a judgment given in favour of the plaintiff after a hot contest between the plaintiff and the defendant, while the term *jayapatra* is restricted by him to the judgment given on admission by the defendant or a judgment dismissing the suit on various grounds.[405] He lays down a stringent rule that if a man abandons a ground of defence or attack and puts forward a less cogent one, he would not be allowed to put forward again the stronger ground after a decisive judgment of the court.[406] This resembles the 4th explanation to section 11 of the Indian Civil Procedure Code (1908) about *res judicata*. The verses about kārṣāpaṇa and dīnāra quoted above (note 368) from Nārada (pariśiṣṭa verses 58-60) are ascribed to Kātyāyana by the Smṛticandrikā.

The date of Kātyāyana can be settled only approximately. He is certainly much later than Manu and Yājñavalkya. As shown above he presupposes Nārada and regarded Bṛhaspati as a very leading authority on vyavahāra. Hence his upper limit is the 3rd or 4th century A. D. Viśvarūpa quotes eight verses as Kātyāyana's by name (vide on Yāj. II. 5, 6, 47, 63, 281) on such topics of Vyavahāra as the defects of the plaint, the contents of the plaint, the liability for the debts of a deceased person, payments of debts of honour (satyaṁkāra), punishment for abortion, grievous hurt and homicide of a Brāhmaṇa woman. Medhātithi (on Manu 7. 1) ascribes to Kātyāyana the rule that in case of conflict between the dictates of dharmaśāstra and arthaśāstra the king should prefer the former. Medhātithi on Manu (VIII. 216) speaks of Kātyāyana-sūtra, appears to quote a portion of it in prose and explains it.[407] Medhātithi

says that Kātyāyana extended the maxim of the trader carrying merchandise (bhāṇḍavāha-vaṇik maxim) to all similar transactions. All known quotations of Kātyāyana are in verse. When Medhātithi speaks of a sūtra and quotes a portion of it (as "vā" and "iti" after "nivarteta" indicate) in prose, we must either suppose that he is referring to some other work of Kātyāyana than the one in verse from which hundreds of verses are cited by other writers or that Kātyāyana's work on vyavahāra also contains some prose passages. As hardly any other writer quotes a prose passage of Kātyāyana on vyavahāra, the second alternative appears somewhat unlikely. Viśvarūpa and Medhātithi regarded Kātyāyana as an authoritative *smṛtikāra* along with Nārada and Bṛhaspati. This position he could not have attained in less than a few hundred years. Therefore the lowest limit to which Kātyāyana can be assigned is the 6th century. Hence it may be said that Kātyāyana flourished between the 4th and 6th century A. D.

The Vyavahāramātṛkā (p. 307) quotes a Bṛhat-Kātyāyana on the question of proof. The Dāyabhāga mentions a Vṛddha-Kātyāyana. The Sarasvatīvilāsa also quotes verses of Vṛddha-Kātyāyana on rescission of purchase and other topics (p. 320). In the present state of our knowledge it is very difficult to say whether these two are different works. The Caturvarga-cintāmaṇi (vol. III, part 2, p. 657) speaks of Upakātyāyana. Aparārka quotes a verse from śloka-Kātyāyana which is not found in the Karmapradīpa (Jivananda's ed.), but appears to be a summary of a prose passage quoted as Kātyāyana's immediately before by Aparārka.

In Jivananda's collection of smṛtis (part I, pp. 603-644) there is one of Kātyāyana in three prapāṭhakas and 29 khaṇḍas and about five hundred verses. The same work is printed as Gobhilasmṛti in the Ānandāśrama collection (pp. 49-71). It contains also a few prose passages in the 12th, 13th and 14th khaṇḍas. The prevailing metre is Anuṣṭubh, a few verses being in the Indravajrā and other metres. The work is styled the Karmapradīpa of Kātyāyana. The opening verse justifies this name when it states that like a lamp the work will clearly show the mode of performing certain rites treated by Gobhila and other rites which are not clearly elucidated.[408] The contents of this work are briefly as follows :— how

408 अथातो गोभिलोक्तानामन्येषां चैव कर्मणाम् । अस्पष्टानां विधिं सम्यग्दर्शयिष्ये प्रदीपवत् ॥

to wear the sacred thread; sipping water and touching various limbs with water; the worship of Gaṇeśa and fourteen mātṛs in every rite; kuśas; śrāddha details; consecration of sacred fires; details about araṇīs, sruc, sruva; rules about cleansing the teeth and bathing; saṁdhyā; prāṇāyāma, muttering of Vedic *mantras*; tarpaṇa of gods and manes; the great daily *yajñas*; who is to offer śrāddha; rules about periods of impurity due to death; duties of wife; śrāddhas of various kinds.

The Karmapradīpa mentions by name several authors. It very frequently cites the views of Gobhila (pp. 603, 626, 638) and Gautama (pp. 619, 620, 626, 630, 636, 639). The Karmapradīpa as the opening verse says is intimately related to the Gobhila Gṛhya-sūtra. It distinctly says that as Gobhila did not dilate upon the details as to time and procedure of goyajña and vājiyajña, Kātyāyana dilates upon them. This is borne out by the Gobhila gṛhya-sūtra.[409] Another[410] passage of Kātyāyana about the Aṣṭakas is based upon the very words of the Gobhila gṛhya. Frequent reference is made to the views of Vasiṣṭha on the worship of Mātṛs (p. 605), on śrāddha (pp. 608, 625). Vide also p. 642 (28. 16). Among the other authors named are Nārada on the sticks for dantadhāvana (p. 615), Bhārgava (probably Uśanas) on p. 640, Śāṇḍilya and Śāṇḍilyāyana on p. 626. Kātyāyana is named in several places (pp. 624, 627, 638) and once the first person is used (as in "mamāpyetad hṛdi sthitam" p. 643). The Kātyāyanasmṛti quotes the verse of Manu (III. 70) on the five great *yajñas*. On p. 633 four verses forming the consolation to be offered to the relatives of a person departed are the same as Yāj. (III. 8-11) and one verse in the same context occurs in the Mahābhārata (Śāntiparva

27. 31 and other places).[411] On p. 631 Kātyāyana speaks of Rāma having performed yajñas taking as his spouse the golden image of Sītā.

The question is:—what is the date of this Kātyāyanasmṛti (Karmapradīpa) and whether it is the work of Kātyāyana the great jurist. The Mit. (on Yāj. I. 254) quotes a verse as Kātyāyana's which occurs in Jivananda's text (p. 624 verse 20); similarly the Mit. quotes two verses as Kātyāyana's (on Yāj. III. 247) which have a place in the Karmapradīpa (Jivananda p. 634 verses 4-5). Scores of verses cited as Kātyāyana's by Aparārka (on ācāra and prāyaścitta) are found in the Karmapradīpa. For example, *vide* Aparārka p. 43 (three verses) and Karmapradīpa (p. 605, 1110-12), Aparārka p. 51 (three verses about samidh) and Karmapr. (p. 613, 8. 17-19), Aparārka p. 135 (four verses about bathing in rivers) and Karma. (p. 615, 10. 5-7 and 14), Aparārka p. 532 (four verses on śrāddha in which Kātyāyana himself is cited as an authority) and Karma. (p. 624, 16. 16-19), Aparārka p. 872 (six verses) and Karma. (21. 2-7 p. 632), Aparārka p. 1066 (three verses about an *agnihotrin* being guilty of mahāpātaka) and Karma. (23. 4-6 p. 634). The Smṛticandrikā also quotes profusely from Kātyāyana on *ācāra*, śrāddha etc. and cites from the Karmapradīpa by name passages which occur in Jivananda's edition. The above references show that in the eyes of the Mitākṣarā and Aparārka the Karmapradīpa was an authoritative work. Therefore it follows that it must have been composed centuries before the 11th century A. D. It is however remarkable that several quotations ascribed to Kātyāyana in the Mitākṣarā, Aparārka and other works are not found in the Karmapradīpa. For example, the Mitākṣarā (on Yāj. III. 242) cites Kātyāyana's verse about five varieties of lapses in conduct viz. mahāpātaka, atipātaka, pātaka, prāsaṅgika, upapātaka and on Yāj. III. 260 quotes a verse of Kātyāyana about what are atipātakas. These are not to be traced in the Karmapradīpa printed by Jivananda. Similarly Aparārka (pp. 94-95) quotes three verses of Kātyāyana that are very interesting but are not found in

411 सर्वे क्षयान्ता निचयाः पतनान्ताः समुच्छ्रयाः । संयोगा विप्रयोगान्ता मरणान्तं हि जीवितम् ॥

Jivananda's edition.[412] Later works like the Nirṇayasindhu, the Saṁskāramayūkha, the Madanapārijāta quote numerous verses of Kātyāyana on upanayana, marriage and other saṁskāras which we vainly seek to find in the Karmapradīpa. Hence it follows that there was some large work of Kātyāyana of which the Karmapradīpa is either an abridgment or only a portion.

The next question is whether Kātyāyana the jurist and the author of the Karmapradīpa are identical. There are not sufficient data to identify the two. The only fact that points to the identity is that such eminent and early writers as Vijñāneśvara and Aparārka appear to make no distinction between the two. Besides the Karmapradīpa is also an early work. Against this it has to be remembered that Viśvarūpa, probably the most ancient of all extant commentators, nowhere quotes Kātyāyana on ācārā and prāyaścitta. This absence of quotations is not a very cogent argument; still it raises a doubt in one's mind whether a work of Kātyāyana on ācāra and other non-jural topics was known to Viśvarūpa.

The other principal versified smṛtis will now be described in (Sanskrit) alphabetical order.

39. Aṅgiras

From Viśvarūpa downwards Aṅgiras is quoted very frequently on all topics except that of civil law (vyavahāra). Aṅgiras is one of the writers on dharma enumerated by Yāj. Viśvarūpa (on Yāj. I. 9) states that according to Aṅgiras a *pariṣad* may comprise 121 Brāhmaṇas. On Yāj. I. 50 Viśvarūpa quotes a verse of Aṅgiras that what is done according to one's own will without following the dictates of śāstra is fruitless.[413] On Yāj. III. 248 Viśvarūpa says that the *vrata* called Vajra was prescribed by Aṅgiras for Brāhmaṇas guilty of deadly sins. Viśvarūpa (on Yāj. III. 265) quotes two verses of Aṅgirās on the prāyaścitta for killing the wife of a Brāhmaṇa who has kindled the sacred fires, for killing wives of

[412] वरयित्वा तु यः कश्चिन्मणश्येत्पुरुषो यदा । रक्तागमांक्षीनतीत्य कन्यान्यं वरयेद्वरम् ॥ प्रदाय गच्छेच्छुल्कं यः कन्यायाः स्त्रीधनं तथा । धार्या सा वर्षमेकं तु देयान्यस्मै विधानतः ॥ पूर्वदत्ता तु या कन्या अन्येनोढा यदा भवेत् । संस्कृतापि प्रदेया स्यादन्यस्मै पूर्व प्रतिश्रुता ॥.

[413] स्वस्वाभिप्रायकृतं कर्म यत्तु धर्मविवर्जितम् । क्रीडाकर्मैव बालानां तत्सर्वं निष्प्रयोजनम् ॥

other Brāhmaṇas and Kṣatriyas and Vaiśyas. On Yāj. III. 266 he quotes two verses of Aṅgiras laying down prāyaścitta for killing certain beasts and birds, wherein Aṅgiras himself is mentioned with honour (bhagavān). Aparārka (pp. 22-23) quotes thirteen verses from Aṅgiras on the constitution of *pariṣad*, wherein such terms as chāturvidya, vitarkī, aṅgavid, dharmapāṭhaka are explained and the last of which says that a *pariṣad* sitting in judgment over those who are guilty of mahāpātakas may consist of hundreds. The Mitākṣarā (on Yāj. I. 86) quotes several verses on the practice of *satī* and ascribes them to both Śaṅkha and Aṅgiras.[414] Aparārka (pp. 109, 112) quotes four other verses on the same practice, one of which is in the Indravajrā metre and another prohibits a Brāhmaṇa wife from following that practice. Medhātithi (on Manu. V. 157) quotes the view of Aṅgiras on *satī* and disapproves of it. The Mitākṣarā, Haradatta and others quote numerous verses of Aṅgiras on āśauca and prāyaścitta. Haradatta on Gautama (20. 1) quotes a verse of Aṅgiras about the seven *antyajas*.[415] Viśvarūpa (on Yāj. III. 237) quotes a sūtra of Sumantu in which Āṅgirasa is cited as an authority. The Śuddhi-mayūkha quotes a verse of Aṅgiras which relies upon Śātātapa.[416] The Smṛticandrikā quotes Aṅgiras on the enumeration of Upasmṛtis (vide note 260 above). The Smṛticandrikā also contains a few prose quotations from Aṅgiras; the same work cites a verse of Aṅgiras holding the dharmaśāstra of Manu as the supreme guide.[417]

The Aṅgiras-smṛti (in Jivananda part I, pp. 554-560) in 72 verses is probably an abridgment. It lays down prāyaścittas for various occasions, such as taking food and drink from antyajas, for cruelly beating or causing various injuries to cows. It also lays down various rules for the wearing of the dark cloth (nīlīvastra) by women. It cites Aṅgiras and Āpastamba by name. The penultimate verse condemns those who rob women of their wealth.

414 One of them is the well known verse तिस्रः कोट्यर्धकोटी च यानि लोमानि मानुषे । तावत्कालं वसेत्स्वर्गे भर्तारं यानुगच्छति ॥

415 चण्डालः श्वपचः क्षत्ता सूतो वैदेहिकस्तथा । मागधायोगवौ चैव सप्तैतेन्त्यावसायिनः ॥

416 सर्वेषामेव वर्णानां सूतके मृतके तथा । दशाहाच्छुद्धिरत्तेषामिति शातातपोब्रवीत् ॥

417 यत्पूर्वं मनुना प्रोक्तं धर्मशास्त्रमनुत्तमम् । नहि तत्समतिक्रम्य वचनं हितमात्मनः ॥ स्मृतिच० (आह्निक).

There are several mss. in the Deccan College Collection which contain a varying number of verses on prāyaścitta agreeing more or less with Jivananda's text. For example, No. 53 of 1879-81 contains about one hundred verses, No. 205 of 1882-83 contains 54 verses, while No. 65 of Viśrāmbāg collection and No. 83 of 1895-1902 contain only 32 ; No. 81 of 1884-86 is styled Bṛhad-Aṅgiras and contains 151 verses, many of which are identical with those in the Calcutta text.

The Mitākṣarā (on Yāj. III. 277) and the Smṛtiratnāvali of Vedācārya (I. O. cat. No. 1552 p. 475) quote a Bṛhad-Aṅgiras and the Mitākṣarā also quotes a Madhyama-Aṅgiras several times (on Yāj. III. 243, 241, 258, and 260).

40. Ṛsyaśṛṅga

This is a writer who is frequently quoted on ācāra, āśauca, śrāddha, and prāyaścitta by the Mit., Aparārka, Smṛticandrikā and other works. Aparārka (p. 724) quotes as Ṛsyaśṛṅga's a verse ascribed to Śaṅkha in the Mitākṣarā (on Yāj. II. 119) and other works, which states that when one coparcener recovers with his own efforts family property that was lost to the family, he gets a fourth share of it and the others become sharers in the rest.[418] The Smṛticandrikā (I. p. 32) quotes 'api vāsasā yajñopavītārthān kuryāt tadabhāve trivṛtā sūtreṇa', which is in prose.

41. Kārsnājini

This writer is quoted by the Mit. (Yāj. III. 265 three verses), Aparārka, Smṛticandrikā and other works mostly on śrāddha. Aparārka (p. 138) quotes a verse from him which enumerates the seven sons of Brahmā, Sanaka, Sanandana, Sanātana, Kapila, Āsuri, Voḍha (?) and Pañcaśikha. Aparārka (p. 424) quotes a verse which refers to the two signs of the Zodiac, Kanyā, and Vṛścika.

42. Carurvimśatimata

There are two Mss. of this work in the Deccan College Collection (No 244 of A. 1881-1882 and 111 of 1895-1902). It contains 525 verses. The work is so called because it embodies the essence of the teachings of 24 sages, Manu, Yājñavalkya, Atri, Viṣṇu,

[418] पूर्वनष्टां तु यो भूमिमेकश्चेदुद्धरेत् क्रमात् । यथांशं तु लभन्तेन्ये दत्त्वांशं तु तुरीयकम् ॥

oth/asiṣṭha, Vyāsa, Uśanas, Āpastamba, Vatsa, Hārīta, Guru qu(Bṛhaspati), Nārada, Parāśara, Gārgya, Gautama, Yama, Baudhāyana, ce/Dakṣa, Śaṅkha, Aṅgiras, Sātātapa, Sāṅkhya (Sāṅkhyāyana?), F Saṁvarta. The subjects treated of are:—The usages of the varṇas and āśramas, śauca, *ācamana*, cleansing the teeth, bath, prāṇāyāma, repeating the Gāyatrī, study of the Vedas, marriage, agnihotra, five great daily yājñas, means of livelihood, forest hermits, saṁnyāsins, duties of Kṣatriyas and the other two varṇas, prāyaścittas for the deadly sins and other lesser misdeeds, means of livelihood, śrāddha, āśauca (on birth and death).

The work often quotes the views of Uśanas, Manu, Pārāśarya, Aṅgiras, Yama, Hārīta. It quotes Manu III. 5 (asapiṇḍā ca yā etc.) and Manu 12. 95 (yā vedabāhyāḥ smṛtayaḥ.). Two other verses which it contains are indicated as interpolated in several editions of Manu.[419] It says that the teachings of Arhat, Cārvāka and Buddhas delude people.[420] Its position is that whatever is not found in the Veda or the Purāṇas, the Rāmāyaṇa, or Mahābhārata or in the śāstras of Manu and others is as good as non-existent.[421]

The Caturviṁśatimata is frequently quoted by the Mit., Aparārka and later works, but not by Viśvarūpa and Medhātithi. It was probably compiled about the time when the latter two writers flourished. Aparārka (p. 1121) quotes a prose passage from the work on the prāyaścitta for a dvijāti procreating children on a Śūdra wife. This passage could not be traced in the two mss. referred to above.

The portions of the work on saṁskāra and śrāddha together with the commentary of Bhaṭṭoji, son of Lakṣmīdhara, have been

published in the Benares Sanskrit Series (Nos. 137 and 139). The commentary is a very learned one and refers to a host of writers. This commentary is in some mss. ascribed to Rāmacandra (vide I. O. cat. No. 1554, p. 475).

43. Dakṣa

Dakṣa is one of the writers on dharma enumerated by Yāj. Viśvarūpa quotes verses of Dakṣa several times, viz. on Yāj. 1. 17 (on clods of earth for purifying the body), on Yāj. III. 30 (two verses on āśauca), on Yāj. III. 66 (about a parivrājaka), on Yāj. III. 191 (about padmāsana). The Mit. (on Yāj. I. 89) quotes a half verse of Dakṣa to the effect that a dvija should not remain unattached to an āśrama (i. e. without a wife in the context) even for a moment; on Yāj. III. 58 two verses about bhikṣus; on Yāj. III. 243 (one verse). Aparārka cites numerous verses of Dakṣa on ācāra, āśauca, śrāddha and similar topics. In one case (p. 368) he attributes a prose passage to Dakṣa about the gift of gold.[422] Two of Dakṣa's verses most frequently quoted by writers on vyavahāra are those that lay down what nine things cannot be the subjects of gift.[423]

In Jivananda's collection there is a Dakṣasmṛti (part II, pp. 383-402) in seven chapters and 220 verses (vide also Ānandāśrama collection pp. 72-84). The principal subjects treated of are:— Four āśramas, two kinds of brahmacārins; the daily round of duties for dvijas; various subdivisions of actions, nine karmans, nine vikarmans, nine actions that should be concealed, nine acts that should be made public, nine things that should not be gifted; gifts; eulogy of a good housewife; śauca of two kinds; impurity due to birth and death; Yoga and its six aṅgas viz. prāṇāyāma, dhyāna, pratyāhāra, dhāraṇā, tarka and samādhi, maithuna of eight kinds to be avoided by ascetics, duties of bhikṣu, dvaita, and advaita.

This smṛti is certainly a very old one. All the quotations from Dakṣa cited by Viśvarūpa occur in the printed Dakṣa (vide pp. 395,

422 सुवर्णमेव स्वर्णमस्य च देशकालपात्रसुवर्णपरिमाणाश्च फलविशेषः। अपरार्क.

'396, 384, 397 which reads 'na pathyāśanād yogo'). Similarly all the quotations in the Mit. from Dakṣa are found in the Calcutta text. Aparārka contains over forty verses from the printed Dakṣa, though there are a few verses cited by him as Dakṣa's which are not found therein. The Smṛticandrikā quotes about ten verses of Dakṣa on woman which are all found in the 4th chap. of the Calcutta text.

In the Deccan College collection there is a ms. of Dakṣa (No. 120 of 1895-1902) which contains 197 verses on the same topics as above, many of which are identical with the Calcutta text. The Bombay University has also a similar ms. Vide I. O. cat. No. 1320 p. 385 for a similar ms. in 197 verses.

44. Pitāmaha

Pitāmaha is enumerated among writers on dharma in a verse of Vṛddha-Yājñvalkya quoted by Viśvarūpa. The Smṛti of Pitāmaha is drawn upon mostly on vyavahāra. Viśvarūpa cites (on Yāj. I. 17) a verse from him on śauca.[424] Mit. and Aparārka quote verses from Pitāmaha only on vyavahāra and specially on ordeals. The Smṛticandrikā quotes about ten verses on āhnika, 130 on vyavahāra and only a few on śrāddha. Pitāmaha regards the Vedas with the aṅgas, Mīmāṁsā, the smṛtis, Purāṇa and Nyāya system as dharmaśāstras.[425] Pitāmaha like Bṛhaspati enumerates nine kinds of ordeals,[426] while Yāj. and Nārada name only five, though the latter seems to have known two more, viz. taṇḍula and taptamāṣa. The Smṛticandrika quotes a dozen verses about 50 *chalas* on which a king took action without any complaint.[427] Pitāmaha seems to have followed Vyāsa in defining documents called krayapatra, sthitipatra, saṁdhipatra, viśuddhipatra.[428] The Smṛticandrikā cites

424 त्रिषु ये नोपनीयन्ते शूद्राः सौधन्वनाः स्त्रियः । गन्धलेपापक (र्षणं ?) तेषां शौचं मृदाम्भसा ॥

425 वेदाः साङ्गास्तु चत्वारो मीमांसा स्मृतयस्तथा । एतानि धर्मशास्त्राणि पुराणं न्यायदर्शनम् ॥ अपरार्क p. 601; compare याज्ञ. I. 3.

426 अष्टमं फालमित्युक्तं नवमं धर्मजं भवेत् । दिव्यान्येतानि सर्वाणि निर्दिष्टानि स्वयंभुवा ॥ quoted by अपरार्क p. 694.

427 छलानि चापराधांश्च पदानि नृपतेस्तथा । स्वयमेतानि गृह्णीयान्नृपस्त्वावेदकैर्विना ॥ स्मृतिच.

428 Vide परा. मा. vol. III. p. 128 and स्मृतिच०.

Pitāmaha for an enumeration of the 18 prakṛtis viz. washerman, leather worker, etc.[429] The same work states that according to Pitāmaha the titles of law to be taken cognisance by the king himself were twenty-two. In the hall of justice, he says, there should be eight constituents viz. the scribe, the accountant, śāstra, the sādhyapāla, the assessors, gold, fire and water.[430] Some of the other noteworthy dicta of Pitāmaha are:—a suit should be[431] first tried before the village (pancāyat), then before the town (court of appeal), then before the king; between litigants of the same country, town, societies, cities and villages, the decision should be arrived at according to their own peculiar conventions and usages, but when there is a dispute between these and strangers, the decision must be according to the śāstra; possession[432] in order to be recognised by the courts as decisive must have five characteristics, it must have title, long duration, it must be uninterrupted, it must not have been impeached and it must be before the eyes of the opponent; a private document[433] under one's own hand is inferior to a *jānapada* (a publicly written and attested) deed, the latter is inferior to a royal edict, this last is inferior to possession continued for three generations.

Pitāmaha is later than Bṛharpati,[434] as he cites the latter's view that a litigation between members of the same village, society, town, guild, caravan or army must be decided according to their peculiar usages. Therefore Pitāmaha must be assigned to some date between the 4th and 7th century A. D.

45. Pulastya

Pulastya is one of the expounders of dharma enumerated by Vṛddha-Yājñavalkya. Viśvarūpa quotes a verse from him on śārīra-śauca.[435] The Mit. (on Yāj. I. 261) cites a verse from Pulastya that a Brāhmaṇa should principally use ascetic's food (i. e. vegetable food) in śrāddha, that kṣatriyas and vaiśyas should use meat and śūdras honey.[436] The Mit. (Yāj. III 253) quotes two verses of Pulastya who enumerates eleven intoxicating drinks together with *surā* as the twelfth.[437] Aparārka quotes several verses from Pulastya on saṁdhyā, śrāddha, āśauca, duties of yatis, prāyaścitta. Aparārka quotes two verses from Pulastya propounding the view that a combination of jñāna and karma is the correct view.[438] The first of these verses is ascribed by him to Yoga-Yājñavalkya elsewhere (note 336). The Smṛticandrikā quotes about forty verses from Pulastya on āhnika and śrāddha. In one place it quotes Pulastya on the efficacy of bathing on Sunday, Tuesday, and Saturday.[439] In another place it refers to the *japa* of Rāma, Paraśurāma, Nṛsiṁha, Trivikrama.

The Dānaratnākara of Caṇḍeśvara cites a prose text from Pulastya on the gift of deer-skin.[440]

The Pulastya-smṛti must have been composed between 4th and 7th century A. D.

46. Pracetas

Pracetas finds a place among the sages enumerated by Parāśara though not in Yājñavalkya. In both Mit. and Aparārka there are passages in prose and verse ascribed to Pracetas on daily duties, śrāddha, āśauca, prāyaścitta. The Mit. (on Yāj. III. 27) quotes a verse from Pracetas saying that workmen, artisans, physicians, male and female slaves, kings, royal officers have not to observe periods of impurity[441] (on death). This verse is cited as a smṛti by Medhātithi on Manu V. 60 without ascribing it to Pracetas. So Medhātithi looked upon Pracetas as equally authoritative with Manu, Viṣṇu and others.

The Mit. (on Yāj. III 20, 263-64), Haradatta (on Gautama 22. 18) and Aparārka frequently cite verses from Bṛhat-Pracetas on āśauca and prāyaścitta. The Mit. and Aparārka also quote verses on the same topics from Vṛddha-Pracetas.

A few prose quotations from Pracetas are noted in the Smṛti-candrikā and by Haradatta (on Gautama 23. 1).

47. Prajāpati

Prajāpati is cited as an authority by the Baudhāyanadharmasūtra (II. 4. 15 and II. 10. 71). Vasiṣṭha several times quotes Prājāpatya ślokas (viz. III. 47, XIV 16-19, 24-27, 30-32). It has been shown above that most of these verses are found in the Manusmṛti or have close correspondence with verses of Manu. So it is not unlikely that both the writers of dharmasūtras mean Manu by Prajāpati.

In the Ānandāśrama collection (p. 90-98) there is a smṛti of Prajāpati in 198 verses on the various details of śrāddha, such as the time, place, the persons authorised to perform, proper food, Brāhmaṇas to be invited etc. The prevailing metre is Anuṣṭubh, but there are nine verses in the Indravajrā, Upajāti, Vasantatilakā (verse 137) and Sragdharā (verse 96). It speaks of Kalpaśāstra, smṛtis, dharmaśāstra, purāṇas. It contains a verse referring to the Kanyā and Vṛścika (scorpion) signs of the zodiac, which is almost the same as a verse of Kārṣṇājini.

[441] कारवः शिल्पिनो वैद्या दासीदासास्तथैव च । राजानो राजभृत्याश्च सद्यःशौचाः प्रकीर्तिताः ॥

The Mit. (on Yāj. III. 25 and 260) quotes verses of Prajāpati on āśauca and prāyaścitta. Aparārka cites verses of Prajāpati on purification of various substances, śrāddha, witnesses, ordeals and āśauca. None of these is traced to the printed text of Prajāpati. Aparārka (p. 952) gives a long prose text of Prajāpati on the four orders of parivrājakas, viz. kuṭīcaka, bahūdaka, haṁsa, paramahaṁsa. Aparārka (p. 542) cites a verse of Laugākṣi which refers to the view of Prajāpati that the son of a putrikā was to offer piṇḍas to his mother by the gotra of his maternal grand-father.[442] Aparārka, Smṛticandrikā, Parāśara-Mādhavīya and other works quote several verses of Prajāpati on vyavahāra. Witnesses are of two kinds, kṛta and akṛta. In this he seems to have followed Nārada (ṛṇādāna, verse 149). Prajāpati lays down the characteristics of valid reply (uttara) of the defendant and defines[444] the four varieties of uttara. The Parāśara-Mādhavīya cites several verses of Prajāpati on ordeals. Prajāpati recognised the right of the sonless widow to succeed to her husband's wealth[445] and enjoined on her the duty of offering śrāddha every month and year to her husband's manes and to honour his relatives.[446]

48. Marīci

This sage is relied upon as an authority by the Mit., Aparārka, Smṛticandrikā on Āhnika, Āsauca, Śrāddha, Prayaścitta and Vyavahāra. Aparārka quotes several verses on *tarpaṇa* one of which speaks of Sunday.[447] Marīci disallows bathing in the rivers in the months of Śrāvaṇa

and Bhādrapada.[448] Marīci made a very near approach to the modern conceptions underlying the Transfer of Property Act. 'Completeness is not attained without writing in the transactions of sale, mortgage, partition and gift of immoveable property'.[449] If a buyer purchases a chattel before a row of merchants and to the knowledge of the king's officers and in broad daylight, he is free from blame and gets back his money (if the thing turns out to be another's property), while if the price (paid by a buyer for a chattel) cannot be recovered (from the vendor who sells without title) owing to the vendor's address being not known, the loss should be apportioned between the buyer and the original owner of the chattel.[450] Marīci divides ādhi into four varieties, bhogya, gopya, pratyaya, ājñādhi.

It is to be noted that Aparārka (p. 908) quotes a prose passage of Marīci on āśauca.

49. Yama

The Vasiṣṭha-dharmasūtra (18. 13-15 and 19. 48) cites four ślokas of Yama and quotes (11. 20) one verse in which Yama is spoken of as an authority. All the ślokas except one are found in Manu.[451] Vasiṣṭha quotes a śloka of Prajāpati wherein Yama's view

The last two are almost the same as मनु IV. 80-81 and the first is a paraphrase of आप. श्रौ. is set forth. Yama is one of the sages enumerated in the list of Yājñavalkya. Govindarāja (on Manu 5. 16) and Aparārka quote a verse of Śaṅkha wherein Yamas' view that the flesh of certain birds could be eaten is referred to.[452] Aparārka (p. 1231) also cites a verse of Śaṅkha in which the view of Bhagavān Yama that one should save one's life in all ways (even by incurring sin) is relied upon.

In Jivananda's collection (part I. pp. 560–568) there is a smṛti of Yama in seventyeight verses on prāyaścitta and purification (śuddhi). In this smṛti Yama himself is cited in the third person (verse 65). One verse (33) refers to the view of Bhāsvati (son of the sun, by which may be meant either Manu or Yama himself).[453] Some of the verses are identical with those of Manu (e. g. verses 26, 28 are the same as Manu 11. 178 and 3. 19). Verse 44 is in the Upajāti metre. In the Ānandāśrama collection there is a Yamasmṛti in 99 verses on prāyaścitta, śrāddha, and purification. Most of the topics of this smṛti are the same as those of the Calcutta text, but most of the verses are not identical. A few verses are found in both, e. g. the verses about the seven lowest castes[454] (antyajas). Verse 11 quotes the view of Śātātapa. This smṛti contains the well-known text that a woman passes on marriage into the gotra of her husband, which is cited by the Mit. (on Yāj. I. 254).[455] In the same collection there is a smṛti of Bṛhad-Yama (pp. 99-107). It is divided into five chapters and contains 182 verses. It deals with prāyaścittas for various lapses, purification from various kinds of contacts (śuddhi), śrāddha, partition and a few matters of medical procedure. In this smṛti Yama is frequently cited by name. Śātātapa is cited on partition (V. 20). Many of the verses of this text are identical with those of Yama in Jivananda's text. For example, Jivananda (p. 561) verses 15-17 are the same

452 तित्तिरिं च मयूरं च लावकं च कपिञ्जलम् । वाधीणसं वर्तकं च भक्ष्यानाह यमः सताम् ॥ (सदा v. l.) अपरार्क p. 1167.

454 रजकश्चर्मकारश्च नटो बुरुड एव च । कैवर्तमेदभिल्लाश्च सप्तैते अन्त्यजाः स्मृताः ॥ Jivananda verse 54, Ānandāśrama verse 33.

455 स्वगोत्राद्भ्रश्यते नारी विवाहात्सप्तमे पदे । स्वामिगोत्रेण कर्तव्यास्तस्याः पिण्डोदकक्रियाः ॥ verse 78.

as Bṛihad-Yama III. 1-3, Jivananda p. 563 verses 29-33 are the same as Bṛhad-Yama III. 34-38, Jivananda verses 35-36 are the same as Bṛhad-Yama III. 16-17. The verse in the Upajāti metre (Jivananda 44) is Bṛhad-Yama III. 61. Two of the verses at the end of chap. V. are the same as Yāj. II. 17 and 23.

The numerous mss. of Yama contain either one or other of the above three texts or different texts bearing on the same topics. For example, Deccan College collection Nos. 209-211 of A 1881-82 and No. 153 of 1895-1902 are the same as the Yamasmṛti in the Ānandāśrama collection, No. 401 of 1891-95 seems to be the same as Bṛhad-Yama in the Ānandāśrama collection. But the I. O. Cat. No. 1334 p. 390 contains 57 ślokas, the last 20 of which are in the Indravajrā metre.

Viśvarūpa, Vijñāneśvara, Aparārka, the Smṛticandrikā and other later works quote over three hundred verses of Yama on all topics of dharmaśāstra including vyavahāra. This establishes that they had an extensive work of Yama before them from which it is probable various abridgments corresponding with the printed works were made. Viśvarūpa quotes about ten verses of Yama on water as purifier (on Yāj. I. 187), on śrāddha (on Yāj. I. 225 and 252) and on prāyaścitta for killing a cow (on Yāj. III. 262). The identical verses are not found in the printed texts. Some of the verses quoted from Yama in Aparārka and the Smṛticandrikā can be traced in the printed text. For example, Aparārka (p. 42) quotes a verse of Yama in which Yama himself is referred to as an authority.[456] It occurs in Jivananda's text (verse 65). The two verses in Jivananda's text (verses 26, 28) that are identical with Manu are cited in the Smṛticandrikā as Yama's. Two verses of Bṛhad-Yama (III. 20-21) about the proper age of marriage in the case of girls are quoted as Yama's in the Smṛticandrikā.[457] In some of the verses quoted by Aparārka from Yama, the opinions of Manu are cited which can be identified with the views of the Manu-

smṛti. For example, according to Yama food polluted by the touch of hair, moths and insects, or seen by sinners and women in their courses is purified by water, holy ashes etc.[458] This refers to Manu V. 125. Similarly the Smṛticandrikā quotes a verse of Yama which says that according to Manu those who administer poison, who are incendiaries and robbers and those guilty of homicide and abetment thereof should pay the extreme penalty of death.[459] Aparārka (p. 988 on Yāj. III. 109) quotes five verses of Yama which refer to the 26th *tattvas* well known in the Sāṅkhya system, regard Puruṣottama as a 26 *tattva* and propound that he who correctly understands the 25 *tattvas*, in whatever āśrama he may be, reaches the highest abode of Viṣṇu. Aparārka quotes a few prose passages from Yama on the garments to be worn by brahmacārins,[460] on prāyaścitta for killing various kinds of birds and insects, for cutting trees and bushes, for drinking wine, for stealing gold and for the other deadly sins etc.[461]

The Mahābhārata (Anuśāsana 104. 72-74) quotes *gāthās* of Yama.

The Smṛticandrikā quotes a verse of Yama which speaks of the sun being in the zodiacal sign Virgo.[462]

Yama required the king to look into the disputes of litigants carefully and impartially.[463] Yama cites the authority of Manu for the proposition that everything brought about by coercion such as a gift or a deed was liable to be set aside. This is almost identical with Manu 8. 168. Yama lays down that a Brāhmaṇa was never to be awarded corporal punishment, but that a Brāhmaṇa guilty of

crimes was to be imprisoned and made[465] to work. Yama, like Yāj. (II. 145), prescribed that the strīdhana of a woman married in the Āsura form went to her father,[466] if she died childless. Aparārka (p. 822) quotes two verses of Yama that prescribed the first ammercement for him who, though forbidden, wrongfully takes the water of a lake or disturbs a water-course and the highest ammercement for him who breaks a lake. Aparārka (p. 860) also cites Yama for the fine of five kṛṣṇalas in the case of adultery with another's wife of the same caste as that of the paramour and twelve paṇas in case the wife is of a lower caste. The Smṛticandrikā and the Vyavahāramayūkha on the other hand direct that the king should punish the Brāhmaṇa woman guilty of adultery with a Śūdra by throwing her to dogs and by forcible tonsure and riding on an ass in case of adultery with a Kṣatriya or Vaiśya. The Smṛticandrikāra, Parāśara-Mādhavīya and Vyavahāramayūkha quote a verse of Yama about a debtor, who, being able to pay, does not wantonly pay, being punished by taking twice the amount. Yama remarks that the order of saṁnyāsa is not allowed to women in the Vedas or in the śāstra[467] (dharmaśāstra) and that her real dharma is to be the mother of children from one of her own caste. A Bṛhad-Yama is cited by the Mit. (on Yāj. III. 255 and 290), Haradatta and by Aparārka on prāyaścitta. Similarly a Laghu-Yama is cited by Haradatta and Aparārka and a Svalpa-Yama (probably same as Laghu-Yama) by the Smṛtiratnākara of Vedācārya.

50. Laugākṣi

The Mit. (on Yāj III. 1-2,260, 289) quotes verses of Laugākṣi on āśauca and prāyaścitta. Aparārka quotes prose passages and verses of Laugākṣi on the saṁskāras, vaiśvadeva, cāturmāsya, purification

of substances, śrāddha, āśauca and prāyaścitta. Aparārka cites (p.512) a verse of Laugākṣi which regards Prajāpati as an authority. The Mit. and almost all works on vyavahāra cite a verse of Laugākṣi defining yoga and kṣema and prescribing that they are impartible.

51. Viśvāmitra

Viśvāmitra is one of the writers on dharma enumerated by Vṛddha-Yājñavalkya as quoted by Viśvarūpa. Aparārka, the Smṛti-candrikā, the Kālaviveka of Jīmūtavāhana and other works quote verses of Viśvāmitra on almost all topics of dharma except vyavahāra, such as on the five deadly sins, on śrāddhas, prāyaścitta etc. Viśvāmitra defines dharma as that which is esteemed by Āryas (respectable people) who know the Vedas.[468] His verses on the mahāpātakas are frequently quoted.[469] The Madras (Govt.) Mss. cat. (p. 1985 No. 2717) notices a smṛti of Viśvāmitra in verse in nine chapters.

52. Vyāsa

In Jivananda (part II pp. 321-342) and in the Ānandāśrama collection of smṛtis there is a smṛti ascribed to Vyāsa. The two texts are the same with a few variations. It is in four chapters and contains about 250 verses. Vyāsa is said to have declared the smṛti in Benares. The contents briefly are :— the dharmas herein laid down prevail only in that region where the black deer roam about; the authoritativeness of śruti, smṛti and purānas; mixed castes; sixteen saṁskāras; duties of Brahmacārī; marriage; Brāhmaṇa may marry Kṣatriya or Vaiśya girl but not Śūdra; duties of a wife; the nitya, naimittika and kāmya acts of householders, eulogy of the householder stage and of gifts.

Viśvarūpa quotes a few verses of Vyāsa. They are mostly taken from the Mahābhārata and are concerned with topics of marriage, daily duties (such as washing the teeth and bathing), śrāddha and prāyaścitta. Similarly Medhātithi quotes several verses from the

468 यमार्याः क्रियमाणं तु शंसन्त्यागमवेदिनः। स धर्मो यं विगर्हन्ति तमधर्मं प्रचक्षते॥ स्मृतिच० (आह्निक p. 6).

469 ब्राह्मणो न च हन्तव्यः सुरा पेया न च द्विजैः। ब्राह्मणस्वर्णहरणं न कर्तव्यं कदाचन॥ गुरुपत्नीं न गच्छेच्च संसर्गं तैश्च नाचरेत्। महापातकिसंज्ञा तु निर्दिष्टैषा मनीषिभिः॥ अपरार्क p. 1044.

Mahābhārata as Vyāsa's. In Aparārka, the Smṛticandrikā and other works about two hundred verses of Vyāsa are cited on vyavahāra. From these it appears that Vyāsa dealt with rules of procedure and the several titles of law (vyavahāra-padas) and that his doctrines closely agreed in most respects with those of Nārada, Kātyāyana and Bṛhaspati. He gives rules on the four kinds of uttara (mithyā, saṃpratipatti, kāraṇa and prāṅ-nyāya), divides documents in three varieties (svahasta, jānapada, rājaśāsana), divides laukika documents into eight sub-varieties (just as Kātyāyana seems to have done); he closely follows Bṛhaspati in his requirements about royal grants and two of his verses about grants (ṣaṣṭiṁ varṣa &c. and sāmānyoyaṁ dharmasetur nṛpāṇām) occur very frequently in inscriptions (vide Aparārka on Yāj. I. 318). Vyāsa lays down that if a stranger enjoy a person's land for twenty years when the king is there (i. e. when there is no revolution or anarchy) and when the owner is able (to resist) the latter loses his property.[470] He speaks of adverse possession as having five characteristics.[471] He mentions seven kinds of sureties, while Hārīta and Kātyāyana speak of only five and Bṛhaspati of four. He speaks of only five kinds of ordeals. He defines a *niṣka* as equal to 14 suvarṇas, a suvarṇa being equal to eight palas.[472] Vyāsa seems to represent a middle stage in the evolution of the rights of the widow to succeed to her deceased husband. He says that a woman was to get a maximum of two thousand (kārṣāpaṇas) from the estate of her deceased husband[473] (besides what he gave her when living). Vyāsa gave to the father and sons equal shares in ancestral property and allowed partition even against the wish of the father.[474] From these important charac-

teristics of Vyāsa it may safely be concluded that Vyāsa flourished about the same time as Yājñavalkya and Bṛhaspati, i. e. between the second and the fifth century.

In Aparārka and other works there are numerous verses attributed to Vyāsa which are certainly not taken from the Mahābhārata or from the Vyāsasmṛti in the Ānandāśrama collection (pp. 357-371). For example, on Yāj. I. 12 he cites a verse of Vyāsa in the Vasantatilakā metre about the auspicious asterism for *caula* and another verse laying down Saturday, Sunday and Friday as unsuitable for *caula*. Similarly Vyāsa's verses dealing with the merit of bathing on Sunday, Monday, Tuesday and Wednesday in conjunction with certain *tithis* are cited by Aparārka (p. 213). Vyāsa speaks of śrāddhas when the Sun is in the sign of Virgo (Aparārka p. 424). These indications are sufficient to assign Vyāsa to a comparatively later date. But as Aparārka evidently makes no distinction between Vyāsa the jurist, Vyāsa the reputed compiler of the Mahābhārata (e. g. he quotes on p. 961 six verses of the Bhagavatgītā as Vyāsa's) and Vyāsa who wrote on the saṁskāras, śrāddha and other topics, it appears that the jurist and the writer on other topics of dharma were separated from him by several centuries. Whether the jurist and the writer on other topics of dharma are identical is a difficult problem. All that can be said is that the two may probably be identical. The Smṛticandrikā quotes a Gadya-Vyāsa and about 450 verses of Vyāsa on āhnika, vyavahāra and prāyaścitta.

Aparārka quotes a verse of Vṛddha-Vyāsa on Saudāyika, a kind of strīdhana. The Mit., the Prāyaścitta-mayūkha and other works cite verses of a Bṛhad-Vyāsa. Ballālasena in his Dānasāgara quotes Mahā-Vyāsa and Laghu-Vyāsa as authorities and also Dāna-Vyāsa, which probably means the dāna-dharma portions of the Mahābhārata.

53. Sat-triṁśan-mata

This appears to have been a work like the Caturviṁśatimata described above. Quotations from it are cited in the Kalpataru, the Mitākṣarā, the Smṛticandrikā, Aparārka, Haradatta and a host of writers and works. Mitramiśra[475] says that though the Ṣaṭ-triṁśan-

mata has been accepted as an authority by the above-mentioned writers, yet certain other writers did not hold the work authoritative. The fact that Viśvarūpa and Medhātithi do not mention this work, taken along with the above statement of Mitramiśra, may be relied upon for holding that this compilation must have been among the latest products of the age of smṛtis and was probably compiled some time between 700-900 A. D. Almost all the quotations from this compilatiou are concerned with the topics of purification of substances (śuddhi), śrāddha and prāyaścittas for sins and pollutions of various sorts. No verse of this compilation dealing with vyavahāra could he discovered. One verse quoted from it prescribes a bath on touching Bauddhas, Pāśupatas, Jainas, atheists and followers of Kapila.[476] Another verse quoted by Aparārka cites the view of Bṛhaspati.[477] In another verse the view of Vaivasvata is referred to.[478] Aparārka quotes a prose passage from this compilation prescribing the prāyaścittas for touching the corpse of a cāṇḍāla etc. As no ms. was available, it is difficult to say what 36 sages are relied upon as authorities.

54. Saṁgraha or Smṛtisaṁgraha

This work is frequently cited by the Mitākṣarā, Aparārka, the Smṛticandrikā and other works on all topics of dharma. The quotations on vyavahāra are copious and are very important for the history of Hindu Law. A few of the important views of the Saṁgrahakāra are set out below. He gives the requisite characteristics of a plaint in five verses.[479] According to him documents are of two kinds, rājakīya and jānapada. The ordeals from dhaṭa (balance) to poison (i. e. four) are prescribed in cases where the subject matter is of great value (i. e. above 500 paṇas), while kośa and the (other)

ordeals (in all three) are prescribed in disputes for lesser sums.[480] This is slightly opposed to Nārada (ṛṇādāna verse 336) according to whom the five ordeals from tulā to kośa were prescribed in substantial disputes.[481] The Saṁgrahakāra has in view the seven ordeals spoken of by Nārada (ṛṇādāna verses 252, 337, 343), while Bṛhaspati and Pitāmaha enumerate nine. He defines dāya as the wealth that is handed down through father and mother.[482] He held that ownership arose from the dictates of śāstra and was not an affair of the world (laukika) and puts forward two reasons in support of his theory, viz. if ownership were laukika, then it would not be possible to make such assertions as 'his wealth has been wrongfully seized by another' and the texts (vide Gautama X. 39) laying down the means of acquisition of wealth for the several varṇas would be meaningless.[483] Dhāreśvara held the same view. These views were elaborately criticized by the Mit. According to the Saṁgrahakāra,[484] partition creates ownership in the son as regards paternal wealth (in which he has no rights by birth). Dhāreśvara entertained the same opinion, which was vehemently controverted by the Mit., holding that partition takes place of that in which one has already ownership. Accordingt o the Saṁgraha,[485] ownership does not consist in being able to dispose of a thing at one's sweet will, since it is the śāstra that prescribes the proper disposal or application of all things. The Saṁgraha[486] laid down that the special share given to the eldest son, the practice of niyoga and the offering of a cow are all forbidden in the present age. Dhāreśvara also held the same

view about the eldest son's rights and the Mit. also approves of it and quotes anonymously the same verse (on Yāj. II. 117). The Saṁgraha in two verses, apparently following Manu 9. 182-183, lays down that, if of several full brothers one has a son, all thereby have issue and that, if one out of the several wives of a person has a son, all the co-wives may be regarded as putravatī. The Smṛticandrikā says that Devasvāmī explained this dictum of the Saṁgrahakāra. The Saṁgraha says that the widow of a separated coparcener dying childless would inherit his whole estate if she submitted to *Niyoga* at the behests of her elders.[487] This was also the opinion of Dhāreśvara and was refuted according to the Smṛticandrikā by Viśvarūpa. The Mit. also criticizes this view. He names Manu in connection with the succession of a person dying without leaving any one out of the twelve kinds of sons.[488] He has in view Manu 9. 185. According to the Saṁgrahakāra the order of succession to a sonless man is :— widow, the daughter who is a putrikā, mother, paternal grandmother, father, full brothers, half-brothers, the line of the father (pitṛsantati), the grandfather's line, the great-grand-father's line, other sapiṇḍas, sakulyas, the preceptor, the pupil, a fellow-student, a learned Brāhmaṇa. The Mit. notes that relying on Manu (9. 217) Dhāreśvara placed the paternal grandmother after the mother and before the father (thus agreeing with the Saṁgraha). The Saṁgraha says that homicide and other offences when commited with force are called *sāhasa*.[489]

It will be seen from the above that the views of the Saṁgrahakāra closely agreed with those of Dhāreśvara in many respects and were not approved of by the Mit. and other later writers. In vyavahāra the Saṁgraha certainly marks a far more advanced stage than Yājñavalkya and Nārada, whose works do not contain the controvertial questions about ownership, partition etc. As Dhāreśvara agrees very closely with the Smṛtisaṁgraha it may be argued that they were not separated by a long interval of time. It has to be

also noted that Viśvarūpa and Medhātithi do not refer to the Saṁgraha. It is not unlikely that the Saṁgraha was in vogue in the territory ruled over by Bhoja of Dhārā and was therefore followed by Bhoja Dhāreśvara. Taking all things into consideration the Saṁgraha was probably compiled between the 8th and 10th centuries of the Christian era. The Smṛticandrikā no doubt says in one place that the Saṁgrahakāra follows the views of Dhāreśvara.[490] But this statement should not be emphasized and interpreted too literally. All that it means is that both held the same opinion. There is no intention to state that Dhāreśvara preceded the Saṁgrahakāra. Chronology was never the strong point of Indian commentators, particularly when the writers whose opinions were referred to flourished several centuries earlier. We know that Bhāruci and Dhāreśvara preceded the Mitākṣarā which names both; but the Sarasvatīvilāsa in several places (e. g. pp. 347, 361, 383) says that Bhāruci cannot tolerate the view of Vijñāneśvara and also says that Dhāreśvara and Devasvāmī follow the view of Vijñānayogin (p. 395).

The Smṛticandrikā quotes several verses from the Saṁgraha on topics of śrāddha in which Gautama, Kātyāyana, Parāśara, Manu, Yājñavalkya, Yama and Śaunaka are cited by name.[491]

55. Saṁvarta

Saṁvarta occurs as a Smṛtikāra in the list of Yājñavalkya. He is cited on all topics of dharma by Viśvarūpa, Medhātithi, the Mit., Haradatta, Aparārka, the Smṛticandrikā and a host of other writers. Viśvarūpa quotes either wholly or in part about twenty verses of Saṁvarta on evening *sandhyā-vandana*, on the duties of a yati and on the prāyaścittas for theft, adultery of various kinds, deadly sins. Medhātithi quotes verses of Saṁvarta on Manu V. 88 and XI. 116. The Mit. quotes him on prāyaścitta and āśauca (Yāj. III. 6, 17, 19 etc.). Aparārka had a large work before him and quotes about 200 verses.

A few of the views of Saṁvarta on topics of vyavahāra may be noted here. According to him oral testimony when in opposition to writing was to be discarded.[492] This is in striking agreement with section 92 of the Indian Evidence Act. He says that if houses and fields are being enjoyed (by one person as against another) when the king is there (i. e. when the central government is strong and there is no anarchy), then it is possession that counts and not mere writing (i. e. possession will be protected and not mere paper title without possession).[493] He lays down that no interest was to be allowed if not stipulated for in certain cases, viz., on strīdhana (when used by the husband), on interest, on deposit (as long as it is not lost or deteriorated) and in suretyship.[494] He enumerates ten wrongs (*aparādhas*) of which the king was to take cognisance *suo motu* without any private person's complaint, viz., restraint of the defendant (before judgment), obstruction of the public road, women conceiving in adultery, becoming rich without any ostensible means, destruction of a meeting-hall and of trees and crops, kidnapping of maidens, sinning Brāhmaṇas, champerty and maintenance, destruction of the roads where tolls are to be paid, the danger of robbers, rape, injury to cows and Brāhmaṇas.[495] He prescribed that disputes were not be investigated on the full moon and new moon day, and on the 14th and 8th *tithis*.

In Jivananda's collection (part I, pp. 584-603) and in the Ānandāśrama collection (pp. 411-424) there is a smṛti of Saṁvarta in 227 and 230 verses respectively. It purports to have been declared to Vāmadeva and other sages by Saṁvarta. Its main contents are:— that is the religious country where the black deer roam about, rules of conduct for a Brahmacārin, prāyaścittas for various lapses on the part of a student, duties of householder, eulogy of liberality, duties of forest hermit and saṁnyāsin, prāyaścittas for various sins and actions. Saṁvarta is sometimes cited as an authority (verses 38, 123). He recommends the marriages of girls at the age of eight (verse 67) and condemns marriage with a maternal uncle's daughter (verse 157).

In a few Mss. (e. g. I. O. cat. No. 1367) the Saṁvartasmṛti comprised is different from the printed Saṁvarta.

The printed smṛti appears to be an epitome of a portion of the original smṛti of saṁvarta. Many of the verses in the printed texts are found in Aparārka. For example Aparārka p. 49=Saṁvarta verse 6; Aparārka p. 693=Saṁvarta verses 107-108; Aparārka p. 1053=Saṁvarta verses 111-113; Aparārka p. 1094 (eight verses out of which five)=Saṁvarta verses 130-134. The pāda of Saṁvarta which Viśvarūpa quotes (ardhāstamitabhāskarām) on Yāj. I. 25 occurs in verse 6 of the printed text. This shows that the printed smṛti preserves very ancient material, the authenticity of which is vouched for by so early a writer as Viśvarūpa.

The Mit. quotes a Bṛhat-Saṁvarta (on Yāj. III. 265, 288).

A Svalpa-Saṁvarta is quoted in Harinātha's Smṛtisāra.

56. Hārīta

The verse quotations from Hārīta on topics of vyavahāra deserve some treatment. He defines vyavahāra as that whereby the recovery of one's own wealth and the avoidance of (doing) the duties peculiar to another (caste or class) are effected in due course of law.[496] He further says that that judicial proceeding is proper which is based on the dictates of dharmaśāstra and arthaśāstra, which is in conformity with the usages of respectable people and which is free from

[496] स्वधनस्य यथा प्राप्तिः परधर्मस्य वर्जनम्। न्यायेन यत्र क्रियते व्यवहारः स उच्यते॥ स्मृतिच०.

fraud.[497] Hārīta calls upon the king to know the śāstras, the duties of the varṇas and of the lowest castes.[498] He like Nārada said that vyavahāra had four aspects, each succeeding one prevailing against the preceding one[499], viz., dharma, vyavahāra, caritra, nṛpājñā. He attached the greatest importance to writing and said that a transaction consigned to writing is effective even after great lapse of time and that he who has a writing in his hands is entitled to possession (probably in cases of mortgages and pledges).[500] He lays down very elaborate rules about the requisites and defects of plaints, about summoning the defendant, about the contents, faults and kinds of the defendant's reply, and about the burden of proof.[501] He protects long possession of property even if it originated without title provided it had lasted for three generations.[502] He says that title is the decisive factor as to various kinds of possession, viz., when possession is forcibly taken by soldiers and freebooters, when a thing is stolen or kept concealed, when it was delivered through affection and friendship or when it was lent on hire, or when it was handed over for wearing or safe custody or was borrowed through friendship.[503] To illustrate the relation of title and possession he uses a very apt figure, viz. just as a branch cannot be seen expanding in the sky unless it is supported by the roots, so title is the root and possession

is its offshoot. According to him sureties are of five kinds,[504] abhaya (for keeping the peace), pratyaya (for confidence), dāna (return of money or carrying out one's obligations), upasthāna (return of money lent on pledge) and darśana (for appearance). He prescribed an absolute tutelage for women as regards the giving away of the husband's wealth and allowed only maintenance to a young widow of improper conduct.[505] But Hārīta was humane in his treatment of even erring wives. He does not allow a husband to cast adrift an adulterous wife and prescribes that she should be given food to keep body and soul together and bare clothes.[506]

It appears from the above that Hārīta the jurist must have flourished nearly at the same time as Bṛhaspati and Kātyāyana, i. e. between 400 and 700 A. D.

57. Commentaries and Nibandhas (digests)

The literature on Dharmaśāstra falls into three well-marked but somewhat over-lapping periods. The first period is that of the ancient dharmasūtras and of the Manusmṛti. It is a period dating from at least the 6th century B. C. to the beginnings of the Christian era. Next comes the period when most of the versified smṛtis were composed and it ranges from the first centuries of the Christain era to about 800 A. D. The third period is that of the commentators and the writers of digests. This covers over a thousand years from about the 7th century to 1800 A. D. The first part of this last period was the golden era of famous commentators. Commentaries on smṛti works continued to be written almost to the end of this period, *e. g.* Nandapaṇḍita wrote the commentary called Vaijayantī on the Viṣṇudharmasūtra in the 17th century. But the general tendency from the 12th century onwards was to write works not professing to be commentaries on a particular smṛti, but works that were in the nature of digests containing a synthesis of all the dicta of smṛti writers on topics of dharma. Examples of this class

505 दानार्थे वा धनार्थे वा धर्मार्थे वा विशेषतः। आदाने वा विसर्गे वा न स्त्री स्वातन्त्र्य मर्हति॥ स्मृतिच०; विधवा यौवनस्था चेन्नारी भवति कर्कशा। आयुषः क्षपणार्थं तु दातव्यं जीवनं तदा॥ मिता० on या. II. 135.

of works are the Kalpataru, the Smrticandrikā, the Caturvargacintāmaṇi, the Ratnākaras of Caṇḍeśvara. Even when in the earlier part of this period writers professed to compose only commentaries on particular works, they adopted the style of digests trying to introduce order out of a chaotic mass of Smṛti dicta and explaining away apparent contradictions. For example, Viśvarūpa's commentary (in the ācāra and prāyaścitta sections), the Mitākṣarā and Aparārka's work, though professing to be commentaries on Yājñavalkya, are really in the nature of digests. In fact there is no hard and fast line of demarcation between a *ṭīkā* and a *nibandha* (digest). Vijñāneśvara is described by the Dvaitanirṇaya of Śaṅkarabhaṭṭa as the most eminent of all writers of *nibandhas*. Therefore, though it is usual to speak of the third period as one of commentators and nibandhakāras, there is no necessity in this work to observe any sharp line of distinction between the two. In the following pages a few prominent and typical commentators and nibandhakāras who have written on all or most of the branches of dharmaśāstra and whose works have attained classical rank will be dealt with in chronological order as far as that can be done with any accuracy.

58. Asahāya

Dr. Jolly in his edition of the Nāradasmṛti (B. I. series) has incorporated a portion of the bhāṣya of Asahāya as revised by Kalyāṇabhaṭṭa. Even this revised version comes up to only verse 21 of the fifth title *abhyupetya-aśusrūṣā*. The exact relation of Kalyāṇabhaṭṭa's labours to the original *bhāṣya* cannot be accurately gauged from the opening[507] words 'finding that the *Nāradabhāṣya* composed by Asahāya was spoilt (*bhraṣṭa*) by bad scribes, Kalyāṇa composes this after revising the ancient one'. The colophon at the end of the first chapter of the Vyavahāramātṛkā says that Kalyāṇabhaṭṭa revised the bhāṣya of Asahāya at the encouragement of Keśavabhaṭṭa.[508] Kalyāṇabhaṭṭa seems to have taken great liberties with the text of the original bhāṣya. On p. 9 verse 15 (rājā satpuruṣaḥ sabhyaḥ śāstram gaṇakalekhakau), the comment on śāstra is 'Manu-Nārada-

Viśvarūpātmakam'. If Viśvarūpa named here be identical with the the Viśvarūpa who commented on Yāj. (as is almost certain), this passage could not have occurred in Asahāya's bhāṣya. Viśvarūpa, in commenting on Yāj. III. 263-64, mentions Asahāya by name and cites his explanation of a sūtra of Gautama (22. 13). The name Kalyāṇabhaṭṭa frequently occurs in the printed commentary itself (p. 81, 86, 89).[509]

In the I. O. ms. there is a salutation to Śivā and Gaṇeśa at the beginning. There is a ms. of the Nāradīyabhāṣya as printed by Dr. Jolly in the Deccan College collection (No. 27 of 1874-75). It does not contain the first folio and curiously enough it ends just where the printed text stops. Dr. Jolly omits a few lengthy passages occurring in the ms. and generally indicates such omissions by dots. In a few cases Dr. Jolly omits only a word or two for no apparent reason, e. g. on p. 8 (folio 7b of No. 27 of 1874-75) he omits the wotd 'paramasamṛddhyā' after 'vyavahāraḥ' and before 'caturṇām-api varṇānām'.

The Hāralatā of Aniruddha who was the *guru* of king Ballālasena of Bengal the author of Adbhutasāgara (about 1168 A. D.) tells us that Asahāya composed a bhāṣya on the Gautamadharmasūtra.[510] Viśvarūpa also cites, as said above, Asahāya's explanation of a sūtra of Gautama.

It appears that Asahāya probably wrote a commentary on the Manusmṛti also. A passage of the Sarasvatīvilāsa[511] says that partition of dharma was approved of by smṛtikāras like Manu,

Yājñavalkya, by their commentators, viz. Asahāya, Medhātithi, Vijñāneśvara and Aparārka and by writers of *nibandhas*, viz. the author of the Candrikā and others. Here the order in which the commentators are named requires that Asahāya like Medhātithi was known to be a commentator of Manu. This conclusion is to some extent corroborated by the fact that the Vivādaratnākara[512] quotes with reference to Manu 9. 182 the words of Asahāya thereon. On Manu 8. 156 Medhātithi quotes the opinion of Asahāya.[513]

The foregoing establishes that Asahāya composed bhāṣyas on the Gautamadharmasūtra, on the Manusmṛti and on Nārada. When the Smṛticandrikā[514] refers to a bhāṣya of Nārada it is most probably referring to Asahāya. In the Mit. (on Yāj. II. 124) the opinion of Asahāya and Medhātithi on the right of an unmarried sister to receive one-fourth as provision for her marriage from her brothers is preferred to that of Bhāruci.[515] This seems to be rather a reference to Asahāya's commentary on Manu (9. 118) which contains a rule similar to Yāj. (II. 124), while Nārada contains no such rule about a fourth share. It is a strange irony of fate that the

very name of Asahāya who is profusely quoted by the Sarasvatī-vilāsa in the first half of the sixteenth century was forgotten by later writers, so much so that the Bālaṁbhaṭṭī understands the word Asahāya (in note 515 above) as an attribute of Medhātithi in the sense of ' peerless '.

As Viśvarūpa and Medhātithi both name Asahāya, his lowest limit is about 750 A. D. How much earlier he flourished it is difficult to say. He can hardly be earlier than the 6th century. In the com. on Nārada (p. 48) there is a story from Pāṭaliputra about the repayment of a debt by sons, grandsons and great-grandsons. It has been argued (Calcutta Law Journal, vol. 17 p. 59) that, as Pāṭaliputra was a deserted city in the middle of the 7th century and as the reference shows that Pāṭaliputra was a living and flourishing city, Asahāya must have lived long before the 7th century. But as the very authenticity of the text of the bhāṣya is doubtful owing to the drastic 'revision' of Kalyāṇabhaṭṭa, such a conclusion is extremely hazardous. In the ms. of the bhāṣya other places such as Vaṭapadraka (probably modern Baroda), Avāvadu and Saṁvāduka are mentioned. There is nothing to show that the author was either a native of or had a first-hand knowledge of Pāṭaliputra. He might have been relying on traditions when he gave the story. Dr. Jolly not being aware of the express mention of Asahāya by Medhātithi argued that he flourished earlier than Medhātithi (Tagore Law Lectures p. 5 ; S. B. E. vol. 25 p. VII) on the ground that the Mit. and the Sarasvatīvilāsa always place Asahāya before Medhātithi whenever authorities on vyavahāra are enumerated. Dr. Jolly's conclusion is right as shown above, but his reasoning is faulty. There is hardly anything of chronology in the order in which authors are named, since we find that the Sarasvatīvilāsa[516] names Vijñāneśvara even before Asahāya, though the former flourished centuries after the latter.

Some of the views attributed to Asahāya may be quoted here. The definition of *dāya* (heritage) given by the Mit. was identical with Asahāya's.[517] Asahāya explained the dictum of Uśanas that

fields were impartible by taking it to refer to the son of a Brāhmaṇa from a Kṣatriya wife, who does not participate in land gifted to a Brāhmaṇa.[518] The Mit. on Yāj. II. 119 takes the same view. Asahāya held that as regards succession to the *Śulka* of a woman even step-brothers should be given something, though the major portion would go to the full brothers.[519] According to Asahāya, the wealth of a childless Brāhmaṇa went to the teacher, then to the teacher's son, then to the teacher's widow, the pupil, pupil's son, pupil's widow (one after another) and then to the fellow-student.[520] The Vivādaratnākara[521] (p. 578) quotes the Prakāśa as referring to the views of Asahāya and Medhātithi on Manu IX. 198 that the special rule of Manu applies to all the *strīdhana* belonging to a Kṣatriya woman who has a brāhmaṇī co-wife. The Vivādaratnākara[522] quotes a verse of Nārada about *māṣa* and a verse of the bhāṣyakāra thereon. It probably refers to Asahāya's bhāṣya.

59. Bhartṛyajña

This seems to have been a very ancient commentator. Medhātithi[523] in his bhāṣya on Manu 8. 3 says 'other explanations have been well brought out by Bhartṛyajña and they should be understood from his work'. Trikāṇḍa-Maṇḍana (who flourished before 1100 A.D.) in his Āpastambasūtradhvanitārtha-kārikā[524] (I. 41) refers to the views of Bhartṛyajña that one who had committed to

memory the text of the Veda had the privilege (the *adhikāra*) of consecrating the sacred fires, though he may be innocent of the meaning of the Vedic texts. From Ananta's bhāṣya it appears that Bhartṛyajña composed a bhāṣya on the Kātyāyanaśrautasūtra which had been lost (utsanna) in the former's day. From Gadādhara's comments on the Pāraskara gṛhyasūtra it appears that Bhartṛyajña commented on Pāraskara.[525] The Gṛhastharatnākara of Caṇḍeśvara quotes Bhartṛyajña's explanation of the word *saṁvibhāga* occurring in Gautamadhārmasūtra (10. 39 'svāmī riktha-kraya-saṁvibhāga-parigrahādhigameṣu)'.[526] The Nityācārapradīpa (B. I. series) after quoting Gautamadharmasūtra (11. 29 varṇāśramāḥ svadharmaniṣṭhāḥ &c.) cites the comment of Bhartṛyajña[527] on the word *tac-cheṣeṇa* occurring in that sūtra. Therefore it appears probable that Bhartṛyajña like Asahāya was an ancient commentator of the Gautamadharmasūtra. The Gṛhastharatnākara, after quoting from Vasiṣṭha (17. 1) and Viṣṇu the well-known verse of the Aitareya-brāhmaṇa (ṛṇam-asmin saṁ-nayati) cites the explanation of Bhartṛyajña as to the word 'jātasya' occurring therein.[528]

Since Bhartṛyajña is quoted by Medhātithi who also mentions Asahāya but not Viśvarūpa, it follows that Bhartṛyajña must have flourished before 800 A. D. and was probably a contemporary of or slightly later than Asahāya.

60. Viśvarūpa

The commentary of Viśvarūpa called Bālakrīḍā on the Yājñavalkya-smṛti has been recently published in two parts by M.M.T. Gaṇapati Śāstri in the Trivandrum Sanskrit Series. The Mit. states in the introductory verses that the dicta of Yāj. were expanded by

(पारस्कर II. 5. 28) गदाधर says 'इदं च सूत्रं सूत्रत्वेन हरिहरभाष्ये तिष्ठति भर्तृयज्ञककर्कादिग्रन्थेषु नोपलभ्यते'.

the voluminous or ample (*vikaṭa*) explanations of Viśvarūpa. In commenting on Yāj. I. 81 the Mit. tells us that Viśvarūpa looked upon the words of Yāj. I. 79 (tasmin yugmāsu saṁviśet) as a *niyama*. In Viśvarūpa's commentary on Yāj. I. 80 (evaṁ gacchan &c.) we do find that the verse of Yāj. and similar passages of Manu (3. 45), Vasiṣṭha and Gautama (5. 1) are understood to contain a *niyama* and not a *parisaṁkhyā*.[529] On Yāj. III. 24 the Mit. informs us that Viśvarūpa, Medhātithi and Dhāreśvara looked upon certain texts of Ṛṣyasṛṅga on *āśauca* as in conflict with well-known smṛtis and discarded them. Mr. S. Sitaram Śāstri published (in 1900 at Madras) the text and translation of Viśvarūpa's comment on inheritance and Mr. Setlur also published the vyavahāra section. In the following pages the Trivandrum edition is relied on.

The printed com. of Viśvarūpa on the *vyavahāra* section is extremely meagre and scarcely merits the epithet *vikaṭa* applied to it by the Mit. But the comment of Viśvarūpa on the *ācāra* and *prāyaścitta* sections is truly voluminous and compares favourably with the Mit. The style of Viśvarūpa is simple and forcible and resembles that of the great Śaṅkarācārya. He quotes profusely from Vedic works, mentions the Carakas and Vājasaneyins (on Yāj 1. 32), the Kāṭhaka (on Yāj. III. 237 and 243) and very often supports his position by quotations from the Ṛgveda (e. g. on Yāj. II. 121 and 206), the Brāhmaṇas (e. g. the Śatapatha on Yāj. 1. 53 and III. 257) and from the Upaniṣads (e. g. on Yāj. II. 117, the well-known Chāndogya passage about the ordeal for theft and on Yāj. I. 50 Chāndogya II. 23. 10 about the three branches of *dharma*). He speaks of the *pada-pāṭha* and the *kramapāṭha* as due to human agency (on Yāj. III. 242). He frequently quotes the Gṛhyasūtras of Pāraskara and less frequently those of Bhāradvāja and Āśvalāyana. He cites a host of smṛtikāras.[530] Most of the quotations attributed to

529 मानवं तु ' ऋतुकालाभिगामी स्यात् ' इति ... नियमपरतयैव व्याख्येयम् । एतेनैव... वासिष्ठं व्याख्यातम् । ... गौतमीयं त्वनृतुपरिसंख्यार्थं ' ऋतावुपेयात् ' इति केचित् । ...तस्मात्तदपि नियमार्थमेव व्याख्येयम् ।.

530 The स्मृतिकारs mentioned by name are : अङ्गिरस्, अत्रि, आपस्तम्ब, उशनस्, कात्यायन, काश्यप, गार्ग्य, वृद्धगार्ग्य, गौतम, जातूकर्ण (or-र्णि), दक्ष, नारद, पराशर, पारस्कर, पितामह, पुलस्त्य, पैठीनसि, बृहस्पति, बौधायन, भारद्वाज, भृगु, मनु, वृद्धमनु, यम, याज्ञवल्क्य, वृद्धयाज्ञवल्क्य, वसिष्ठ, विष्णु, व्यास, शङ्ख, शातातप, शौनक, संवर्त, सुमन्तु, स्वयंभु (i. e. मनु), हारीत.

Svayaṁbhū are found in the extant Manusmṛti, but this is not the case with the quotations ascribed to Bhṛgu (vide p. 138 above). Most of the quotations from Bṛhaspati (even on such topics as repayment of debts, sureties, the rights of śūdrāputra) are in prose, only a few being in verse (e. g. a verse about ordeals on Yāj. II. 117, a verse about the method of partition on Yāj. II. 153). It appears therefore that Viśvarūpa either knew a work of Bṛhaspati in prose on arthaśāstra in which occurred a few verses or he had before him a prose work of Bṛhaspati and a versified smṛti of Bṛhaspati, both of which he regarded as the compositions of the same author. He quotes a verse (on Yāj. I. 328) from Viśālākṣa, a well-known writer on politics quoted even by Kauṭilya. He refers to the arthaśāstra of Uśanas along with that of Bṛhaspati. Kauṭilya is nowhere quoted by name. The learned editor of Viśvarūpa thinks (Intro. p. V) that Viśvarūpa took Bṛhaspati and Viśālākṣa as *ārṣa* writers long anterior to Yāj. and therefore used their *dicta* to elucidate and support Yāj., while he omits Kauṭilya because he thought Kauṭilya to be posterior to Yāj. This argument contains several fallacies. In the first place it is wrong because Viśvarūpa quotes verses from Nārada and Kātyāyana to supplement Yāj. There is nothing to show that Viśvarūpa regarded Nārada and Kātyāyana also as anterior to Yāj. and we have seen above that they are several centuries later than the smṛti of Yāj. Moreover Kauṭilya himself looked upon both Bṛhaspati and Viśālākṣa as high authorities and so Viśvarūpa might have quoted them rather than Kauṭilya. Even taking the latest date assigned to Kauṭilya (about 3rd century A. D.), he flourished several centuries before Viśvarūpa. It is impossible to believe that Viśvarūpa was in possession of the exact chronological relation of Yāj. and Kauṭilya. Many scholars, besides, place Kauṭilya's work centuries before Yāj. It appears, however, that Viśvarūpa had the work of Kauṭilya before him. On Yāj. I. 307 he speaks of ministers tested by the four allurements (*upadhā*) of *dharma, artha, kāma* and *bhaya*. This is an echo of Kauṭilya (I. 10). On Yāj I. 343 Viś. refers to the view of some that a march should be made when neighbouring chiefs are overwhelmed in calamities.[531] This is the view of Kauṭilya almost in

the same words. On Yāj. I. 341 Viś. speaks of the manifold aspects of the work of a minister, some words of his comment being almost identical with Kauṭilya's.

Viśvarūpa's work is thoroughly saturated with the lore of the Pūrvamīmāṁsā. He quotes Jaimini by name (on Yāj. I. 225 where Jaimini VI. 8. 15 is quoted). Curiously enough he applies the term *nyāya* to Mīmāṁsā. He takes ' nyāya-mīmāṁsā ' in Yāj. I. 3 as one *vidyā*, while he notes that others explain *nyāya* as the system of logic propounded by Akṣapāda. He quotes the sūtras of Jaimini as those of Yājñikas who know *nyāya* (e. g. on Yāj. I. 53 he quotes Jaimini I. 3. 16 and on Yāj I. 87 he quotes Jaimini VI. 8. 17). He applies the epithet *naiyāyika* to a mīmāṁsaka like Śabara and speaks of the mīmāṁsakas as *nyāyavidaḥ*.[532] He mentions the Śābarbhāṣya by name (on Yāj. III. 243) and in several places quotes the very words of Śabara (e. g. on Yāj. III. 181).[533] He quotes the ślokavārtika of Kumārila (I. 12 the verse 'sarvasyaiva hi &c.) in his introductory remarks. In his comment on Yāj. I. 7 he cites over fifty verses in the nature of *kārikās* dealing with the relation of śruti and smṛti and kindred topics. These verses are his own composition, as in one of them he assures us that a certain point will be dealt with by him in detail in the section on śrāddha.[534] In interspersing his commentary with *kārikās* of his own and in their style and pithiness he greatly resembles Kumārila. Throughout his work he relies upon mīmāṁsā maxims and methods of

discussion. For example, on Yāj. I. 4-5 he discusses the rule of Jaimini II. 4. 8 ff (about 'sarvaśākhāpratyayam ekaṁ karma') in its application to smṛtis; on Yāj. I. 225 he relies upon the position that words like *yava* and *varāha* are to be taken as employed in the Vedas in the same sense in which *śiṣṭas* use them (vide Jaimini I. 3. 9); on Yāj. II. 144 he speaks of wealth (dravya) being *puruṣārtha*, where he alludes to the well-known distinction between *kratvartha* and *puruṣārtha*, the subject of Jaimini's 4th chap. His commentary on Yāj. III 212, 237, 262 are fine examples of his superb skill in the interpretation and reconciliation of apparently conflicting texts.

Though Viśvarūpa was a past master in Purvamīmāṁsā lore, his philosophical views seem to have been identical with those of the great Śaṅkara. According to him, *mokṣa* results from correct knowledge alone and the whole saṁsāra is due to *avidyā*.[535] He quotes anonymously one of Gauḍapāda's kārikās[536] (III. 5) on Yāj. III. 134.

He speaks on Yāj. III. 103 of Nārada who knew the Veda of music (gītivedavid), of purāṇa (on III. 175), and quotes verses (on Yāj. III. 85) from an abhidhānakośa (lexicon) and from a Nāmaratnamālā (on III. 266). He speaks of the śloka of Bhikṣāṭana (on III. 66). He is in this probably referring to the Bhikṣāṭanakāvya,[537] which is mentioned by the Sāhityadarpaṇa. Among commentators he mentions Asahāya's bhāṣya on Gautama by name (on Yāj. III. 263). On Yāj. III. 256 he explains Mleccha as *pulindas* and *Tājikas* (i. e. Arabs).

535 In his com. on याज्ञवल्क्य III. 66 he says 'अपवर्गार्थं हि पारिव्राज्यं ज्ञानैकसाधनं न तत्र कर्मणा प्रयोजनमित्युक्तमेव'।, 'तत्त्वावग्रहणात्मकेनाविद्योत्थत्वात्मपश्वस्यैवमादिचोद्यानवकाश एव। ... तत्त्वेन ब्रह्मणो नान्यद्वस्त्वन्तरमस्तीति ब्रह्मविदां स्थितिः।'.

In the Ānandāśrama edition of गौडपाद the fourth *pāda* is तद्वज्जीवा सुखादिभिः. I could not trace the *kārikā* धूमपूर्ण०.

537 Vide I. O. cat. p. 1448 for the भिक्षाटनकाव्य of शिवभक्तिदास alias उत्प्रेक्षावल्लभ who names वाल्मीकि, कालिदास and the कादम्बरी of बाण.

It has been shown above (§34 pp. 169-170) how Viśvarūpa's text of Yāj. varied in some respects from that of the Mit. ; how he frequently refers to the views of commentators of Yāj. earlier than himself (in the words ' apare, ' ' anye '), how he proposes several explanations of the same words in several cases.

Dr. Jolly (Journal of Indian History 1924, pp. 7-8) says that the citations of Viś. in the Smṛticandrikā about his having refuted the views of Dhāreśvara cannot be traced in the printed Bālakrīḍā, as also the reference to Viś. in the Mit. on Yāj. I. 81 and II. 135. It has been shown above (note 529) that the printed Viś on Yāj. I. 80 *does* contain the view attributed to it by the Mit. As regards the Mit. on Yāj. II. 135 it has to be noted that the Mit. does not mention Viś. by name there, but only speaks of ' bhagavān ācārya,[538] ' which words are interpreted by the Subodhinī and the Bālambhaṭṭī as referring to Viśvarūpa. It is true that the printed Viś. does not contain in so many words the explanation attributed by the Mit. to ' bhagavān ācārya. ' But it is worth considering that in the printed Viś. the two quotations from Manu and Śaṅkha do occur and are put in the mouth of an objector and are explained away in a way somewhat similar to that put forth in the Mit.[539] As regards the passages of the Smṛticandrikā, the matter requires careful examination. The Smṛticandrikā (II. p. 294 Gharpure's ed.) says that according to the Saṁgrahakāra a widow was allowed to succeed to her sonless husband's wealth if she submitted to *niyoga*, that the

same was the view of Dhāreśvara and that Viśvarūpa refuted the view of Dhāreśvara. In no place does the printed Viś. name Dhāreśvara. The words of the Smṛticandrikā are not to be taken literally. It will be shown below that the author, Devaṇṇabhaṭṭa, flourished about 1200 A. D., while Dhāreśvara flourished between 1000-1050 A. D. Devaṇṇa had no correct idea of their relative chronological position. It has been shown above (p. 249) how though Asahāya is named by the Mit., the Sarasvatīvilāsa very often says that Asahāya does not like (or tolerate) the views of Vijñāneśvara. Similarly the same work (para 392) says that Dhāreśvara and Devasvāmin do not tolerate the view of Vijñāneśvara, but Dhāreśvara is one of the predecessors of Vij. actually named by him. So all that the Smṛticandrikā means is that Dhāreśvara and Viśvarūpa differed in their views on the particular points mentioned by it. The word *patnī* is taken by Viś. to mean a widow who is pregnant at the time of her husband's death and quotes the sūtras of Vasiṣṭha and Gautama in support of his view as *jñāpakaṣ*. So this view entirely differs from the view of Dhāreśvara that the widow of a sonless person succeeds if she submits to *niyoga*. The Smṛticandrikā (II. p. 300) says that the Saṁgrahakāra placed the father's mother immediately after the mother and before the father, that the Saṁgrahakāra relied on the same arguments that were employed by Dhāreśvara and that Viśvarūpa and others refuted those arguments. The passage in the printed Viś. is somewhat corrupt in this place. Viś. *does place* the mother before the father on the ground of the word *mātā* occurring first when the word 'pitarau' or the compound '*mātāpitarau*' is expanded. The comment does mention the verse of Manu (9. 217) about the grandmother, but it makes no clear sense, as it stands.[540] For the reason given above Rai Bahadur M. M. Chakravarti (JASB for 1912, p. 345 and for 1915, p. 322) is not right when he places Viśvarūpa later than Bhojadeva because of the remarks of the Smṛticandrikā.

In the works of Jīmūtavāhana (viz. the Dāyabhāga and the Vyavahāramātṛkā), in the Smṛticandrikā, the Hāralatā, and other later works like the Sarasvatīvilāsa, the views of Viśvarūpa are frequently cited and discussed. Several such citations have been

[540] क्षत्रियादिषु पुत्राणां तु पितरि मातुरभावे 'पितुर्माता हरेद् धनम्' इत्यस्य विषयः।

already examined by me (JBBRAS for 1926, pp. 200-204). From considerations of space I do not repeat here the discussion of those passages. In the Gṛhastharatnākara[541] of Caṇḍeśvara (D.C. No. 44 of 1883-4, folio 133a) the explanation of Viśvarūpācārya on Yāj. I. 135 is cited, which does not exactly tally with the printed Viś. Hemādri[542] refers to Viśvarūpa's explanation given in his section on partition which does not occur in the printed text. The result of the examination of these citations is that the printed text of Viś. is in the main genuine, but that in a few cases (particularly in the vyavahāra section) it is corrupt or deficient.

Though Viś. holds the same view as the Mit. that ownership does not for the first time arise on partition but that partition takes place of what is already (jointly) owned, yet on numerous points the two disagree. A few of them may be set out here.

(1) Viś. allows (on Yāj. II. 118) the father unrestricted freedom of distribution of property among his sons during his lifetime, while the Mit. expressly says that this power of unequal distribution is restricted to self-acquired property.

(2) Viś. (on Yāj. II. 119) allows a share of property to the widows of predeceased sons and grandsons of a man when a partition takes place during his lifetime. The Mit. restricts the words ' patnyaḥ ' to the father's own wives when he effects a partition during his lifetime.

(3) Viś. connects the words ' without detriment to the paternal estate ' (in Yāj. II. 122) with the words ' whatever else is acquired by himself ' and not with ' maitra ' (gifts from a friend) and ' audvāhika ' (gifts on marriage), while the Mit. connects the half verse ' whatever else is acquired by the man himself without

detriment to the paternal estate' as a qualifying clause to the next half verse and to another verse 'kramād abhyāgatam &c.' In the Mit. the two verses 'pitṛdravyāvirodhena &c.' and 'kramād &c.' occur consecutively, while in Viś. they are separated by three verses and Viś. takes the verse 'kramād' &c. as referring to the re-opening of a partition for a son born after partition.

(4) Viś. allows *niyoga* only to *śūdras* in general and to kṣatriya kings in case of danger of extinction of line (vide com. on Yāj. I. 69 and II. 131), while Mit. forbids *niyoga* in general and holds the texts speaking of it as applicable to a girl who is only betrothed and not married.

(5) Viś. appears to allow one share out of ten to the son of a sūdra wife from a brāhmaṇa without restriction of any kind, while Mit. restricts the share to estates other than land acquired by gift.

(6) Viś. interprets the expression 'half share' (in Yāj. II. 138) with reference to the illegitimate son of a *śūdra* as meaning 'some portion, not necessarily exactly half,' while Mit. interprets it literally.

(7) Viś. allows a widow to succeed to her husband if she is pregnant at his death, while Mit. allows a widow to succeed without any restriction except that of chastity.

(8) Viś. restricts the word 'duhitaraḥ' in 'patnī duhitaraś-caiva' (Yāj. II. 138) to *putrikā* only and so does not allow all daughters whatever to succeed, while Mit. does not introduce any such qualification.

(9) Viś. reads 'anyodaryasya saṁsṛṣṭī' for anyodaryastu &c.' and 'sodaro' for 'saṁsṛṣṭo' in Yāj. II. 143 and his interpretation of the verse is entirely different from that of the Mit.

(10) Viś. reads 'ādhivedanikaṁ caiva' for 'ādhivedanikādyaṁ ca' of Mit. and holds that *bandhudatta*, *śulka* and *anvādheyaka strīdhana* of a childless woman goes on her death to her full brother; while Mit. connects these three with the preceding verse and takes the half verse 'atītāyām' as laying down a general rule of succession to *strīdhana* of all kinds and interprets 'bāndhavāḥ' as meaning 'husband and the rest'.

(11) Viś. takes the verse 'adhivinna-striyai' &c. (on Yāj. II. 152) as applicable to a wife superseded without any ground of

supercession allowed by the texts; while Mit. does not introduce any such qualification.

As Viśvarūpa quotes Kumārila's Ślokavārtika and is mentioned by the Mit. as an authoritative commentator it follows that he flourished between 750 A. D. and 1000 A. D. A greater approximation as to the date of Viśvarūpa can be made, if the identity of Viśvarūpa with Sureśvara be held established. Sureśvara, as he himself tells us in the Naiṣkarmyasiddhi, the Taittirīyopaniṣadbhāṣya-vārtika and other works, was a pupil of the great Śaṅkarācārya whose generally accepted period is 788-820 A. D. Mādhavācārya in several works of his quotes as Viśvarūpa's passages from the well-known works of Sureśvara. For example, the Parāśara-Mādhavīya (vol. I, part I, p. 57) quotes a kārikā of Sureśvara as that of Viśvarūpācārya.[543] In the Vivaraṇaprameyasaṁgraha (Vizianagaram series p. 92) also Mādhava quotes a verse from the Bṛhadāraṇyakopaniṣad-bhāṣya-vārtika as Viśvarūpa's.[544] In the Puruṣārthaprabodha[545] of Brahmānanda-bhāratī (ms. in Bhau Daji collection, Bombay) composed in 1476 (probably of the Śaka era) the author speaks of the Naiṣkarmyasiddhi as a work of Viśvarūpa. In the Saṁkṣepa-Śaṅkara-jaya Viśvarūpa is said to be the author of the two vārtikas on Śaṅkara's bhāṣya.[546] According to tradition embodied in the various lives of Śaṅkara, the latter had four pupils, Sureśvara, Padma-pāda, Toṭaka and Hastāmalaka. Several works mention Viśvarūpa as one of the four pupils and omit the name Sureśvara. For example, in the Dvādaśa-vākya-vivaraṇa of Gopāla (Aufrecht's Oxf. cat. No. 557, p. 227 b) the four pupils of Śaṅkara are named as Viśvarūpa, Padmanābha, Toṭaka and Hastāmalaka. In the Māna-sollāsa-vṛttānta-vilāsa of Rāmatīrtha we are expressly told that Sure-

śvara is another name of Viśvarūpa, a pupil of Śaṅkara (vide Mitra's Notices vol. V, No. 1763, p. 82). In the Saptasūtra-saṁnyāsapaddhati (Mitra's Notices, vol. VI, p. 296) the four pupils are said to eb Svarūpācārya, Padmācārya, Toṭaka and Pṛthvīdhara. The Guruvaṁśakāvya (Vanivilas ed.) identifies Sureśvara and Viśvarūpa (II.59) and makes him a pupil of Kumārila and Śaṅkara. It may therefore be held as fairly established that Viśvarūpa and Sureśvara are identical. Some corroboration is afforded by the fact that Viśvarūpa quotes Gauḍapāda the ' paramaguru ' of Śaṅkara and holds the same philosophical views as those of Śaṅkara. Just as Viśvarūpa quotes Kumārila's Ślokavārtika, Sureśvara also in his Taittirīyopaniṣadbhāṣya-vārtika quotes a *kārikā* of Kumārila and styles the latter Mīmāṁsakaṁ-manya.[547] This shows that Sureśvara treated Kumārila with scant respect, which seems unlikely if he was at any time Kumārila's pupil. Viśvarūpa in his introduction[548] performs an obeisance to the Sun, the great serpent (Śeṣa), Tilaksvāmin and Vināyaka. The Bhāmatī of Vācaspati-miśra has a similar salutation. Vācaspati-miśra wrote his Nyāyasūci-nibandha in 841-42 A. D. i. e. he was almost a contemporary of Śaṅkara and his pupils. The learned editor of Viś. tells us that in a commentary on Viś. called Vacanamālā Sureśvara is bracketed with Manu and Yogīśvara (Yājñavalkya) as an expounder of Śāstra (i. e. dharmaśāstra).[549] Therefore that commentator looked upon Viś. and Sureśvara as identical. From all these several considerations it follows that

Viśvarūpa flourished about 800–825 A. D. But this problem presents further difficulties. The mutual relations of Sureśvara, Bhavabhūti, Umbeka and Maṇḍana are a great puzzle. I have dealt with this question in JBBRAS for 1928, pp. 289-293. The conclusions arrived at there are that Maṇḍana's literary activity lies between 690–710, that of Umbeka between 700-730 and Sureśvara's between 810–840 A. D. and that Umbeka and Bhavabhūti are identical, but that Maṇḍana and Sureśvara are separated by about 100 years.

Dr. Jolly has brought together in the Journal of Indian History (vol. III. pp. 1–27) some valuable information about Viśvarūpa.

In several later works a digest called Viśvarūpa-nibandha is frequently cited. That appears to be the composition of another Viśvarūpa altogether. For example, the ṣaṇ-ṇavati-śrāddha-nirṇaya of Śivabhaṭṭa (which is later than 1650 A. D.) tells us that Viśvarūpācārya composed a *vivaraṇa* (commentary) on the Śrāddhakalikā.[550] The Kṛtyacintāmaṇi of Śivarāma (D. C. No. 221 of 1879) quotes several[551] verses from Viśvarūpanibandha on Sapiṇḍa relationship in marriage, which are not found in the Bālakrīḍā, but which agree remarkably with the words of the Mit. on Yāj. I. 53. The Varṣakriyākaumudī (pp. 378, 380) mentions Viśvarūpa-nibandha and quotes two verses cited therein. The Tithi-nirṇaya-sarvasamuccaya (later than 1450 A. D.) quotes certain *kārikās* of Viśvarūpa on the 18 varieties of Ekādaśī.[552] The Kālanirṇayasiddhāntavyākhya (composed in 1653 A. D.) quotes certain verses of Viśvarūpa on the question of the disposal of food prepared for a marriage when a period of impurity on death supervenes.[553] The

Nirṇayasindhu also quotes verses of Viśvarūpa. From these data it follows that a Viśvarūpa composed a commentary on Srāddha-kalikā and also wrote a digest on matters of ācāra and other topics of dharma in prose and verse. Raghunandana in his Udvāhatattva (ed. by Jivananda, p. 116) names a Viśvarūpa-samuccaya. It is likely that it is the same as Viśvarūpa-nibandha.

61. Bhāruci.

The Mit. on Yāj. (I. 81) says that Bhāruci like Viśvarūpa held the view that the rule ' ṛtau bhāryāṁ gacchet ' was a *niyama* and not a *parisaṁkhyā*. On Yāj. II 124 the Mit. says that the explanation of ' the fourth share ' to be given to unmarried sisters offered by Asahāya and Medhātithi was the proper one and not that of Bhāruci. The Parāśaramādhavīya[554] and the Sarasvatīvilāsa (para 133) inform us that Bhāruci was of opinion that unmarried sisters were only entitled to a provision for their marriage and were not entitled to a fourth share.

Bhāruci, being mentioned by the Mit., is certainly older than 1050 A. D. Rāmānujācārya in his Vedārthasaṁgraha (reprint from the *Pandit*, ed. of 1924, p. 154) mentions six *ācāryas* that preceded him as expounders of the Viśiṣṭādvaita system, viz. Bodhāyana, Ṭaṅka, Dramiḍa, Guhadeva, Kapardin and Bhāruci. Similarly the Yatīndramatadīpikā[555] of Śrīnivāsadāsa (Ānandāśrama ed.) enumerates (p. 2) a host of teachers as the predecessors of Rāmānujācārya in propounding the Viśiṣṭādvaita system. Vyāsa is the reputed author of the Vedāntasūtras, Bodhāyana is said to have composed a *vṛtti* on the Vedānta-sūtras, called Kṛtakoṭi according to the Prapañca-hṛdaya (p. 39, Trivandrum ed.). Ṭaṅka and Brahmanandin are identical. Dramiḍa is credited with the authorship of a *bhāṣya* on the Vedānta-sūtras (which is quoted by Rāmānuja in his bhāṣya on II. 2. 3). Nāthamuni is said to have been the grand-father of Yāmunamuni, who was born about 916 A. D. Rāmānuja refers to him with great reverence as his teacher's teacher (*parama-guru*, vide Vedārtha-saṁgraha, p. 149) and is said to have been young

when Yāmuna died (vide J R A S for 1915, p. 147 and I. A. for 1909, p. 129). It is therefore obvious that the teachers are arranged by the Yatīndramatadīpikā in chronological order. Hence Bhāruci, being placed earlier than even Dramiḍa and Nāthamuni, was comparatively an ancient author and could not have flourished later than the first half of the 9th century. Bhāruci the jurist also flourished before 1050. It is difficult to believe that there were two famous writers of the same name nearly about the same time. Hence it may provisionally be held that Bhāruci the writer on dharmaśāstra and Bhāruci the Viśiṣṭādvaita philosopher are identical. If this identity be accepted, then Bhāruci the writer on dharmaśāstra becomes comparatively an early writer, being at least as old as Viśvarūpa. His views agree on several points with those of Viśvarūpa, which is a circumstance that lends some corroboration to the date proposed for him.

One interesting point about Bhāruci deserves mention here. From numerous notices contained in the Sarasvatīvilāsa it appears that Bhāruci either commented upon the Viṣṇudharmasūtra or wrote some work in which he took great pains to incorporate explanations of several sūtras of Viṣṇu. For example, para 637 tells us that Bhāruci explained the word ' bīja ' occurring in a sūtra of Viṣṇu as ' piṇḍa '.[556] In para 674 we are told that Bhāruci explained the word ' niṣkāraṇa ' in a sūtra of Viṣṇu and that he held that a daughter's son has not to perform the śrāddha of his maternal grandfather if the latter has a son. Sudarśanācārya in his comment upon Āpastambagṛhya (8. 21. 2) ascribes the same view to Bhāruci and quotes the very words of Bhāruci.[557] Vide J B B R A S for 1925 pp. 210-211 for further examples. There is nothing unnatural in Bhāruci, the Viśiṣṭādvaita philosopher, having composed a commen-

The sūtra of विष्णु is दौहित्रस्य मातामहश्राद्धं निष्कारणम्. The words of सुदर्शनाचार्य are इममेवार्थं भारुचिरप्याह यस्मिन्पक्षे अपुत्रो मातामहः पुत्रिकासुतश्चाखिलद्रव्यहारी तस्मिन्पक्षे तस्य पिण्डदाननियमः इत्यादिना मन्थेन ।

tary on the Viṣṇudharmasūtra. The extant Viṣṇudharmasūtra contains doctrines peculiar to the Viśiṣṭādvaita system such as the worship of Nārāyaṇa or Vāsudeva, the four Vyūhas of Vāsudeva &c. If Bhāruci was a Viśiṣṭādvaitin he would naturally turn to the sūtra of Viṣṇu as having the greatest claim on his attention. Many of the sūtras of Viṣṇu quoted in the Sarasvatīvilāsa with the explanations of Bhāruci are not found in the printed text of Viṣṇu, on which Nandapaṇḍita commented in the first half of the 17th century. It appears that the Sarasvatīvilāsa had before it a larger version of Viṣṇu current in the south (vide note 118, p. 70 above).

On scores of points there is divergence between the views of Bhāruci and those of the Mit. Bhāruci differed from the Mit. as to the definition of *dāya* and *vibhāga*, he allowed *niyoga* to childless widows, while the Mit. condemned it in the case of all widows; Bhāruci, like Viśvarūpa, did not mention *sapratibandha* and *apratibandha dāya*; Bhāruci, like Viśvarūpa, held that a coparcener who concealed some joint property was not guilty of theft, while the Mit. held that he was. Vide J B B R A S for 1925 pp. 211-13 for more examples and details.

62. Śrīkara

The Mit. on Yāj. II. 135 alludes to the view of Śrīkara and others that the widow succeeded as heir to her deceased husband's estate if it was small.[558] The Smṛtisāra[559] of Harinātha attributes the same view to Śrīkara and disapproves of it. On Yāj. II. 169 the Mit.[560] cites the view of Śrīkara about that topic and disapproves of it. Viśvarūpa also gives two explanations of that verse of Yāj., the first of which agrees with that of the Mit. and the second is akin to Śrīkara's.

'

The works of Jīmūtavāhana (viz. the Dāyabhāga and the Vyavahāramātṛkā), the Smṛticandrikā and the Sarasvatīvilāsa contain very interesting notices of Śrīkara's views. Many of them were brought together by me in J B B R A S for 1925, pp. 213-215. Śrīkara like Viśvarūpa held the view that 'duhitaraḥ' in Yāj. refers to the *putrikā*, he allowed the parents of a childless person to succeed together at the same time. The Dāyabhāga very severely criticizes the views of Śrīkara on the succession to re-united members, on *vidyādhana* and on Yāj. II. 24 (about enjoyment for 20 years).[561] Most of the views attributed to Śrīkara were also entertained by Viśvarūpa or are more antiquated than Viśvarūpa's.

Śrīkara was probably a writer from Mithilā and seems to have propounded the view of spiritual benefit as the criterion for judging superior rights of succession. The Smṛtisāra[562] of Harināṭha ascribes such a view to a Śrīkara-nibandha.

Whether Śrīkara wrote a commentary on a smṛti or a general digest (nibandha) it is difficult to say. The Smṛticandrikā[563] says that Śambhu, Śrīkara and Devasvāmin compiled digests of smṛtis and added their own explanations of them. The Smṛtyarthasāra[564] of Śrīdhara asserts in the introductory verses that Śrīkaṇṭha and Śrīkarācārya filled up the gaps in the smṛtis that were scattered about (by introducing order out of chaos). Śrīkara's explanations of Yājñavalkya are frequently cited by the Mit., the Dāyabhāga and

others. But the Mit. does not connect Śrīkara's name with Yājñavalkya as a commentator, though Viśvarūpa is expressly so connected. It appears therefore more likely that Śrīkara wrote a digest of smṛtis in which he paid particular attention to the explanation of the words of Yājñavalkya. The Rājanītiratnākara[565] of Caṇḍeśvara quotes the views of Śrīkara on rājanīti, one of which is that the poor and helpless are entitled to a share of the royal wealth.

Hemādri[566] quotes the view of Śrīkara on Viṣṇu and disapproves of the faults found therein by the author of the Paṇḍita-paritoṣa.

As Śrīkara is quoted by the Mit., he is certainly earlier than 1050 A. D. As his views agree largely with Viśvarūpa's, he may provisionally be regarded as nearly of the same period as Viśvarūpa's. He cannot be earlier than Asahāya who is named both by Viśvarūpa and Medhātithi, though both of them are silent about Śrīkara. Hence Śrīkara must be placed somewhere between 800 and 1050 A. D. and probably flourished in the 9th century.

This Śrīkara must be distinguished from another Śrīkara, the father of Śrīnātha.

63. Medhātithi.

Medhātithi is the author of an extensive and erudite commentary (*bhāṣya*) on the Manusmṛti. It is the oldest extant commentary on that smṛti. The bhāṣya of Medhātithi was first published about forty years ago by Rao Saheb V. N. Mandlik in Bombay and recently Mr. J. R. Gharpure of Bombay brought out an edition of Medhātithi which closely follows Mandlik's edition. A critical edition of the bhāṣya based upon all the available Mss. is a great *desideratum*. An English translation of the *bhāṣya* by M. M. Dr. Ganganath Jha is in progress and several parts have been published so far. In the following Mr. Gharpure's edition has been used. The *bhāṣya* as printed is corrupt in many places, particularly in the 8th, 9th and

12th *adhyāyas* In Mr. Gharpure's edition there is no *bhāṣya* on verses 182-202 of the 9th chapter.

Bühler in his learned and exhaustive Introduction to the Manusmṛti (S. B. E. vol. 25) brings together a good deal of information about Medhātithi (pp. CXVIII-CXXVI). In JBBRAS for 1925 pp. 217-221 I have offered criticisms on some of Bühler's views and have given certain additional information.

In several Mss. of the *bhāṣya* at the end of several *adhyāyas* occurs a verse[567] which says that a king named Madana, son of Sahāraṇa, brought copies of Medhātithi's commentary from another country and effected a restoration (*jīrṇoddhāra*). This does not refer to the restoration of the text of Medhātithi, but to the completion of the library of the king, who was Madanapāla, son of Sādhāraṇa and flourished, as we shall see later on, in the latter half of the 14th century.

Dr. Jolly (Tagore Law Lectures p. 6) holds Medhātithi to be a southerner on account of the fact that his father's name was Vīrasvāmin and on account of the attention paid to his *bhāṣya* by southern writers. It cannot be said that names ending in 'svāmin' were a monopoly of the south. The Rājatarangiṇī gives several literary celebrities whose names ended in 'svāmin' (e. g. V. 34 mentions a Śivasvāmī). Kṣīrasvāmin was a Kāshmirian. The south has always been famed for preserving Mss. of valuable works from the north. Mss. of the Kāvyālaṁkāra of Bhāmaha, a Kāshmirian, are very rare and have been found only in the south. Bühler (p. CXXIII) seems to be right in holding that Medhātithi was a Kāshmirian (or at least an inhabitant of Northern India). In explaining such words as 'svarāṣṭre' and 'janapadaḥ' (Manu VII. 32 and VIII. 42) Medhātithi introduces Kashmir. He gives (on Manu VIII. 400) the monopoly of the sale of elephants as a privilege of the kings of Kashmir where saffron abounds.[568] He says

that the rainbow is called 'vijñāna-chāyā' in Kashmir (on Manu IV. 59). He very frequently refers to northerners e. g. on Manu III. 234 he says 'kutapa' is the word for what is well-known as 'kambala' among northern people and on III. 238 he says 'northern people wrap their heads with *śaṭakas*' (garments). He says on Manu II. 24 that in the Himālayas in Kashmir it is not possible to perform the daily *saṁdhyā* in the open nor is it possible to bathe every day in a river in 'Hemanta' and 'Śiśira'. On Manu II. 18 he says 'in other countries, some say, people marry one's maternal uncle's daughter; but that is opposed to the words of Gautama' (4. 3) and proceeds 'even in that country taking food in the same plate with (or in the company of) one whose thread ceremony is not performed is not at all regarded as dharma (but as improper conduct)'. This is clearly a reference to Baudhāyana Dh. S. (I. 1. 19) according to which 'mātulasutā-pariṇayana' and taking food in the same plate with one whose *upanayana* is not performed are two of the five usages peculiar to the south. It is fair to add that later writers like Kamalākarabhaṭṭa (Nirṇayasindhu, 3rd pariccheda on sāpiṇḍya) regard Medhātithi as a southerner.

Medhātithi quotes from or names numerous smṛti writers, such as Gautama, Baudhāyana, Āpastamba, Vasiṣṭha, Viṣṇu, Śaṅkha, Manu, Yāj., Nārada, Parāśara, Bṛhaspati, Kātyāyana and others. He refers to Bṛhaspati as a writer on 'vārtā' (Manu VII. 43 and IX. 326) and to Bṛhaspati and Uśanas as writers on politics and government (Manu VIII 285, VII. 2 and 155). On Manu VII. 43 he refers to *Cāṇakya* as a writer on 'daṇḍanīti'. In numerous places he seems to have drawn upon Kauṭilya's work. For example, on Manu VII. 155 in interpreting 'pañcavarga' as 'kāpaṭika, udāsthita, gṛhapatika, vaidehika and tāpasavyañjana' he explains them almost in the words of Kauṭilya (I. 2). On VII. 148 he quotes the five aṅgas of *mantra* in the very words of Kauṭilya.[569] Vide also his remarks on Manu VII. 54 (testing of ministers by *upadhās*). He names Asahāya (on 8. 156) and certain writers as Smṛtivivaraṇakārāḥ (on II. 25). Bühler is not quite accurate (p. cxx, n. 1) when he states that 'Medhātithi gives only once the name of an

early commentator'. On VIII. 3 he refers to the interpretations of Bhartṛyajña. He refers to the interpretations of Yajvan (on VIII. 151 and 156). Yajvan is only the last part of a name (as in Devarājayajvan). He quotes the interpretation of Manu by Upādhyāya (on II. 109, IV. 162, V. 43, IX. 141 and 147). Bühler holds that Medhātithi refers to his own teacher. It is more likely that Upādhyāya, like Yajvan, is the name or part of the name of a previous commentator of Manu. On VIII. 152 the explanations of Ṛju are twice cited. On IX. 253 Medhātithi cites the view of one Viṣṇusvāmin.[570] From the tenor of the quotation it appears that Viṣṇusvāmin was a writer on Mīmāṁsā and not a commentator of Manu as Bühler thought (p. cxx, n. 1). Some Mss. read the word preceding Viṣṇusvāmī as 'kovara', others as 'kāvara'. It is probably 'kāvera' (residing on the Kāverī river).

He quotes (on Manu I. 19) a verse from the Sāṅkhyakārikā ('prakṛter mahān &c). He speaks of Vindhyavāsa[571] as a Sāṅkhya and says that he does not admit a subtle interim body (antarābhavadeha). This is probably taken from Kumārila's words.[572] He repeatedly refers to the *purāṇas*, tells us (on III. 232) that they were composed by Vyāsa and contained accounts of creation. He quotes (on XII. 118) a verse from the Vākyapradīpa.[573]

He tells us (on II. 6) that the Pāñcarātras, Nirgranthas (Jains) and Pāśupatas were outside the pale of Vedic orthodoxy.[574]

Medhātithi had drunk deep at the fountain of the Pūrvamīmāṁsā. His bhāṣya is full of the terms *vidhi* and *arthavāda*. He quotes Jaimini's sūtras frequently and applies them to the interpretation of smṛti texts at every step. Vide J B B R A S for 1925 p. 219 for examples. He cites passages from Śabara's *bhāṣya* (e. g. on III. 1). He mentions Kumārila by name (on I. 3) and as Bhaṭṭapāda (on Manu II. 18).

574 एवं सर्व एव बाह्या भोजकपाञ्चरात्रिकनियन्थानार्थवादपाशुपतप्रभृतयः ।

Bühler at first took the remark (on Manu XII. 19) about 'Śārīraka' as[575] referring to Śaṅkara's bhāṣya on the Vedāntasūtra, but later on changed his opinion (S B E vol. 25, p. cxxii) and held that it probably implies a reference to the Śārīraka sūtras. Bühler's considered opinion does not seem to be right. The words 'yatheha rājā ... apaiti' are a summary of Śaṅkara's bhāṣya on Vedāntasūtra II. 1. 34 and II. 3. 42. and I. 2. 11-12. On Manu II. 83 he refers to the Upaniṣad-bhāṣya[576] on Chāndogya II. 23. 4 and says that that passage has been differently explained in the *bhāṣya*. Śaṅkara does explain that passage of the Chāndogya differently. But this is not all. In various other places Medhātithi seems to have in view the Śārīrakbhāṣya of Śaṅkara. For example, on I. 80 he has[577] before him Śaṅkara's bhāṣya on the sūtra 'lokavat tu līlākaivalyam' (Vedāntasūtra II. 1. 33). He, however, seems to have favoured the position that the attainment of *mokṣa* is due[578] not to mere correct knowledge but to the combination (*samuccaya*) of knowledge and karma (vide remarks on Manu VI. 32, 74-75,

and XII. 87-90). This was probably due, as Kullūka remarks[579] (on I. 3), to his being a profound student of Mīmāṁsā.

From Medhātithi's bhāṣya it is perfectly clear that the text of Manu on which he commented was practically the same that we have now. He refers to ancient (*cirantana*) expositors of Manu (on V. 127) and to former (*pūrva*) expositors (IV. 176, II. 134, X. 21). He discusses various readings in several places (vide III. 119, IV. 99, 185, 229, VIII. 53). On VIII. 182-183 he notes[580] that the order of the verses was traditionally different. Kullūka also notices that those two verses and the next two were read in one order by Medhātithi and Bhojadeva and in another by Govindarāja. On 9. 93 he notes that according to some that verse is not Manu's.[581]

Medhātithi's bhāṣya is full of very interesting information. But for want of space it cannot be analysed in detail. The Mit. (on Yāj. II. 124) refers to the view of Asahāya and Medhātithi (on Manu 9. 118) about the fourth share to be given to an unmarried sister at a partition between brothers and follows it in preference to Bhāruci's. On Yāj. III. 24 the Mit. tells us that certain texts of Ṛṣyaśṛṅga about varying periods of impurity for Brāhmaṇas and others were not accepted as authoritative by Dhāreśvara, Viśvarūpa and Medhātithi. According to him[582] *saṁnyāsa* does not mean the giving up of all the obligatory duties laid down by *śāstra*, but the giving of *ahaṁkāra*. He[583] allowed a brāhmaṇa to adopt even a kṣatriya boy. He explains away the well-known verse 'naṣṭe mṛte... patiranyo vidhīyate' by

taking the word 'pati' in its etymological sense and says[584] that the verse suggests that in order to maintain herself in such calamities the woman may take service with another person as her protector.

Medhātithi quotes several verses from his own work called Smṛtiviveka on Manu II. 6 (in all 24 verses) and on X. 5. he says that he has dealt with the topic of mixed castes in Smṛtiviveka. That work therefore was either entirely in verse or contained numerous verses. The Parāśara-Mādhavīya (vol. I, part 2, pp. 183-186) has a long quotation in verse on the duties of *yatis* from a work called Smṛtiviveka and the same work several times quotes verses attributed to Medhātithi (vol. I. part I p. 276 and part 2 p. 172). Hence the Smṛtiviveka cited by the Parāśara-Mādhavīya most probably is Medhātithi's work. Lollaṭa[585] an early writer quotes several verses of Medhātithi in his work on śrāddha. In the Tithinirṇaya-sarvasamuccaya (Bhadkamkar collection) several verses of Medhātithi on obstacles to marriage such as death are quoted.[586] In the Yatidharmasaṁgraha of Viśveśvara-sarasvatī (Ānandāśrama ed. p. 27) two well-known verses about ' *aṣṭaṅga-maithuna* ' (viz. *smaraṇaṁ kīrtanaṁ keliḥ* &c.) are ascribed to Medhātithi and another verse[587] is cited (on the same page) about the six duties of *yatis*. These quotations show that Medhātithi

wrote an extensive work in verse on several topics of dharma. It is to be fervently hoped that this work of Medhātithi would be brought to light some day or other. Coming as it does from such an erudite and ancient writer, it would throw a flood of light on the development of dharmaśāstra.

As Medhātithi names Asahāya and Kumārila and most probably quotes the views of Śaṅkarācārya, he is later than 820 A. D. As the Mit. looked upon him as an authoritative writer, he must be earlier than 1050 A. D. Most probably he flourished between 825 and 900 A. D. Kullūka[588] on Manu III. 127 says that Medhātithi is much earlier than Govindarāja (1050–1100 A. D.). Lollaṭa is mentioned as a predecessor in the Smṛtyartha-sāra of Śrīdhara, which was composed between 1150-1200 A. D. So Lollaṭa is much earlier than 1150 A. D. He looked upon Medhātithi as a writer whose work was as authoritative as a smṛti. A work called Prakāśa[589] which is quoted in the Kalpataru appears to have mentioned Medhātithi. Hemādri quotes at great length Medhātithi's comments in several places.[590] Hence the above date is amply corroborated. This conclusion is further strengthened by the fact that, though he names Asahāya, he does not mention Viśvarūpa, Bhāruci or Śrīkara. If by Miśra[591] in his comment on Manu XII. 118 he refers to Vācaspati-miśra, the author of the Bhāmatī and other works, then he will have to be placed after 850 A. D.

64. Dhāreśvara Bhojadeva.

The Mit. (on Yāj. II. 135) says that Dhāreśvara tries to reconcile the conflicting texts about the right of the widow to succeed to her husband's estate by saying that she succeeded if her husband was separate and if she was willing to submit to *niyoga*. On the same verse the Mit. says that following Manu 9. 217 Dhāreśvara placed the paternal grand-mother immediately after the mother as an heir and even before the father. On Yāj. III. 24 the Mit. says that certain texts of Ṛṣyaśṛṅga about impurity on death were not

accepted as authoritative by Dhāreśvara, Viśvarūpa and Medhātithi. Vide (sec. 60 on Viśvarūpa) about the remarks of the Smṛticandrikā on Dhāreśvara and Viśvarūpa. The Hāralatā[592] (p. 117) remarks (as does the Mit. on Yāj. III. 24) that Bhojadeva, Viśvarūpa, Govindarāja, and the Kāmadhenu did not cite certain texts as Jātūkarṇa's and that therefore they were not authoritative.

That Dhāreśvara is to be identified with Bhojadeva of Dhārā, perhaps the most famous Indian prince as a patron of learned men, follows from several considerations. The Dāyabhāga[593] cites Bhojadeva and Dhāreśvara without making any distinction between the two. Some views that are ascribed to Dhāreśvara in one work are ascribed to Bhojadeva in another. The Vivādatāṇḍava of Kamalākara ascribes to Bhojadeva the same views as to the widow's rights as are ascribed to Dhāreśvara by the Mit. Mss. of the Rājamārtaṇḍa (commentary on the Yogasūtras) have colophons saying that the work was composed by Dhāreśvara Bhojarāja. Dhāreśvara is styled *ācārya* by the Mit. (on Yāj. III. 24) and *sūri* by the Smṛticandrikā (II p. 257). Works on numerous branches of knowledge were composed by (or in the name of) Bhoja of Dhārā. On poetics we have twe extensive works of his, viz. the Sarasvatīkaṇṭhābharaṇa and the Śṛṅgāraprakāśa. A verse at the[594] beginning of the Rājamārtaṇḍa tells us that Bhoja composed a work on grammar, a commentary on the Yogasūtra and a work on medicine called Rājamṛgāṅka just as Patañjali wrote on these three subjects (vide Mitra's Notices of Mss, vol. I, p. 115 for the medical work of Bhoja called Rājamārtaṇḍa alias Yogasāra). He composed a work on astronomy called Rājamṛgāṅka. A work of his on the Śaiva *āgama* called Tattvaprakāśa has been published in the Trivandrum Sanskrit Series. There are several other works ascribed to him, which need not be

set out here. That he composed an extensive work on the principal subjects of dharmaśāstra follows from the numerous references to him contained in the Mit., the Dāyabhāga, the Hāralatā and other works. The Śuddhi-kaumudī[595] (B. I. edition) of Govindānanda frequently speaks of a work called Rājamartaṇḍa of Bhoja on śrāddha. The Jayasiṁha-kalpadruma (p. 26) quotes Rājmārtaṇḍa and Bhojarājīya on the same page. Whether Bhoja composed on Dharmaśāstra one work or two (as he composed two on poetics), and whether his work was a commentary or an independent digest it is difficult to say. M. M. Haraprasādaśāstri in one of his reports threw out the suggestion that the Kāmadhenu was the work of Bhoja, but this is entirely wrong, as the words of Śrīdatta in his Pitṛbhakti[596] will show.

Besides the two points noted above (about widow's rights and about the grandmother), there are others on which the Mit. and Dhāreśvara disagreed: viz. Dhāreśvara held ownership to be known only from śāstra, while the Mit. held it to be *laukika* (vide Vīramitrodaya pp. 528, 536); Dhāreśvara held that the word 'duhitaraḥ' in in Yāj. stands for *putrikā* in the order of succession (Smṛti-candrikā II. p. 295-96). On other points the views of Dhāreśvara coincide with those of the Mit., viz. on the usage of giving a special share to the eldest son having fallen into desuetude, on the daughter's son's right to succession, on the father's inability to give a greater or smaller share to his sons in ancestral property on a partition during his life-time. Vide my article on Bhojadeva in JBBRAS for 1925 pp. 223-224 for details of these and other views ascribed to Bhojadeva. A few other references may be noted here. The Nirṇayāmṛta[597] (p. 68) quotes a Bhojarājīya text. In the Kālaviveka of

Jīmūtavāhana two verses about taking food at the time of eclipses are cited from Bhojadeva (p. 539). In several works certain views are stated to be those of a Bhūpālapaddhati or of Bhūpāla or of Rāja. The reference seems to be to a work of king Bhoja. For example, in the Dānaratnākara a Bhūpāla-paddhati and Bhūpāla are frequently quoted.[598] The Samayapradīpa[599] and Ācārādarśa of Śrīdatta speak of both Bhūpāla and Rāja. In other works also the views of Bhoja are often referred to as those of Rāja (the king *par excellence*). For example, the Ekāvali[600] (a work on Poetics) says that in the Śṛṅgāra-prakāśa the king accepted only one *rasa*. The Varṣakaumudī (p. 107) says that a certain verse is cited by the Gaṅgāvākyāvalī without naming the author, but as it is not cited by the Rājā and the rest, it is unauthoritative.

The several *tattvas* of Raghunandana mention two works of Bhojadeva or Bhojarāja. For example, the Tithitattva (Jivananda vol. I, p. 17) cites a text as quoted in the Bhujabalabhīma by Bhojarāja ; similarly in the Śrāddhatattva, (Jivananda vol. I, p. 266) two texts are cited as quoted qy Bhojadeva in Bhujabalabhīma. Raghunandana also mentions Rājamārtaṇḍa of Bhojarāja (vide Āhnikatattva, vol. I, p. 451). He often cites the Rājamārtaṇḍa and the Bhujabalabhīma on the same page without the author's name (e. g. *vide* Udvāhatattva, vol. II, p. 124). Raghunandana often speaks of a Bṛhad-Rājamārtaṇḍa along with the Rājamārtaṇḍa on the same or the next page (vide Tithitattva, vol. I, pp. 25-26 and Jyotistattva pp. 605 and p. 655). That the Bhujabalabhīma and the Rājamārtaṇḍa are two different works appears to be clear. Whether the Bṛhad-Rājamārtaṇḍa and the Rājamārtaṇḍa are distinct works is not quite clear. (Vide Tri. The Bhujabalabhīma is also mentioned by Śūlapāṇi and by Rudradhara in his Śrāddhaviveka.

Bhoja of Dhārā, according to the Bhojaprabandha, had a long reign of 55 years. There are three certain dates of his. A grant of Bhoja is dated *saṁvat* 1078 (i. e. 1021-22 A. D.). *Vide* I. A. vol. VI, p. 53; *vide* also I. A. vol. 41, p. 201 for Bhoja's grant dated *saṁvat* 1076 Māgha (Jan. 1020) and E. I. vol. XVIII, p. 320 for Betma plate of Bhoja dated 1076 Bhādrapada (September 1020 A. D.). His astronomical work, the Rājamṛgāṅka, takes *śake* 964 (1042-43 A. D.) as its initial date.[601] Bhoja's uncle Muñja was slain by Tailapa between 994-997 A. D. and Muñja was succeeded by Sindhurāja or Sindhula also styled Navasāhasāṅka. An inscription of Jayasiṁha, the successor of Bhoja, is dated *saṁvat* 1112, i. e. 1055-56 A. D. (vide E. I. vol. III, pp. 46-50). Therefore Bhoja must have reigned between 1000 and 1055 A. D.

There is a work named Dharma-pradīpa by Bhoja (Deccan College No. 26 of 1874-75). It is a work by another Bhoja later than 1400 A. D., as it quotes Vijñāneśvara and the Madanapārijāta. It was composed by an assembly of *pandits* at the bidding of king Bhoja of Āśāpura, son of Bhāramalla. The ms. was copied in *saṁvat* 1695 (i. e. 1638-39 A. D.).

65. Devasvāmin

The Smṛticandrikā tells us that Devasvāmin composed like Śrīkara and Śambhu a work in the nature of a digest of *smṛtis* (*smṛtisamuccaya*). Vide note 563 above. The commentary of Nārāyaṇa of the Naidhruva gotra, son of Divākara, on the Āśvalāyanagṛhyasūtra[602] says that it relies upon the bhāṣya of Devasvāmin on the same work. Gārgya Nārāyaṇa, son of Narasiṁha, in his commentary on the Āśvalāyana-śrautasūtra, tells us that he follows the bhāṣya of Devasvāmin thereon. It is hardly

[601] शाके वेदर्तुनन्दोनो रविघ्नो माससंयुतः। अधो देवान्वितो द्विस्थखिवेदघ्नस्तयोर्हृतः॥ राजमृगाङ्क (D. C. ms. No. 105 of 1873-74).

[602] आश्वलायनगृह्यस्य भाष्यं भगवता कृतम्। देवस्वामिसमाख्येन विस्तीर्णं तत्समादृतः॥

likely that two writers of the same name flourished about the same time. Hence it may be assumed that Devasvāmin wrote bhāṣyas on the Āśvalāyana Śrauta and Gṛhya sūtras and a digest of smṛtis, where he discussed all topics of dharma, such as ācāra, vyavahāra, āśauca &c. The commentrry of Bhaṭṭoji[603] on the Caturviṁśatimata refers to the view of Devasvāmin on *śraddha* and *aśauca*. Hemādri[604] (vol. III, part 2, p. 324) and Mādhava (on Parāśara, vol. I, part 2, p. 328) also quote Devasvāmin. The Smṛticandrikā quotes the views of Devasvāmin on vyavahāra and āśauca several times. For example, Devasvāmin[605] explained the word Yautaka differently from the Nighaṇṭu (which explained it as the wealth that was given to a woman when she was seated on the same seat with her husband at the time of marriage). Devasvāmin explained that the words of the Saṁgraha[606] that, when a son was born to one of several full brothers, he stood as a son to all and that the same rule applied to several co-wives when one of them had a son, meant that in both cases another son should not be adopted. Devasvāmin held the view (like Bhojadeva) that the word 'duhitṛ' in Yājñavalkya's verses on succession meant *putrikā*.[607] Devasvāmin explained

The स्मृतिच० (II, p. 289) says 'तस्य पूर्वोक्तेन सहाविरोधाय देवस्वामिना तात्पर्यार्थ उक्तः उभयत्र नान्यः प्रतिनिधिः कार्य इति ग्रन्थेन'. The same words occur in the स. वि. (para 392 and p. 305) and in the दत्तकमीमांसा (p. 42).

Manu[608] 9. 141 as saying that the adopted son (in the particular case mentioned by Manu) took all the wealth and the *gotra* of his adoptive father. Vide Smṛticandrikā (Mysore ed.) on āśauca p. 22. The Vaijayantī of Nandapaṇḍita (on Viṣṇu 22. 32) quotes the view of Devasvāmin that on the death of unmarried daughters mourning was to be observed for ten days.[609] The Smṛticandrikā quotes a verse from Devasvāmin[610] on śrāddha also.

In the Prapañcahṛdaya (Tri. S. series, p. 39) we are told that Devasvāmin composed a brief gloss on the 12 adhyāyas of the Pūrvamīmāṁsāsūtra and the four adhyāyas of the Saṁkarṣakāṇḍa, seeing that the bhāṣyas of Bodhāyana and Upavarṣa were vast. The Govt. collection of Mss. at Madras has Devasvāmin's bhāṣya on the Saṁkarṣakāṇḍa (*vide* Tri. Cat. vol. III, part I, Sanskrit C, p. 3841). There are not sufficient data available to establish the identity of this writer with Devasvāmin, the writer on dharmaśāstra.

As the Smṛticandrikā quotes Devasvāmin so profusely, he cannot be later than 1150 A. D. His earlier limit can be determined in several ways. Gārgya Nārāyaṇa's comment on Āśvalāyanaśrauta (II. 1. 14) is quoted by Trikāṇḍamaṇḍana, who is himself quoted by Hemādri. Therefore Gārgya Nārāyaṇa could not have flourished later than 1100 A. D. (vide Bhandarkar's Report on search for mss., 1883-84, pp. 30-31). Therefore Devasvāmin probably flourished about 1000-1050 A. D., if not earlier. The fact that Devasvāmin held certain views similar to Bhojadeva's also corroborates the chronological position thus assigned to him.

66. Jitendriya

Jitendriya is one of those writers who at one time held an eminent position but in course of time sank into unmerited oblivion. The works of Jīmūtavāhana bear abundant testimony to the fact that Jitendriya wrote an extensive work on dharmaśāstra. In his Kālaviveka (p. 380) Jīmūtavāhana says that Jitendriya[611] wrote on the

topic of *kāla* (i. e. on determining doubtful points about the months, the tithis, saṁkrāntis, &c. and the religious rites to be performed on them). In several passages of the Kālaviveka the very words of Jitendriya are quoted. Jitendriya said that a rite that occupies in performance only a short time must be performed at the principal time indicated for it[612] (and not at a *gauṇa* time). From another quotation it appears that Jitendriya controverted the views of a predecessor Sambhramabhaṭṭa.[613] Jitendriya is said to have enumerated the names of the fifteen *muhūrtas* of the day from the Matsyapurāṇa[614]; vide pp. 257, 367 of the Kālaviveka for other places where the views of Jitendriya on *kāla* occur. In the Dāyabhāga of Jīmūtavāhana also Jitendriya is frequently mentioned. The Dāyabhāga says that, if a man takes another's gold believing it to be iron or takes what is another's believing (in good faith) that it is his own, Jitendriya held in his remarks on the section of *prāyaścitta* that he is not guilty of theft.[615] The peculiar doctrine of the Dāyabhāga that the widow of a person, whether he was separate or a member of a joint family, succeeded to her deceased husband's estate had been already expounded by Jitendriya.[616] The view of Jitendriya was that whatever is acquired by a person without using means or materials jointly owned by all members of a family is his exclusive property and that *maitra* (gifts of a friend) and *audvāhika* are

only cited (by Yāj.) as examples of this proposition.[617] Jitendriya held the daughter's son entitled to succeed after the daughter, just as Viśvarūpa, Bhoja and Govindarāja did. In the Vyavahāramātṛkā of Jīmūtavāhana also Jitendriya's views are cited (on pp. 302, 334). This shows that he wrote also on procedure in law courts. Jitendriya is also referred to in the Dāyatattva of Raghnnandana.[618] But no other early writer quotes Jitendriya. Therefore it appears that Jitendriya was probably a Bengal writer and flourished about 1000–1050 A. D. and that he was completely eclipsed by the brilliant Jīmūtavāhana.

67. Bālaka.

Bālaka like Jitendriya is no more than a name to us. Jīmūtavāhana's works make frequent reference to him. He held the view that the daughter's son, not being expressly mentioned as an heir by Yāj., came in after those expressly mentioned from the widow to the brother.[619] The Dāyabhāga notices that Bālaka read a text of Āpastamba in a wrong way.[620] Bālaka said that the words of Śaṅkha 'svaryātasya-aputrasya bhrātṛgāmi dravyam. . . jyeṣṭhā vā patnī' apply either to a widow belonging to a caste other than her husband's or to a very young widow or in case her husband was undivided or re-united.[621] Bālaka says that when some property is acquired by one brother by means of learning, other brothers are not entitled

to that wealth.[622] The Dāyabhāga refers to a passage from Bālaka in which the latter relies on the Pūrvamīmāṁsā example of *mudga* and *māṣa*.[623] In the Vyavahāramātṛkā of Jīmūtavāhana (p. 346) it is stated that Bāla held the same views as those of Śrīkara-miśra on a certain point. In the Prāyaścitta-nirūpaṇa of Bhavadeva a writer named Vāloka is mentioned (vide JASB 1912 at p. 336). This seems to be a Bengali scribe's way of pronouncing the name Bālaka. Bālaka is mentioned in Raghunandana's Vyavahāratattva (p. 47) also as holding the view with Śrīkara and others that adverse possession for twenty years conferred ownership in the case of immovable property.[624] Śūlapāṇi in his Durgotsaviveka twice quotes the views of Bālaka and once refutes the latter.[625] Hence it appears that Bālaka was an eastern or Bengal writer, composed a work on several branches of dharmaśāstra (such as vyavahāra and prāyaścitta) and flourished before 1100 A. D.

68. Bālarūpa.

In the Smṛtisāra of Harināthа (I. O. cat. No. 301, folio 128a ff) there is a long passage setting out the views of Bālarūpa on the question of the succession to a childless man. In the Vivāda-candra[626] of Misaru-miśra the opinions of Bālarūpa (Bālarūpamata)

that the words of Yāj. (II. 117 tābhya ṛte'nvayaḥ) mean the offspring of the mother and on the succession to reunited coparceners are cited. In the Vivādacintāmaṇi of Vācaspati[627] the views of Bālarūpa are frequently cited. Relying on the words of Parāśara, Bālarūpa held that an unmarried daughter was entitled to preference over a married one as an heir to a sonless man. As regards the verse of Hārīta that if a young widow was *karkaśā* (quarrelsome, 'suspected of unchastity' according to others), then she was to be given maintenance alone (out of her husband's estate), Bālarūpa's view was that it refers to the widow of a re-united coparcener.[628] Bālarūpa was of opinion that *ātmabandhus*, *pitṛbandhus* and *mātṛbandhus* succeeded in the order stated.[629] The Kālādarśa of Ādityabhaṭṭa names Bālarūpa among the authorities on which it relies. This shows that Bālarūpa wrote not only on *vyavahāra* but also on *kāla*.

As Harinātha and the Vivādacandra mention Bālarūpa he is certainly earlier than about 1250 A. D. The important question is whether Bālaka and Bālarūpa are identical. I think, though with some hesitation, that they are identical. The difficulty is caused by the fact that Harinātha speaks of 'the author of Bālarūpa,' which implies that Bālarūpa is a *work* and *not* an *author*, while the others speak of Bālarūpa as an *author*. The Dāyabhāga always speaks of Bālaka and never of Bālarūpa, while the Mithilā writers, Misaru-miśra, Vācaspati and Harinātha, speak of Bālarūpa and not of Bālaka. Bālaka is not mentioned by any writer belonging to a province other than Bengal. It is not likely that there were two early authors belonging to the same locality on *vyavahāra* bearing two names so nearly the same as Bālaka (or Bāla) and Bālarūpa. Moreover if we read one quotation from the Dāyabhāga between the lines (vide note 621) where Jīmūtavāhana makes fun of Bālaka by charging him with having exposed his *Bālarūpatva* (being Bālarūpa, being childish) it appears that the Dāyabhāga looked upon Bālaka and Bālarūpa as identical. If so Bālaka or Bālarūpa

becomes an ancient writer, who flourished certainly before 1100 A. D. As he held the same views as Śrīkara and an antiquated view about the rights of the daughter's son he must not be later than 1050 A. D.

69. Yogloka

Yogloka like Jitendriya and Bālaka is a writer about whom we know only from the works of Jīmūtavāhana and Raghunandana. He is the last of the series of writers enumerated in one place by the Kālaviveka as having dealt with the subject of *kāla* (vide note 611 above). The Vyavahāra-mātṛkā of Jimūtavāhana very frequently[630] cites the views of Yogloka and generally twits him with thinking himself as being a logician or a new-fangled (*nava-tārkikam-manya*) logician. Both in the Kālaviveka and the Vyavahāramātṛkā Yogloka is generally cited for being refuted (e. g. pp. 457-58, 465, 483 of the Kālaviveka). It is only very rarely that Jīmūtavāhana agrees with Yogloka (as on p. 369 of the Kālaviveka). From certain passages of the Kālaviveka it follows that Yogloka composed two works, one called Bṛhad-Yogloka (larger work) and the other styled Svalpa-Yogloka (a smaller-work).[631] It appears that Yogloka was later than Śrīkara and accepted certain illustrations given by the latter.[632] The Vyavahāratattva of Raghunandana informs us that like Śrīkara and Bālaka, Yogloka held the view that twenty years' adverse possession of immoveables conferred ownership (vide note 624 above). The same work tells us that the Maithilas followed the view of Yogloka that the verse of Kātyāyana (yadyekadeśa-vyāptāpi... nṛṇām) was intended to apply to a case where a litigant threw down the challenge that if even one out of several

items of property charged were brought home to him as having been stolen by him, he would restore all the items claimed.[633]

The foregoing establishes that Yogloka wrote at least on *kāla* and *vyavahāra* and composed two treatises on *kāla*.

Jīmūtavāhana[634] says that a predecessor of his styled Dīkṣita criticized a certain reading of Yogloka's, i. e. Yogloka preceded Dikṣita, who was a predecessor of Jīmūtavāhana. Jīmūtavāhana further refers to ancient (*purātana*) mss. of Yogloka's work. Hence Yogloka must have preceded Jīmūtavāhana by at least a hundred years. He is later than Śrīkara (note 632 above). Therefore he must have flourished between 950-1050 A. D.

70. Vijñāneśvara

The Mitākṣarā of Vijñāneśvara occupies a unique place in the Dharmaśāstra literature. Its position is analogous to that of the Mahābhāṣya of Patañjali in grammar or to that of the Kāvyaprakāśa of Mammaṭa in Poetics. It represents the essence of dharmaśāstra speculation that preceded it for about two thousand years and it became the fountain head from which flowed fresh streams of exegesis and developments. Under the decisions of the Courts in British India, the Mitākṣarā is of paramount authority in several matters of Hindu Law (such as adoption, inheritance, partition etc.) throughout India except where, as in Bengal, the Dāyabhāga prevails.

The Mit. professes to be a commentary on the Yājñavalkya-smṛti. In the colophons of several mss. it is described as Ṛju-mitākṣara, Pramitākṣarā or simply Mitākṣarā. These names are probably due to some of the verses appended at the end of the commentary.[635] The Mit. is not only a commentary explanatory

of the verses of Yājñavalkya, but it is in the nature of a digest of smṛti material. It brings together numerous smṛti passages, explains away contradictions among them by following the rules of interpretation laid down in the Pūrvamīmāṁsā system, brings about order by assigning to various dicta their proper scope and province (*viṣayavyavasthā*) and effects a synthesis of apparently disconnected smṛti injunctions.

The Mit. quotes a host of smṛti writers[636] and six predecessors, who were commentators and authors of digests on dharmaśāstra, viz. Asahāya, Viśvarūpa, Medhātithi, Śrīkara, Bhāruci and Bhojadeva. Besides it quotes Vedic works (like the Kāṭhaka), the Bṛhadāraṇyakopaniṣad, the Garbhopaniṣad, the Jābālopaniṣad, the Nirukta, Bharata (author of Nāṭyaśāstra), Yogasūtra, Pāṇini, Suśruta, the Skandapurāṇa, the Viṣṇupurāṇa, Amara, Guru (i.e. Prabhākara).

The author styles himself Vijñānayogin in the concluding verses of his commentary and later writers frequently refer to him in that way. He belonged to the Bhāradvāja *gotra* and was son of Padmanābhabhaṭṭa. He was a *paramahaṁsa* (i. e. an ascetic) and was the pupil of Uttama. He tells us that when he wrote the Mitākṣarā, king Vikramārka or Vikramādityadeva was ruling in the city called Kalyāṇa[637] (now in the Nizam's dominion). The verses at the

end containing the personal history appear to be genuine. They occur in the oldest Mss. of the Mit. such as the Government of Bombay Ms. dated *śakasaṁvat* 1389.

The author of the Mit. was a profound student of the Pūrva-mīmāṁsā system. Throughout the Mit. discussion of Pūrva-mīmāṁsā *nyāyas* and their application to dharmaśāstra are sown broadcast. For example, the Mit. on Yāj. I. 81 (whether it is a *niyama* or *parisaṁkhyā*), I. 86, II. 114, II. 126, II. 265 &c., may be consulted. The Mit., as the very name implies, is generally concise and to the point. But in his desire to make his work a repository and synthesis of varied smṛti dicta the author does not mind if he has occasionally to expand his commentary to enormous lengths. For example, the Mit. on Yāj. III. 265 and 290 occupies several pages of closely printed text.

As the Mitākṣarā names Viśvarūpa, Medhātithi and Dhāreśvara, it must have been composed after 1050 A. D. The Smṛticandrikā[638] of Devaṇṇabhaṭṭa (which as will be seen later on was composed about 1200 A. D.) several times criticizes the views of the Mit., viz. the latter's remarks that the giving of an additional share to the eldest son is disapproved of by the people, the reasons given for preferring the mother to the father and the definition of *dāya*. Vijñāneśvara is named in the Kalpataru of Lakṣmīdhara[639] (composed in the 2nd quarter of the 12th century). This shows that the Mit. was composed before 1120 A. D. A greater approximation can be arrived at in several ways. The Kalpataru mentions

Vādibhayaṃkara[640] who, the Vīramitrodaya[641] tells us, was an admirer and follower of Vijñāneśvara and yet found fault with his explanation of Yāj. II. 51 (rikthagrāha ṛṇam &c.). Therefore the Mit. must have been composed at the latest before 1100 A. D. Among the Cālukyas of Kalyāṇa, the only king named Vikramārka or Vikramāditya during whose reign Vijñāneśvara could have flourished is Vikramāditya VI who reigned for over fifty years from about 1076 to 1127 A. D. Vide Bombay Gazetteer vol. I, part 2, pp. 446-453, I. A. vol. 48 p. 6 (for pedigree of the Cālukyas of Kalyāṇa with dates), I. A. vol. 12 p. 212 (for an inscription of Vikramāditya Tribhuvanamalla dated *śake* 1047) and I. A. vol. 22, pp. 296-298. From all these considerations it follows that the Mit. was composed between 1070-1100 A. D.

Out of the numerous commentaries on the Mit. those of Viśveśvara, Nandapaṇḍita and Bālambhaṭṭa are the most famous. *Vide* sections 93, 105, 111. Considerations of space preclude any detailed statement of the doctrines peculiarly associated with the name of Vijñāneśvara. There are however some which must be mentioned. He laid down (on Yāj. I. 52) that wherever the word *sapiṇḍa* occurred, it denoted either directly or mediately connection with particles of one body (i. e. blood-relationship with an ancestor). He also strictly adheres to the principle that propinquity is the guiding principle in matters of inheritance and succession. He divides *dāya* into *apratibandha* and *sapratibandha* and affirmed that sons, grandsons and great-grandsons acquired by birth ownership in ancestral property. On all these matters he is diametrically opposed to Jīmūtavāhana.

Aufrecht in his great catalogue makes conflicting statements about a work called Āśaucadaśaka. On I. p. 55 he notes that Āśaucadaśaka is a work of Harihara with a commentary by Vijñāneśvara and again on I. p. 571 he ascribes Āśaucadaśaka-ṭīkā to Vijñāneśvara. On I. p. 762 he ascribes the Āśaucadaśaka and Daśaślokīvivaraṇa to Harihara and appears to distinguish him from that Harihara who

composed a bhāṣya on Pāraskaragṛhyasūtra. On I. p. 795 he corrects himself by saying that Harihara wrote only the commentary on the Āśaucadaśaka and that the latter is identical with the Daśaślokī-vivaraṇa. On III. p. 121 he is doubtful whether the Āśaucadaśaka is a work of Vijñāneśvara. In the Deccan College collection there is an ancient Ms. (No. 196 of 1884-1887) of the Āśaucadaśaka.[642] It was copied in *saṁvat* 1578 Mārgaśīrṣa (i. e. December 1522 A. D.). It distinctly says that Vijñāneśvarayogin composed in ten Śārdūla-vikrīḍitā stanzas a work on *āśauca* and that Harihara composed a commentary on it. In the Bhadkamkar collection there is an old Ms. of the Āśaucadaśaka, the colophon of which ascribes the work to Vijñāneśvara. Vide I. O. cat. p. 565, No. 1749 for a ms. of Āśaucadaśaka with Harihara's commentary dated *saṁvat* 1589 (1532-33 A. D.) That the Āśaucadaśaka was a very popular work follows from the several commentaries thereon that are available even now. Raghunātha[643], son of Mādhava and nephew of the famous Nārāyaṇabhaṭṭa, composed a commentary on the Daśaślokī in śake 1500 (D. C. No. 82 of A. 1882-83). There is another commentary on the same work by Bhaṭṭoji (D. C. No. 99 of 1582-83). Harihara quotes in his bhāṣya, besides several well-known smṛtikāras, a work called Viśvādarśa (folio 4b).[644] Harihara, the commentator of the Pāraskaragṛhyasūtra, is described as the pupil of Vijñāneśvara in several mss. Harihara in his bhāṣya on Pāraskaragṛhya quotes Vijñāneśvara and Kalpataru. The Viśvādarśa praises Vijñāneśvara very highly.[645] Therefore it appears that

642 The ms. begins: अथ विज्ञानेश्वरविरचितमुनिज(न)वाक्यैर्मिताक्षरामध्यात् । आशौचदशकवृत्तिं वदति हरिहरो हरिं नत्वा ॥ अत्र तावद्विज्ञानेश्वरयोगीन्द्रश्चतुर्वर्णात्मकस्य जन्मनि सूतौ भवं सूतकं मरणे शवे भवं शावं सूतकशावसिद्ध्यर्थं वृत्तदशकं शार्दूलविक्रीडितेन चकार तत्राद्यं वृत्तमाह मातुर्गर्भविपत्स्वधं &c. Vijñāneśvara composed the Āśaucadaśaka *alias* Daśaślokī and that Harihara, who was either Vijñāneśvara's pupil or not very far removed from him (as he is quoted by Hemādri) composed a commentary thereon. The first verse of the Daśaślokī is cited below as a specimen of the concise style attempted by the author.[646]

Aufrecht (II. p. 50 and I. p. 236) credits Vijñāneśvara with a bhāṣya on Triṁsat-ślokī, a work in thirty Sragdharā stanzas on *āśauca*. This work together with the commentary was printed in *pothi* size at Benares in *saṁvat* 1918 (1861-62 A. D.). The printed text contains[647] the same colophon at the end and date as the D. C. ms. No. 217 of 1879-80, which was copied in *saṁvat* 1711 *Caitra* (i. e. April 1655 A. D.). It is extremely doubtful, however, whether Vijñāneśvara wrote a bhāṣya on the Triṁśat-ślokī. In the bhāṣya Vijñāneśvara and the Mitākṣarā are cited by name.[648] The manner of referring to them rather suggests that the commentary on the Triṁsat-ślokī was composed by some person other than Vijñāneśvara, who, however, drew largely on the Mit. There is a ms. of the Triṁśat-ślokī with a commentary in the Bhau Daji collection which is ascribed to Hemādri on the cover (vide BBRAS. cat. vol. II. p. 209, No. 667).

In the Madras Govt. mss. library there is a ms. of the Vyavahāra-śiromaṇi of Nārāyaṇa, who says that he learnt dharmaśāstras under Vijñāneśvara (adhītya dharmaśāstrāṇi Vijñāneśvara-sadguroḥ). The work deals with the *vyavahāra* portion and was composed for the benefit of the un-initiated (bālabodhārtham). The ms. contains the portion dealing with the king's duty to look into the disputes of people, the time for doing that, sabhā, definition of prāḍ-vivāka (judge), the plaint and its defects, āsedha (restraint of the

The work breaks off in the middle of the explanation of the verse 'patnī duhitaraścaiva'. He closely follows the Mitākṣarā in all that he says; but in one place he expressly differs from his teacher, viz. whereas the Mitākṣarā mentions four different times for partition, Nārāyaṇa says that there are really two times of partition, when the father desires partition and when the son or sons desire it.[648a] On *saṁbhāyasamutthāna* he quotes a passage from Kauṭalya (the ms. uses this form), which agrees closely with the printed text (vide Arthaśāstra III. 14, p. 186, ed. by Shama Sastrī).[648b]

71. Kāmadhenu

This was an ancient digest on the various branches of Dharmaśāstra. Unfortunately no ms. of this work has yet come to light. The Kalpataru of Lakṣmīdhara refers to the view of Kāmadhenu and others that what was bestowed upon a slave (*dāsa*) by his master through favour was also under the control of the master.[649] The Hāralatā which was composed in the third quarter of the 12th century several times mentions the views of Kāmadhenu.[650]

[649] On the verse of कात्यायन 'दासस्य हि धनं यत् स्यात् स्वामी तस्य प्रभुर्मतः' the कल्पतरु says ' यदा प्रसादे स्वामिना दासस्य कृते दत्तं तत्र दासधनेपि स्वामी प्रभुरिति प्रकाशहलायुधकामधेनुपारिजातप्रभृतयः । ' folio 876 of the कल्पतरु (Benares College transcript).

Śrīdharācārya, in his Smṛtyarthasāra,[651] enumerates the Kāmadhenu among the works and writers who dwelt upon the teachings of the Smṛtis. The Vivādratnākara[652] of Caṇḍeśvara speaks of the Kāmadhenu several times. In the Śrāddhakriyā-kaumudī certain verses from the Kāmadhenu are cited in connection with the rites on certain *tithis* of the month of Āśvina (p. 261). Śūlapāṇi in his Śrāddhaviveka names as his authorities the Kāmadhenu and other digests after the smṛtis.[653] The Samayapradīpa[654] of Śrīdatta notices that the Kāmadhenu read 'dvitīyā caitramāsasya,' while the Kalpataru read 'tṛtīyā.' The same reading of the Kāmadhenu is noticed in the Smṛtisāra of Harinātha (I. O. cat., No. 634, folio 79b). In the Rājanītiratnākara the Kāmadhenu is quoted on the definition of 'rājā' and on the two varieties of rulers (pp. 2 and 5). In Hemādri there is a quotation from Smṛtikāmadhenu (vol. IV, p. 992) about the freedom in *kali* from incurring sin on account of contact with great sinners.

The question arises who is the author of the Kāmadhenu. If we rely upon a highly paronomastic passage of the Vyavahāraratnākara[655] of Caṇḍeśvara, Gopāla was the author of the Kāmadhenu. In the Rājanītiratnākara (p. 81) Gopāla is said to have held, with

VI. p. 66). कल्पद्रुम (कल्पतरु), पारिजात, कामधेनु and रत्नाकर have two senses,

Lakṣmīdhara and Śrīkara,[656] the view that on the state wealth poor and helpless people have a claim and that the state perishes if the supreme authority is wielded by many (and not by one). The same work (p. 84) cites the opinion of Gopāla that the coronation rites mentioned in works on *rājanīti* are merely illustrative and that according to the particular usages of countries and families a king may be proclaimed without those rites by merely being seated on a throne.[657] The Pitṛbhakti of Śrīdatta expressly mentions that it is based on the works of Gopāla and others. The Vīramitrodaya cites the view of Gopāla that vyavāhara comes under what is called *jalpa* in the technique of the Nyāya system and that the view of Miśra that Vyavahāra is comprised under the term *vāda* of the same system is wrong. Whether the Gopāla mentioned by Mitramiśra is the same as the author named by Caṇḍeśvara it is difficult to say. But it seems to me that they are identical. Aufrecht in his great catalogue (I. 93) ascribes the authorship of the Kāmadhenu to Śambhu. Whence he derived this information is not clear. The authors and works cited by him do not, so far as I know, ascribe the Kāmadhenu to Śambhu. It is true that Śambhu is credited by the Smṛticandrikā with a digest on *dharmaśāstra* (vide note 563 above) and the Smṛtyarthasāra also names him as one of the authorities on which it relies. Hemādri[659] also tells us that Śambhu was a *nibandhakāra* and refuted the views of Medhātithi on Manu III. 125. The Smṛticandrikā frequently cites the views of Śambhu on vyavahāra and generally refutes them. For example, on the word 'pitarau' occurring in Yāj. II. 135 Śambhu remarked that no difference should be made between the parents (father and mother) as heirs, since whoever out of the two took the wealth of their son it would come

to both.[660] Vide also Smṛticandrikā II, pp. 205, 216. Therefore Śambhu also, being mentioned by the Smṛticandrikā and the Smṛtyarthasāra, is certainly earlier than 1150 A. D. In this state of the authorities I am doubtful whether Śambhu was the author of the Kāmadhenu. I am inclined to hold that he was not the author of that work and that Gopāla was the author. This conclusion is somewhat strengthened by the fact that the Smṛtyarthasāra mentions both Kāmadhenu and Śambhu as authorities on which it relies. If Śambhu had been, in the opinion of the Smṛtyarthsāra the author of the Kāmadhenu, the mention of both would have been superfluous. Mr. Jayasval (in JBORS for 1927, vol. XIII, parts 3-4, p. VII) ascribes the Kāmadhenu to Bhoja, but this is wrong (vide p. 277, note 576).

As the Kāmadhenu is named as an authority by the Kalpataru and the Hāralatā it is certainly not later than 1100 A. D. It cannot be very much earlier since it is not mentioned by Medhātithi and the Mitākṣarā. It may therefore be assigned to the period between 1000 and 1100 A. D.

72. Halāyudha

The Kalpataru[661] of Lakṣmīdhara in its vyavahāra section quotes the views of a jurist Halāyudha several times. The Vivādaratnākara of Caṇḍeśvara mentions Halāyudha dozens of times. In the Smṛtisāra of Harināṭha[662] Halāyudha-nibandha on possession is quoted. The Smṛtisāra also says (folio 140 a) that Halāyudha favoured *niyoga* by the widow of a son-less deceased person and deprived the widow of succession to her deceased husband if she did not submit to *niyoga*. This was the view of Dhāreśvara also. According to Halāyudha[663] parents succeeded before brothers to a deceased person

if the property in the hands of the deceased was ancestral, but that if it was acquired without detriment to ancestral property then brothers succeeded even before parents. Halāyudha is cited in the Vivādacintāmaṇi also, e. g. Halāyudha[664] held the view that the verse of Yāj. (II. 126) was intended to convey that where joint property was concealed by a member and was discovered after partition, he did not incur the guilt of theft. This same view was held by Jitendriya and others. Raghunandana quotes Halāyudha in his Divyatattva, Dāyatattva and Vyavahāratattva. The Vīramitrodaya[665] also quotes Halāyudha.

The foregoing shows that the work of Halāyudha, the jurist, was a very valuable one. This Halāyudha must have flourished before 1100 A. D., since the Kalpataru (1125-1150 A. D.) looked upon him as an authority. As Halāyudha is not mentioned by any of the early commentators like Medhātithi and by the Mit. and as he held opinions similar to those of Dhāreśvara, Jitendriya and others, he cannot well be placed earlier than 1000 A. D. Therefore he flourished between 1000 and 1100 A. D. He was probably a Maithila or Bengali writer, as, among the comparatively early writers on dharma, it is the writers of the north, particularly of Mithilā and Bengal, that rely upon him as a great authority.

The name Halāyudha (an epithet of Balarāma, the brother of Kṛṣṇa) was a common one in India. It seems to have been borne by several eminent writers and this fact has created a great deal of confusion. There is one Halāyudha who was the author of the Abhidhānaratnamālā (edited by Aufrecht), the Kavirahasya (edited by Sourindra Mohan Tagore in 1879 and by Heller in 1900) and probably the Mṛtasañjīvanī, a commentary on the Chandaḥ-sūtra of Piṅgala. In the Kavirahasya he gives the various forms of roots in the several conjugations and connects all verses with Kṛṣṇa, the

emperor of the Deccan (Dakṣiṇāpatha).[666] This Kṛṣṇarāja was most probably the Rāṣṭrakūṭa emperor Kṛṣṇa whose dates range from 940 A. D. to 959 A. D. (*vide* JBBRAS, vol. 18, page 239 ; Bom. Gazetteer I., part 2, p. 210 ; I. A. vol. 11, p. 109 and Bhandarkar's Report, 1883-84, pp. 8-9.). In the colophon to the Mṛtasañjīvanī the author is described simply as bhaṭṭa-Halāyudha. In that commentary verses are quoted as illustrations wherein Muñja alias Vākpatirāja is highly extolled.[667] Muñja was slain by Tailapa between 994-997 A. D. Hence Halāyudha, the author of the commentary on Piṅgala, must not have flourished much earlier than the latter half of the 10 century. It is not unlikely that Halāyudha after being at the court of the Rāṣṭrakūṭas migrated to Avanti when the star of Muñja, who was himself a scholar, rose on the horizon of central India and when the fortunes of the Rāṣṭrakūṭas waned. But this Halāyudha who hailed from the Deccan cannot be the first Halāyudha who appears to have flourished in Mithilā or Bengal.

There is another Halāyudha, author of a famous work called Brāhmaṇa-sarvasva printed at Benares in saṁvat 1935. But this was not available to me and hence I used a Ms. of it in the Deccan College collection (No. 9 of A 1883-84). He gives some account of himself and his family in the introductory verses. He belonged to the Vātsya gotra and was a son of Dhanañjaya who is described as *dharmādhyakṣa* (judge). Lakṣmaṇasena, the king of Bengal, gave him dharmādhikāra (i. e. made him judge).[668] He had two elder brothers[669] Paśupati and Īśāna of whom the former composed Śrāddha-kṛtya-paddhati and Pākayajña-paddhati and the latter the

Dvijāhnika-paddhati. He tells us in the Brāhmaṇasarvasva that he composed Mīmāṁsāsarvasva, Vaiṣṇavasarvasva, Śaivasarvasva, Paṇḍitasarvasva.[670] Unfortunately no Ms. of any of these works has so far been discovered. The chief object[671] of the Brāhmaṇasarvasva is to explain the meaning of the *mantras* used by Brāhmaṇas in daily observances from the brushing of the teeth to going to sleep and in the *saṁskāras* on birth, marriage, death etc. He wrote for the Vājasaneya Kāṇva Śākhā and acknowledges[672] his debt to Uvaṭa who wrote a bhāṣya on the Vājasaneya Saṁhitā in Avanti while Bhoja ruled the earth (mahīṁ Bhoje praśāsati). In some introductory verses and the several colophons of the sections of the Brāhmaṇa-sarvasva Halāyudha styles himself *āvasathika*, *mahādharmādhyakṣa* or simply *dharmādhyakṣa*, *dharmādhikārin* and his brother Paśupati also is styled *āvasathika*. It is very difficult to say what is the exact meaning of this last word. It probably means one who regularly performs all the *gṛhya* rites.[673] Vide Tri. cat. of Madras Govt. Mss. for 1919-1922, pp. 5165 for a ms. of Paṇḍita-sarvasva which deals with the usages of varṇas and āśramas, tithi, śuddhi, the time for śrāddha, jyotiḥśāstra, marriage, gifts, prāyaścitta, pratiṣṭhā &c. But whether it is Halāyudha's work it is difficult to say from the extracts given.

The time when Halāyudha the author of the Brāhmaṇasarvasva flourished can be easily settled as he was the dharmādhyakṣa of Lakṣmaṇasena of Bengal. The Adbhutasāgara was begun in *śake* 1090[674]

(i. e. 1168-69) by Ballāla-sena and it was ultimately finished by his son Lakṣmaṇasena. That these verses are not spurious follows from a reference in the Ṭoḍarānanda-saṁhitā-saukhya about the position of the constellation of the Great Bear according to the Adbhutasāgara in the *śake* year 1082 (1160-61 A. D.) while Ballālasena was ruling.[675] The Saduktikarṇāmṛta of Śrīdharadāsa[676], who was a contemporary of Lakṣamaṇasena, furnishes us with the exact year of the accession of Lakṣamaṇasena viz: that *śake* 1127 corresponded with the 27th year of Lakṣamaṇasena's reign, i. e. he began to reign in 1178-79 A. D. Therefore the literary activity of Halāyudha, the author of the Brāhmaṇasarvasva, lies between 1175-1200 A. D. There is, I am aware, a very heated controversy about the dates of Ballālasena and his son Lakṣamaṇasena, but I am inclined to hold, particularly on account of the explicit reference contained in the body of the Adbhutasāgara[677] itself and in the Ṭoḍarānanda, that Lakṣamaṇasena came to the throne about 1178-79 A. D. The Brāhmaṇasarvasva and the Paṇḍitsarvasva of Halāyudha are quoted by Raghunandana in the Āhnika (pp. 389, Jivananda, vol. I), Prāyaścitta (pp. 531, vol. I for Paṇḍitasarvasva) and other Tattvas. Sourindra Mohan Tagore (introduction to Kavirahasya p. I-II) says that Ādiśūra brought to Bengal five Brāhmaṇas from Kanoj of whom Bhaṭṭa Nārāyaṇa was the most famous and was the author of the Prayogaratna and also of the Veṇīsaṁhāra and that Halāyudha was 16th in descent from that Nārāyaṇa. These traditions of the matchmakers of Bengal and panegyrists of big families are entirely worthless for literary and chronological purposes,

particularly for events of comparatively early times. In their zeal to extol their patrons' families to the skies they were most unscrupulous and threw to the winds all chronology. The Prayogaratna was composed at Benares by Bhaṭṭa Nārāyaṇa whose family migrated from Paithan in the 16th century, while the Veṇīsaṁhāra was composed about a thousand years earlier. Yet both works are fathered upon Nārāyaṇa, the ancestor of the rich and influential Tagore family.

There is yet another Halāyudha. On the Śrāddhakalpasūtra of Kātyāyana a commentary called Prakāśa was composed by Halāyudha, son of Saṅkarṣaṇa (vide BBRAS cat. No. 518, p. 170). In this commentary he refers to Karka, Kāmadhenu, Kalpataru, Govindarāja, Lakṣmaṇopādhyāya, Mitākṣarā, Śaṅkhadhara and Paśupati. He is therefore later than 1150 A. D. He cannot be identified with the author of the Kavirahasya, as the latter flourished much earlier under the Rāṣṭrakūṭas. Nor can be the same as the jurist Halāyudha, since the latter is named in the Kalpataru, which in its turn is quoted in the Prakāśa. The dharmādhyakṣa of Lakṣamaṇasena was a son of Dhanañjaya, while the author of the Prakāśa was a son of Saṅkarṣaṇa. The Śrāddhakāśikā of Kṛṣṇa (Gujarati Press ed. p. 430) on the Navakaṇḍikā or Śrāddhakalpasūtra of Kātyāyana says that first Karka[678] explained the sūtra in pregnant words and then Halāyudha explained it and yet it remained as difficult as before. Kṛṣṇa is mentioned in the Nirṇayasindhu and the Śrāddhamayūkha of Nīlakaṇṭha. Therefore Halāyudha, the author of the Prakāśa on Kātyāyana must have flourished before 1509 A. D. and later than 1150 A. D.

Vide J. A. S. B. 1915 pp. 327-336 where M. M. Chakravarti brought together interesting information about Halāyudha.

73. Bhavadevabhaṭṭa

The Vyavahāratattva of Raghunandana and the Vīramitrodaya tell us that Bhavadevabhaṭṭa composed a work called Vyavahāratilaka on judicial procedure. The Vyavahāratattva[679] tells us that Bhavadeva

read 'astavyastapadavyāpi' instead of 'yadvyastapadamavyāpi' in Kātyāyana's verses enumerating the blemishes of *uttara* (defendant's reply). The Vyavahāratattva[680] mentions Bhavadevabhaṭṭa's discussion and illustration of a reply (uttara) with a weak plea (kāraṇa). The same work informs us that Bhavadeva held the same views on adverse possession as Śrīkara, Bālaka and others did (vide note 624 above). The Vivādacandra of Misarumiśra[681] several times refers to the views of Bhavadeva. The Vīramitrodaya[682] gives in great detail the remarks of Bhavadeva on the well-known text of Sumantu about killing an *ātatāyin*. The Sarasvatīvilāsa[683] and the Vaijayantī of Nandapaṇḍita quote the very same views of Bhavadevabhaṭṭa on Sumantu's text.

The foregoing brief discussion shows that Bhavadeva's Vyavahāratilaka must have been a valuable work on judicial procedure. Unfortunately that work has not yet come to light.

Bhavadeva also wrote several other works.

In the Deccan College collection there are two Mss. (No. 9 of 1895-98 and No. 263 of 1887-91) of a work of Bhavadeva variously named Karmānuṣṭhānapaddhati or Daśakarma-paddhati or Daśakarma-dīpikā. M. M. Chakravarti in his informing article on Bhavadeva (J. A. S. B. 1912, pp. 333-348) says that the work has often been printed. I was not able to secure a copy. That work[684] deals with

the ten principal rites and ceremonies to be performed by Brāhmaṇas who study the Sāmaveda. The principal subjects are :—The *Homa* to the nine planets (*Navagraha-homa*), *mātṛpūjā*, *pāṇigrahaṇa* and other essential rites of marriage, *homa* on the fourth day after marriage, garbhādhāna, puṁsavana, sīmantonnayana, soṣyantīhoma (*homa* when a woman is on the point of delivery), jātakarma, niṣkramaṇa, nāmakaraṇa, annaprāśana, cūḍākaraṇa, upanayana, samāvartana (the student's returning from the teacher's house after finishing his studies), Śālākarma (first entrance in a new house).

Another work of Bhavadeva, who is styled Bālavalabhī-bhujaṅga therein, is the Prāyaścittanirūpaṇa (I. O. cat. No. 1725 p. 554, Mitra's notices, vol. IX, No. 3138, pp. 214-15). In that work he mentions over 25 smṛtikāras, the Matsya and Bhaviṣya purāṇas, Viśvarūpa, Śrīkara and Bāloka (? Bālaka). This work was held in high esteem, as the Smṛtiratnākara[685] of Vedācārya places Bhavadeva after Manu among the authorities on prāyaścitta that he follows. The Varṣa-kriyā-kaumudī of Govindānanda (B.'I. series) quotes a text from Bhavadevabhaṭṭa on the prāyaścitta for eating in a solar or lunar eclipse (p. 106).

There is yet another work of Bhavadevabhaṭṭa called Tautātita-matatilak, a ms. of which exists in the India Office (cat. No. 1591). It is doubtful whether that ms. contains the whole of the work. That work is concerned with elucidating the doctrines of the Pūrva-mīmāṁsā system from the standpoint of Kumārilabhaṭṭa (who is also called Tautātita). From the colophons at the end and elsewhere it appears that the work was intended to explain Jaimini I. 4 and II. 1, but in the body of the work contained in the Ms. only sūtras from the first *pāda* of the 2nd adhyāya are dwelt upon. Bhavadeva is styled Bālavalabhībhujaṅga here also and invokes a terrific curse[686] upon those who would borrow from his work without acknowledg-

ing their debt. The work opens with the well-known sūtra 'bhāvārthāḥ karmaśabdāḥ &c. (Jaimini II. 1. 1). It goes on explaining the principal topics of Jaimini's 2nd adhyāya, first *pāda*. The sūtras explained are II. 1. 1, 5, 9, 10, 13, 24, 30-35, 38, 40 46-49. It mentions the bhāṣyakāra (Śabara), Vārtika (folio 12 a), Gurumata (17b), Prabhākara (21b), Vārtikakārapāda (22 b, in the plural). It frequently quotes kārikās from the Tantravārtika with the words 'taduktam.' Hemādri[687] quotes Bhavadeva's explanation of the words of Kumārila allowing an option between *jāghanya* and *ājya* and disapproves of it. Vide Tri. cat. of Madras Govt. Mss. for 1919-1922 p. 5527 for the same work.

Unexpected light is thrown on the personal history of Bhavadevabhaṭṭa by an inscription found in the temple of Ananta Vāsudeva at Bhuvaneśvara in the Puri District of Orissa edited by Kielhorn in E. I. vol. VI, p. 203, which eulogises Bhavadevabhaṭṭa, the identity of the author Bhavadeva with the person eulogised being established by the unique epithet, Bālavalabhībhujaṅga applied to the latter.[688] The eulogy is composed by a person called Vācaspatikavi. Bhavadeva belonged to the Sāvarṇa gotra of the Kauthumī school of the Sāmaveda. The family belonged to Siddhalagrāma in Rāḍhā (west of the Hugli and south of the Ganges). Bhavadeva's remote ancestor Bhavadeva obtained in gift the *agrahāra* of Hastinībhiṭṭa from the Gauḍa king. The father of Bhavadeva was Govardhana, a warrior and a scholar. His mother was Sāṅgokā, daughter of a Vandhyaghaṭīya Brāhmaṇa. With the advice of Bhavadeva king Harivarmadeva is said to have reigned long in prosperity. Bhavadeva is stated in the above mentioned inscription to have composed works on *horā* (astrology), *smṛti*, and *mīmāṁsā*. Bhavadeva is eulogised as a great builder. He constructed a reservoir of water in Rāḍhā, he set up a stone image of Nārāyaṇa and founded a temple in which he placed images of Nārāyaṇa, Ananta, ann Nṛsiṁha. He also gave

to Harimedhas female attendants, dug a tank and laid out a garden. Neither Kielhorn nor Chakravarti has attempted any explanation of the epithet Bālavalabhībhujaṅga. I hazard an explanation. Bhavadeva probably made some innovation in the structure of the roofs or balconies of the temples he built and he was therefore styled a lover (a gallant or paramour) of little (*bāla*-small sized or girlish) *valabhīs*. From the nature of the character Kielhorn conjectured that the inscription belonged to the 12th century A. D.

The date of Bhavadeva can be approximately settled to be about 1100 A. D. as he is quoted by Hemādri, the Vivādacandra of Misaru and the Smṛtisāra of Harinātha. He is certainly earlier than 1200 A. D. A period of at least half a century must have elapsed before a Bengal writer like Bhavadeva came to be looked upon as an authority on mīmāṁsā by Hemādri who wrote in distant Berar. It appears that he was quoted in the Karmopadeśinī of Aniruddha (I. O. cat. No. 1853, p. 474). But that Ms. is bound up with another work by a later author and the reference in the cat. is not quite clear. If we rely on the Vīramitrodaya, a work called Pradīpa criticised the views of Bhavadeva on the verse of Yāj. II. 24 (about adverse possession for 20 and 10 years). Bhavadeva held that twenty years' enjoyment of immovable property by a stranger implied that the real owner meant to abandon it for the benefit of the stranger enjoying it, that such abandonment for the enjoyment of another leads to the inference of the extinction of previous ownership and that the property being abandoned by the owner in favour of the stranger who takes hold of it, ownership also (of the stranger) arises. The Pradīpa[689] points out that it does not invariably follow

[689] भवदेवस्तु ... तस्मादेवं वाच्यं यदयं यथोक्तो भोगः पूर्वस्वामिनो भोक्तुद्वेशेन त्यागात् तत्स्वत्वध्वंसमर्थापयति अनुमापयति वा। ... तथा च तदुद्वेशेन त्यक्ते तत्परिग्रहणादेव परस्य तत्र स्वत्वमप्युपपद्यते। ... अत्र प्रदीपकृतः। यत्र हि मत्कृत्ये- (प्ये?) दानीं नात्र फलसम्भावना तदधुना तावत्पर एव भुक्त्वा (भुंक्तां?) पश्चादेतत्सकाशात्सफलोपभोगां भुवं ग्रहीष्यामीत्यभिसंधाय भूम्यादिस्वामी तत्र परोपभोगं क्षमते तत्रापि विंशत्यभ्यधिको भोगोस्ति स्वामिनस्तदुद्वेशेन त्यागश्च नास्तीति व्यभिचारान्नेदृशभोगस्य पूर्वस्वामिस्वत्वत्यागे प्रामाण्यम्। किं च भूस्वामी सचेताः किमिति वृथैव तत्र स्वत्वं जह्यात्। न ह्यत्र दृष्टमुद्वेश्यं नाप्यदृष्टं धर्मशास्त्रोकेतिकर्तव्यताविरहात्। ... नापि यदुद्वेशेन यत्त्यज्यते तत्तस्य स्वामिति नियमः। उद्देश्येनागृहीते व्यभिचारात्। वीर० p. 212-14.

that, because a srranger is allowed to enjoy land, the owner intends to abandon the land for the stranger, nor is it an invariable rule that what is abandoned for another becomes the property of that other. It will be shown later on that the Pradīpa must have been composed before 1150 A. D. Hence it follows that Bhavadeva flourished about 1100. He cannot be very much earlier than that, as he is not mentioned by any writer of the 11th century and as he not only mentions Kumārila and Prabhākara, but also writers who criticised Prabhākara's views.

There were several other later persons named Bhavadeva who wrote on topics of Dharmaśāstra such as Bhavadeva, author of Dānadharmaprakriyā (middle of 17th century), and Bhavadeva, the author of Smṛticandrikā, who flourished in the first half of the 18th century.

On Bhavadeva's Karmānuṣṭhāna-paddhati there is a commentary called Saṁsārapaddhatirahasya.

74. Prakāśa.

A work called Prakāśa has been quoted by very early *nibandhakāras*. The Kalpataru quotes the interpretation of Prakāśa, Halāyudha and Kāmadhenu on a verse of Kātyāyana.[690] The Vivādaratnākara of Caṇḍeśvara cites the views of Prakāśa scores of times (e. g. p. 131, 145, 456, 460, 462, 474, 485, 504 etc). Frequently Prakāśa is coupled with Pārijāta (e. g. p. 497). On page 518 of the Vivādaratnākara a remark of Prakāśa wherein both Asahāya and Medhātithi are named is cited.[691] The Dānaratnākara of Caṇḍeśvara quotes a passage of Saṁvarta with Prakāśa's explanation of it.[692] In the Śrāddhasaukhya of Ṭoḍarānanda Prakāśa's explanation

690 Vide note 521 above. On पणे जितः, one of the 15 kinds of *dāsas* enumerated by नारद, the कल्पतरु quotes the remarks of the प्रकाश ' यद्यस्मिन्विवादे पराजितो भवामीत्यादिपरिभाषणेन दासीभूतः द्यूतजित इति प्रकाशपारिजातौ।' (folio 368 of Benares Sanskrit College transcript).

of the word 'Yānevata' occurring in a passage of Śaṅkha about the fruits allowed in śrāddha is quoted.[693]

These quotations establish that Prakāśa was a work that not only dealt with vyavahāra, but also with such topics as *dāna*, *śrāddha* etc.

Whether the Prakāśa was an independent work or a commentary is somewhat doubtful. But from a passage of the Vivādaratnākara it seems to follow that it was a commentary on the Yājñavalkya-smṛti. There we are told that the Kalpataru[694] read 'abhijānatā' for 'avijānatā' in Yāj. II. 258, but that since that reading is opposed to Yājñavalkya-prakāśa, Halāyudha and Pārijāta it must be, regarded as a wrong reading. As it is a reading of Yāj. himself that was being discussed, it would be somewhat strange if it were said that it was opposed to Yāj. and Prakāśa and therefore it is necessary to suppose that Yājñavalkyaprakāśa is one work.

The Vivādacintāmaṇi in several places gives the explanation of Prakāśa.[695] The Smṛtisāra[696] gives at great length the explanation of Prakāśa on the controversial verses of Yāj. (II. 138-139). The Vīramitrodaya[697] quotes at length Prakāśa's explanation of Manu (9. 207) and disapproves of it on the ground (among others) that the verse can more clearly be explained so as to convey

a meaning similar to that of Yāj. II. 116. The Prakāśa is mentioned in the Dāyatattva (vol. II, p. 173) and in the Śuddhitattva (vol. II, p. 288).

As the Prakāśa is quoted in the Kalpataru it is certainly earlier than 1125. It mentions Medhātithi. Besides the Mit. does not refer to it. There is room for thinking that it follows the Mit. Yāj. II. 116 is, according to the Vivādaratnākara,[698] explained by the Prakāśa in almost the same words as the Mit. It is possible that both borrow from the same original. At all events the Prakāśa must have been composed between 1000 and 1100 A. D.

Hemādri frequently cites a work called Mahārṇavaprakāśa.[699] According to the latter the sandal unguents, flowers, incense, lamp presented in śrāddha are to be offered to the Brāhmaṇas invited and not to the *pitṛs*. In another place Hemādri quotes the explanation of the word '*nimantraṇa*'[700] given by the Mahārṇavaprakāśa. In some places Hemādri refers to a work called Smṛtimahārṇava or simply Mahārṇava.[701] It appears to me that all these three are the names of the same work. The question then arises whether the Smṛtimahārṇavaprakāśa is the same as the Prakāśa mentioned by the Kalpataru and Caṇḍeśvara. In the present state of our knowledge it appears that they are identical. The Madanaparijāta (p. 93) quotes a verse from the Smṛtimahārṇava about *upākarma*.

75. Pārijāta.

Several works bear the appellation Pārijāta such as the Vidhānapārijāta (composed in 1625 A. D.), the Madanapārijāta (about 1375 A. D.) and the Prayogapārijāta (between 1400-1500). But

there was an ancient work called Pārijāta quoted by even some of the earliest *nibandhakāras*. The Kalpataru several times quotes the views of a work called Pārijāta. The Prakāśa and Pārijāta are frequently mentioned[702] together in the Kalpataru and the Vivādaratnākara. The latter regarded the Kalpataru, Pārijāta, Halāyudha and Prakāśa as its most eminent predecessors.[703] The Dānaratnākara[704] quotes several times the views of Pārijāta on gifts. The Smṛtisāra of Harinātha sets out at length the order of succession to a sonless man according to the Pārijāta (vide I. O. Ms. No. 301, folio 134 a). One of the striking opinions of the Pārijāta was that the widow of a sonless man should raise offspring by *niyoga* and give the wealth of the deceased to the son so born.

From the above it appears that the Pārijāta was an independent work on *vyavahāra, dāna* and other topics. Being quoted by the Kalpataru it was earlier than 1125 A. D. and as it held views similar to those of Bhojadeva and Halāyudha on the widow's rights and as it is not quoted by the Mit. or other earlier works it must be assigned to a date between 1000-1125 A. D. In I. L. R. 12 Cal. 348 at p. 356 the learned judges hold that the Pārijāta frequently cited as an authority by the Vivādaratnākara is the Madanapārijāta. But this is entirely wrong. The latter work, it will be shown (*vide* sec. 93), was composed about 1375, while the Vivādaratnākara was composed about 1320 A. D. Hence the Pārijāta of the Vivādaratnākara is the ancient work mentioned in the Kalpataru.

The commentary of Govindarāja on the Manusmṛti was published by Rao Saheb V. N. Mandlik and a portion of it was published by

Dr. Jolly in the Manuṭīkāsaṁgraha. In his commentary[705] on Manu III. 247 and 248 he tells us that he has treated at greater length the subject of those verses in his own work called Smṛtimañjarī. Kullūka[706] in his comment on Manu IV. 212 twits Govindarāja with having explained '*ugra*' in one way in his commentary on Manu and in a different way in his Mañjarī. A Ms. of a portion of the Smṛtimañjarī exists in the India Office (cat. p. 471).

From these two works a brief account of the personal history of Govindarāja can be extracted. The colophons at the end of the Manuṭīkā describe Govindarāja as the son of bhaṭṭa Mādhava. The first verse[707] of the Smṛtimañjarī and one at the end (though somewhat corrupt) give the information that he was the son of Mādhava and grand-son of Nārāyaṇa and appears to have lived on the holy banks of the Ganges.[708] Those who like Sarvadhikari identify Govindarāja with Govindacandra, prince of Benares, are therefore entirely wrong since he was a Brāhmaṇa and not a Kṣatriya. The first verse[709] of his Manuṭīkā contains an obeisance to god (or Śiva) and states that he had received the śāstra of Manu in an unbroken tradition of teacher and pupil and that he had examined previous commentaries of Manu.

The Smṛtis mentioned by him in the two works of his are given below.[710] Besides he mentions the Vāyupurāṇa (on Manu III. 232) and Purāṇa in general (on Manu I. 74 and 80). He frequently quotes the Gṛhyasūtras, also the Bahvṛcagṛhyapariśiṣṭa, the Yogasūtra. He says (on Manu 2. 23) that Mleccha countries like Āndhra and others were not fit for performing sacrifices. He appears to have held like Medhātithi the view that *mokṣa* was to be attained by a combination of *jñāna* and *karma*.[711] As compared with the bhāṣya of Medhātithi his commentary is very concise. Kullūka largely drew upon Medhātithi and Govindarāja, mentions them hundreds of times, criticizes[712] both of them and particularly holds up Govindarāja to ridicule often enough.[713] Kullūka notes that Govindarāja in opposition to Medhātithi and Bhojadeva arranged Manu 8. 181-184 differently (putting 8. 182 as the last of those four verses). In the printed edition there is no comment of Govindarāja on the verses of the 9th chapter from verse 72. But it appears that the Dāyabhāga had that part of the commentary, as it quotes the views of Govindarāja on the rights of the daughter's son which could have appeared only on Manu IX. 130-136.

A few words may now be said about the Smṛtimañjarī, Mss. of which are rare. At the end of the India office Ms. a summary of the contents of the whole work is given (for which see footnote

below).[714] It appears that the Smṛtimañjarī dealt with all principal topics of dharmaśāstra such as the saṁskāras, the daily duties viz: bath, saṁdhyā, brahmayajña, the duties of the student, householder, the forest hermit, and the *saṁnyāsin*, the duties of the four *varṇas*, gifts, the purifications of various materials, foods forbidden and allowed, impurity on birth and death, *sapiṇḍas* and *samānodakas*, funeral rites, *śrāddha* and its various details, prāyaścitta. The ms. in the India office deals with the *adhikārī* for prāyascitta, the *parṣat* (i. e. the assembly of learned men who are to determine what prāyaścitta is to be prescribed), the means of atoning for sins and violations of religious duties, the prāyaścittas for the *mahāpātakas* (viz. the murder of a Brāhmaṇa, drinking wine, theft of gold, incest) and for other lesser and similar sins, meaning of the word prāyaścitta, prāyaścittas for killing men of Kṣatriya, Vaiśya and Śūdra classes and for killing women, prāyaścittas for the killing of a cow and of various beasts and birds, prāyaścittas for eating forbidden or polluted food and for selling articles forbidden to be sold, secret *prāyaścittas*. The India Office Ms. which deals only with *prāyaścittas* contains 152 folios. This gives us an idea as to how extensive the whole work must have been

The Vyavahāramātṛkā as its very name implies deals with the elements of vyavahāra (i. e. judicial procedure). It speaks of the eighteen titles of law, the derivation of the word prāḍvivāka (judge), the persons fit to be appointed judges, different grades of courts, duties of *sabhyas*, four stages of vyavahāra, pūrvapakṣa (plaint), pratibhū (surety), blemishes in a plaint, *uttara* (reply of the defendent), four kinds of *uttara*, blemishes in *uttara*, *kriyā* (proof or burden of proof), divine (*daivī*) and human (*mānuṣī*) proof (viz : ordeals, inference, witnesses, documents, possession), persons incompetent to be witnesses. Ordeals have not been dealt with by the author. The first verse of the work[741] styles it Vyavahāra-mātṛkā. The last verse[742] but one suggests the name Nyāyamātṛkā which practically is a synonym of Vyavahāra-mātṛkā and the colophon at the end of a ms. in the Deccan College collection calls it Nyāyaratnamālikā.

About twenty smṛtikāras[743] are mentioned in the Vyavahāra-mātṛkā. Kātyāyana, Bṛhaspati and Nārada are the three smṛtikāras most frequently quoted, nearly two-thirds of the quotations in the entire work being derived from them. Among the *nibandhakāras* the following are named :— Jitendriya, Dīkṣita, (p. 302), Bāla (p. 346, the same as Bālaka), Bhojadeva (pp. 284, 305), Mañjarī-kāra (i. e. Govindarāja), Yogloka, Viśvarūpa, Śrīkara (pp. 292, 334 or Śrīkaramiśra p. 342). About Viśvarūpa he says[744] 'I have put forward this conclusion of the ancient writers, I have

Chakravarti is not right in taking (JASB 1915 p. 317) 'prācām' to mean 'eastern' in this verse, as in the previous verse also जीमूतवाहन refers 'to all *munis*' and 'former works' 'इति सकलमुनीनां भुक्तिवाक्यं विमृश्य स्वरसन इह सोर्थो गम्यते न्यायतश्च । स पुनरुपनिबन्धो (द्वो ?) गृह्यतां बुद्धिमद्भिर्भवति यदि न जाड्यं श्रद्धया माकृतेषु' ॥

refuted the objections of Viśvarūpa and others and dealt with them at length.' Yogloka and Śrīkara are generally quoted for being refuted and the former is frequently jeered at as 'tārkikaṁ-manya' or 'nava-tārkikaṁ-manya'. In this work Jīmūtavāhana displays great familiarity with the ancient dialectics. In some cases what the printed text exhibits[745] as prose really constitutes verses. Sir Asutosh Mukerji is not accurate when he says in the preface that 'Jīmūtavāhana refers to a number of jurists not mentioned by any other author, e. g. Jitendriya, Yogloka, Bālaka, Viśvarūpa, Śrīkara and Mañjarīkāra.' It has been shown above that both Viśvarūpa and Śrīkara have been mentioned by the Mit. which is certainly earlier than Jīmūtavāhana and by a host of other writers who were either earlier than or contemporaries of Jīmūtavāhana. The Vyavahāramātṛkā is quoted in the Vyavahārtattva[746] (pp. 199, 214, vol. II) and the Dāyatattva of Raghunandana.

The Dāyabhāga is the most famous of Jīmūtavāhana's works. In matters of Hindu law such as inheritance, partition, *strīdhana*, re-union, it is of paramount authority in modern British Indian courts in Bengal, except in those cases where the Mitākṣarā is applicable. The names of more than a dozen commentators of it are known and Pandit Bharatacandra Siromani published it with seven commentaries (1863-1866). It was translated into English by Colebrooke. In many editions (such as that of Jivananda) it is divided into sections though there were no divisions in the original work. The contents of the Dāyabhāga are :— Definition of dāya ; father's power over ancestral property ; partition of father's and grand-father's property ; division among brothers after their father's death ; definition, classification and devolution of *strīdhana* ; persons excluded from inheritance and partition on the ground of disabilities; property which is impartible (in its very nature or because it is self-acquired); order of succession to one dying sonless; re-union, partition of coparcenery property concealed but discovered afterwards, *indicia* of partition.

745 e. g. on p. 348 the words 'तस्मादाकाशकुसुमसमान एव प्रमाणभावोऽस्याः । भुक्तेर्दूरनिरस्तं लिखितादिभ्यो बलीयस्त्वम् ॥' constitute an Āryā. Similarly on p. 349 the words 'तस्मादस्मात्तिरियमुक्ता भुक्तेः प्रमाणता भ्रान्तैः । ... स्ववचनमात्राधीनस्वत्वफलत्वात्प्रमाणं सा ॥' make two Āryās.

746 'युक्तिर्न्याय्यः स च लोकव्यवहारः इति व्यवहारमातृका' व्यवहारतत्त्व p. 199, vol. II.

Some of the peculiar doctrines of the Dāyabhāga which are of fundamental importance and which sharply distinguish it from the Mit. are : sons have no interest in ancestral property by birth, sons can claim partition only after extinction of their father's ownership (i. e. after his death or on his becoming *patita* or a *samnyāsin*) or partition can take place between father and sons if the father so desires, a widow succeeds to her husband's interest on his death even if he be joint with his brother, the right to take a deceased person's estate is regulated by the spiritual benefit conferred by the person claiming as heir (by means of the offering of *piṇḍas*)and not by the principle of consanguinity (as in the Mit.).[747]

Besides the smṛtikāras,[748] the Mahābhārata and the Mārkaṇḍeya-purāṇa the following authors are referred to by name in the Dāyabhāga :—Udgrāhamalla, Govindarāja (as author of Manuṭīkā), Jitendriya, Dīkṣita, Bālaka, Bhojadeva or Dhāreśvara, Viśvarūpa and Śrīkara. Udgrāhamalla is referred to on the distribution of strīdhana and it is said that Udgrāhamalla (i. e. his view) is throttled[749] by the text of Devala. It appears therefore that Udgrāhamalla was not a smṛti writer, but a *nibandhakāra*. Dīkṣita[750] is credited with the view that, among daughters, those who have sons or are likely to have sons are preferred to those who are either barren, widowed or who give birth to daughters alone and the Dāyabhāga approves of this yiew. There is one more writer who is referred to twice with great respect as *Niravadyavidyoddyota*.

Whether this is a mere description or title ('the refulgence of whose learning is spotless') or whether the author's name was Uddyota and *niravadyvidya* ('whose learning is spotless') is an epithet, it is difficult to say. For a correct knowledge of the origin and development of the theory of spiritual benefit propounded in the Dāyabhāga, it would be extremely desirable to know who this writer was, as Jīmūtavāhana tells us that that view was brilliantly set forth by Niravadyavidyoddyota. The same writer is also quoted on the well known verse of Yājñavalkya 'bhūryā pitāmahopāttā &c.,' which is the sheet-anchor of Vijñaneśvara's theory about the son's rights by birth in ancestral family property.[751]

Jīmūtavāhana gives very little information about himself. In the colophons of his works he is described as Pāribhadrīya Mahāmahopādhyāya and at the end of the Vyavahāramātṛkā (vide note 742 above) he tells us that he was born of the Pāribhadra family (*kula*).[752] It is said that this name of the family still survives in the Parihal or Pāri Gai, a section of Rāḍhīya Brāhmaṇas (Ghose's Hindu Law, 3rd edition, pp. XVI-XVIII and JASB 1915 p. 320). It is also said that Edumiśra in his Kulakārikā tells us that Jīmūtavāhana was chief judge in the reign of Viṣvak-sena of Bengal and that he was 9th in descent from Nārāyaṇabhaṭṭa, one of the five Brāhmaṇas brought by Ādiśūra. The information supplied by the match-makers of Bengal is, as shown above, not worth reliance, unless corroborated by independent evidence. It is also said that for fourteen generations the Brāhmaṇas of Pārigrāma have been degraded and so Jīmūtavāhana would not have paraded the fact that he was Pāribhadrīya if at the time when he wrote his subcaste had been degraded (Intro. to Kālaviveka p. VIII). The fact that Jīmūtavāhana was a native of Rāḍhā is testified by his statement in the Kālaviveka that Agastya (Canopus) rose in Ujjayinī

when four days of the month of Bhādrapada remained, but that in Rāḍhā Agastya rose when seven days of the month were yet to run.[753]

Extremely divergent views have been held as to the date of Jīmūtavāhana. He has been assigned to various dates from the 11th to the 16th century. In L. R. 41 I. A. at p. 298 it is said by their Lordships of the Privy Council that the Mit. was earlier by five centuries than Jīmūtavāhana. Dr. Jolly (R. u. S. p. 37) assigns him to the 15th century. For a statement of the various dates and their examination the article of M. M. Chakravarti in JASB. for 1915, pp. 321-327 and Mr. Panchanan Ghosh's learned article in 26 Calcutta Law Journal (journal portion p. 17 ff.) may be consulted. Since Jīmūtavāhana mentions Dhāreśvara Bhojadeva and Govindarāja, he cannot be placed earlier than the last quarter of the 11th century. Since he is quoted by Śūlapāṇi, Vācaspati-miśra and Raghunandana, he cannot be later than the middle of the 15th century. The Kālaviveka furnishes important data. On a ms. of the Kālviveka there is a note made about the birth-date of the son of a certain Ghaṭakasiṁha with the horoscope of the child. The year specified therein is *śake* 1417, i. e. 1495 A. D. It follows from this that the Ms. itself must have been copied ometime before this and the original work must be much earlier still. So the Kālaviveka cannot be placed at any rate later than about 1400 A. D.

In the Kālaviveka Jīmūtavāhana tells us that his predecessor Andhuka[754] exhibited a certain astronomical matter in *śake* 952 (i. e. 1030 A. D.) and that he declared an intercalary month in *śake* 955.

Similarly Jīmūtavāhana expatiates upon several[755] minute astro-

nomical and astrological details which were observed in the *śake* years 1013 and 1014 (i. e. 1091 and 1092 A. D.). It is impossible to supposse that an author would enter into such minute details about a time which was anterior to his own by centuries. Generally astronomical works take for their calculations starting points or years which were within their own experience or very nearly so. Therefore it appears to be a sound conclusion to hold that the Kālaviveka was composed soon after *śake* 1013 or 1014 (i. e. 1091 and 1092 A. D.). Hence it follows that the literary activity of Jīmūtavāhana lay between 1090 and 1130 A. D. The Kālaviveka seems to be his first work. The Vyavahāramātṛka would naturally come before the Dāyabhāga. He seems to have contemplated writing[755][756] on ṛṇādāna also, as he says in the Dāyabhāga that a certain matter would be expounded by him in ṛṇādāna.

The most cogent argument that can be advanced against the above early date assigned to Jīmūtavāhana is that neither Jīmūtavāhana nor any of his compositions is mentioned by Bengal writers and works on Dharmaśāstra belonging to the 12th, 13th and 14th centuries such as the Hāralatā, the commentary of Kullūka etc. No satisfactory explanation can be offered of this silence. But is is a very precarious thing to conclude from this silence that Jīmūtavāhana's works did not exist during those centuries. It is safer to base conclusions about his date on the positive evidence contained in his works rather than rely upon the negative argument from silence in later works. When some of his commentators say that he criticises the views of Caṇḍeśvara, Miśra and others we should not take them seriously. The commentators had no idea of the exact chronological position of writers long anterior to them. All they mean is that Jīmūtavāhana criticises views that were shared also by Caṇḍeśvara and others. Another important question is whether Jīmūtavāhana who is certainly a little later than the Mit.

criticizes it. The Vivāda-tāṇḍava of[757] Kamalākara says that Jīmūtavāhana held that the view about the equal ownership of father and son in ancestral property was put forward for precluding the possibility of the uncle taking the whole estate of a man dying (in union) leaving a son or a predeceased son's son or for precluding the possibility of an unequal distribution of ancestral property by a father among his sons and that Jīmūtavāhana took up this position, being blinded by his hatred of the Mit. The Vīramitrodaya[758] also says that Jīmūtavāhana criticizes the Mitākṣarā definition of *vibhāga* and the view of the Mit. about the times for partition. The Vyavahāramātṛka[759] also appears to criticizes several times views which were held by the Mit. and the correspondence is very striking. On this point this much may be said that the points selected for attack by Jīmūtavāhana do occur almost in the same words in the Mit. but, since the Mit. is not expressly mentioned and since it is likely that other writers like Asahāya and Bhāruci whose works have not yet been discovered might have contained the very same words that are found in the Mit., it is somewhat hazardous to assert that Jīmūtavāhana criticizes the Mit. alone and no other work. All that one can advance is that it is quite within the bounds of possibility that Jīmūtavāhana criticizes the Mit.

79. Aparārka

On the smṛti of Yājñavalkya Aparāditya wrote a voluminous commentary styled Aparārka-Yājñavalkīya-dharmaśāstra-nibandha (published in two volumes by the Ānandāśrama Press, Poona, 1903 and 1904). In a verse[760] at the end and in the colophons the author is called Aparāditya, a Śilāhāra king, born in the family of Jīmūtavāhana of the Vidyādhara race. In the introductory[761] fifth verse also the author is styled 'an ornament of the family of Jīmūta' and is highly eulogised for his devotion to Śiva and his brilliant intellect.

Aparārka's work, like the Mitākṣarā, though professedly a commentary on Yāj., is really in the nature of a digest. It is far more voluminous than the Mit. It quotes profusely from the Gṛhya and Dharma sūtras and the metrical smṛtis. Several features distinguish it from the Mit. The Mit. is generally very chary of quoting from the purāṇas, while Aparārka contains long extracts sometimes extending over pages from several purāṇas, viz, the Ādipurāṇa, the Adityapurāṇa, the Kūrma, the Kālikāpurāṇa, Devī, Nandi, Nṛsiṁha, Padma, Brahma, Brahmāṇḍa, Bhaviṣyat, Bhaviṣyottara, Matsya, Mārkaṇḍeya, Liṅga, Varāha, Vāmana, Vāyu, Viṣṇu, Viṣṇudharmottara, Śivadharmottara, Skanda. The index at the end of the printed Aparārka gives the names of the various smṛtikāras quoted in the work. Another feature not found in the Mit. is that Aparārka quotes long passages of the dharmasūtras and explains them at length, e. g. on Yāj. III 294 (p. 1205) he quotes Gautama (Dh. S. 20. 2-9) and then offers a lengthy explanation ; on Yāj. III. 294-295, he quotes long passages of Vasiṣṭha (Dh. S.15. 11-14 and 17-21) and gives detailed explanations of them. It is probable he had not before him commentaries on these dharmasūtras. On p. 11, he

gives brief summaries in the style of the Śaṅkarabhāṣya of the tenets of the Śaiva, Pāśupata, Pāñcarātra, Sāṁkhya and Yoga systems. He does not appear to have been an ardent admirer of the Advaita Vedānta though he refers to the Śārīrakamīmāṁsā.[762] In one place he sets out the arguments of those who hold that correct knowledge alone leads to *mokṣa* and of those who hold that a combination of correct knowledge and works is essential for *mokṣa* and leaves his readers to choose for themselves whatever view they take.[763] It is remarkable that, while even the Mit. names at least six *nibandhakāras* on dharmaśāstra viz. Asahāya, Viśvarūpa, Bhāruci, Śrīkara, Medhātithi and Dhāreśvara, Aparārka observes a studied silence in the matter of citing the names of his predecessors. He employs such vague expressions as *kecit, anye, apare,* though he cites views that were ascribed by the Mit. and others to Dhāreśvara and others, e. g. on pp. 741-42 he says[764] that the text of Yāj. 'patnī duhitaraḥ' according to some refers to the widow who submits to *niyoga* (this is the view of Dhāreśvara); on p. 744 he refers to the view of some that the word *duhitṛ* in Yāj. means only the appointed daughter (*putrikā*). This last was the view of Viśvarūpa and Śrīkara. On p. 761 he refers to the reading of some in Yāj. II. 150 as 'sāmantā sthavirā gaṇāḥ' which is found in Viśvarūpa (II. 154) and not in the Mit. Aparārka names (p. 926) a Vāgbhaṭa-smṛtisaṁgraha and a Smṛtimīmāṁsā of Jaimini (p. 206) from which two verses are quoted, variant readings therein are noticed and detailed explanations thereof are offered. He refers to several works and authors on astronomy and astrology such as Garga, Kriyāśraya (p. 872), Sārāvali. On pp. 570 and 572 of the printed text occur two references to a *pustaka* of rājānaka Śitikaṇṭha.[765] That was probably a marginal

note in a ms., the copyist or owner of which found on comparison with another ms. belonging to rājānaka Śītikaṇṭha additional matter. Aparārka quotes from Bhaṭṭa (i. e. Kumārilabhaṭṭa).[766] Aparārka does not appeal as frequently to the doctrines of the Pūrvamīmāṁsā as the Mit. does and he does not generally enter into acute discussions of Pūrvamīmāṁsa in its application to Dharmaśāstra as the Mit. does. It must be said that Aparārka is much inferior to the Mit. in lucid exposition, in dialectic skill, in subtelty of argument and in the ordered presentation of heterogenous material.

Some of the views that are usually associated with Jīmūtavāhana were propounded by Aparārka also. Aparārka bases the right to take a deceased person's property on the superior spiritual benefit conferred by the claimant on the person deceased.[767] In several other respects also Aparārka differs from the Mit., though in general the two closely agree. For example, Aparārka prefers the father over the mother as an heir (p. 745) ; Aparārka explains the word ' apratiṣṭhitā ' in Gautama's text (18. 22) as ' one who is issueless or is indigent or a widow, ' while the Mit. explains it to mean only ' indigent. '

Whether Aparārka knew the Mit. is a vexed question. Some scholars while holding that Aparārka does criticize the Mit. explain away the non-mention of the Mit. by saying that Indian etiquette required a royal author not to mention the name of the servant of another king, while the existence of the master himself was ignored (Dr. Jolly in Journal of Indian History vol. III p. 17). It is doubtful whether any such etiquette ever existed and further Aparārka studiously avoids the express mention of every ancient commentator. Works of royal authors, such as the Madanpārijāta or the Sarasvatīvilāsa, do not appear to have followed the etiquette. In

my opinion the Mit. was known to Aparārka. Aparārka reads Yāj. III. 17 as 'Vaitānopāsanāḥ kāryāḥ kriyāśca śruticoditāḥ,' explains the first word as a karmadhāraya compound, gives the explanation of this verse offered by others, disapproves of it and then says that others read 'śruticodanāt' for 'śruticoditāḥ'.[768] Viśvarūpa reads 'vaitānikāśrayāḥ... śrutidarśanāt' and offers no comment on this verse beyond the word 'spaṣṭārthametat' (it is III. 15. in the Trivandrum ed.). The Mit. does contain the reading referred to by Aparārka and the śruti passage 'yāvaj-jīvam' etc. Aparārka refers on Yāj. III. 254 to the reading 'samām'[769] adopted by some, says that the latter explain the verse as prescribing the penance for three years and observes that the verse of Manu (IX. 92) does not apply, as the latter say, to him alone whose palate has merely come in contact with liquor (without his having actually swallowed it). Viśvarūpa (III. 248) does not explain the verse as prescribing a three

years' penance nor does he refer to the contact of wine with the palate. The Mit. however contains both these particulars. On p. 1084 also[770] Aparārka seems to be referring to the view of the Mit.

The date of Aparārka can be settled within very narrow limits. The Smṛticandrikā[771] in several places quotes the views of Aparārka and sometimes contrasts them with those of the Mit. The Smṛticandrikā refutes the view of Aparārka that the words of Yāj. 'jyeṣṭhaṁ vā śreṣṭhabhāgena' are meant to comprehend all various modes of giving an additional share (*uddhāravibhāga*) to the eldest son on partition mentioned by Manu and others and it follows Aparārka's explanation of 'apratiṣṭhitā' in Gautama's text. It will be shown later on that the Smṛticandrikā must have been composed about 1200 A. D. If the above conclusion that Aparārka knew the Mit. and criticizes it be correct, Aparārka must have flourished after 1100 A. D. and before 1200 A. D. Here epigraphical research comes to our help. We know from the commentary that the author Aparāditya was a Śilāhāra prince of Jīmūtavāhana's family. Inscriptions of the Śilāhāras show that there were three branches of that family, one ruling in the northern Konkan at Thana, the second in the southern Konkan and the third at Kolhapur (vide JBBRAS, vol. XIII p. 10-17 for the three branches). All the branches traced their descent from Jīmūtavāhana. There is only a single inscription of the second branch which had ten kings reigning from about 808 to 1008 A. D. (JBBRAS vol. I, p. 209, E. I. vol. III. p. 292). There is no Aparāditya in this line. of the northern Śilāhāras speak of two kings who are named Aparādityadeva. In JBBRAS vol. XXI, pp. 505-516 there is a grant dated *śake* 1049 (expired) of Aparādityadeva who donated a village named Vaḍavali in the Thana District to a brāhmaṇa studying the Mādhyandina recension of the Vājasaneya-saṁhita. The king is there styled once as Aparājita and several times as Aparādityadeva. He was son of Anantadeva and grand-son of Nāgārjuna and traced his descent to Jīmūtavāhana, son of Jīmūtaketu, far famed in legend and literature as an exemplar of self-sacrifice[772], e. g. in the drama Nāgānanda. In this inscription Aparādityadeva is styled *Śilāhāranarendra* and *Jīmūtavāhanānvayaprasūta* as in the colophon of the commentary on Yāj. (vide note 760 above) and also *Mahāmaṇḍaleśvara* and *Tagarapuraparameśvara*. In the Annals of the Bhandarkar Institute, vol. V, part 2, p. 169 there is a grant made at Somnath-Paṭan in Kathiawar of Vikramsaṁvat 1176 (1119-20 A. D.) while Aparādityadeva of the Śilāhāra family was reigning, almost in the same words as in the grant in JBBRAS vol. XXI p. 505. In I. A. vol. IX, p. 33 there is a grant of Anantadeva father of Aparādityadeva dated in *śake* 1016 (i. e. 1094-5 A. D.). Vide Bombay Gazetteer vol. I. part 2, p. 15 for a list of 20 kings of the northern Konkan branch from 810 to 1260 A. D. *Vide* also an inscription of Aparādityadeva dated śake 1051 (i. e. 1129 A. D.) in Festgabe Dr. Jacobi pp. 189-193 (1926). Therefore it appears that the dates of Aparādityadeva I referred to in these grants fall between 1115 and 1130 A. D. It was most probably this king who composed the commentary on Yāj. We know from the Śrīkaṇṭhacarita of Maṅkha that king Aparāditya[773] of Konkan sent Tejakaṇṭha on an embassy to an assembly of learned men in Kashmir during the reign of Jayasiṁha of Kashmir (1129 to 1150 A. D.). Aparārka's commentary continues to be the standard law-book used by the *pandits* of Kashmir (Jolly's Tagore Law lectures p. 24). Aparārka's work

betrays familiarity with Kashmir. I have already noticed the reference to rājānaka Śitikaṇṭha above. On a passage from Brahmapurāṇa speaking of a śrāddha at Mārtaṇḍapādamūla, Aparārka notes (p. 903) that[774] the latter is well known in Kashmir. It is therefore most probable that the work was composed about 1125 and was introduced into Kashmir when an embassy was sent from the Konkan king to Kashmir in the reign of Jayasiṁha. The dates of the second Aparāditya range from 1184 to 1187 A. D. (*Vide* Bombay Gazetteer vol. XIII, part 2, p. 427; JBBRAS vol. XII, pp. 333-335 for an inscription of Aparāditya dated 1109 *śake* i. e. 1187 A. D. (wherein he is styled Koṅkaṇa-cakravarti). It is difficult to hold that this was the author of the commentary on Yāj. The Smṛticandrikā is mentioned by Hemādri and hence could not be later than the first quarter of the thirteenth century. Therefore if Aparārka who is frequently cited by the Smṛticandrikā were to be regarded as having flourished about 1187 A. D., very little distance is left between him and the Smṛticandrikā in order that the former should come to be looked upon as an authority by the latter. Therefore it appears probable that Aparārka wrote the commentary on Yāj. in the first half of the 12th century (about 1125 A. D.). Vide Tri. cat. Mad. Govt. Mss. for 1919-22, pp. 4853-54, for the Nyāyamuktāvali of Aparādityadeva, which is a com. on the Nyāyasāra of Bhāsarvajña.

80. Pradīpa

The Smṛtyarthasāra of Śrīdhara enumerates the Pradīpa among its authorities after the Kāmadhenu.[775] The Smṛticandrikā in a highly paronomastic verse appears to refer to a work called Pradīpa.[776] The Sarasvatīvilāsa[777] quotes the view of the Pradīpa

that even the suretyship debt of a person must be paid by his grandson. The Jīvatpitṛkanirṇaya[778] of Rāmakṛṣṇa (about 1600 A. D.) quotes the Pradīpa on the question that when brothers are separated they should perform separately the annual śrāddha of their father and other ancestors. Nandapaṇḍita in his commentary on the[779] Ṣaḍaśīti cites the view of the Pradīpa that the sūtra of Paiṭhīnasi (a woman delivered of a son bathing after twenty nights from delivery is entitled to perform all religious rites, while one who is delivered of a female child is so entitled after a month) applies to the wife of one who is not a *dīkṣita* (one who has consecrated the Vedic fires). It has been shown above (note 689) how the Pradīpa criticizes Bhavadeva, according to the Vīramitrodaya, which in several places cites the views of the Pradīpa (vide pp. 78, 89, 215 & etc.).

The foregoing discussion shows that the Pradīpa was probably an independent work on vyavahāra, śrāddha, śuddhi and other topics. Being mentioned by the Smṛtyarthasāra and Smṛticandrikā, it cannot be later than about 1150 A. D. As it criticizes Bhavadeva it cannot be earlier than 1100 A. D.

Hemādri[780] refers to the explanation of the word *kala* occurring in a text of Gārgya offered by a Smṛtipradīpa. It is not unlikely that he means the same work as is referred to by others as Pradīpa.

81. The Smṛtyarthasāra of Śrīdhara

This well-known work was published by the Ānandāśrama Press, Poona, in 1912 A. D. The principal topics discussed by it are: the acts allowed in former ages but forbidden in the *kali* age ; the number of *saṁskāras*, the detailed treatment of *Upanayana*, the

duties of Brahmacārin, holidays, marriage, its various forms, prohibitions on the ground of *sapiṇḍa* relation, discussion about *gotra* and *pravara*, daily duties such as *śauca, ācamana*, brushing the teeth, bathing, the five *yajñas*, daily saṁdhyā, daily worship; detailed treatment of *śrāddha*, proper time, articles, and brāhmaṇas to be invited at it, various kinds of *śrāddha*, discussion about various *tithis*; intercalary month; forbidden and allowed food; purification of various substances and of one's own body; impurity on birth and death; rites after death; rules about *saṁnyāsa*; prāyaścittas for various grades of sins and lapses.

From the colophon it appears that Śrīdhara was himself a performer of Vedic sacrifices and was the son of Nāgabhartṛ Viṣṇubhaṭṭa of the Viśvāmitra gotra. This colophon does not however occur in the ancient ms. of the work in the Deccan College collection (No. 44 of 1870-71) dated *saṁvat* 1495 (1438-39 A. D.). In the 2nd introductory verse (vide note 564 above) the author tells us that Śrīkaṇṭha and Śrīkarācārya filled the gaps in the smṛtis that were scattered about (i. e. they composed digests thereof with their own remarks). He also says (vide note 651 above) that he relies on the Kāmadhenu, the Pradīpa, the Abdhi, the Kalpavṛkṣa (i. e. Kalpataru), Kalpalatā, Śambhu, Draviḍa, Kedāra and Lollaṭa and the various commentators of Manu and other smṛtikāras. In dealing with *saṁnyāsa* he says that he would treat of the procedure of *saṁnyāsa* following the opinion of Govindarāja and of Baudhāyana.[781] At the beginning of some sections (p. 48 and p. 49 on *śrāddha* and *prāyaścitta* respectively) he again repeats the verse about Kāmadhenu and the other authorities. The Abdhi named therein seems to be the Smṛtimahārṇava quoted in Hemādri, in the Vivādaratnākara and other works. He refers to Mitākṣarā also (p. 56). For Lollaṭa see above (under Medhātithi). It appears that Śrīdhara also composed another and a larger work on dharmaśāstra. For example, Hemādri who[782] knew

the Smṛtyarthasāra quotes certain views as Śrīdhara's which do not occur in the Smṛtyarthasāra. The Prayogapārijāta, the Nirṇaya-sindhu, and the Saṁskārakaustubha quote the views of a work called Śrīdharīya which are not found in the Smṛtyarthasāra. Śrīdhara seems to have been a writer from southern India.

The date of the Smṛtyarthasāra can be fixed within approximate limits. As it names the Mit., the Kāmadhenu, the Kalpataru and Govindarāja, it is later than 1150 A. D. The Smṛticandrikā and Hemādri[783] both quote it as an authority. For example, the Smṛti-candrikā says that the Smṛtyarthasāra holds that the Tulasī is among the things the use of which is to be avoided in *śrāddha*. Therefore the Smṛtyarthasāra must have been composed between 1150 and 1200 A. D.

82. Aniruddha

Aniruddhabhaṭṭa is one of the early and eminent Bengal writers on Dharmaśāstra. His Hāralatā was published in the Bibliotheca Indica series (1909) and his Pitṛdayitā alias Karmopadeśinīpaddhati was recently published by the Sanskrit Sahitya Parishad at Calcutta (No 6).

The Hāralatā deals with impurity on birth and death, with the acts allowed to be done or forbidden during impurity, with periods of impurity on death in a distant land or on the deaths of infants and women, with rules when two periods of impurity overlap each other, with impurity on the death of *sapiṇḍas*, the meaning of

The Pitṛdayitā is a work intended for the followers of the Sāmaveda. Its contents are :—the duties on rising from bed, brushing the teeth, bath, *saṁdhyā, tarpaṇa,* vaiśvadeva, *pārvaṇa-śrāddha,* eulogy of gifts, sapiṇḍīkaraṇa and other śraddhas, antyeṣṭi and rites during the days of mourning after death, the letting loose of a bull. The printed work appears to be the same that is described in the I. O. cat. at p. 474 as Karmopadeśinī. But the India Office Ms. appears to have certain various readings e. g. a reference to Kāmadhenu and Kalpataru at the end of the section on antyeṣṭi does not occur in the printed text.[784].

The first verse of the Hāralatā states that the author consulted the commentaries on Manu and other smṛtis.[785] Besides the well-known smṛtikāras such as Manu, Yājñavalkya, Nārada etc., the authors and works named in the Hāralatā are :—Asahāya as the *Bhāṣyakāra* of Gautama, Kāmadhenu, Govindarāja, Bhojadeva, Viśvarūpa and Śaṅkhadhara. The Pitṛdayitā[786] says that it was composed after consulting the Gobhilagṛhyasūtra, the Chāndogyapariśiṣṭa, the smṛtis, purāṇas, the śāstras of Gautama and Vasiṣṭha and various saṁgraha works. In the work itself, besides the above, Kātyāyana, Varāhapurāṇa and the smaller (svalpa) Matsyapurāṇa are quoted.

From the last verse[787] of the Hāralatā we know that Aniruddha was a resident of Vihārapāṭaka on the bank of the Ganges and was

a student of the doctrines of Bhaṭṭa (Kumārila). From the colophons[788] at the end of the Hāralatā and the Pitṛdayitā it appears that he was a Dharmādhyakṣa and a Cāmpāhaṭṭīya (a section among Vārendras) Brāhmaṇa of Bengal. The ms. in the India Office has a colophon in which Aniruddha is styled Dharmādhikaraṇika (Judge). From the Dānasāgara of Ballālasena we learn (verses 6 and 7) that Aniruddha was a *guru* of that king of Bengal and rendered assistance in the composition of that work. The Dānasāgara[789] was composed in *śake* 1091 (i. e. 1169 A. D.). From this it appears that Aniruddha was at the height of his fame in 1168, i. e. his literary activity may be placed in the third quarter of the 12th century A. D. This conclusion is corroborated by the fact that the Hāralatā names Bhojadeva, Govindarāja, and the Kāmadhenu as authorities and is therefore later than 1100 A. D. The Hāralatā is named as an authority in the Śuddhiviveka of Rudradhara[790]. The Śrāddhakriyākaumudī of Govindānanda (about 1510-1545 A. D.) frequently quotes Aniruddha and includes him among ancient authors.[791] The Pitṛdayitā is named in the Śrāddhakriyākaumudī (p. 503). In the Āhnikatattva (vol. I, p. 421) and Śuddhitattva (vol. II, p. 314) of Raghunandana the views of Pitṛdayitā are quoted. There is a commentary on the Hāralatā called Sandarbhasūcikā composed by Acyuta Cakravartin, son of Haridāsa Tarkācārya (vide I. O. cat. p. 567, No. 1753).

In the proceedings of the ASB (for 1869 p. 137) a Cāturmāsya-paddhati of Aniruddha is noted. Mitra notices a work called Bhagavattattvamañjarī on Vaiṣṇava philosophy written by Aniruddha (Mitra's Notices vol. III. p. 155, No. 2700).

83. Ballālasena

This famous king of Bengal compiled at least four works. His Ācārasāgara is mentioned in the Smṛtiratnākara of Vedācārya and in the Madanapārijāta (p. 58). He also wrote the Pratiṣṭhāsāgara. Both these works are referred to as already composed in the Dānasāgara.[792] The Dānasāgara deals with the sixteen great *dānas* and other lesser gifts. The subjects dealt with by the Dānasāgara are as follows : eulogy of brāhmaṇas, eulogy of the merit arising from gifts, proper objects of gifts, exceptions, the nature of gift, the donor, faith as to the utility of gifts, proper times and places for gifts, things proper to be donated, what cannot be gifted away, bad donations, religious rites and procedure followed in making gifts and in accepting them, the technical terms of the subject of gifts, the sixteen *mahādānas*, lesser dānas of various kinds (the author himself says at the end that he has described 1375 kinds of gifts), the names of various purāṇas and their extent. The Dānasāgara contains extremely valuable information about the Mahābhārata and the purāṇas. As it quotes extensively from the purāṇas, it serves as an excellent check for the textual restoration of purāṇas. For example it says that the Bhāgavata, Brahmāṇḍa and Nāradīya purāṇas do not contain *dānavidhis* and hence they are not drawn upon in the work. In another verse he says that it is well-known that the Viṣṇurahasya and Śivarahasya are of the nature of mere compilations and so have not been relied on in the work. The Devīpurāṇa, he says, is approved of by the heterodox systems and is not included in various lists of purāṇas and upapurāṇas and hence it is not included in the Dānasāgara. He says that the subject of the dedication of reservoirs of water and of temples has been dealt with at length in ihe Pratiṣṭhāsāgara, so it is omitted in the Dānasāgara and that the gifts made in accordance with the divisions of the year (into *ayana*, season, month, pakṣa &c.) are not spoken of in their entirety in the Dānasāgara, as they are described in the Ācārasāgara. The work is mentioned in the Dānaratnākara

792 Verses 55 and 56 of his दानसागर (I. O. cat. 542, No. 1704-5).

of Caṇḍeśvara and in the Nirṇayasindhu. His Adbhutasāgara has been printed by Messrs. Prabhakari and Co. (1905). The authorities on which he relies therein are noted below.[793] The Adbhutasāgara is mentioned in Ṭoḍarānandasaṁhitā-saukhya and Nirṇayasindhu. This was his last work which he left unfinished and which was completed by his son Lakṣmaṇasena. It deals with the rites and observances appropriate on certain celestial and terrestrial portents for removing the evil foreboded by them.

Ballālasena began the work in 1090 *śake* and the Dānasāgara was composed in 1091 *śake*. Therefore Ballālasena's literary activity must be placed in the third quarter of the 12th century (vide notes 674, 676 above). *Vide* also IHQ vol. V, p. 133 for the date of Ballālasena.

It appears that Raghunandana believed that the Dānasāgara was really the work of Aniruddhabhaṭṭa though published in the name of Ballālasena.[794] In the Dānasāgara itself it is distinctly stated that Ballālasena composed it under the directions of his *guru* (Aniruddha).[795] In the colophon he is styled mahārājādhirāja and and niḥśaṅka-śaṅkara.

84. Harihara

From quotations in the Vivādaratnākara it appears that Harihara wrote on vyavahāra. For example, the Vivādaratnākara first quotes (on p. 220) the definition of 'saṁsaraṇa' given by Bṛhaspati and then cites three verses of Kātyāyana defining a *catuṣpatha* and a *rājamārga* and prescribing punishments for causing obstruction and

committing nuisance thereon. Then it notices that the verse 'yas-tatra' cited by it from Kātyāyana is cited by Harihara as from Prajāpati when the topic immediately preceding is 'saṁsaraṇa'.[796] The Vivādaratnākara quotes a sūtra of Śaṅkha-Likhita prescribing the punishment for sexual intercourse with a virgin against her will and Harihara's explanation of the word 'dvyaṅgulaccheda'.[797] From these it is clear that Harihara wrote some work on vyavahāra, which has not yet been recovered. He must have flourished earlier than 1300 A. D.

There is a commentary on the Pāraskargṛhyasūtra composed by Harihara who is styled *agnihotrin* in the colophons. In one ms. copied in śake 1707 (1785-86 A. D.) he is described as the pupil of Vijñāneśvara. In the introductory second verse he says he relies on Vāsudeva. In the body of the work he refers (Gujarati Press edition) to Karkopādhyāya (p. 200), Kalpatarukāra, Reṇudīkṣita, and Vijñāneśvarācārya (p. 370). Therefore he is later than 1150 A. D. Harihara's views are mentioned by Hemādri,[798] the Samayapradīpa and Ācārādarśa of Śrīdatta and in the Smṛtisāra of Harināṭha. Therefore this Harihara must be earlier than 1250 A. D. Whether he was really the pupil of Vijñāneśvara is doubtful. In his bhāṣya Harihara refers to words current in Kanoj.[800] Hemādri mentions Harihara's explanation of *nepālakambala* wherein the latter says that it is well known among the northerners.[801] Harihara-

paddhati is mentioned in the Śrāddhatattva (vol. I, p. 281) and Harihara in the Yajurvediśrāddhatattva (vol. II, p. 488). We have seen above that a Harihara commented upon the Āśaucadaśaka of Vijñāneśvara. This fact together with his being not far from Vijñāneśvara's time may have led to the belief that he was a pupil of Vijñāneśvara. It appears probable that the jurist Harihara who flourished before 1300 and Harihara the bhāṣyakāra of Pāraskara who flourished between 1150 and 1250 A. D. are identical. The views ascribed to Harihara by Hemādri in his section on śrāddha are not found in the bhāṣya on Pāraskara. Therefore Hemādri is referring to some other work of Harihara. From a passage of Hemādri it appears that Harihara wrote after the Mahārṇava[802] (Prakāśa). Hemādri also tells us that Harihara refuted the views of Jayantasvāmī on a certain verse.[803] The same Harihara who commented on Pāraskara also wrote a commentary on Kātyāyana's Snānavidhisūtra wherein he mentions the Kalpatarukāra (vide D. C. ms. No. 101 of 1891-95). Several Hariharas are known. There is Hariharabhaṭṭācārya, the father of the great Bengal writer Raghunandana. A Hariharācārya composed an astrological work Samayapradīpa in *śake* 1481 (1559-1560 A. D.).

85. The Smṛticandrikā of Devannabhaṭṭa

This is a well-known digest on Dharmaśāstra. An English translation of the portion of it which is concerned with *dāyabhāga* was published in 1867 by T. Kristnasvami Iyer at Madras. The text has been published by Mr. J. R. Gharpure (up to śrāddha) in Bombay and also in the Mysore Government Oriental series (up to āśauca). In the following Mr. Gharpure's edition has been used and the Mysore edition for āśauca section. The Smṛticandrikā is a very extensive digest. It is almost the earliest (except the Kalpataru) among digests on dharmaśāstra of which mss. have yet been discovered. The printed text deals with the topics (kāṇḍas) of *Saṁskāra, Āhnika, Vyavahāra, Śrāddha, Āśauca.* It appears that

he wrote on prāyaścitta also. In the colophons of mss. of the work the name of the author is variously written as Devaṇṇa, Devaṇa, Devananda or Devagaṇa (vide I. O. cat. pp. 405-406). He is also described therein as the son of Keśavādityabhaṭṭa and as a *Somayājī*.

The Smṛticandrikā quotes most profusely from numerous smṛtikāras and affords valuable assistance in reconstructing some of the smṛtis and checking mss. and editions thereof. For example, it quotes about 600 verses from Kātyāyana on *vyavahāra* and about the same number from Bṛhaspati. Among works, commentators and authors of digests named by it the following may be noted: Aparārka, Trikāṇḍī, Devarāta, Devasvāmī, Āpastambakalpabhāṣyārthakāra (Āśauca p. 84), Dhāreśvara, Dharmabhāṣya, Dhūrtasvāmī, Pradīpa, Bhavanātha, Bhāṣya on Āpastamba Dharmasūtra, Dharmadīpa or Pradīpa (Āśauca p. 63), Bhāṣyārthasaṁgrahakāra, Manuvṛtti, Medhātithi, Mitākṣarā, Vaijayantī (a lexicon), Viśvarūpa, Viśvādarśa (Āśauca p. 164), Śambhu, Śrīkara, Śivasvāmī, Smṛtibhāskara, Smṛtyarthasāra. He mentions a Bhaṭṭācārya on Āśauca (p. 1, 2), probably Śrīnivāsa, the author of Śuddhidīpikā who wrote about 1159-60 A. D. (JASB 1915 p. 334). He quotes a passage from the work of an author, whom he styles Guru (probaly his own teacher or father).[804] The Smṛticandrikā often critisizes these works and authors and advances its own views after considering the positions of others. Devaṇṇabhaṭṭa was a southern writer and his work is according to judicial decisions of great authority in southern India.[805] But it has been held that in spite of its high authority it cannot override the Mitākṣarā even in the Madras Presidency.[806]

The contents of the Smṛticandrikā are : various Dharmas, such as those of *varṇas*, āśramas; usages of countries; saṁskāras, garbhā-

The Smṛticandrikā refers to Vijñāneśvara with great respect.[807] Yet there are several interesting points on which the Smṛticandrikā differs from the Mitākṣarā. The Smṛticandrikā questions (vide note 638 above) the statement of the Mit. that unequal distribution by the father of ancestral property among his sons should not be resorted to, as it has come to be abhorred by the people. The Smṛticandrikā does not approve of the definition of *dāya* given by the Mit.[808] The Smṛticandrikā does not accept Vijñāneśvara's explanation of the word 'apratiṣṭhitā' occurring in the sūtra of Gautama, but upholds Aparārka's explanation of it (vide note 771 above). The Smṛticandrikā favours the theory of spiritual benefit in matters of succession and therefore among daughters prefers one that has sons over another daughter who is sonless.[809] It criticizes the reasons advanced by the Mit. for preferring the mother over the father as an heir to their deceased son and says that both parents succeed together.[810] Though the Smṛticandrikā in this way in some

cases criticizes the Mit., it generally follows its lead. It holds, just as the Mit. does, that sons acquire by birth ownership in ancestral property. The author asserts that he puts forward no imaginary views but only such views as are based on (authoritative) texts.[811]

As the Smṛticandrikā names the Mit., Aparārka and Smṛtyarthasāra, its upper limit cannot be placed earlier than 1150 A. D. Their Lordships of the Privy Council say in *Buddhasingh vs Lalta-singh*[812] that Devanandabhaṭṭa is supposed to have been a contemporary of Aparārka. But this supposition is not quite correct. Since Aparārka is quoted several times as an authority to be preferred even to the Mit., it looks more probable that there is some distance of time between Aparārka and Devaṇṇabhaṭṭa. Hemādri quotes the views of the Smṛticandrikā probably oftener than those of any other *nibandhakāra*. In one place[813] he does not approve of the explanation given by the Smṛticandrikā of a verse occurring in the Mahābhārata about a man with male issue performing śrāddha on the thirteenth *tithi*. In another[814] place Hemādri refers to the view of the Smṛticandrikā on the question whether the *śrāddha* on *amāvāsyā* is optional with śrāddha in dark half. Therefore it follows that the Smṛticandrikā must have been composed at least a generation earlier than Hemādri, i. e. before 1225 A. D. The Smṛticandrikā is frequently quoted by the Sarasvativilāsa, the Viramitrodaya and other digests.

Several authors composed works styled Smṛticandrikā, e. g. there is a Smṛticandrikā of Śukadeva-miśra (I. O. cat. p. 471 No. 1549), another by Āpadeva (Mitra's Notices, vol. VI, p. 301), another by Vāmadevabhaṭṭācārya (Mitra's Notices, vol. IX, p. 137).

86. Haradatta

Haradatta's fame stands very high as a commentator. He wrote a commentary called Anākulā on the Āpastamba-gṛhya-sūtra (D. C. Ms. No. 2 of 1866-68), a commentary on the Āpastambīya-mantra-pāṭha (vide Dr. Winternitz's ed. of 1897, p. XIII), a commentary called Anāvilā on the Āśvālāyana-gṛhya-sūtra (published in the Trivandrum series), a commentary called Mitākṣarā on the Gautamadharmasūtra and a commentary named Ujjvalā on the dharmasūtra of Āpastamba. His commentaries are very good models of ideal commentaries. His commentary on the dharma-sūtra of Gautama (printed by the Ānandāśrama Press, Pooona) is more concise than that on the Dharmasūtra of Āpastamba (large extracts of which were published by Bühler in his edition in the B. S. series, the whole being printed by Halasyanath Sastri at Kumbhakonam and in the Mysore Government Oriental Library series). In his commentary on the Dharmasūtras he quotes verses from numerous smṛtis and from the purāṇas but hardly ever mentions by name any commentator or *nibandhakāra*. In his Anāvilā (page 9) he quotes the views of a Bhāṣyakāra who is probably Devasvāmin and mentions also a Caṇḍogagṛhyabhāṣya-kāra (on I. 2. 3). In his commentaries on both the Dharmasūtras he frequently quotes the opinions of previous commentators with the words 'anye,' 'aparaḥ,' 'kecit;' *vide* G. Dh. S. II. 28, VII. 4 and 14, IX. 52, XI. 17, XII. 32 and 33, XXIV. 5, XXVI. 9, XXVIII. 7 and 44 ; Āp. Dh. S. I. 1. 4. 24, I. 2. 5. 2 and 18, I. 3. 10. 4, I. 3. 11. 20, I. 5. 15. 20. etc. From the fact that he mentions two interpretations on Āp. Dh. S. I. 2. 5. 2. with the words 'apara āha' and 'ityanye' and several interpretations on II. 7. 17. 22 it follows that he had before him two or three commentaries on Āp. Dh. S. In Bühler's edition Haradatta on Āp. Dh. S. I. 1. 2. 38 appears to refer to a gṛhya-vṛtti, but in the Kumbhakonam edition the reading is different (viz. *gṛhye gatam*). He is very careful to

point out the un-Pāṇinean forms in the sūtras of Gautama[815] and Āpastamba, explains at great length all grammatical matters and generally prefers readings that are in consonance with the rules of Pāṇini. He very often says that the text of the sūtras, particularly of Āpastamba, as handed down by oral tradition was either wrong or followed Vedic usage as regards grammar.[816]

From various references Haradatta seems to have been an inhabitant of Southern India or was at least very familiar with its usages. On Gautama XI. 20 he instances several usages of the Colas. On Gautama XV. 18 he gives a synonym in the Dravida language for[817] a skin disease called 'Kilāsa.' On Āp. Gṛ. S. VI. 6 (the sūtra 'nadīnirdeśaśca etc.) he gives Kāverī and Vegavatī as instances. On Āp. Dh. S. II. 11. 29. 15 (last sūtra) he refers to certain practices of the Draviḍas observed when the Sun is in Aries or Virgo.[818] The Vīramitrodaya classes Haradatta and the Smṛticandrikākāra among southern *nibandhakāras*.[819] From his remark on Āp. Dh. S. II. 7. 17. 25 (the sūtra 'anyatra rāhudarśanāt)' that the northerners do not recite that sūtra it appears that he affirms that he was a southerner.

Haradatta seems to have been a great devotee of Śiva. He begins his commentary on Gautama, on Āśvalāyana-gṛhya and Āp. Gṛ. with an obeisance to Rudra and his commentaries on Āp. Dh. S. and on the Āpastambīya-mantra-pāṭha (otherwise called Ekāgni-

kāṇḍa, 25th and 26th *praśnas* of Āpastamba-kalpa) with an obeisance to Mahādeva. Burnell (Tanjore mss. cat. p. 170) tells us that according to tradition in Southern India, Rudradatta, the commentator of the Āp. Śrauta-sūtra, is the same as Haradatta. In his commentary on Āp. Gṛ. S. I. 13. 5 (ghoṣavad caturakṣaraṁ vā) he gives as instances of the names of males Hara, Rudra, Deva, Haradatta and Bhavanāga. In the colophons the Anāvilā is described as the work of Haradattācārya-miśra.

Ghose in his Hindu Law (3rd ed. Intro. p. XV) says that, like Medhātithi, Haradatta denies the heritable rights of widows and must have come before Vijñāneśvara and not after. But Ghose appears to be wrong. Haradatta first says that according to the *ācārya* (i. e. Āpastamba) the *sapiṇḍas* of the deceased who took the property were obliged to maintain the widow of the deceased, while the view of Gautama was that the widow took, on failure of male issue, an equal share along with the *sapiṇḍas*, and then Haradatta says that he himself liked the latter view.[820] He often gives interesting information. On Gautama XVII. 33 he tells us that *asafoetida* is eaten by all, even though it is a matter for consideration whether being the exudation of a tree, it is to be regarded as due to cutting (and so forbidden).[821] On Āp. Dh. S. II. 2. 5. 14 he cites as an example of reviling (*ā-krośa*) the following : ' the Taittirīya is a Śakhā that is *ucchiṣṭa* (the leavings of food eaten), the Yājñavalkya and other Brāhmaṇa works are modern '.[822] On Gautama IV. 5. he says that what distinguishes the Prājāpatya form of marriage from the Brāhma and others is that there is in the former a stipulation that the husband is not to enter into another order of life (*āśrama*) nor is he to marry another woman.[823] On Āp. Dh. S. I. 4. 12. 15 he says that whereas in the case of marriage with a paternal aunt's or maternal uncle's daughter, the act springs

820 On आप. ध. सू. II. 6. 14. 2 ' पुत्राभावे यः प्रत्यासन्नः सपिण्डः ' he says ' भार्यां तु रिक्थग्राहिणः सपिण्डाद्या रक्षेयुर्न तु दायग्रहणमित्याचार्यस्य पक्षः । ... गौतमस्तु पुत्राभावे पत्न्याः सपिण्डादिभिः समांशमाह । ... वयमप्येतमेव पक्षं रोचयामहे ।'.

from the fact that one is pleased thereby, there is no necessity to infer a *śāstra* (a Vedic passage) once existing but now lost (in support of such usage).[824]

The date of Haradatta is a rather difficult problem. Bühler (S. B. E. vol. II. p. xliii) at first thought that Haradatta probably wrote in the 16th century, but in his 2nd edition of the Āp. Dh. S. he says (p. viii) that the Munich ms of the Ujjvalā written in Poona about 1600 A. D. shows the interpolated text found in all Devanāgarī copies and that therefore Haradatta is older than at least 1450-1500 A. D. The Vīramitrodaya[825] frequently cites the Mitākṣarā of Haradatta on Gautama. Nārāyaṇabhaṭṭa (born in 1513 A. D.) in his Prayoga-ratna quotes Haradatta's comment on Gautama VIII. 14-22 about saṁskāras and his son Śaṅkarabhaṭṭa names both the Mitākṣarā and the Ujjvalā of Haradatta in his Dvaitanirṇaya. The Prayogapārijāta of Nṛsiṁha, which is quoted in the Prayogaratna of Nārāyaṇabhaṭṭa and is therefore not later than the first quarter of the 16th century, cites Haradatta's explanation of Āp. Gṛ. S. (on ' pravāsād-etya putrasya śiraḥ parigṛhya japati ' etc.) and contrasts it with Nārāyaṇa's view. The Subodhinī of Viśveśvarabhaṭṭa (about 1375 A. D.) on Mit. (Yāj II. 132) quotes certain smṛti passages as found in the vṛtti of Āpastamba which are found in Haradatta's gloss.[826] Hence it follows that Haradatta cannot be later than about 1300 A. D. The fact that Haradatta hardly ever names any commentator except perhaps Devasvāmin, the Bhāṣyakāra of Āpastambe-gṛhya, and that he holds antiquated views about the widow's right to succeed to her deceased husband's estate are strong arguments in favour of the view that Haradatta is comparatively an early writer. Hardly any writer after Vijñāneśvara assigns the same position to the widow as Hara-

datta does. Hence it appears that Haradatta could not have flourished much later than 1100 A. D. So he must be placed between 1100-1300 A. D., very probably near the earlier limit than the later one.

One important question is as to the identity of Haradatta, the commentator of the Dharma and Gṛhya sūtras and Haradatta, the author of the Padamañjarī, a commentary on the Kāśikā of Vāmana and Jayāditya. Bühler felt uncertain about the identity. Śaṅkara-bhaṭṭa in his Dvaita-nirṇaya speaks of Haradatta as expounding[827] a *kārikā* of Hari (Vākyapadīya III. p. 260, Benares ed.) and also speaks of Haradatta as the author of the Ujjvalā and the Mitākṣarā without making any distinction between the two. This shows that he regarded the two as identical. Haradatta in his commentaries on the Dharmasūtras gives far more attention to grammar than almost any other commentator of Dharmaśāstra.[828] His grammatical disquisition on Āp. Dh. S. I. 2. 5. 18 ('plāvanam ca nāmno' etc.) is almost identical with the Padamañjarī on Pāṇini VIII. 2. 83 ('pratyabhivādeśūdre'). On Āp. Dh. S. II. 7. 17. 17 he quotes a verse as from the grammarians for defining the location of the *udīcyas*.[829] The Mādhavīya Dhātu-vṛtti mentions the Padamañjarī. From this it follows that the Padamañjarī was composed before 1300 A. D. Dr. Belvalkar places Haradatta, the author of the Padamañjarī, about 1100 A. D.[830] The learned editor of the Anāvilā in the Trivandrum series points out that, as Haradatta is

quoted in the Puruṣakāra which in its turn is mentioned in the Dhātu-vṛtti of Mādhava and as Śaraṇadeva, the author of the Durghaṭa-vṛtti, who wrote in *śake* 1095, cites the Jainendra and Kaiyaṭa but not Haradatta nor the Padamañjarī, Haradatta wrote about the close of the 12th century A. D. These circumstances render it highly probable (if not certain) that Haradatta the commentator of the Dharmasūtras is the same as the author of the Padamañjarī and that he flourished between 1100 and 1300 A. D. and probably about 1200 A. D. The Smṛticandrikā twice refers to the bhāṣya of the Āpastamba-dharma-sūtra.[831] Haradatta's commentary is styled *vṛtti* and not bhāṣya and the citations do not occur in his work. Hence it appears that the Smṛticandrikā did not know Haradatta's works and the latter could not have flourished much earlier than the Smṛti-candrikā.

In the Padamañjarī Haradatta is said to have been the son of Padma (Rudra)-kumāra, younger brother of Agnikumāra and a pupil of Aparājita.[832] In his Padamañjarī Haradatta employs the word 'kūcimañcī' which is a Telugu word.[833] The Bhaviṣyottara-purāṇa printed in Grantha characters contains 12 chapters (54 to 65th) and the Śivarahasya printed in the said characters has one chapter (17th) which set out the life (*carita*) of a Haradattācārya. It is there stated that Haradattācārya's original name was Sudarśana, that he was the son of Vāsudeva and that he died 3979 years after Kaliyuga began[834] (i. e. 878 A. D.). This Haradattācārya, being the son of Vāsudeva, was not the same as the author

of the Padamañjarī, who was the son of Padmakumāra. This earlier Haradatta may probably be the same as the Haradattācārya cited as an authority in the Sarvadarśana-saṁgraha on the Nakulīśa-pāsupatadarśana.[835] Dr. Jolly (R. u. S. p. 33) identifies without sufficient foundation the Haradattācārya of the Sarvadarśana-saṁgraha with Haradatta, the commentator of Āpastamba and Gautama.

A work called Hari-hara-tāratamya and another called Caturveda-tātparya-saṁgraha are ascribed to a Haradatta. Of the latter there is a ms. in the Deccan College collection (No. 109 of 1871-72), which contains 154 verses of fine penmanship. The first and last are given below.[836] Whether these two works were composed by Haradatta, the commentator of the Dharmasūtras, it is difficult to say. In the latter work the author sings a hymn of praise to Śiva as the supreme deity, points out how the Vedic *mantra*s refer to him, how the various rites are meant for him, refers to the mythological representations of Śiva as *Kirāta*, or as wearing skin etc. All the verses upto 143 are in the Vasantatilakā metre, while towards the end there are a few verses in other metres such as Śikharinī and Rathoddhatā. He was a staunch Śaivite,[837] though the hymn breathes a spirit of tolerance and sympathy for different religious and philosophical systems. He refers to the Maitrāyaṇa Śruti, Talavakāra Brāhmaṇa, Kātyāyana-gṛhya, Bhagvadgītā, the Purāṇas as supplementing the Vedas (vedopabṛṁhaka), the Sāṁkhya and Yoga.

87. Hemādri

Hemādri and Mādhava are the Castor and Pollux in the galaxy of *dākṣiṇātya* writers on Dharmaśāstra. Hemādri is a very voluminous writer. He is the author of the Caturvarga-cintāmaṇi, an encyclopædia of ancient religious rites and observances. According to the statements contained in the work itself the author intended to treat Dharmaśāstra in five sections, called vrata, dāna, tīrtha, mokṣa and pariśeṣa.[838] The Pariśeṣa-khaṇḍa was divided into four parts, viz., Devatā, Kālanirṇaya, Karmavipāka, Lakṣaṇasamuccaya.[839] The Caturvarga-cintāmaṇi has been published in the Bibliotheca Indica series. Four volumes containing 6 parts and covering about 6000 pages have been so far printed. The second and third volumes have two parts each. The fourth volume which deals with *prāyaścitta* does not appear to be the work of Hemādri.[840] The work so far published is concerned with *vrata, dāna, śrāddha* and *kāla* (the latter two being parts of the pariśeṣa-khaṇḍa). That portion of the Caturvarga-cintamaṇi which was intended to treat of *tīrtha* and *mokṣa* has not yet come to light. It is extremely doubtful whether the author was able to carry out his gigantic scheme. Mss. of portions of the great work are described in the catalogues under various names, e. g. I. O. cat. No. 1379, p. 407 on *śāntika-pauṣṭikāni* is the same subject that is treated in *vratakhaṇḍa* pp. 1003ff., though there are considerable variations between the Ms. and the printed text.

Hemādri's is a standard work on the subjects with which he deals. He quotes most profusely from smṛtis and purāṇas and names a host of writers. He appears to have been a profound student of the Pūrvamīmāṁsā. The discussions in his work, particularly on śrāddha and kāla, cannot be well understood without thorough acquaintance with the numerous *nyāyas* of the mīmāṁsā

which he employs at every step. To illustrate this a few instances may be cited at random. On pp. 137, 143, 156, 159, of his kāla-nirṇaya (vol. III part 2) he makes use of four different nyāyas of the *mīmāṁsā*.[841] The eminent commentators and *nibandhakāras* on dharmaśāstra and other works named by him are given below.[842] It is somewhat remarkable that though he quotes Aparārka and the Smṛti-candrikā scores of times he hardly ever mentions by name the Mitākṣarā of Vijñāneśvara. Though he does not promise a treatment of vyavahāra, here and there he makes sallies into the domain of vyavahāra. For example, he quotes the well-known sūtra of Gautama (10. 39) on the sources of ownership and holds a lengthy discussion thereon.[843] In another place he digresses into the question of the various kinds of *strīdhana* and their devolution (vol. III, part 1, pp. 530-531). He was of opinion that everyone, to whatever *śākhā* he may belong, should perform śrāddha in accordance with the directions thereon in all śākhās, kalpa and gṛhya sūtras, smṛtis, purāṇas and usages.[844] He makes the important

statement[845] that a person following any particular Vedic śākhā may enter into alliance by marriage with any other person of the same country following another Vedic *śākhā*.

Hemādri gives some account of himself in his work. The Mss. present great variations from the printed text. He belonged to the Vatsagotra.[846] He was the grandson of Vāsudeva and the son of Kāmadeva. The introductions to the *khaṇḍas* contains fulsome praise of Hemādri. One verse says that Hemādri scored out by showering wealth on poor people the lines that Brahmā had drawn on their forehead at the time of their birth (foredooming them to eternal poverty) and that Brahmā acquiesces in such conduct of Hemādri.[847] Another verse says that none existed, exists or will exist surpassing Hemādri.[848] He describes himself as in charge of the imperial records of Mahādeva, the Yādava king of Devagiri (modern Daulatabad).[849] In the colophons and the body of the work also he is described as the *karaṇādhīśvara* of Mahādeva, as highly honoured by the king and as a minister (*mantrin*) of the king.[850] He gives in the introduction to the Vratakhaṇḍa a detailed pedigree of the Yādavas of Devagiri. In the section on kāla (vol. III, part 2) he starts with Saṅghaṇa (i. e. Siṅghaṇa

of the inscriptions), then speaks of his son Jaitrapāla (i. e. Jaitugi), his son Kṛṣṇa (or Kanhara) and lastly of Mahādeva, son of the younger brother of Kṛṣṇa. This is not the place to go into the genealogy of the Yādavas. There are some discrepancies between the genealogy as presented by Hemādri and as gathered from the inscriptions and numerous copperplate grants of the Yādavas. *Vide* Bombay Gazetteer, vol. I, part 2, pp. 248-249 for Hemādri and pp. 268-275 for extracts from the Vratakhaṇḍa, pp. 252 and 519 for two pedigrees of the Devagiri Yādavas and pp. 511-534 for history. The following may be consulted for the principal grants of the Yādavas :-- Ind. Ant. vol. 17, p. 117 (Kalasbudruk plate of Bhillama dated *śake* 948 or 1025 A. D.), E. I. vol. III p. 110 (Bahal inscription of Siṅghaṇa dated *śake* 1144), E.I. vol. III p. 217-18 (Gadag inscription of Bhillama dated *śake* 1113 i. e. 1191 A. D.), Ind. Ant. vol. 14, p. 68 (grant of Kṛṣṇa or Kanhara dated 1249-50 A. D.), Ind. Ant. vol. 14, p. 314 (Paithan plate of Rāmacandra dated *śake* 1193), E. I. vol. XIII, p. 198 (Thana plate of Rāmacandra dated *śake* 1194 i. e. 1272 A. D.), E. I. vol. XIX, p. 20 (Mamdapur inscription of Kanhara dated *śake* 1172 i. e. 1250 A. D. wherein his younger brother Mahādeva is described as *yuvarāja*). Mahādeva reigned from 1260 to 1271 and Rāmacandra, the son of Kṛṣṇa, from 1271 to 1309 A. D. Since in the Caturvarga-cintāmaṇi Hemādri is said to be the keeper of the state records of Mahādeva, that work must have been composed at some time between 1260 and 1270 A. D. There are contemporary records available showing that Hemādri was in high favour not only with Mahādeva but also with his successor Rāmacandra. The Thana plate of Rāmacandra (dated *śake* 1194, i. e. 1272 A. D.) records the the grant of a village called Vaul in Sāsaṭi (modern Sāṣṭi in the Thana District) to thirty-two brāhmaṇas by Acyuta Nāyaka of the Gautama gotra and descendant of Jalhana, who was the governor of Konkan, and describes[851] Hemādri as one who had attained a pre-eminent position in the government through the favour of Rāmacandra and as one who was in charge of all (state) records and was the foremost minister.

Hemādri is credited with a commentary on Śaunaka's Praṇava-kalpa.[852] He appears to have written a śrāddha-kalpa according to the rules of Kātyāyana which is distinct from his Śrāddhakhaṇḍa (vide Calcutta Sanskrit College mss. cat,. vol. II, p. 163, No. 217 and Stein's cat. p. 105). Hemādri also wrote a commentary[853] called Kaivalyadīpikā on the Muktāphala of Vopadeva, the famous author of the Mugdhabodha grammar. The Muktāphala embodies the philosophy of the Bhāgavata purāṇa in 19 adhyāyas and 784 verses (and a few lines in prose in 5th and 6th chapters). Vopadeva was a friend and protegee of Hemādri, who wrote several works at the encouragement of the latter. He says that he wrote the Harilīlā (published in the Calcutta Oriental Series No. 3), an index of the Bhāgavata for pleasing the minister Hemādri.[854] There is a commentary on this work called Viveka with which both Hemādri and Madhusūdana-Sarasvatī had something to do.[855] Hemādri also wrote a commentary called Āyurvedarasāyaṇa on the Aṣṭāṅgahṛdaya of Vāgbhaṭa.

Altogether Hemādri was a towering personality. His name is associated throughout the Maratha Country with the construction of numerous temples having a peculiar style of architecture. He is also credited with having invented the Modi script. Within a few decades his Caturvarga-cintāmaṇi, particularly its *dāna* and *vrata* sections, came to be looked upon as the standard work in the whole of the Deccan and southern India. Mādhava in his Kālanirṇaya (p. 67) expressly mentions the Vratakhaṇḍa of Hemādri as an authority. This work was composed about 1340 A. D. In an inscription of Bhāskara *alias* Bhavadūra, son of Bukka I, dated *śake* 1291 (i. e. 1369 A. D.) the king is described as making various gifts following the composition of Hemādri.[856] This is obviously a reference to his *dānakhaṇḍa* and establishes that long before 1369 A. D. Hemādri had become a standard author in the Telugu country. The Vanapalli plate of Anna-Vema dated *śake* 1300 (about 1380 A. D.) describes Vema as giving the various gifts in Hemādri and his son as one who observed the *vratas* and *dānas*[857] described by Hemādri. Pedda--Komaṭi--Vema is described in a grant of *śake* 1344 as eager in bestowing gifts described in the rules of Hemādri.[858] Hemādri is quoted in the Madanapārijāta,[859] the Dvaitanirṇaya of Śaṅkarabhaṭṭa, the Nirṇayasindhu and other works.

88. Kullūkabhaṭṭa

Kullūka's commentary on the Manusmṛti styled the Manvarthamuktāvali is the most famous of all commentaries on Manu. It has been printed several times. In the following the Nirṇayasāgara edition of 1909 has been relied upon. Kullūka's commentary is concise and lucid and his remarks are always to the point. He avoids all unnecessary discussions and is never prolix. He was not however original. He drew upon the commentaries of Medhātithi and Govindarāja and incorporated a great deal from them

into his own work without acknowledgment. For example, on Manu XI. 95 he simply summarises the remarks[860] of Govindarāja and cites only one out of the several quotations that are found in Govindarāja's Manu-ṭīkā. He severely criticizes both Medhātithi and Govindarāja, particularly the latter. He frequently pours ridicule on the latter (vide note 713 above). At the end of his commentary he says[861] that Medhātithi's skill lay in expounding what texts were authoritative and of substance and what were not so, Govindarāja in concise words explained the hidden meaning of the brief text (of Manu), while Dharaṇīdhara had his own method of explanation which was independent of previous tradition; and therefore he undertook to write a commentary that would clearly set forth the real meaning of Manu. He was very proud of his achievement and says that neither Medhātithi nor Govindarāja nor other commentators explained in the way he did and that explanatory material like his would be difficult to find elsewhere.[862] He notices the explanations of Medhātithi and Govindarāja hundreds of times, discusses various readings and his commentary deserves to a considerable extent the eulogy pronounced by Sir William Jones[863] "At length appeared Cullūca Bhaṭṭa, who, after a painful course of

study and the collation of numerous manuscripts, produced a work of which it may perhaps be said very truly that it is the shortest yet the most luminous, the least ostentatious yet the most learned, the deepest yet the most agreeable, commentary ever composed on any author, ancient or modern."

Among the authors and works quoted by him (besides the usual smṛtis) are the following :—Garga (on II. 6), Govindarāja, Dharaṇīdhara, Bhāskara (bhāṣyakāra of the Vedāntasūtras, on I. 8 and 15), Bhojadeva (on VIII. 184), Medhātithi, Vāmana (author of the Kāśikā), Bhaṭṭavārtika-kṛt (on XII. 106), Viśvarūpa (the commentator of Yājñavalkya, on II. 189 and V. 68). The Viśvarūpa that he quotes on Manu V. 215 is the lexicographer and not the jurist as Aufrecht (in his great catalogue) appears to hold.

He gives us a little information about himself in the introductory verse.[864] He came of a Vārendra Brāhmaṇa family of Bengal (Gauḍa) residing in Nandana and was the son of Bhaṭṭa Divākara. He wrote his commentary in Kāśī in the company of *Pandits*. On Manu VI. 14 he mentions the names of certain vegetables that were current in Malwa and among the Vāhīkas.[865]

It appears that Kullūka also composed a digest called Smṛtisāgara. A Ms. of a portion of it called Śrāddhasāgara exists in the Calcutta Sanskrit College (cat. vol. II. p. 405, No. 446). In this his Āśaucasāgara and Vivādasāgara are referred to.

I secured a transcript of the ms. of the Śrāddhasāgara in the Calcutta Sanskrit College through the kindness of the Principal. The Śrāddhasāgara deals with the following subjects :—definition of of śrādha ; whether it is of the nature of *yāga*, dāna and homa ; various kinds of śrāddhas such as nitya, naimittika &c. ; the proper and improper places for śrāddha ; the proper times for śrāddha ; Aṣṭakā-śrāddha ; śūdras can perform aṣṭakā aud other śrāddhas ; intercalary month ; who are paṅkti-pāvana brāhmaṇas ; meaning of

nimantraṇa and āmantraṇa ; the number of brāhmaṇas to be invited ; the *darbhas* ; śrāddhadevatās ; the sacred thread etc.

The Śrāddhasāgara is full of Pūrvamīmāṁsā discussions. The author says that he wrote it and the other two works (Vivādasāgara and Āśaucasāgara) at the order of his father. He quotes profusely from the Mahābhārata, the Mahāpurāṇas and Upapurāṇas and from the dharmasūtras and metrical smṛtis. He names the Kalpataru oftener than any other *nibandhakāra*. The other authors and works named are : Bhojadeva, Halāyudha (probably the author of Prakāśa on the Śrāddhakalpasūtra of Kātyāyana), Jikana, Kāmadhenu, Medhātithi, Śaṅkhadhara. In one place we have a reference to Prabhākara and Kamalākarabhaṭṭa (on Kāla and Kāma being devatās) and in another place to Gauḍa-Maithila-Mayūkhabhaṭṭāḥ (which are probably marginal notes creeping into the ms. or refer to authors other than the well-known ones). He refers to the opinion of his own *guru* in opposition to that of the Kalpataru.

The date of Kullūka cannot be settled with certainty. Bühler held that he lived probably in the 15th century (S. B. E. vol. xxv. p. cxxxi). Ghose (Hindu Law, 3rd edition p. XVI) and M. M. Chakravarti (JASB 1915, p. 345) are of the same opinion. In I. L. R. 48 Cal. 643 Sir Asutosh Mukerji places Kullūka in the 15th century (at p. 688). As Kullūka mentions Bhojadeva, Govindarāja, Kalpataru and Halāyudha he is certainly later than 1150 A. D. Raghunandana[866] in his Dāyatattva and Vyavahāratattva, and Vardhamāna in his Daṇḍaviveka frequently mention his views. Śrīnātha's com. on the Dāyabhāga refutes the view of Kullūka. The Śrāddhakriyā-kaumudī of Govindānanda refers to Kullūka's explanation of the word 'ākāṅkṣan' as 'Vīkṣamāṇaḥ' in Manu III. 258. The Rājanīti-ratnākara of Caṇḍeśvara quotes the explanation of Kullūka.[867] Therefore Kullūka must have flourished before 1300

A. D. Kullūka in his by no means small work nowhere refers to the Dāyabhāga, though he himself came of a Bengal family. This silence is explicable in two ways. As we have seen, Kullūka wrote in Kāśī and not in Bengal. Therefore if he flourished not long after Jīmūtavāhana, it is quite natural that writing in Benares he had not heard of the Dāyabhāga or read it. It has been shown above that Jīmūtavāhana probably wrote about 1100-1150 A. D. Therefore Kullūka flourished between 1150 and 1300 A. D. and probably wrote about 1250 A. D. M. M. Chakravarti is not sure as to how early Kullūka flourished but opines that he could not have flourished later than the first quarter of the 15th century (JASB 1915, p. 345 n. 1).

89. Śrīdatta Upādhyāya

Mithilā has made extremely valuable and substantial contributions to Dharmaśāstra Literature. From the days of the Yājñavalkya smṛti down to modern times the land of Mithilā has produced writers whose names are illustrious. Śrīdatta Upādhyāya is one of the earliest among the mediaeval Maithila *nibandhakāras*. He is the author of several works which will be briefly noticed.

The Ācārādarśa of Śrīdatta was printed in Benaras at the Divakara Press and by the Venkateśvara Press in Bombay in *saṁvat* 1961. It is a manual of the daily religious duties of the followers of the white Yajurveda (Vājasaneyins),[868] such as *ācamana*, brushing the teeth, morning bath, *saṁdhyā*, *japa*, *brahmayajña*, *tarpaṇa*, daily worship of gods, *vaiśvadeva*, feeding guests etc. Among the works and writers named are the following[869]:—Ācāra-cintāmaṇi, Kalpataru, Kāmadhenu, Kālikāpurāṇa, Gaṇeśamiśra, Rājā (probably Bhojadeva), Smṛtimahārṇava, Harihara and Halāyudha-nibandha. There is a commentary on this work called Ācārādarśabodhinī

composed by Gaurīpati or Gaurīśa, son of Dāmodara Maithila, at Benaras in 1640 A. D (Dr. Bhandarkar's report, 1883–84, p. 347). In this work he uses several vernacular words; e. g. he says that 'Śāla' tree is known as Sagavana[870] (in the vernacular).

Another work of his is the Chandogāhnika on the daily duties for Sāmavedins. He refers to it in his Samayapradīpa[871] and Pitṛbhakti. A supplement to it named Chandogāhnikoddhāra was written by Śaṅkaramiśra, son of Bhavanāthamiśra (Mitra's Notices, vol. VI p. 10, No. 1989).

The Pitṛbhakti is a manual on the śrāddha rites for students of the Yajurveda. It was based[872] on the Kātīyakalpa with Karka's bhāṣya thereon and on the works of Gopāla and Bhūpāla (i. e. Bhojadeva). It is frequently quoted in the Śrāddhaviveka of Rudradhara. Among the writers named are (besides those that occur in the Ācārādarśa also): Pitṛhitākaraṇikāra, Nārāyaṇavṛtti (on Āśvalāyana Gr. S.), Mitākṣarā, Ratnakaraṇḍikā, Vidhipuṣpamālā (26 a), Śubhākara, Smṛtimañjarī, Smṛtimañjūṣā, Halāyudha's Śrāddhādhyāya. This work first treats of the details of the *Pārvaṇaśrāddha*, then of ekoddiṣṭa, of the monthly śrāddhas, the śrāddha on the 11th day after death, of Sapiṇḍīkaraṇa, of ābhyudayika śrāddha. It then proceeds to consider the definition of śrāddha.

The Śrāddhakalpa was composed by him for the Sāmavedins. It is referred to in his Samayapradīpa[873] and Pitṛbhakti (folio 33b)

The Samayapradīpa treats of the proper times for various *vratas*.[874] It is divided into three chapters (*paricchedas*). The

He also refers to Gauḍanibandha. No other writers or works except those that are already enumerated under Ācārādarśa and Pitṛbhakti are named in this work. On folio 7a there is a name which is somewhat indistinct and appears to be 'Mitāmitrādibhiḥ'. The Samayapradīpa is mentioned in the Kṛtya-ratnākara (pp. 400, 479, 505) of Caṇḍeśvara and in Śūlapāṇi's Durgotsavaviveka.[875] Śrīdatta is more frequently quoted in the Śrāddhakriyākaumudī of Govindānanda than almost any other author or work.

As Śrīdatta names the Kalpataru, Harihara and Halāyudha's work on Śrāddha he must have flourished later than 1200 A. D. As Caṇḍeśvara mention his Samayapradīpa, Srīdatta must have flourished before the first quarter of the 14th century. If Gaṅeśamiśra mentioned in the Ācārādarśa be the same as Ganeśvaramiśra, the author of Sugatisopāna and uncle of Caṇḍeśvara (which appears extremely probable), then Śrīdatta flourished a short time before Caṇḍeśvara and must have composed his works between 1275 and 1310 A. D.

It appears that there was another Maithila writer called Śrīdattamiśra, son of Nāgeśvaramiśra, who composed the Ekāgnidānapaddhati and one or two other works (Hp. Nepal cat. p. 129). The Nepal Ms. of the Ekāgnidāna-paddhati was copied in La-Sam 299 (Lakṣamaṇasena era 299, i. e. 1418 A. D.). Vide Hp. Nepal cat. XII, 45 and 129. So this Śrīdatta flourished towards the end of the 14th century in the reign of Devasiṁha son of Bhaveśa. Vide JASB for 1915 pp. 379-381 and 388-390 for Śrīdatta.

90. Candeśvara

Caṇḍeśvara is the most prominent figure among Maithila *nibandhakāras* on Dharmaśāstra. He compiled an extensive digest called Smṛtiratnākara or simply Ratnākara. This digest was divided into seven sections viz., on kṛtya, dāna, vyavahāra, śuddhi, pūjā, vivāda and gṛhastha.[876] Out of these the Vivādaratnākara dealing with dāyabhāga and the other titles of law (*vyavahārapadas*) has been printed in the B. I. series and has been translated into English by Mr. G. C. Sarkar and by Mr. Justice Digambara Chatterjee. The Vivādaratnakara of Caṇḍeśvara and the Vivādacintāmaṇi of Vācaspati are of paramount authority in matters of Hindu Law in Mithilā (modern Tirhut) so far as British Indian Courts are concerned.[877]

The Kṛtya-ratnākara deals in 22 *taraṅgas* with the discussion of *Dharma* (its real nature, its rewards, means of knowing it and the occasions for it), the various vratas and observances in the several months from *Caitra*, the observances in the intercalary month, various *vratas* on the several days of the week, the Sun's passage into a new sign, eclipse on the new-moon day etc. This work is referred to in his Dānaratnākara, which in its turn is quoted in the Gṛhastha-ratnākara.[878] The work has recently been printed in the B. I. series (1925).

The Gṛhastharatnākara is a very extensive work in 68 *taraṅgas* on the duties of householders. The Deccan College Ms. that I could consult is incomplete, has only folios 30, 72-133 and contains the last 23 *taraṅgas* only. Some of the subjects dealt with are :— from whom gifts were to be accepted by gṛhasthas; duties and

actions proper for Kṣatriyas, Vaiśyas and Śūdras; the observances of a *snātaka*; *yama* and *niyama*; *śauca*; the observances of *brahmacarya*; what ruins families; proper abode for a gṛhastha; what a gṛhastha should or should not speak or should or should not see; things not to be given to *śudras*; the avoidance of anger, adultery and intermixture of castes (*saṁkara*); requiting of debts etc.

The Dānaratnākara contains 29 *taraṅgas* and deals with the following subjects:—meaning of *dāna*; what may or may not be gifted; fit objects of charity; the gifts called *mahādānas*; gifts of a thousand cows and heaps of corn; various gifts, such as those of food, books; gifts appropriate to certain months, *nakṣatras* and *tithis*; miscellaneous gifts; dedication of wells and tanks for public use; planting of trees.

The Vivādaratnākara is an extensive work (671 pages in print) in 100 *taraṅgas* on civil and criminal law and deals with the 18 titles of law such as *dāyabhāga* (on partition and inheritance), ṛṇādāna (recovery of debts) and others. It formed the basis of the Vivādacandra of Misarumiśra, the Vivāda-cintāmaṇi of Vācaspati and the Daṇḍaviveka of Vardhamāna. It is mentioned in his own Gṛhastharatnākara.[879]

The Vyavahāraratnākara deals with judicial procedure, such as the plaint, the reply, the burden of proof, means of proof, judgment etc. Vide Mitra's notices, vol. VI. p. 66, No. 2036.

The Śudhiratnākara is in 34 *taraṅgas* and deals with impurity on birth and death, persons who have to observe no āśauca, meaning of *sapiṇḍa*, rites on death up to the end of the period of mourning, purifications of food and various substances. Vide Mitra's Notices, vol. VII. p. 149, No. 2384 and I. O. cat. p. 412, No. 1389.

For the Pūjāratnākara, vide Mitra's Notices, vol. III, p. 162, No. 2398. That work is mentioned by Raghunandana in the Śuddhi-tattva (vol. II, p. 299 on Śālagrāma stone).

Besides this digest Caṇḍeśvara compiled several other works.

Kṛtyacintāmaṇi is one of such works. It is a question when it was composed. In his Gṛhastharatnākara he says that certain

[879] इत्यादीनि चान्यानि पुत्रदेशे विवादरत्नाकर एवास्माभिर्वर्णितानीति। गृहस्थरत्नाकर folio 188 b.

architectural and decorative constructions called Śrīvṛkṣa, Vardhamāna and Nandyāvarta have been spoken of by him in the Kṛtyacintāmaṇi[880] But the Kṛtyacintāmaṇi says that he has already composed the seven ratnākaras.[881]

The Kṛtyacintāmaṇi is divided into sections called prakāśas. It deals with astronomical matters in relation to the performance of several religious ceremonies and saṁskāras, such as *tārāśuddhi*, the intercalary month, garbhādhāna, sīmantonnayana, birth of a child on the Mūla nakṣatra, the rites on the 6th day after birth, nāmakaraṇa, the movements of Saturn, Sun's passage from one sign into another, the results of eclipses etc.

Another work of Caṇḍeśvara, the Rājanītiratnākara, has been recently edited at Patna (1924) by Mr. K. P. Jayasval with a learned introduction dealing with the personal history of Caṇḍeśvara, his relations with the Maithila kings and the mediaeval Indian literature on politics. It appears that Caṇḍeśvara did not complete the writing of a work on politics when he compiled his great digest. He wrote the work at the command of the king Bhaveśa (or Bhaveśvara) of Mithilā.[882] The work contains 16 *taraṅgas* (waves, i. e. chapters) on the following subjects :—definition of a king, different grades of kings, the eighteen vices or calamities for kings, duties of kings ; the characteristics and duties of amātyas (councillors) ; the characteristics of *purohita* ; the characteristics and duties of a prāḍvivāka (Judge); the members of the hall of justice (sabhyas), their number and qualifications; concerning forts; the time and place and accessories of the settlement of royal policy; concerning the state treasury; the army; the commander-in-chief and the discipline of the army; ambassadors, allies, and spies; the general obligations of kings, conflict of Dharmaśāstra and Arthaśāstra, the six *guṇas* -- saṁdhi etc., the maṇḍala of kings; the king's power of punishment; abdication by king, the heir-apparent, impartibility of the kingdom ; the eldest son's right to succeed, the

seven constituent elements of the state; the state's obligation towards the poor, the helpless etc.; the coronation of the heir-apparent or his investiture.

There are two more works composed by Caṇḍeśvara viz., the Dānavākyāvali and the Śivavākyāvali (vide I. O. cat. p. 1409, No. 3724 for the latter).

Caṇḍeśvara names in his works, particularly in the Kṛtyaratnākara and the Vivādaratnākara, a host of writers and works. In his great digest he drew largely upon five predecessors and incorporated often without acknowledgment much or almost all that was valuable in them. These five predecessors were the Kāmadhenu, the Kalpataru, the Pārijāta, the Prakāśa (i. e. Smṛtimahārṇava) and Halāyudha, all of which he quotes scores of times. At the end of the Vivādaratnākara he boasts that whatever is of the essence in the above five works and even more is comprehended in his single work the Ratnākara.[883] Among the authors and works mentioned in his seven ratnākaras, those mentioned below deserve to be noted.[884] In I. L. R. 12 Cal. 348 (at p. 356) the learned judges appear to hold that the Pārijāta mentioned in the Vivādacintāmaṇi is the Madanapārijāta. But this is obviously a mistake (vide p. 309 above on Pārijāta). Besides these in his Rājanītiratnākara he names Kāmandaka, Kullūkabhaṭṭa, Pallava and Pallavakāra, Śrīkara. What

is printed as Naṭasūtra in the Vivādaratnākara (p. 477) is really Lāṭa (i. e. Lāṭyāyana Śrautasūtra). Caṇḍeśvara mentions many vernacular words (e. g. Krityaratnākara pp. 109, 111, 306, 338, 443).

We learn a great deal about the family and personal history of Caṇḍeśvara from his works. The Vivādaratnākara in the introduction and in the colophon tells us that Caṇḍeśvera was a *mantrin* (a minister), was entrusted with the office of minister for peace and war, that he conquered Nepal and weighed himself against gold on the banks of the Vāgvatī in *śake* 1236 (1314 A. D.).[885] There are more or less similar colophons at the end of the Rājanītiratnākara and the other ratnākaras. The grand-father of Caṇḍeśvara was Devāditya,[886] who was minister of Harasiṁhadeva of Tirhut and who belonged to the Kārṇāṭa family. One of the sons of Devāditya was Vīreśvara who was also a minister for peace and war of the same king and is said to have made grants to learned Brāhmaṇas in Rāmapura (i. e. Simraon in Champaran District) and other cities (verse 10 of Kṛtyaratnākara). Mr. Jayasval points out in his introduction to the Rājanīti-ratnākara (j) that the correct name of the king was Harisiṁhadeva. Another son of Devāditya was Gaṇeśvara who was younger than Vīreśvara and who was also a great minister and author of Sugatisopāna. A copy of this work bears the date *La-sam* (Lakṣmaṇasena era) 224 (i. e. 1343-44 A. D.).[887] In the colophon of this work Devāditya is called 'mahāmatta' (mahāmātra) and Ganeśvara is styled mahārājādhirāja. In the

Śrāddhaviveka of Rudradhara the Sugatisopāna is said to be the work of one who was *pratihastaka* (deputy) of Bhavaśarma.[888] Caṇḍeśvara was the son of Vīreśvara and like his father and grandfather became minister of Harisiṁhadeva. This must have happened about 1310 A. D., as he weighed himself in 1314 A. D. The Kṛtyaratnākara (verse 15) says that he touched the very idol of Paśupati in Nepal and worshipped it after conquering the country.

From the Vyavahāraratnākara it appears that Caṇḍeśvara was Chief Judge as well as Minister for peace and war.[889] Caṇḍeśvara and his ancestors are highly praised for their liberality.[890] In the Dānaratnākara (verse 2 at the end) he is said to have rescued the earth submerged in the flood of Mlecchas.[891] This probably refers to the defeat of some Mahomedan generals. Harisiṁhadeva was routed by Ghiasuddin Tughlak in 1324 and retired from Tirhut

into Nepal.[892] Hence it follows that the seven Ratnākaras some of which (like vivāda and dāna) refer to his weighing himself against gold in 1314 A. D. and his high position at the court of Harisiṁhadeva were composed between 1314 and 1324 A. D. His Rājanītiratnākara was composed at the command of Bhaveśa. This last belonged to the line of the Kāmeśvara dynasty which began to rule Tirhut in the third quarter of the 13th century, in 1370 A. D. according to Mr. Jayasval (introduction to Rājanītiratnākara, *r*). Therefore the literary activities of Caṇḍeśvara extended over about 50 years from 1314 and the Rājanīti-ratnākara was probably his last work composed at a very advanced age. For the somewhat controversial and confused chronology of the Tirhut kings of the Kārṇāṭa and Kāmeśvara dynasties, vide Hp. cat. (Introduction p. 31); Grierson in Ind. Ant. vol. 14, p. 182-196 and Ind. Ant. vol. 28, p. 57; JASB 1915 pp. 407-433 (M. M. Chakravarti); JBORS vol. IX, p. 300 and X, p. 37 (Jayasval).

Caṇḍeśvara exercised very great influence over Maithila and Bengal writers. Misarumiśra, Vardhamāna, Vācaspati-miśra and Raghunandana[893] very frequently quote him. The Vīramitrodaya (p. 181) calls the Ratnākara 'Paurastya-nibandha' (eastern digest).

91. Harinātha

Harinātha is the author of a digest called Smṛtisāra on several topics of dharmaśāstra. No part of this work has been yet printed. In the India Office there are two mss. of the Smṛtisāra (I. O. cat. p. 448, No. 1488 and p. 449, No. 1489). The first cites 67 authorities (*pramāpakāḥ*) on Dharmaśāstra, out of which the Karmapradīpa, the Kalpataru, the Kāmadhenu, Kumāra, Gaṇeśvaramiśra, Vijñāneśvara, Vilamba (?), Śmṛtimañjūṣā and Harihara deserve special mention. This ms. contains the portion of the Smṛtisāra on the saṁskāras, rites on death, śrāddha and prāyaścitta. The other ms. deals with the principal topics of vivāda (various titles of law) and vyavahāra (judicial procedure), viz. partition, father's share

892 The *Pañji* historian of Mithilā thus describes the departure of हरसिंहदेव 'बाणाब्धियुग्मशशिसंमितशाकवर्षे पौषस्य शुक्लनवमीरविसूनुवारे । त्यक्त्वा सुपट्टनपुरीं हरसिंहदेवो दुर्दैवदेशितपथोथ गिरिं विवेश ॥'.

893 The दानरत्नाकर, पूजारत्नाकर and शुद्धिरत्नाकर are quoted in the शुद्धितत्त्व of रघुनन्दन (e. g. pp. 284, 299, 301, vol. 1).

on partition, larger share to eldest son, persons excluded from partition and inheritance, impartible property; *strīdhana*; the several kinds of sons; succession to the property of the sonless; re-union; gambling and prize-fighting and other titles of law; various methods of *daṇḍa* (punishment); the various units of measure etc.; judicial procedure i. e. the plaint, the reply, the means of proof, viz, documents, witnesses, possession, reasoning, oaths, and ordeals; review of judgment; minority and dependence; rules about succession according to various authors. This last portion appears to be a sort of supplement, wherein the views of Bālarūpa, Pārijāta, Halāyudha, Kalpataru and of the Smṛtisāra itself on the order of succession to a man dying sonless are set forth. Viśvarūpa and Śrīkara are named in the summary of Bālarūpa's views and the Prakāśa at a later stage (folio 148 b). Bhavadeva-nibandha is also expressly named on possession.

No information is given in the mss. about Harinātha himself. He is styled in the colophons ' mahāmahopādhyāya. ' In several places he refers to the views of the Gauḍas on *ācāra*; e. g. he cites the view of the Gauḍas that on a fasting day or śrāddha day one should not employ the twig used in dantadhāvana and that when there is Ekādaśī on two days a house-holder should observe a fast on the first and a *yati* on the second. It appears that he was not a Gauḍa but rather a Maithila.

The India Office ms. of the *vivāda* portion of the Smṛtisāra is dated *saṁvat* 1614 (i. e. 1558 A. D.). Another ms. of the same portion (vide Mitra's Notices, vol. V, p. 232, No. 1913) was copied in Lakṣmaṇa *saṁvat* 363 i. e. 1469-1470 A. D. Śūlapāṇi quotes the Smṛtisāra in his Durgotsavaviveka. Misarumiśra in his Vivādacandra several times refers to the opinions of the Smṛtisāra.[894] Hence it follows that the Smṛtisāra was composed before the last quarter of the 14th century. Caṇḍeśvara in his voluminous work

nowhere refers to Harinātha nor does the latter refer to him. Hence they were probably contemporaries or not separated by any appreciable interval of time. As Harinātha mentions the Kalpataru and Harihara, he must be later than about 1250 A. D. If Ganeśvaramiśra[895] mentioned by Harinātha be the author of the Sugatisopāna (which is extremely probable) who was an uncle of Caṇḍeśvara, then Harinātha cannot be earlier than about 1300 A. D. and flourished at about the same time as Caṇḍeśvara, viz, the first half of the 14th century A. D. Harinātha is quoted by Vācaspatimiśra in his Dvaitanirṇaya, by Raghunandana (in Udvāhatattva vol. I, pp. 108, 119, Āhnikatattva vol. I, p. 240, Śuddhitattva vol. II, p. 240), Kamalākara, Nīlakaṇṭha and a host of other later writers. In the Ekādaśītattva p. 45 Harinātha is spoken of as *upajīvya* by Vardhamāna and Vācaspati.

There are several works styled Smṛtisāra e. g. of Kesavaśarma (Mitra's Notices, vol. II. p. 76), of Yādavabhūṣaṇa-bhaṭṭācārya (Mitra's Notices, vol. IV p. 213 No. 1642), of Devayājñika (D. C. Ms. No. 266 of 1884-87 and 344 of 1886-92, the latter being called Smṛtisārasaṁgraha). Hence it often becomes difficult to say in the case of later works, what particular Smṛtisāra is being quoted.

92. Mādhavācārya

Mādhavācārya is the brightest star in the galaxy of *dākṣiṇātya* authors on dharmaśāstra. His fame stands only second to that of the great Śaṅkarācārya. He had a most versatile genius and either himself wrote or inspired his brother Sāyaṇa and others to write voluminous works on almost all branches of Sanskrit literature. As an erudite scholar, as a far-sighted statesman, as the bulwark of the Vijayanagara kingdom in the first days of its foundation, as a *saṁnyāsin* given to peaceful contemplation and renunciation in old age, he led such a varied and useful life that even to this day his is a name to conjure with. Among his numerous works two deserve special mention here, viz : the Parāśara-mādhavīya, his commentary on the Parāśarasmṛti and the Kālanirṇaya.

895 श्वः कर्तास्मीति निश्चित्य दाता विप्रान्निमन्त्रयेत् । निरामिषं सरुद्भुक्त्वा सर्वभुक्जने गृहे । असंभवे परेद्युर्वा ब्राह्मणास्तान्निवेदयेत् ॥ अत्र गणेश्वरमिश्राः । इदं वाक्यं निरामिषसरुद्भोजनविशिष्टे निमन्त्रणविधायकमतो निमन्त्रणाङ्गानि निरामिषसरुद्भोजनां श्रुतिबलात् । स्मृतिसार (I. O. ms. No. 1488).

The Parāśara-mādhavīya has been published several times, the edition in the B. I. series and in the Bombay Sanskrit series being the best known. In the following the Bombay edition has been used. This work is very extensive and occupies about 2300 printed pages in the Bombay edition. It is not a mere commentary on Parāśara's text, but is in the nature of a digest of civil and religious law. The original smṛti of Parāśara contains no verses on *vyavahāra*, but Mādhavācarya hangs, on the slender peg of a single verse of Parāśara calling upon the king to rule his subjects with righteousness, his treatise on *vyavahāra* that covers a little over a fourth part of the whole commentary (vide note 341 above an Parāśara). The Parāśara-mādhavīya is a work of authority on modern Hindu Law in southern India.[896] His style is lucid and he generally avoids lengthy and abstruse discussions. Besides numerous smṛtikāras and purāṇas he names the following authors and works — Aparārka, Devasvāmin, Purāṇasāra, Prapañcasāra, Medhātithi, Vivaraṇakāra (on the Vedāntasūtra), Viśvarūpācārya, Śambhu, Śivasvāmin, Smṛticandrikā. The Parāśara-mādhavīya was amongst his earliest works. He tells us that there was no commentary on Parāśara before him.[897]

The Kālanirṇaya of Mādhavācarya has been published several times. In the following the B. I. edition has been used. He states that he wrote this work after he composed his commentary on the Parāśarasmṛti.[898] The work is divided into five *prakaraṇas*. The first (Upodghāta) deals with a scholastic disquisition on *kāla* (time) and its real nature ; the 2nd (called *vatsara*) speaks of the year, its various lengths according as it is *cāndra*, *sāvana* or *saura*, of the two *ayanas*, of the seasons and their number, of the months (*cāndra* and *saura*), of the intercalary months, and the religious acts allowed and forbidden in intercalary months, of the two *pakṣas* (fortnights); the third *prakaraṇa* (pratipatprakaraṇa) deals with the meaning of the word *tithi*, duration of a

tithi, the fifteen *tithis* of a *pakṣa*, two kinds of *tithis*, viz. śuddhā (i. e. not intermixed with another *tithi* on the same day) and *viddhā* (intermixed with another *tithi* on same day), rules about the preference of the first *tithi* for particular religious rites and observances (for Gods and Manes) when intermixed with the preceding and following *tithis*, the fifteen *muhūrtas* of the day and of the night; the *fourth* (dvitīyādi-tithi-prakaraṇa) extends the application of the rules about *pratipad* to the *tithis* from the second to the fifteenth and decides on what *tithi* (whether intermixed with the preceding or the following) certain *vratas*, such as Gaurīvrata on the third, Janmāṣṭamī on the 8th, were to be performed; the *fifth* (*prakīrṇaka* i. e. miscellaneous) deals with rules about the determination of *nakṣatras* for various acts, the *yogas* and *karaṇas* and rules about saṁkrānti and eclipses and the actions proper for them.

The Kālanirnaya besides the names of numerous sages, purāṇas, astronomical and astrological writers mentions the following works and authors :—Kālādarśa (p. 83), Bhoja (as having composed in Āryā metre a work on the Śaiva *āgama*), Muhūrta-vidhāna-sāra (p. 341), Vateśvarasiddhānta, Vāsiṣṭha Rāmāyaṇa, the Siddhānta-śiromaṇi (of Bhāskarācārya), Hemādri (p. 67 his *vratakhaṇḍa* and *puruṣhaṇḍa*).

A good deal about the family and personal history of Mādhavācārya can be gleaned from the above-mentioned two works and other treatises of Mādhavācārya. From the Parāśara-mādhavīya we[899] learn that he was the son of Māyaṇa and Śrīmatī, that Sāyaṇa and Bhoganātha were his younger brothers, that he was a student of the black Yajurveda and of the Baudhāyana-sūtra-caraṇa and belonged to the Bhāradvāja-gotra. The introductory verses and the colophon of the Prāyaścitta-sudhānidhi[900] of Sāyaṇa corroborate most of these particulars. A verse at the beginning of the

Kālanirṇaya tells us that Vidyātīrtha, Bhāratītīrtha and Śrīkaṇṭha were his teachers.[901] The Parāśara-Mādhavīya highly eulogises[902] Mādhava, compares him to divine and semi-divine councillors like Aṅgirasa of Indra and says that he was the hereditary teacher (*kulaguru*) and *mantrin* of king Bukkaṇa (or Bukka). The colophons to the several works of Sāyaṇa, the younger brother of Mādhavācārya, show that these brothers were closely connected with four rulers of the Vijayanagar dynasty, viz. Bukka and his son Harihara, Kampa and his son Saṅgama. In the Yājñatantra-sudhānidhi[903] (ms. in the Bhau Daji collection) Sāyaṇa, the author of the bhāṣyas on the vedas, is said to be the *kulaguru* of Harihara, son of Saṅgama. In the Guruvaṁśa-kāvya (Vāṇīvilāsa Press ed.) it is said that Vidyāraṇya was the pupil of Vidyātīrtha, that he composed Vedabhāṣyas and published them in the names of Sāyaṇa and Mādhava, that Harihara and Bukka were the most valiant of the five sons of Saṅgama (*v.* 48), that Vīra Rudra was the sovereign of Harihara and Bukka and was defeated by the *suratrāṇa* i. e. *sultan*. The same work says that Vidyāraṇya founded Vijayanagarī in śake 1258, vaiśākha śuddha 7 Sunday (i. e. 30th April 1335 A. D.) and crowned Harihara king.[903a]

Burnell in his introduction to the Vaṁśabrāhmaṇa started the theory that Sāyaṇa and Mādhava were identical and put forward an esoteric meaning on the verse that states that Sāyaṇa and Bhoganātha

were the younger brothers of Mādhava. But the facts as culled from the works of these two great men and the inscriptions of contemporary Vijayanagara kings are too strong for the hypothesis of Burnell and make it look absurd. The whole subject about the relationship of Mādhava, Sāyaṇa and Bhoganātha has been carefully examined by Rao Bahadur R. Narsimhachar in Ind. Ant. vol. 45 pp. 1-6 and 17ff and the theory of Burnell has been thoroughly refuted. Sāyaṇa and Bhoganātha were as real personages as Mādhavācārya himself. Mādhavācārya in his later years became a *saṁnyāsin* and was named Vidyāraṇya. To the items of evidence adduced by R. B. R. Narsimhachar for establishing the identity of Mādhava and Vidyāraṇya (Ind. Ant. vol. 45 p. 18) I may add one more. The Vīramitrodaya ascribes the commentary on Parāśara composed by Mādhava to Vidyāraṇya.[904] It has however to be noted that the Guruvaṁśakāvya (Vāṇīvilāsa Press ed.) says (V. 41-44) that Vidyāraṇya was different from both Sāyaṇa and Mādhava.

The chronology of the kings of Vijayanagara has been a fruitful source of controversy. It is not necessary to go into that chronology in great detail here. It may be studied in such works as Sewell's 'Forgotten empire' and in E. I. vol. III. p. 36, E. I. vol. XIV p. 68, E. I. vol. XV p. 8. The following pedigree[905] will be sufficient for the purpose of connecting Mādhava and his brothers with the kings of Vijayanagara. The earliest inscription is that of Harihara I dated *śake* 1261 (1339-40 A. D.) wherein Harihara

is said to be a Mahāmaṇḍaleśvara and is spoken of as 'Śrī-Vīra-Hariyappa-Voḍeya.'[906] The colophon of the Mādhavīya Dhātu-vṛtti describes Mādhava as the great minister of Saṅgamarāja, the son of Kamparāja.[907] The Biṭraguṇṭa grant in *śake* 1278 (1356 A. D.) by Saṅgama II at the request of his teacher Srīkaṇṭhanātha shows that Bhoganātha[908] who composed the contents of the grant was a *narmasaciva* (gay or humorous companion) of Saṅgama II. We saw above that Śrīkaṇṭha was a teacher of Mādhavācārya ano that Bhoganātha was the youngest brother of Mādhavācārya. Bhoganātha in order to be a poet and a *narmasaciva* of a reigning sovereign must have been a grown-up man in 1356 A. D. and so Mādhavācārya must have been quite an elderly person about that time. The Kālanirṇaya tells us that in the cyclic year Īśvara following immediately after *śake* 1258 *śrāvaṇa* was an intercalary month and that in the cyclic year Bhāva that preceded *śake* 1258 (i. e. in *śake* 1256) Fālguna was an intercalary month and then examines the intercalary months that occurred iu the cyclic years up to Vikārī thereafter (i. e. up to *śake* 1281).[908a] As the Kālanirṇaya examines the intercalary months from *śake* 1256 (i. e. 1334 A. D.) to *śake* 1281 (i. e. 1359 A. D.), it follows that it was either composed during these years or immediately after this period. The Parāśara-mādhavīya was composed before the Kālanirṇaya. Rao Bahadur Narsimhachar states that in a copperplate grant dated 1386 A. D. it is said that Harihara (II) gave in the presence of Vidyāraṇya-śrīpāda certain donations to three scholars who were the promoters

(*pravartaka*) of the commentaries on the four Vedas (Ind. Ant. vol. 45 p. 19). Another inscription speaks of Vidyāraṇya in 1378 A. D.[909] This shows that Mādhavācārya had become a *saṁnyāsin* at least in 1377 A. D. Tradition says that Vidyāraṇya died in 1386 A. D. at the ripe old age of 90. Therefore we shall not be far wrong if we place the literary activity of Mādhava-Vidyāraṇya between 1330-1385 A. D. From the remarks about intercalary months it appears that the Parāśaramādhavīya and Kālanirṇaya were composed between 1335-1360 A. D. There was a tradition among *pandits* that it was Mādhavācārya who composed bhāṣyas on the Vedas and ascribed them to his brother Sāyaṇa. Kāśīnātha, in his Viṭṭhala-ṛṅmantra-sāra-bhāṣya says so.[910]

Great confusion has been caused by identifying Mādhava-Vidyāraṇya with another scholar named Mādhava who was also a *mantrin* of Bukka, who was a great warrior and was governor of Banavase and the country round Goa on the western coast. In a grant[911] of the village Kucara, also called Mādhavapura, dated *śake* 1313 (1391 A. D.), it is said that he routed the armies of the Turuṣkas, wrested Goa the capital of Koṅkaṇa from them and re-established the temple of Saptanātha (i. e. Sapta-koṭīśvara). There is another inscription dated *śake* 1290 (i. e. 1368 A. D.) where the great minister (*Mahāpradhāna*) Mādhavāṅka is stated to have ruled over Banavase 12000 under king Bukkarāya (Ind. Ant. vol. IV, p. 206). Fleet is wrong in identifying the minister Mādhavāṅka with Mādhavācārya-Vidyāraṇya. Another grant from Goa (found by Dr. Bhau Daji) says that Mādhava-mantrin, son of Cauṇḍibhaṭṭa, established the *liṅga* of Saptanātha (JBBRAS vol. 9, p. 228). Vide E. C. vol. VIII, Sorab No. 375 dated śake 1268 (Sunday Mādhava 30, i. e. 11th Feb. 1347), where we are told that Mādhavamantrin was governor of Candragutti, capital of Banavase 12000, that he was minister of Mārapa, younger brother of Harihara I and that he was a disciple of

Kriyāśakti, a Śaiva teacher. In E. C. vol. VII, Shikarpur 281 dated śake 1290 Kārtika bahula 8 (i. e. 15th November 1368) Mādhava is said to have been a son of Cāuṇḍa of the Āṅgirasa gotra and a minister of Bukka I and his *guru* is said to have been Kāśivilāsa Kriyāśakti.

From this it follows that the Mādhava *mantrin* who was a governor of Banavase and Goa and was living in 1391 A. D. was the son of Cauṇḍibhaṭṭa and cannot be identified with Mādhavācārya who was the son of Māyaṇa.

There is a ms. in the Bombay University Library of a work called Kālanirṇayakārikā in 130 verses, which contains the introductory verses of the Kālanirṇaya dealing with the contents, though in a somewhat different order. There are several commentaries on the Kālanirṇaya, viz. Kālanirṇayadīpikā by Rāmacandrācārya composed about 1450 A. D., a commentary called Lakṣmī by Lakṣmīdevī, wife of Vaidyanātha Pāyaguṇḍa. There is a Vivaraṇa of the Kālanirṇayadīpikā, by Nṛsiṁha, son of Rāmacandrācārya (vide D. C. Ms. No. 99 of 1871-72).

93. Madanapāla and Viśveśvarabhaṭṭa

The Madanapārijāta compiled under the patronage of king Madanapāla by Viśveśvarabhaṭṭa is a famous work. Like Bhoja, Madanapāla seems to have been a great patron of learning and several works are attributed to him. At least four works on dharmaśāstra are ascribed to him (i. e. were written under his patronage) viz the Madanapārijāta, Smṛtimahārṇva or Madanamahārṇava, Tithinirṇayasāra and Smṛtikaumudī.

The Madanapārijāta is an extensive work printed in the B. I. series. There are 23 introductory verses, the first 13 of which give the genealogy of Madanapāla. In the printed edition these 13 verses are stated to have been added by *Purohita* Śrī-Rāmadeva. The last of the introductory verses states that the work was composed after a careful study of Hemādri, Kalpavṛkṣa (i. e. Kalpataru), Aparārka, Smṛticandrikā, Smṛtyarthasāra and Mitākṣarā.[912] That Madanapāla was only the patron and not the real author of the

(*pravartaka*) of the commentaries on the four Vedas (Ind. Ant. vol. 45 p. 19). Another inscription speaks of Vidyāraṇya in 1378 A. D.[909] This shows that Mādhavācārya had become a *saṁnyāsin* at least in 1377 A. D. Tradition says that Vidyāraṇya died in 1386 A. D. at the ripe old age of 90. Therefore we shall not be far wrong if we place the literary activity of Mādhava-Vidyāraṇya between 1330-1385 A. D. From the remarks about intercalary months it appears that the Parāśaramādhavīya and Kālanirṇaya were composed between 1335-1360 A. D. There was a tradition among *pandits* that it was Mādhavācārya who composed bhāṣyas on the Vedas and ascribed them to his brother Sāyaṇa. Kāśīnātha, in his Viṭṭhala-ṛṅmantra-sāra-bhāṣya says so.[910]

Great confusion has been caused by identifying Mādhava-Vidyāraṇya with another scholar named Mādhava who was also a *mantrin* of Bukka, who was a great warrior and was governor of Banavase and the country round Goa on the western coast. In a grant[911] of the village Kucara, also called Mādhavapura, dated *śake* 1313 (1391 A. D.), it is said that he routed the armies of the Turuṣkas, wrested Goa the capital of Koṅkaṇa from them and re-established the temple of Saptanātha (i. e. Sapta-koṭīśvara). There is another inscription dated *śake* 1290 (i. e. 1368 A. D.) where the great minister (*Mahāpradhāna*) Mādhavāṅka is stated to have ruled over Banavase 12000 under king Bukkarāya (Ind. Ant. vol. IV, p. 206). Fleet is wrong in identifying the minister Mādhavāṅka with Mādhavācārya-Vidyāraṇya. Another grant from Goa (found by Dr. Bhau Daji) says that Mādhava-mantrin, son of Cauṇḍibhaṭṭa, established the *liṅga* of Saptanātha (JBBRAS vol. 9, p. 228). Vide E. C. vol. VIII, Sorab No. 375 dated śake 1268 (Sunday Mādhava 30, i. e. 11th Feb. 1347), where we are told that Mādhavamantrin was governor of Candragutti, capital of Banavase 12000, that he was minister of Mārapa, younger brother of Harihara I and that he was a disciple of

Kriyāśakti, a Śaiva teacher. In E. C. vol. VII, Shikarpur 281 dated śake 1290 Kārtika bahula 8 (i. e. 15th November 1368) Mādhava is said to have been a son of Cāuṇḍa of the Āṅgirasa gotra and a minister of Bukka I and his *guru* is said to have been Kāśivilāsa Kriyāśakti.

From this it follows that the Mādhava *mantrin* who was a governor of Banavase and Goa and was living in 1391 A. D. was the son of Cauṇḍibhaṭṭa and cannot be identified with Mādhavācārya who was the son of Māyaṇa.

There is a ms. in the Bombay University Library of a work called Kālanirṇayakārikā in 130 verses, which contains the introductory verses of the Kālanirṇaya dealing with the contents, though in a somewhat different order. There are several commentaries on the Kālanirṇaya, viz. Kālanirṇayadīpikā by Rāmacandrācārya composed about 1450 A. D., a commentary called Lakṣmī by Lakṣmīdevī, wife of Vaidyanātha Pāyaguṇḍa. There is a Vivaraṇa of the Kālanirṇayadīpikā, by Nṛsiṁha, son of Rāmacandrācārya (vide D. C. Ms. No. 99 of 1871-72).

93. Madanapāla and Viśveśvarabhaṭṭa

The Madanapārijāta compiled under the patronage of king Madanapāla by Viśveśvarabhaṭṭa is a famous work. Like Bhoja, Madanapāla seems to have been a great patron of learning and several works are attributed to him. At least four works on dharmaśāstra are ascribed to him (i. e. were written under his patronage) viz the Madanapārijāta, Smṛtimahārṇva or Madanamahārṇava, Tithinirṇayasāra and Smṛtikaumudī.

The Madanapārijāta is an extensive work printed in the B. I. series. There are 23 introductory verses, the first 13 of which give the genealogy of Madanapāla. In the printed edition these 13 verses are stated to have been added by *Purohita* Śrī-Rāmadeva. The last of the introductory verses states that the work was composed after a careful study of Hemādri, Kalpavṛkṣa (i. e. Kalpataru), Aparārka, Smṛticandrikā, Smṛtyarthasāra and Mitākṣarā.[912] That Madanapāla was only the patron and not the real author of the

work is made clear in several places. In the introductory verse 20 it is stated that the work was compiled through (lit. by the mouth of) learned men.[913] In two places in the body of the work[914] it is said that the author has explained the matter under discussion in his work called Subodhinī, a commentary on the Mitākṣarā. Therefore the Madanapārijāta was really composed by Viśveśvarabhaṭṭa, the author of the Subodhinī. The Madanapārijāta contains nine *stabakas* (bunches i. e. chapters) on brahmacarya, the *dharmas* of householders, the daily duties (*āhnika-kṛtya*), the *saṃskāras* from *garbhādhāna* onwards; impurity on birth and death, the purification of various substances (*dravyaśuddhi*), *śrāddha*, *dāyabhāga* (partition and inheritance) and *prāyaścitta*. In the portion on the Dāyabhāga it very closely follows the Mitākṣarā. Its style is simple and lucid. Besides the authors and works mentioned above it cites those noted below.[915]

There is a work called Mahārṇava ascribed to Māndhātā, a son of Madanapāla. In several mss. of this work deposited in the Deccan[916] College there are introductory verses giving the genealogy of Madanapāla that agree almost word for word with the introductory verses of the Madanapārijāta. Moreover two verses that speak of Viśveśvarabhaṭṭa occur here also as well as in the Madanapārijāta and Subodhinī. This work also is said to have been compiled by

No. 260 does not contain the verses about the genealogy, but the two verses माता पुण्य० and मतिर्येषां (which are 21 and 22 in the मदनपारिजात) occur in all the three; in No. 131 and No. 259 the verse माता पुण्य० occurs in the introdoctory verses and the verse मतिर्येषां occurs at the end of the work and in No. 260 the two verses are the 2nd and 3rd of the introductory verses.

Māndhātā through the learned.[917] It is said to have been based on a study of the *śruti*, the *smṛtis* and the *puraṇas*. The work is divided into 40 *taraṅgas* (waves). The principal subject[918] of the work is to describe how the various diseases which human bodies are heir to are the result of evil deeds done in past lives (this subject being called Karmavipāka in dharmaśāstra works) and to prescribe various rites and penances for the eradication of the evil results of evil deeds. Among the various rites and penances that are set forth in great detail may be mentioned the Kūṣmāṇḍa-homa, Rudraikādaśinī, Mahārudrābhiṣeka, Vināyakaśānti, the Nava-grahayajña &c. The Mahārṇava mentions the Karmavipāka of Śātātapa, the Caturvarga-cintāmaṇi (folio 234 a of D. C. no. 259 of 1886-1892), the Mitākṣarā, the Karmavipāka-samuccaya &c. It is worthy of note that in the Smṛti-kaumudī the authorship of the Mahārṇava is claimed by the author himself and is not ascribed to Madanapāla's son.[919]

The Tithinirṇayasāra is another work compiled under Madana-pāla. Stein in his cat. of mss. at Jammu (p. 306) gives extracts from this work. The first fourteen verses are the same as those in the Madanapārijāta. It appears to have been composed by Viśvanātha, which is most probably a paraphrase of the name Viśveśvara.[920]

The Smṛtikaumudī contains an introduction of 17 verses, 13 of which set forth the genealogy of Madanapāla. The fourteenth verse tells us that Madanapāla composed works called Yantraprakāśa, Mahārṇava, Pārijāta, Siddhāntagarbha and Tithinirṇayasāra.[922] The 15th verse says that he composes the Smṛtikaumudī through

the learned.[923] The 17 verse says that his predecessors have generally dilated upon the dharmas of the three higher *varṇas* and the *dharmas* of the śūdra have not been dealt with by them as a principal topic, therefore he would clearly expound the *dharmas* of the last *varṇa*. At the end of the ms. in the I. O. cat. it is described as the younger sister of the Madanapārijāta and of the Mahārṇava.[924] This is not found in the D. C. ms. which was copied in *saṁvat* 1615. This work is divided into four kalollāsas, each kalollāsa being subdivided into kiraṇas (rays). The first kalollāsa has two kiraṇas, the second has four, the third and fourth five kiraṇas each. The subjects dealt with are: I two kinds of śūdras, viz : the kevalaśūdra (simple śūdra) and one who is of mixed descent, being born of a śūdra woman from a man of the higher castes ; the mixed castes ; II. general discourses on the śūdra's *adhikāra* for engaging in various acts and performing various rites, such as the study of the vedas and smṛtis, the performance of garbhādhāna and other saṁskāras and the consecration of sacred fires ; saṁdhyāvandana ; the śūdra's capacity for attaining the knowledge of brahman ; III. marriage ; different forms of marriage, prohibited degrees of blood relationship (sāpiṇḍya), the various rites of marriage such as kanyādāna ; such saṁskāras as nāma-karaṇa (naming the child), the duties of śūdras in ordinary and difficult times ; āśauca for śūdras ; the various śrāddhas for them ; the letting loose of a bull in honour of the dead ; IV. śūdra's daily duties such as śauca, brushing the teeth, baths in the morning and at other times, *brahmayajña*, *tarpaṇa*, *vaiśvadeva*, daily *śrāddha*, dinner, &c.

The Smṛtikaumudī mentions among others Aparārka, Kṛtya-kalpataru, Mitākṣarā, Medhātithi, Yajñapārśva and Smṛtimañjarī. It also quotes from the Vedānta-kalpataru[925] and the author claims the Madanapārijāta as his own work.

It has been seen how all the four works set out above were composed under the patronage of Madanapāla and how they were

probably from the pen of Viśveśvarabhaṭṭa. There is one more work on Dharmaśāstra which Viśveśvarabhaṭṭa composed in his own name without the shelter of a patron's name. It is the Subodhinī, a commentary on the Mitākṣarā of Vijñāneśvara. The vyavahāra portion of it has been published in Bombay by Mr. S. S. Setlur and also by Mr. J. R. Gharpure. Mr. Govind Das had seen portions of the Subodhinī on the prāyaścitta section also. The Subodhinī does not comment on each word of the Mitākṣarā but explains only important passages. It is a learned work. This was the earliest composition of Viśveśvarabhaṭṭa, since it is mentioned even in the Madanapārijāta. The first verse of the Subodhinī is also the opening verse of the Mahārṇava and of the Smṛtikaumudī.[926]

From the verses[927] 21 and 22 in the introduction to the Madanapārijāta it appears that Viśveśvara was the son of Pedibhaṭṭa and Ambikā, that he was of the Kauśikagotra and was the pupil of Vyāsāraṇya-muni. In the Subodhinī also the verse 'mātā &c.' occurs at the end with slight suitable variations and the verse 'matiryeṣām' in the beginning. The second introductory verse in Mr. Gharpure's edition makes Viśveśvara the son of Appabhaṭṭa,[928] while Mr. Setlur reads 'Peṭṭibhaṭṭa' which is probably a misreading for Pedibhaṭṭa. From his father's name it appears that Viśveśvara was a native of the Draviḍa country[929] and migrated to Northern India in search of patronage after he wrote the Subodhinī. Viśveśvara is regarded as one of the leading authorities of the Benares School

of modern Hindu law.[930] Madanapāla belonged to the family of Ṭāka kings that ruled in Kāṣṭhā (modern Kath) on the Jumna to the north of Delhi.[931] The printed Madanapārijāta makes the family name to be 'Kāṣṭhā,' but this is most probably a wrong reading, as in the Mahārṇava and the other works of Madanapāla the family name is distinctly stated to be Ṭāka. The pedigree of the family as gathered from the Madanapārijāta and the other works is given below. Some works such as the Mahārṇava omit mention of Sahajapāla. About Sādhāraṇa it is said that he brought about the remission of all taxes at the three *tīrthas* (Prayāga, Kāśī and Gayā).[932]

In the Sūryasiddhāntaviveka of Madanapāla the father of Madanapāla is said to be Sahāraṇa[933] which is a Prakrit equivalent of Sādhāraṇa. Madanapāla appears to have been a very great patron of learned men and is said to have emulated the fame of Bhoja.[934] Besides the four works described above he compiled several other works, the most famous of which is his dictionary of drugs called Madanavinodanighaṇṭu. That work is very extensive, contains about 2250 verses and is divided into fourteen *vargas*, the last of which contains a *praśasti* of his family.[935] This work contains the names of medical drugs, the qualities of drugs and of dishes and of the flesh of various animals. Some of the words given as synonyms for Sanskrit words occur in the modern Marathi.[936] We saw above that his Smṛtikaumudī refers to Yantra-prakāśa and Siddhāntagarbha as two of his works. These two were works on astronomy.

Another work of his is the Sūrya-siddhāntaviveka or Vāsanārṇava, which is a commentary on the Sūryasiddhānta. There is a ms. of this work in the Bhau Daji Collection of the Bombay Asiatic Society.[937] Therein after giving his pedigree he says that by his works on Smṛtiśāstra, on astronomy and mathematics and on medicine he came to be known as *abhinava* Bhoja.[938] In this treatise he refers to his own works already composed called Siddhāntagarbha[939] and Yantraprakāśa. He also refers to a Rājamṛgāṅka

of Bhoja and to Bhāskara's works. The ms. was copied in *saṁvat* 1459, i. e. 1402-3 A. D. In the colophon of this work his *birudas* (titles) are Paṇḍitapārijāta and Abhinava-Bhoja, and he is also styled Mahārājādhirāja.[940] In the Madanapārijāta and the Mahārṇava the *birudas* are Paṇḍitapārijāta and Kaṭāramalla or Kaṭṭāramalla. A work called Ānandasañjīvana on singing, dancing, musical instruments and rāgas is ascribed to Madanapāla.[941] The king Madana, son of Sahāraṇa, who is connected with the restoration of Medhātithi's bhāṣya, must be this Madana.

A great deal has been written concerning the date of Madanapāla. The introductory verses giving the genealogy of Madanapāla must be held to be genuine, as they occur in the ancient ms. (D. C. No. 131 of A 1882-83) of Mahārṇava copied in saṁvat 1645 (1588-89 A. D.) and in the still older ms. (dated *saṁvat* 1459) of the Sūrya-siddhānta-viveka. As the Madanapārijāta mentions the Smṛticandrikā and Hemādri's Caturvarga-cintāmaṇi not only in the introductory verses of the Madanapārijāta but in the body of the Madanapārijāta and the Mahārṇava, Madanapāla must be certainly later than 1300 A. D. As the Smṛtikaumudī mentions the Vedāntakalpataru that was composed in the time of the Yādava princes Kṛṣṇa and Mahādeva, it follows that the work was composed after the third quarter of the 13th century. The Madanapārijāta is quoted in the Nṛsiṁhaprasāda, the Antyeṣṭipaddhati of Nārāyaṇabhaṭṭa, the Āhnikatattava (pp. 326, 397, 479, vol. I) of Raghunandana, the Śrāddhakriyākaumudī (pp. 327, 489) of Govindānanda. Therefore it is certainly earlier than 1500 A. D. And if we rely on the date when the ms. of the Sūryasiddhāntaviveka was copied (viz. 1402-3 A. D.), it follows that Madanapāla flourished before 1400 A. D. The Madanavinodanighaṇṭu[942] gives the date of its

composition as 'Brahmajagad-yugendu' of the Vikrama era, *māgha* 6 of the bright half and Monday (i.e. 8-1-1375 A.D.). This was interpreted by Sarvadhikari (Tagore Law Lectures pp. 297-298, ed. of 1922) as equal to 1231 of the Vikrama era (i.e. 1175 A.D.). He held that 'yuga' meant two. But herein he was entirely wrong. Besides, the date proposed by him is impossible, since it would lead us to hold that Madanapāla wrote in 1175 A.D. and since, as we saw above, he could not have flourished before 1300 A.D. It has been already shown (pp. 309, 369) that the view of Sarvadhikari and others that the Pārijāta mentioned by Caṇḍeśvara is the same as Madanapārijāta is quite wrong. Astronomical usage as found in Bhāskara and other writers always interprets *yuga*[943] as meaning four (and not two) and hence the date of the composition of the Madanavinodanighaṇṭu is 1431 of the Vikrama era (i.e. 1375 A.D.). Vide Jolly's Tagore Law lectures pp. 14-15, Dr. Bhandarkar's Report for 1883-84 pp. 47 and 347 and S.B.E. vol. 25, p. cxxv n. 2. A ms. of the Sūryasiddhāntaviveka, which is one of the last (if not the last) works of Madanapāla is dated in 1402-3 A.D. Hence the literary activity of Madanapāla and of his protegee, Viśveśvarabhaṭṭa, must be placed between 1360-1390 A.D.

94. Madanaratna

The Madanaratna is an extensive digest on Dharmaśāstra no part of which has yet been printed. In the colophons of mss. it is also called Madanaratnapradīpa or simply Madanapradīpa. The work was divided into seven[944] sections called *uddyotas* on *samaya* (or *kāla*), *ācāra, vyavahāra, prāyaścitta, dāna, śuddhi, śānti*. The order of the various sections was the one indicated, the *samayoddyota* being the first part. I have not been able to examine the mss. of all the uddyotas.

943 e.g. भास्कराचार्य in his गणिताध्याय (कालमानाध्याय verse 24) says 'खखाभदन्तसागरैर्युगाग्निभूयुगभूगुणैः। क्रमेण सूर्यवत्सरैः कृतादयो युगाङ्घ्रयः॥' where युग must mean 'four' and युग्म is employed for two.

944 उद्योताः समयाचारव्यवहारविवेचकाः। प्रायश्चित्तस्य दानस्य शुद्धिशान्त्योश्च सप्तमे॥ तत्रादौ राजसिंहेन सर्वधर्मोपयोगतः। तन्यते मदनेन्द्रेण समयस्य विनिर्णयः॥ verses 24-25 of ms. of समयोद्योत in Viśrambāg collection I. No. 146 and verses 26 and 27 in the I.O. cat. ms. (p. 537 b) and Peterson's cat. of Ulwar mss. No. 1410 and extract No. 336 at p. 131.

The Samayoddyota deals with the subjects usually treated of in works on *kāla*, vix discussions about the year, the seasons, the months, the intercalary months, the rules about *tithis*, the rules about the proper times for various religious observances, gifts, *homa*, the rules about *kalivarjya*.

There is a ms. of the Dānoddyota in the Ānandāśrama collection at Poona (No. 2378). The following are the subjects treated of :- eulogy of *dāna* ; the nature of *dāna*, various kinds of *dānas* ; the constituent elements (*aṅgāni*) of *dāna* ; the donor, proper persons for gifts, persons undeserving of gifts, what things cannot be given away, proper and improper times and places for *dāna*, measures of corn and other substances and weights and units of length &c., finding out the east and other directions, characteristics of a *toraṇa*, *patākā* and *maṇḍapa*, *tulā-puruṣa* (weighing oneself against gold or silver), gift of a thousand cows and other magnificent gifts, dedication of a tank or well and planting of a garden &c. In this work the author refers to Kalpataru and to Hemādri as a dākṣinātyanibandhakāra.

Deccan College ms. No. 392 of 1891-95 deals with the *śānti* section. It treats of rites for propitiating gods and planets and averting the evil consequences of great or small portentous phenomena, such as Vināyaka-snāna, sūrya-śānti, navagraha-śānti, śāntis for birth on certain evil *nakṣatras* like *mūla*, *āśleṣā* and evil astrological conjunctions like *vyatīpāta*, *vaidhṛti*, *saṁkrānti* ; rites for the safety of the foetus and of the newly born infant ; *ayutahoma* ; *lakṣahoma*, *koṭihoma* &c. In this section sages like Uttara-Garga, Kātyāyana, Nārada, Baijavāpa (on gṛhya), Mānava-saṁhitā, Yājñavalkya, Śaunaka and purāṇas like the Skanda, Bhaviṣyottara, Viṣṇudharmottara are very frequently cited. Besides the following are among the authors and works referred to :—Apekṣitārthadyotinī, a commentary of Nārāyaṇa, Karmavipākasaṁgraha, Karmavipākasamuccaya, Kumāratantra promulgated by the son of Rāvaṇa, Prayogasāra, Vijñāneśvarācārya (in the plural).

A ms. of the Ācāroddyota is noticed by Burnell in his Tanjore cat. (p. 137 b). Stein (in his cat. of Jammu mss.) notices an incomplete ms. of the Vyavahāroddyota (p. 98 No. 2437). M. M. Haraprasad Sastri notices a ms. of the Prāyaścittoddyota (Nepal Palmleaf and Paper mss. cat. XVIII and p. 223).

From the colophons at the end of the several mss. of the Madanaratna it appears that the work was composed under the patronage of king Madanasiṁha-deva, son of Śaktisiṁha.[945] The king is styled mahārājādhirāja and one of his titles is kodaṇḍa-paraśurāma (meaning 'who was a veritable Paraśurāma in wielding the bow). The introductory verses[946] to the Samayoddyota in the Viśrām-bāg collection and the Ulwar ms. refer to Delhi-deśa and its king named Mahīpāladeva. Then verse 9 speaks of Dāmodara whose exact relationship with Mahīpāladeva is not clear. Dāmodara is said to have made the *yavanas* of *Mulasthāna* (modern Multan in the Punjab) give up the slaughtering of cows. The whole pedigree is given below.[947] Śaktisiṁha is said to have eclipsed even Bhoja.

It is further said that Madanasiṁha called[948] together four learned men, viz., Ratnākara, Gopīnātha, Viśvanātha and Gaṅgādharabhaṭṭa and entrusted the composition of the digest to them. The colophons[949] at the end of the Śāntyuddyota in the Deccan College says that it was composed by Viśvanātha, a resident of Benares and son of Bhaṭṭapūjya, a Śrīmālī Gurjara (Brāhmaṇa). There is a similar colophon at the end of the Prāyaścittoddyota noticed by M. M. Haraprasad Sastri.

Since the Madanaratna mentions the Mit., the Kalpataru and Hemādri, it must be certainly later than about 1300 A. D. It is quoted as a great authority by the writers of the 16th and 17th centuries, such as Nārāyaṇabhaṭṭa, Kamalākarabhaṭṭa, Nīlakaṇṭha and Mitramiśra. In the Vyavahāra-mayūkha Nīlakaṇṭha relies upon the Madanaratna as often as (if not oftener than) the Mitākṣarā. The Vīramitrodaya[950] says that the author of the Madanaratna refers to the views of the Mitākṣarā, Kalpataru, and Halāyudha. From this it follows that the Madanaratna was composed at some time between 1350-1500. Madanasiṁha and his ancestors are spoken of as ruling the country about Delhi. Though Madanasiṁha bears the high-sounding title of mahārājādhirāja it is highly probable that he was some feudatory chief under the Mahomedan rulers of Delhi. It is difficult to conceive of a period between 1300 and 1500 A. D. when a Hindu ruler was king of Delhi. It may be that during the troublous times of Muhammad Tughlak (1325-1351 A. D.), when the capital was transferred from Delhi to Doulatabad, or during the weak rule of the last kings of the Tughlak dynasty (1388-1413 A. D.) Madanasiṁhas' predecessors might

have usurped some territory about Delhi and ruled over it. At all events it would not be far from correct if the Madanaratna be placed about 1425-1450 A. D. Dr. Jolly (R. u. S. p. 37) says that the Madanaratna names the Ratnākara and the Mādhavīya. M. M. Haraprasad Sastri (Report on palm-leaf and paper mss. from Nepal, Intro. pp. 31-32) tells us that the dynasty to which Madanasiṁhadeva belonged ruled over Gorakhpur-Champaran (Western Tirhut), that Madanasiṁhadeva was preceded by Śaktisiṁhadeva, whose predecessor was Pṛthvīsiṁhadeva. The learned Sastri further says that a ms. of the Madanaratnapradīpa-prāyaścittoddyota applies the title 'kodaṇḍaparaśurāma' to Madana (p. 223), that a ms. of the Amarakośa was copied in saṁvat 1511 (1454-55 A. D.) when Madanasiṁha ruled over Campakāraṇyanagara (p. 51 of the body of the Report) and that a ms. of the Narasiṁhapurāṇa was copied in La-saṁ 339 (1457-58 A. D.) when mahārājādhirāja Madanasiṁhadeva ruled over Gorakṣapura i. e. modern Gorakhpur (p. 29 of the Report). The great similarity of the names Madanapāla and Madanasiṁha misled J. C. Ghose (Hindu Law, vol. II, p. XIV, ed. of 1917) into holding that the Madanapārijāta and the Madanaratna were written under Madanapāla. But it is clear from the ancestry of the two kings, Madanapāla and Madanasiṁha, and the names of the real authors of the digests (Madanapārijāta and Madanaratna) that they have no connection with each other.

95. Śūlapāṇi

Next to Jīmūtavāhana, Śūlapāṇi is the most authoritative Bengal writer on dharmaśāstra. Rai Bahadur M. M. Chakravarti gave a very interesting account of his works and time in JASB for 1915, pp. 336-343.

The earliest work of Śūlapāṇi appears to have been his Dīpakalikā, a commentary on the smṛti of Yājñavalkya. It is a very brief commentary. The portion on the dāyabhāga section (Yājñavalkya II, verses 114-149) is contained in five printed pages (vide Ghose's Hindu Law, edition of 1917, vol. II. pp. 550-554). In this commentary, besides the sages he names only a few writers and works on dharma, e. g. the Kalpataru, Govindarāja, the Mitākṣarā, Medhātithi and Viśvarūpa.. He entertained somewhat archaic views on matters of inheritance. For example, he holds that the text speaking of the right of the parents to succeed before the brothers of the

deceased has reference to property acquired by the deceased from his father or grand-father. He explained the word 'apratiṣṭhitā' in the sūtra of Gautama 'strīdhanaṁ duhitṛṇām-aprattānām-apratiṣṭhitānāṁ ca' in the same way as Aparārka, Jīmūtavāhana and the Smṛticandrikā.[951] He says that a full brother though not re-united succeeded before a half-brother though re-united.[952] This explanation of the much canvassed verse of Yāj. offered by Śūlapāṇi is refered to by the Vīramitrodaya.[953] The Vyavahāratattva of Raghunandana several times refers to Śūlapāṇi's explanations of Yāj.[954]

Śūlapāṇi wrote several small treatises on topics of dharmaśāstra and intended them to form part of a huge digest called Smṛtiviveka. Fourteen such works are known to have been so written with titles ending in the word 'viveka,' viz. Ekādaśī-viveka, Tithi-viveka, Dattaka-viveka, Durgotsavaprayoga-viveka, Durgotsava-viveka, Dolayātrā-viveka, Pratiṣṭhā-viveka, Prāyaścitta-viveka, Rāsayātrā-viveka, Vratakāla-viveka, Śuddhi-viveka, Śrāddha-viveka, Saṁkrānti-viveka, Saṁbandha-viveka (on marriage). Of these the Durgotsavaviveka seems to have been amongst his latest works, since he names therein five of his *vivekas* on durgotsava-prayoga, pratiṣṭhā, prāyaścitta, śuddhi and śrāddha. The Śrāddha-viveka is the most famous of his works and has been printed. His Prāyaścittaviveka and Durgotsava-viveka have also been published, the former by Jivananda (1893) and the latter by the Sanskrit Sāhitya Pariṣad at Calcutta in Bengali characters. In the Durgotsava-viveka he deals with the worship of Durgā in Āśvina and also in spring (hence the deity is called Vāsantī). In the Durgotsava-viveka, besides such purāṇas as the Kālikā, Bhaviṣyottara, Bhāgavata, Devī, he names a host of writers and works as noted below.[955] In spite of Aufrecht's view

the Saṁvatsara-pradīpa is not his own work. A Sārasamuccaya is also mentioned in Hemādri (Dāna-khaṇḍa page 135). The Smṛtisāgara is probably the same as the Govindārṇava of Śeṣa Nṛsiṁha or the work of the same name which Kullūka appears to have composed. Śrīkaramiśra is probably the ancient author referred to even by the Mitākṣarā.

The Śrāddha-viveka has several commentaries by eminent writers such as Śrīnātha Ācāryacūḍāmaṇi and Govindānanda. So there are commentaries on the Prāyaścittaviveka. Besides the above, the works and authors mentioned in the other vivekas are noted below.[956] The Śrāddha-viveka of Śūlapāṇi is referred to (as Gauḍīya-śrāddha-vivcka) by Rudradhara,[957] by Vācaspati in his Śrāddha-cintāmaṇi, by Govindānanda in his Śrāddhakriyākaumudī and by Raghunandana in several of his *tattvas*.

We know very little about the personal history of Śūlapāṇi. In the colophons of his works[958] he is styled Sāhuḍiyāla (or -na) Mahāmahopādhyāya and Raghunandana also calls him Mahāmahopādhyāya. The Sāhuḍiyāla was a degraded section of the Rāḍhīya Brāhmaṇas in Bengal from the days of Ballālasena. As Rudradhara calls him Gauḍīya, it follows that Śūlapāṇi was a Bengal Brāhmaṇa. There is a tradition that he was the Judge of king Lakṣamaṇasena of Bengal. But this is impossible as the following discussion about his date will show.

There is some uncertainty about the exact age of Śūlapāṇi. As Śūlapāṇi names the Ratnākara of Caṇḍeśvara and the Kālamādhavīya, he must be later than about 1375 A. D., since some time must have elapsed before a work from Vijayanagar came to be regarded as an authority in Bengal. As Śūlapāṇi's works are mentioned by Rudradhara, Govindānanda and Vācaspati, the former must be earlier than about 1460. In this connection it has to be noted that Govindānanda not only comments upon Śūlapāṇi's

works but probably looks upon Śūlapāṇi as an old writer along with Aniruddha.[959]

A ms. of the Prāyaścittaviveka was copied at Benares in *śake* 1410 (i. e. 1488 A. D.).[960] From all these data it follows that Śūlapāṇi flourished between 1375 and 1460 A. D.

From the Śuddhittatva it appears that Śūlapāṇi wrote Pariśiṣṭa-dīpakalikā (probably a commentary on a Gṛhyapariśiṣṭa)[961].

96. Rudradhara

This is a well-known Maithila writer on Dharmaśāstra, who composed several works. His Śuddhi-viveka has been published several times (at Benares in 1866, in 1878 and by the Veṅkaṭeśvara Press in Bombay, *saṁvat* 1978). That work is divided into three *paricchedas* and deals with purification from impurity on birth and death, the persons liable to undergo purifications, the meaning of the word *putra*, purification of the body and of various substances when polluted, purification of cooked food and water and women in their menses. He tells us that after[962] having examined seven works (*nibandhas*) on śuddhi and being encouraged by his father and brother he composed the Śuddhiviveka. He further says that he made the effort for the benefit of those who were not disposed to go through such works as the Ratnākara, Pārijāta, Mitākṣarā and the Hāralatā.[963] Besides these he mentions the Ācārādarśa, Śuddhi-pradīpa, Śuddhi-bimba, Śrīdattopādhyāya, Smṛtisāra and Harihara.

The Śrāddhaviveka of Rudradhara is the most famous of his works. It was printed at Benares in *saṁvat* 1920. The work is

divided into four *paricchedas*. He first defines śrāddha, and then treats of several topics, viz. the varieties of śrāddha, the procedure at śrāddhas, the *mantras* that are recited, the proper time and place for śrāddhas, the Brāhmaṇas worthy to be invited at śrāddha and the proper food etc. Among the numerous works and authors referred to in the work the undermentioned ones deserve notice.[964] He refers to his own Śuddhiviveka as already written.

In several places he tells us that he follows a different tradition on certain matters from that of the Pitṛbhakti or of the Sugatisopāna. He points out that the *prasātikā* is a kind of grain known in Madhyadeśa as Śāṭhīlā.[965]

For his Vratapaddhati, *vide* Mitra's Notices, vol. VI, p. 15, No. 1995. He says that he was urged by his brother's advice to write the work and that he follows the Samayapradīpa.[966]

Another work of his is the Varṣakṛtya which deals with festivals and fasts.

He was the son of Mahāmahopādhyāya Lakṣmīdhara and youngest brother of Haladhara. His works are quoted by Vācaspati in his Dvaitanirṇaya, by Govindānanda in the Śrāddhakriyākaumudī, by Raghunandana in several of his *tattvas*, by Kamalākara and Nīlakaṇṭha.

As Rudradhara mentions the Ratnākara, the Smṛtisāra, Śridattopādhyāya and the Śrāddhaviveka of Śūlapāṇi, he is certainly later than 1425 A. D. A ms. of his Vratapaddhati is dated in Lakṣmaṇa *saṁvat* 344 i. e. 1463 A. D.[967] Besides he is quoted by Vācaspati and Govindānanda. Therefore he must have flourished between 1425 and 1460 A. D.

The Rudradhara who was a pupil of Caṇḍeśvara and author of the Kṛtyacandrikā, the Vivādacandrikā and the Śrāddhacandrikā appears to be a different author.

97. Misarumisra

Misarumiśra is famous for his works called Vivādacandra and Padārtha-candrikā (on the Nyāya-Vaiśeṣika system). There is a ms. of the Vivādacandra in the Deccan College (No. 57 of 1883-84). That work deals with the titles of Law (vyavahārapadas) such as ṛṇādāna (recovery of debt), nyāsa (deposit), asvāmivikraya, saṁbhūya-samutthāna (partnership), dāyavibhāga, strīdhana; and then with procedure, viz. the plaint, reply, pramāṇas, witnesses, possession etc. It frequently quotes the Ratnākara (on vivāda and vyavahāra) of Caṇḍeśvara and several times criticizes him. Besides numerous smṛti writers the other authors and works named are : Pārijāta, Prakāśa, Bālarūpa (often), Bhavadeva and Smṛtisāra (frequently).

In the mss. and colophons the name of the author seems to be Misarūmiśra.[968] He tells us that he wrote the work under the orders of princess Lachimādevī, wife of prince Candrasiṁha who appears to have been the younger brother of Bhairavasiṁhadeva of the Kāmeśvara dynasty of Mithilā. The work was probably called Vivādacandra to connect it with the prince Candrasiṁha. The Vivādacandra first[969] speaks of king Bhaveśa of the Kāmeśvara dynasty, then of his son Harasiṁhadeva, then of his son Darpanārāyaṇa and the latter's queen Hīrā or Dhīra and then of Candrasiṁha and his queen Lakhimā or Lachimā. We saw above that Caṇḍeśvara who had weighed himself against gold in 1314 A. D. wrote in his old age

under Bhaveśa his work on Rājanīti. Lachimādevī was queen of the great-grandson of this Bhaveśa, who became king of Tirhut in the third quarter of the 14th century. Therefore Candrasiṁha must have flourished about the middle of the 15th century and Misarumiśra's work must be assigned to that period. M. M. Chakravarti points out (JASB for 1915, p. 425) that for Dhīrasiṁha, a son of Darpanārāyaṇa, there is an authentic date, viz. 321 of the Lakṣmaṇasena era in Tirhut (i. e. 1438 A. D.), when a ms. of Śrīnivāsa's Setudarpaṇī (com. on Setubandha) was copied during Dhīrasiṁha's reign.

That the Vivādacandra is a work of authority on Hindu Law in Mithilā has been recognised from very early days in the British courts.[970] The Vivādacandra held that the word strīdhana was to be applied to such woman's property as was technically so called (by the sages) and not to all property that comes to a woman.[971]

98. Vācaspatimiśra

Vācaspatimiśra is the foremost *nibandha* writer of Mithilā. His Vivādacintāmaṇi has been recognised by the High Courts in India and by the Judicial Committee of the Privy Council as a work of paramount authority on matters of Hindu Law in Mithilā.[972] Vācaspati was an extremely voluminous writer and appears to have composed dozens of works. In the Śrāddhakalpa *alias* Pitṛbhaktitaraṅgiṇī, almost his latest work, he says that he wrote in his youth ten works on śāstra and thirty *nibandhas* on smṛti and composed the work in question in his declining years.[973] At least eleven works of his bearing the title 'cintāmaṇi' are known. They are briefly noticed below.

The Ācāracintāmaṇi deals with the daily rites of Vājasaneyins.[974] The Āhnikacintāmaṇi is quoted in his Śuddhicintāmaṇi. The

Kṛtyacintāmaṇi was published in Bengali characters at Benares in *śake* 1814 (vide JASB. for 1915, p. 395) and deals with the festivals that are celebrated on different days in the year. The Tīrthacintāmaṇi has been published in the B. I. series. It is divided into five *prakāśas*, viz. Prayāga, Puruṣottama (Purī), Gaṅgā, Gayā and Vārāṇasī and deals with such topics as the purpose of pilgrimages, the preliminaries of pilgrimage, the various rites to be performed at the several *tīrthas*, the subsidiary sacred places at the principal *tīrthas* etc. He mentions the Kalpataru, Gaṇeśvara-miśra, Jayaśarmā, the Mitākṣarā, Smṛtisamuccaya and Hemādri. In the introduction he explicitly states that he composed the work after carefully examining the Kṛtyakalpadruma and Pārijāta, the Ratnākara and other works.[975] The Dvaitacintāmaṇi is mentioned in his Kṛtyacintāmaṇi. The Nīticintāmaṇi is mentioned in the Vivādacintāmaṇi (p. 72). The Vivādacintāmaṇi (text) was published at Calcutta in 1837 (which edition is used in this work) and was translated into English by Prasannakumar Tagore (in 1863) with a learned preface. It explicitly states that the author carefully studied the Kṛtyakalpadruma, Pārijāta and Ratnākara.[976] The work deals exhaustively with the eighteen titles of law (*vyavahārapadas*). The principal authors and works, besides the usual smṛtis and purāṇas, mentioned in the work are noted below.[977] In this work he mentions several vernacular equivalents for Sanskrit terms. The Vyavahāracintāmaṇi[978] deals with judicial procedure, viz. the four principal topics thereof, viz. *bhāṣā* (the plaint), *uttara* (reply of defendant), kriyā (evidence),

nirṇaya (decision). The Śuddhicintāmaṇi was printed at Benares in Bengali characters in *śake* 1814 (JASB for 1915, p. 396 *n* 2). The Śūdrācāracintāmaṇi deals with the duties of śūdras (Mitra's Notices, vol. VI, p. 22, No. 2001). The Śrāddhacintāmaṇi is a standard work and was printed at Benares in Bengali characters in *śake* 1814.

Besides the works and authors enumerated in the foot-note above, the others mentioned by him in his several Cintāmaṇis are noted below.[979]

Besides these there is a group of Vācaspati's works with the title 'nirṇaya'. The Tithinirṇaya[980] starts with an invocation of the highest Being (*paramātman*) while most of his works are begun with an obeisance to Hari or Kṛṣṇa. It first divides *tithis* into śuddhā and viddhā (commingled with another tithi) and then discusses all the *tithis* from the first to the fifteenth and also *amāvāsyā*; it deals with the questions as to the rites of that *tithi* which is *kṣaya*, with śivarātrivrata, naktavrata, holidays, fasts, jayantīvrata, holikā festival etc. The Dvaitanirṇaya,[981] as its name implies, is concern-

ed with the settlement of some doubtful points of Dharmaśāstra such as the names to be given to brāhmaṇas and the other *varṇas*, doubts on gifts and consecration of tanks and wells, doubts about daily bath, *saṁdhyā*, *devapūjā*, *vaiśvadeva*, daily offerings to manes, about judicial proceedings and the taking of interest, about various *vratas* like ekādaśī and janmāṣṭamī, about intercalary months, about the proper time for marriage and *upanayana*. The Mahādānanirṇaya[982] expatiates on the sixteen munificent gifts such as weighing against gold and silver. In the introductory verses Vācaspati gives the genealogy of his patron's family from Bhaveśa, whose son was Harasiṁhadeva, whose son was Narasiṁha, whose son Bhairavendra bore the *biruda* (appellation) Hari-nārāyaṇa. A verse[983] at the beginning and one at the end attribute the work to Bhairavendra and to Rūpanārāyaṇa respectively. Rūpa-nārāyaṇa was the *biruda* of Rāmabhadra, a son of Bhairavendra. Therefore it looks probable that the work was commenced in the reign of Bhairava and was completed in the reign of his son Rāmabhadra. M. M. Chakravarti says that Bhairava himself bore at one time the *biruda Rūpanārāyaṇa*. M. M. Haraprasad Sāstri (Nepal cat. p. 90) mentions a Vivādanirṇaya of Vācaspati. The Śuddhinirṇaya of Vācaspati deals with impurity on birth and death, the religious acts that must be performed even in times of impurity, *sapiṇḍa* relationship, periods of impurity for the principal varṇas and mixed castes; periods of impurity on abortion, the deaths of infants and women, accidental deaths etc., over-lapping of several periods of *aśauca*; impurity arising from carrying a corpse ; rites after the death of a *saṁnyāsin* ; impurity from contact of lower castes, such as washermen and cāṇḍālās, freedom from impurity at tīrthas and marriages etc.

Besides these, Vācaspati appears to have either composed or contemplated writing seven works called Mahārṇava on kṛtya, ācāra, vivāda, vyavahāra, dāna, śuddhi and pitṛyajña. Of these the Kṛtya-mahārṇava is found and deals with festivals and fasts and the proper times therefor (vide JASB for 1915, p. 398). He also wrote the Gayāśrāddhapaddhati, the Candana-dhenupramāṇa and the Dattaka-vidhi. Probably his last work, as stated above, was the Śrāddhakalpa *alias* Pitṛbhaktitaraṅgiṇī.

Apart from the works on dharmaśāstra, Vācaspati wrote also on the systems of philosophy. But it is not necessary for our purpose to go into that question.

Most of his works styled ' cintāmaṇi 'are mentioned by Raghunandana in the *tattvas* (e. g. Kṛtyacintāmaṇi in Ekādaśītattva, Vivāda- and Vyavahāra-cintāmaṇi in Dāyatattva). The Śuddhicintāmaṇi is quoted in the Śuddhitattvārṇava of Śrīnātha-ācārya-cūḍāmaṇi, the Śrāddha-cintāmaṇi is quoted in the Śrādhha-kriyā-kaumudī (pp.265, 475) and in the Śuddhikaumudī (pp. 89, 93) of Govindānanda, the Vivāda-cintāmaṇi is quoted in the Vīramitrodaya (p. 697) and the Vyavahāracintāmaṇi is criticized in the same work (p. 288). His Pitṛbhakti-taraṅgiṇī is mentioned in the Śuddhitattva and Śrāddhatattva. Vācaspati vouchsafes very little information about himself or his family. In the colophons of his works he is generally styled mahāmahopādhyāya and *miśra* or *sanmiśra*. In the colophon of the Śūdrācāra-cintāmaṇi[984] he is described as the *pariṣad* (the adviser of the king in finally deciding difficult points of Dharmaśāstra) of *Mahārājādhirāja* Hari-nārāyaṇa. We saw above that his Mahādānanirṇaya connects itself with two kings Bhairava and his son Rūpanārāyaṇa. At the end of the Śrāddhakalpa we are told that Vācaspati who was the *pariṣad* of Rāmabhadradeva *alias* Rūpanārāyaṇa, son of Hari-

nārāyaṇa, composed the work at the bidding of his patron.[985] Vardhamāna in his Daṇḍaviveka says that one of his *gurus* was Vācaspati.[896] It is probable that it is this Vācaspati that is meant. But as against this we must remember that Vācaspati in his Śrāddhakalpa quotes Vardhamāna Upādhyāya on śrāddha. Vardhamāna wrote his Daṇḍaviveka while king Bhairava was reigning and his Gaṅgākṛtyaviveka for Rāmabhadradeva. So Vācaspati was an elder contemporary of Vardhamāna.

Prasannakumar Tagore assigned 1423 A. D. as the time of the Vivādacintāmaṇi (vide preface p. xxviii). Ghose in his Hindu Law (vol. II p. xiv) says that Vācaspati wrote the Śrāddhacintāmaṇi by order of queen Jayā, widow of king Bhairavadeva and

mother of Puruṣottamadeva,[987] that Harināràyaṇa (i. e. Bhairava) ruled from 1513 to 1527 and that the latter was killed by Nasrat-shah, the Pathan king of Bengal. M. M. Chakravarti holds that the literary activity of Vācaspati lay between 1450 to 1480 A. D. Since Vācaspati mentions the Ratnākara (of Caṇḍeśvara) and Rudradhara as his authorities he must be later than about 1425 A. D. Vācaspati's works are quoted by Govindānanda and Raghunandana. Therefore Vācaspati is certainly earlier than 1540 A. D. The ms. of the Mahādānanirṇaya found in Nepal is dated in 392 of the Lakṣmaṇasena era (Monday of Vaiśākha, dark half, 12th *tithi* i. e. 22nd April 1511 A.D.) The ms. of the Śuddhinirṇaya (Mitra's Notices vol. X, p. 58, No. 3308) was copied in *saṁvat* 1416, which must in this particular case be taken as equivalent to *śake* 1416 i. e. 1494-95 A. D.., since Vācaspati could not have flourished about 1360 A. D. (which corresponds to Vikrama *saṁvat* 1416). Hence the period assigned by Chakravarti for the literary activity of Vācaspati appears to be correct. That date is further corroborated by the fact that Vācaspati wrote under Bhairavendra and his son Rāmabhadradeva, that were 4th and 5th in descent from king Bhaveśa of Mithilā, who as we saw above began to rule over Mithilā in the third quarter of the 14th century.

This Vācaspati who flourished in Mithilā in the latter half of the fifteenth century is very often confounded with other authors bearing the same name. The great philosopher Vācaspati who was author of the Bhāmatī on the Śārīrakabhāṣya of Śaṅkara and of several other commentaries on other systems of philosophy flourished in the first half of the 9th century as he wrote his Nyāyasūcinibandha in 898 (most probably of the Vikrama era).[988] There was another (Candraśekhara) Vācaspati who wrote the Smṛtisārasaṁgraha (cat. of Calcutta San. College mss. vol. II, p. 181, No. 203) and flourished in the first half of the 18th century.

99. Nṛsiṁhaprasāda

This is an encyclopaedic work on dharmaśāstra, no part of which has been yet printed. The Benares Sanskrit College has a complete ms. of this vast work. I could examine the whole of it. Besides, the Deccan College collection has two mss. of portions of it, viz. of the Dānasāra (No. 353 of 1875-76) and of the Tīrthasāra (No. 352 of 1875-76). The Dānasāra and Śāntisāra are also noticed in Mitra's cat. of Bikaner mss. (pp. 429-430) and six sections out of twelve are noticed in the I. O. cat. p. 434 No. 1467. Unless otherwise stated the references here are to the Benares Sanskrit College ms.

The Nṛsiṁhaprasāda is divided into twelve[989] sections called '*sāra*' on saṁskāra, āhnika, śrāddha, kāla, vyavahāra, prāyaścitta, karmavipāka, vrata, dāna, śānti (the averting of evil foreboded by natural portents and other strange occurrences), tīrtha and pratiṣṭhā (consecration of temples, idols etc.). Each section[990] begins with an invocation of Nṛsiṁha(the man-lion incarnation of Viṣṇu) after whom the work is named Nṛsiṁhaprasāda (the fruit of the grace of Nṛsiṁha). In the Saṁskārasāra, after invoking Nṛsiṁha, the introduction tells us that[991] when king Rāma ruled in Devagiri (modern Daulatabad), Śāmavit was ruler of Delhi and that after the latter Nijāmasāha wielded power over the world. Then after pronouncing an eulogy on Nijāmasāha (verses 10-13) the author

990 e. g. verse 8 of the संस्कारसार. The first verse of आह्निकसार is प्रणम्य श्रीनृसिंहेन (हं तु ?) दलाधीशेन भूभुजा। श्रीनृसिंहप्रसादेन दिनानुष्ठेयमुच्यते॥; the श्राद्धसार begins 'श्रीनृसिंहं नमस्कृत्य दलाधीशमहीपतिः। श्राद्धसारं प्रकुरुते सर्ववैदिकतुष्टये॥'

speaks of himself. We[992] are told that the author was Dalapati (or Dalādhīśa), son of Vallabha, of the Bhāradvāja-gotra and of the Yājñavalkīya śākhā (i. e. Śuklayajurveda) and that he was the keeper of the imperial records of Nebajana (?). There are elaborate colophons[993] at the end of almost each section (called sāra) in which we are told that Dalapati was the pupil of Sūryapaṇḍita, that he was a great exponent of the Vaiṣṇavadharma, that he was the chief minister and keeper of the records of Nijāmasāha, who was the overlord of all Yavanas (Mahomedans) and ruler of Devagiri. In some colophons he is styled Mahārājādhirāja. It is doubtful whether Dalapati or Dalādhīśa was the real name of the author or was merely a title. It is not unlikely that Sūryapaṇḍita said to be the *guru* of the author is the same as Sūrya, the father of the great Maratha saint Ekanātha, who wrote his Bhāgavata at Benares in *śake* 1495 (i. e. 1573 A. D.) and who states that he was born in a family of devout Vaiṣṇavas.

The Nṛsiṁhaprasāda names numerous authors and works. In the beginning of the Saṁskārasāra, he mentions a host of writers and works that he consulted.[994] Besides these he mentions Some-

The third line is metrically faulty in the 6th syllable. This verse occurs in each सार at the end with variations. In the D.C, ms. śvara (commentator of the Tantravārtika) and Kāladīpa in the Saṁskārasāra ; the Purāṇasāra in the Āhnikasāra; Pārijāta and Vādibhayaṅkara in the Vyavahārasāra ; Kāmika, Jñānaratnāvali, Balārkodaya in the Dānasāra.

The contents of some of the sections of the Nṛsiṁhaprasāda may be set out here. In the Saṁskārasāra the author treats of the meaning of *dharma*, śruti, smṛti, the authoritativeness of purāṇas, kalivarjya (usages prohibited in the kali age), puṇyāhavācana, madhuparka, vṛddhiśrāddha, garbhādhāna, puṁsavana, jātakarma, nāmakaraṇa, upanayana, marriage and other *saṁskāras*, the duties of brahmacārins, snātakas, householders, vānaprasthas and saṁnyāsins. In the Āhnikasāra the author after dividing the day into eight parts speaks of the actions appropriate to each viz : in the first getting up from bed at the brāhma-muhūrta, śauca, brushing the teeth, decoration of the hair, bath etc; in the second study ; in the third, looking after dependents and pursuit of one's livelihood ; in the fourth midday bath, brahmayajña, tarpaṇa, vaiśvadeva, daily śrāddha ; in the fifth dinner and foods prescribed and forbidden ; in the sixth and seventh reflecting over itihāsa and purāṇa ; in the 8th decision about worldly affairs, evening saṁdhya etc. In the Kālasāra (which is incomplete in the Benares ms.) he defines the nature of *kāla* and gives rules and decisions about months, *tithis* and such festivals as Navarātra, Janmāṣṭamī etc. In the Vyavahārasāra the author deals with the meaning of vyavahāra, the eighteen titles of law, the four-fold method of deciding dharma, the pramāṇas (means of proof), dāyavibhāga etc. In the Vratasāra he speaks of the several principal *vratas* in each month, some of which are for both men and women, some for men only and some for women only. In the Dānasāra he dilates upon the nature of dāna, its varieties, the various results of dānas, the proper time and place for dānas, proper recipients of dāna, what things can be the subjects of gifts, units of gold, silver etc., the description of kuṇḍa, maṇḍapa and vedī, the sixteen great dānas such as tulā, hiraṇyagarbha, brahmāṇḍa, kalpapādapa etc. and three *atidānas*, viz. land, cows and learning ; gifts of images, food, ornaments, bed-stead etc. ; gifts on saṁkrānti and eclipses etc. The Tīrthasāra is interesting for this that as the author hailed from Devagiri he speaks principally of *tīrthas* of the Deccan and Southern India. In this work he speaks

of Setubandha, Puṇḍarīka[995] or Pauṇḍarīka (modern Pandharpur in the Sholapur District, it seems), Gayātīrtha, eulogies of Godāvarī, Kṛṣṇā-Veṇyā, Narmadā, Malaprahāriṇī etc.

The Nṛsiṁhaprasāda being a work from the Deccan held the view that marriage with a maternal uncle's daughter was sanctioned by the Veda and was not to be censured.[996] It says that where there is (irreconcileable) conflict between the smṛtis and purāṇas there is an option.[997]

As the Nṛsiṁhaprasāda relies upon the Mādhavīya and the Madanapārijāta, it is certainly later than 1400 A. D. As it is mentioned as an authority in the Dvaitanirṇaya of Śaṅkarabhaṭṭa and in the Mayūkhas of Nīlakaṇṭha it must be earlier than about 1575 A. D. If by the Dīpikāvivaraṇa which it enumerates among its principal authorities is meant the com. of Nṛsiṁha, son of Rāmacandrācārya, on his father's commentary of the Kālanirṇaya (which is most probable), then the Nṛsiṁhaprasāda must be later than about 1500 A. D. Dr. Bhandarkar[998] says that Rāmacandrācārya lived about 1450 A. D. A ms. of the Dīpikāvivaraṇa was copied in *saṁvat* 1604 (1548 A. D.).[999] The Benares Sanskrit College ms. appears to have been copied for Rāmapaṇḍita Dharmādhikarī at Benares, who is said to have been the father of Nandapaṇḍita[1000] (see sec. 105 below). At the end of several *saras* either *saṁvat* 1568 (1511-12 A. D.) or 1569 occurs as the date.[1001] This may be said to be the

1001 At the end of the colophon of the आह्निकसार we have the date 'संवत् १५६८ समये आश्विनवदि ११ शुक्रवारे' and on the back of that part of the ms. the date 'संवत् १५६९ वैशाखवदि ७ शुक्रे' i. e. 7th May 1512 A. D. At the end of the कर्मविपाकसार we have 'संवत् १५६९ समये कासीपुरी-श्रीविश्वेश्वरचरणसंनिधाने'. At the end of the तीर्थसार we have 'संवत् १५६८ समये वैशाखसुदि द्वितीया रवौ'.

date of the actual composition of the work or of the copying of the ms. for Rāmapaṇḍita. It seems difficult to believe that Rāmapaṇḍita for whom the ms. was copied in 1511-12 A. D. was the father of the famous Nandapaṇḍita. We know that Nandapaṇḍita composed his Vaijayantī in 1623 A. D. Rāmapaṇḍita must have been a man of middle age before he could order the copying of a huge ms. like the Nṛsiṁhaprasāda. If he did this in 1511-12 A. D. his son could hardly have been alive 120 years later. Therefore it looks probable that the dates (*saṁvat* 1568 and 1569) are not the dates when the ms. was copied for Rāmapaṇḍita, but rather the dates of the composition of the original work or of the copying of the ms. from which Rāmapaṇḍita got his own ms. copied. At all events it is clear that the Nṛsiṁhaprasāda could not have been composed later than 1512 A. D. As the author was a minister of Nijāmasāha who ruled over Devagiri, it appears that he is referring to Ahmad Nizam Shah who ruled from 1490-1508 A. D. or to his son Burhan Nizam Shah (1508-1533 A. D.), most probably the former.[1002] It may be taken as certain that the work was composed between 1490 and 1512 A. D.

100. Pratāparudradeva

The Sarasvatīvilāsa was compiled by Pratāparudradeva, a king of the Gajapati dynasty who ruled at *Cuttack* (Kaṭakanagarī) in Orissa. The Dāyabhāga portion of this work was published with an English translation by Rev. Thomas Foulkes in 1881. An edition of the whole of the vyavahāra section of the Sarasvatīvilāsa has recently been published in the Mysore Government publication Series. Through the kindness of the Editor, Dr. Shamasastri, I was able to secure the printed sheets of 352 pages before publication. In the following reference is made to the paragraphs of Foulkes' edition and the pages of the Mysore edition.

After invoking deities the work starts with the *praśasti* of the king and his family (pp. 2-11). Descent is traced to the Sun himself through Daśaratha, Rāma and his sons. Kapilendra was the founder of the Gajapati family whose son was Puruṣottama. His queen was Rupāmbikā. Pratāparudradeva or Vīra-Rudra-deva

1002 Vide Lane-Poole's 'Muhammadan dynasties' (ed. of 1925) p. 320 for the names and dates of the Nizam Shahs.

was the son of Puruṣottama. He is spoken of as having given protection to Sultan (Suratrāṇa) Husanshah who threw himself on his mercy.[1003] In the colophons[1004] the king is styled Gajapati, Gauḍeśvara (king of Gauḍa), lord of Kalubariga (modern Gulbarga) in the Karṇāṭaka country of nine crores (probably of revenue) and as the protector of Sultan Husanshah of Jamunāpura. It is significant that the same titles are applied to Puruṣottama[1005] in his Poṭavaram grant of *śake* 1412 (1490 A. D.) and in other inscriptions. Pratāparudradeva, while ruling his capital[1006] Kaṭaka-nagarī, called together an assembly of *Pandits* and compiled an extensive digest of civil and religious law. The royal author feels qualms of conscience on the question of eulogising himself and his family but stifles them easily by saying that a poet can also be an appreciative critic of his own productions.[1007] He boasts that he composed the work for saving scholars the trouble of bringing harmony among the conflicting dicta of Vijñānayogī, Aparārka, Bhāruci and others, that there was no work that could equal his own and that his literary effort would make his predecessors' works afford illustrations of the maxim that when a certain purpose is served by one the existence of others is superfluous.[1008] Then it

is said that the vyavahārakāṇḍa was first taken in hand even before the ācārakāṇḍa following the special desire of the king Vīrarudra Gajapati.[1009] But it appears from references in the vyavahārakāṇḍa itself that before that part was finished the ācārakāṇḍa had been completed.[1010] The Sarasvatīvilāsa, being a work composed under the express orders of a king for the benefit of his subjects, makes the nearest approach to the Austinian conception of law as a command addressed by political superiors to political inferiors and enforced by a sanction.

The principal topics dealt with in the Vyavahārakāṇḍa are : the hall of justice, the method of judicial procedure, the plaint, the reply, documents, possession, ṛṇādāna, dāyavibhāga, sāhasa and other titles of law. In the beginning of the work he sets out at great length the views of ancient writers on politics about the constitution of the *maṇḍala*, such as those of Parāśara, Uśanas, Viṣṇu, Bṛhaspati, Viśālākṣa, Manu etc. He generally follows the views of Vijñāneśvara on dāyavibhāga, but here and there strongly criticizes him, e. g. he says that Vijñāneśvara gave a very far-fetched interpretation[1011] of Yājñavalkya's verse ' rikthagrāha ṛṇam dāpyaḥ.' The Sarasvatīvilāsa is a work of authority in Southern India on matters of Hindu Law, though inferior to the Mitākṣarā.[1012] It informs us that, though the Smṛticandrikā passed over the ordeals of water and poison on the ground that they had gone out of vogue, in Utkala the ordeal of water alone was resorted to and in Śūrasena (Mathurā) and Magadha (Bihar) the ordeal of poison alone was administered.[1013]

Besides the usual dharmasūtras and other smṛtis, the principal authors and works named in the Sarasvatīvilāsa are noted below.[1014] The Sarasvatīvilāsa presents in the case of the dharmasūtras, particularly of Viṣṇu and Gautama, great variations from the printed texts of these works (vide sec. 10, p. 70 above). The Sarasvatīvilāsa in scores of places gives the conflicting views of Bhāruci and the Mitākṣarā (for which see under Bhāruci, sec. 61). The Sarasvatīvilāsa also contains valuable information about the views of such authors as Asahāya, Bhavadeva and Śrīkara whose works have not yet come to light.

Burnell (introduction to Vaṁśa Brāhmaṇa p. vii) took Pratāparudradeva to be the king of that name who belonged to the Kākatīya-Gaṇapati dynasty of Warangal and who was carried captive to Delhi in 1322 A. D. But in this he was wrong. It has been shown above that the king connected with the composition of the Sarasvatīvilāsa belonged to the Gajapati dynasty that ruled at Cuttack and not at Warangal. Pratāparudradeva ruled from 1497 to 1539 A. D. Therefore the Sarasvatīvilāsa must have been composed in the first quarter of the 16th century. Foulkes thinks (Intro. p.xx) that the work was composed about 1515 A. D. His argument is that though the commentary of Mādhavācārya was written about two hundred years before the Sarasvatīvilāsa, the latter is entirely silent about it in his work and that the reason of this is to be sought for in the rivalry of the two dynasties of Pratāparudra and Kṛṣṇarāya of Vijayanagara which was set at rest by a marriage alliance about 1516 A. D. Vide Prof. S. Krishnaswami Aiyangar's 'sources of Vijayanagar History' (p. 116), where we are told that the daughter of the Orissa king married to Kṛṣṇadevarāja was named Jaganmohinī (according to some) or Tukkā (according to others) and Sewell's 'A forgotten empire' p. 320. Another argument advanced by Foulkes for 1515 A. D. as the date of the work is that during the latter part of his reign Pratāparudradeva had come

1014 अपरार्क, असहाय, कर्किभाष्य, कुलार्क, गुरु (प्रभाकर), चन्द्रिका (i. e. स्मृतिचन्द्रिका), देवरात, देवस्वामी, धारेश्वर, निबन्धनकार, प्रदीप, प्रदीपिकाकार, भवदेव, भवनाथ, भारुचि, मिताक्षरा, यज्ञपति, मेधातिथि, राजलासक, लक्ष्मीधर, वरदराज (called आधुनिक as contrasted with भारुचि), विज्ञानेश्वर, वृत्तिकार (on आप० श्रौत), वैखानस-संहिता, शालिकानाथ, श्रीकर, संग्रहकार, सोमशेखर, सोमेश्वर.

under the influence of the great Vaiṣṇavite saint Caitanya, who made Purī his residence during the last years of his life and that the Sarasvatīvilāsa has in the beginning an invocation of Śiva. Caitanya was born in śake 1407 Fālguna Full-moon (i. e. in 1486 A. D.); vide Bhandarkar's 'Vaiṣṇavism and Śaivism' (p. 83) and Caitanya is said to have gone to Purī about 1510 A. D. and died in 1533 A. D. (Beames in Ind. Ant. vol. II, p. 1 ff). Both these arguments are not of much weight. As a matter of fact in some mss. there is an invocation of both Viṣṇu (Hayagrīva) and Śiva; *vide* Descriptive Cat. of Government S. mss. at Madras vol. VI, p. 2426 No. 3221. The latest work of certain date that the Sarasvatīvilāsa names is the Smṛticandrikā and it is rather matter for surprise that no work belonging to the 14th and 15th centuries is quoted or named by the Sarasvatīvilāsa. But this circumstance alone is hardly of any worth in face of the positive statement in the work itself that it was composed by Pratāparudradeva Gajapati. Vide JBORS. vol. V, pp. 147-148 and Ind. Ant. for 1929, pp. 28-33 for information about the Empire of Orissa and its emperors, Kapilendra (who died in 1470 A. D.), Puruṣottamadeva (1470-1497) and Pratāparudra-deva.

There is a ms. of a work called Pratāpamārtaṇḍa or Prauḍha-pratāpamārtaṇḍa (D. C. ms. No. 48 of 1872-73) which is ascribed to Pratāparudra, ruler of Utkala, whose capital was Kaṭaka on the banks of the Citrotpalā. It mentions Kapileśvara Gajapati, his son Puruṣottama, father of Pratāparudra. In the colophon the king is described as 'Gajapati-Gauḍeśvara-navakoṭi-karṇāṭa-kalabarageśvara-rūpa-nārāyaṇa' &c. The work is divided into five Prakāśas on Padārthanirṇaya, Vatsarādinirūpaṇa, Tithinirūpaṇa, Vratanirṇaya (such as Navarātra &c.), Viṣṇubhakti. He expressly mentions as his authorities Hemādri, Kalpataru, Ratnākara, Mitākṣarā, Mādhavīya, Anantabhaṭṭa, Smṛticandrikā, Aparārka, Pārijāta, Kālādarśa, Devadāsa. Here there is an express mention of Mādhava which refutes Foulkes' theory set out above.

101. Govindānanda

Govindānanda wrote several works out of which four have been printed in the Bibliotheca Indica series, viz: the Dānakaumudī, Śuddhikaumudī, Śrāddhakaumudī, Varṣakriyā-kaumudī. The last work deals with *tithinirṇaya*, *vratas* on several *tithis* all the year

round, festivals like Durgotsava, Kojāgara etc. All these works appear to have formed part of a general digest called Kriyākaumudī. Besides these he wrote a commentary called Arthakaumudī on the Śuddhidīpikā of Śrīnivāsa which was printed in Bengali characters, and also a commentary called Tattvārtha-kaumudī on Śūlapāṇi's Prāyaścittaviveka (published by Jivānanda at Calcutta). His works are of great utility on account of the numerous authors and works quoted therein. The following deserve special mention.[1015] He was the son of Gaṇapatibhaṭṭa and was styled Kavikaṅkaṇācārya. From the introductory and final verses of his works it appears that he was a Vaiṣṇava. His father was a resident of Bāgri in the Midnapur District of Bengal.

Since he quotes the Madanapārijāta, the Gaṅgā-vākyāvali, Rudradhara and Vācaspati, he must be later than about 1500 A. D. He is quoted by Raghunandana in his Malamāsatattva and Āhnikatattva. So he cannot be later than 1560 A. D. His Śuddhi-kaumudī examines intercalary months[1016] from *śake* 1414 to *śake* 1457 (i. e. from 1492 A. D. to 1535 A. D). Therefore it appears that he wrote his Śuddhikaumudī immediately after *śake* 1457 (i. e. 1535 A. D.). He wrote the Śrāddha-kaumudī and Varṣa-kriyākaumudī after the Śuddhi-kaumudī. Therefore we shall be very near the truth if his literary activity be placed between 1500 and 1540 A. D.

102. Raghunandana

Raghunandana is the last great writer of Bengal on dharmaśāstra. He compiled an encyclopædic work on the different branches of dharmaśāstra styled Smṛtitattva, divided into 28 sections called *tattvas*. He cites the names of over 300 authors and works in his encyclopaedia, which have been collected together by M. M. Chakravarti (JASB for 1915 pp. 363-375). His wonderful mastery over *smṛti* material and his erudition displayed in the Smṛti-tattva earned for him the appellation *smārtabhaṭṭācārya* or simply '*smārta*' from later writers. For example, the Vīramitrodaya refers to him in that way and so does Nīlakaṇṭha in his Vyavahāramayūkha.[1017] His Smṛtitattva was printed at Serampore in Bengali characters so far back as 1834-35 A. D. and it has also been published by Jivananda (in two volumes). Some *tattvas* have been separately published as e. g. the Vyavahāra-tattva and the Dāyatattva (published at Calcutta in 1828 by the Department of Public Instruction). His Dāyatattva was translated into English by Golapcandra Sarkar. In his Malamāsatattva the names of his *tattvas* are given.[1018] Vide Mitra's Notices, vol. III. p. 50 No. 1081 and I. O. cat. p. 420 No. 1405 for an enumeration of the *tattvas* and for reference to the volumes and pages in the Serampore edition. The *tattvas* are not arranged in the verses quoted below according to their chronological order, but according to the exigencies of the metre. In this work I have used Jivananda's edition.

1017 Vide वीर० p. 697 on गौतम's sūtra 'स्त्रीधनं दुहितृणामप्रजानामपतिष्ठितानां च'; व्यवहारमयूख (text p. 112 of my edition) 'स्मार्तहरिनाथावप्येवमेव'.

1018 मलिम्लुचे तथा द्वाये शुचौ च दशसंस्कृतौ। प्रायश्चित्ते विवाहे च तिथ्यां जन्माष्टमीव्रते॥ दुर्गोत्सवे व्यवहृतावेकादश्यादिनिर्णये। तडागभवनोत्सर्गे वृषोत्सर्गत्रये व्रते॥ प्रतिष्ठायां परीक्षायां ज्योतिषे वास्तुयज्ञके। दीक्षायामाह्निके कृत्ये क्षेत्रे श्रीपुरुषोत्तमे। सामश्राद्धे यजुःश्राद्धे शूद्रकृत्यविचारगे। इत्यष्टाविंशतिस्थाने तत्त्वं वक्ष्यामि यत्नतः॥

The 28 तत्त्वs are on मलिम्लुच (intercalary month), द्वाय, शुद्धि, संस्कार, प्रायश्चित्त, विवाह, तिथि, जन्माष्टमी, दुर्गोत्सव, व्यवहार, एकादशी, तडागभवनोत्सर्ग, वृषोत्सर्ग (3 तत्त्वs on छन्दोगवृषो०, यजुर्वृषो०, and ऋग्वृषो०), व्रत, प्रतिष्ठा (two on देवप्रतिष्ठा and मठप्रतिष्ठा), दिव्य (i. e परीक्षा), ज्योतिष, वास्तुयज्ञ, दीक्षा, आह्निक, कृत्य, पुरुषोत्तमक्षेत्र, सामश्राद्ध, यजुःश्राद्ध, शूद्रकृत्य. In the Serampore edition ऋग्वृषोत्सर्ग is not printed (vide Chakravarti in JASB 1915 p. 363). In Jivananda's edition also the ऋग्वृषोत्सर्ग is not included and the जन्माष्टमीतत्त्व seems to be included under तिथितत्त्व.

It is not feasible to give even brief summaries of Raghunandana's *tattvas*. Their vary names indicate the subject matter. But one of them, the Dāyatattva, deserves special mention. It treats of partition made by father, partition among brothers after their father's death, persons not entitled to a share, property not liable to partition, evidence of separation, *strīdhana* and its devolution, inheritance to one dying sonless etc. His Tithi-tattva contains a description in Sanskrit of the game called *Caturaṅga* played on the full moon of Āśvina by four players.

Besides the 28 *tattvas* Raghunandana is said to have composed several other works. There is a commentary on the Dāyabhāga attributed to him. Colebrooke suspected its genuineness, but the colophon of the commentary[1019] gives the same details about Raghunandana as are found in his admitted works. It is to be noticed that the Dāyatattva of Raghunandana sets forth the same principles of Hindu law that are peculiar to Jīmūtavāhana, though in matters of detail they disagree in a few cases. The Vīramitrodaya styles the author of the Dāyatattva a follower of Jīmūtavāhana.[1020] It has been held by the Calcutta High Court that Raghunandana's is the best commentary on the Dāyabhāga and that the authority of Raghunandana is acknowledged and respected universally in the Bengal School.[1021]

Besides the above, Raghunandana wrote also Tīrthatattva or Tīrthayātrāvidhitattva, the Dvādaśayātrātattva (on the principal festivals at Jagannāthapurī, one in each month), Tripuṣkaraśānti-tattva, Gayāśrāddhapaddhati and Rāsayātrāpaddhati. His works however are not very much in vogue elsewhere than in Bengal.

Raghunandana was the son of Hariharabhaṭṭācārya and was a Bengal Vandyaghaṭīya Brāhmaṇa. He was a pupil of Śrīnāthaācārya-cūḍāmaṇi, whose works are frequently quoted in the several *tattvas* (vide Chakravarti in JASB for 1915 p. 351 n. 2). According to tradition Raghunandana and the great Vaiṣṇavite saint Caitanya were pupils of the same teacher, Vāsudeva Sārvabhauma, who was

the shining light of the new logic (navyanyāya) at Navadvīpa and were residents of that place (Sarvadhikari's Tagore Law Lectures, first edition p. 403ff.).

Among the authors and works quoted in his encyclopaedia by Raghunandana those noted below deserve mention.[1022]

Aufrecht placed Raghunandana between 1430-1612 A. D. Dr. Jolly (Tagore Law Lectures p. 10) places him early in the 16th century. In I. L. R. 48 Cal. 643 (F. B.) at p. 695 it is said that Raghunandana belongs to the latter half of the 15th century. As Raghunandana's works are quoted and criticised by the Vīramitrodaya (pp. 79, 531, 683, 697, 703 etc.,) and by Nīlakaṇṭha, Raghunandana is certainly earlier than 1600 A. D. As he names Mādhavācārya, Śūlapāṇi, Rāyamukuṭa, Rudradhara and Vācaspati, he is later than about 1500 A. D. If tradition is to be believed that he was a fellow-student of Caitanya he must have been born about 1490 A. D. Caitanya is said to have been born in 1485 or 1486 A. D.[1023] In his Jyotistattva he mentions *śake* 1421[1024] in connection with the position of Viṣuva. That shows that the work was not composed probably very much long after that date (i. e. 1499-1500 A. D.) In the same Tattva (vol. I. p. 568)

for calculating ravi-saṁkrānti he takes śake 1489 as the basis (i. e. 1567 A. D.). So that Tattva was composed just about that year. A ms. of the Chandoga-śrāddha-tattva was copied in *śake* 1497 (1575-76 A. D.)[1025] and a ms. of the Maṭha-pratiṣṭhā-tattva was copied in *śake* 1498 (i. e. 1576-77 A. D.).[1026] Therefore he must have flourished before 1575. Thus he flourished between 1490 and 1570 and his literary activity, which must have been spread over a long period if we consider the number of his works, lies between 1520-1570. Vide an interesting discussion about his date in JASB for 1915, pp. 354-357 by M M. Chakravarti who places Raghunandana between 1510-1565 A. D.

103. Nārāyanabhaṭṭa

Nārāyaṇabhaṭṭa was the most famous of the celebrated family of the Bhaṭṭas of Benares. For a detailed account of the family and the contribution of the several members thereof to dharmaśāstra, *vide* my Introduction to the Vyavahāramayūkha (v-xvi). M. M. Haraprasad Śāstri has brought to light a biography of this family written by Śaṅkarabhaṭṭa, a son of Nārāyaṇabhaṭṭa (Ind. Ant. for 1912 vol. 41, pp. 7-13). Nārāyaṇabhaṭṭa's father Rāmeśvarabhaṭṭa whose *gotra* was Viśvāmitra migrated from Pratiṣṭhāna (Paithan) in the Deccan to Benares. Rāmeśvarabhaṭṭa was a very learned man and his learning drew to him students from the whole of India. Nārāyaṇabhaṭṭa was born according to Śaṅkarabhaṭṭa's biography in *śake* 1435 in the month of Caitra (i. e. about March 1513 A. D.). Nārāyaṇabhaṭṭa was the eldest of three sons, the other two being Śrīdhara and Mādhava. Nārāyaṇabhaṭṭa learnt all the śāstras at the feet of his father. *Pandits* all over India looked up to him as their leader and patron and he was an assiduous collector of Sanskrit mss. It is said that Nārāyaṇabhaṭṭa brought down by his holiness rain in a season of drought and thereby induced the Mahomedan ruler that had razed the temple of Viśveśvara at Benares to the ground to allow him to rebuild it. For his erudition and piety Nārāyaṇabhaṭṭa was honoured with the title 'Jagadguru' and his family was given the first place of honour in the assembly of learned Brāhmaṇas and at the recitations of the Vedas. It was Nārāyaṇabhaṭṭa and his equally worthy descendants that raised dākṣiṇātya *pandits* to the

position of high eminence at Benares which they still hold. Nārāyaṇabhaṭṭa wrote numerous works on dharmaśāstra among which may be mentioned the Antyeṣṭipaddhati (printed by Nirṇayasāgara Press), the Tristhalīsetu (dealing with the ceremonies to be performed generally at all sacred places and particularly at Prayāga, Kāśī and Gayā) and the Prayogaratna (printed at the Nirṇayasāgara Press, 1915 A. D.). This last contains detailed descriptions and rituals of the saṁskāras from *garbhādhāna* to *vivāha*. His are standard works on the subjects they deal with and are used even now almost throughout the whole of India. He composed a commentary on the introductory verses contained in the Kālamādhava (vide Madras Triennial cat. vol. III. Sanskrit C. p. 4114 No. 2852) and a commentary on portions of the Śāstradīpikā of Pārthasārathimiśra. He composed a work on ordeals which is referred to in the Vyavahāratattva of Nīlakaṇṭha (vide p. 457 of my edition and Bikaner cat. p. 387 No. 832 for a Divyānuṣṭhāna-paddhati of Nārāyaṇabhaṭṭa) and also paddhatis on the dedication of gardens, tanks etc. He exercised a profound influence over later writers directly and indirectly through his sons and grand-sons.

As he was born in 1513 A. D. and composed the commentary on the Vṛttaratnākara in 1545 A. D., his literary activity must be placed between 1540 and 1570 A. D. This is further corroborated by the fact that his grandson Kamalākarabhaṭṭa composed the Nirṇayasindhu, one of his earliest works, in 1612 A. D.

There is a work on dharmaśāstra called Dharmapravṛtti composed by a Nārāyaṇa. Mr. K. P. Jayasval holds that this was composed by *jagadguru* Nārāyaṇabhaṭṭa (JBORS for 1927, vol. XIII, parts III-IV, p. IX). The same view is held by M. M. Haraprasad Śāstri (Ind. Ant. for 1912 p. 7). But this identity is extremely doubtful. The benedictory verses[1027] in the Dharmapravṛtti are different from those of the Prayogaratna and Tristhalīsetu, the method of treatment and the style are different and the colophons are also different. The author of the Dharmapravṛtti does not mention his ancestors as Nārāyaṇabhaṭṭa does. Nīlakaṇṭha in his Vyavahāramayūkha

1027 The introductory verse is नारायणं नमस्कृत्य कामदां च सरस्वतीम् । गणनाथं गुरूंश्चैव धर्मसंरक्षणाय वै ॥ धर्मप्रवृत्त्यै क्रियते कलौ नारायणेन तु । I. O. cat. p. 480 No. 1560.

finds[1028] fault with the Dharmapravṛtti by saying that certain quotations therein are unauthoritative.

104. Ṭoḍarānanda

Rājā Ṭoḍaramalla, the celebrated finance minister of Akbar, compiled an extensive encyclopædia of civil and religious law, astronomy and medicine. The several parts of that encyclopædia dealing with *ācāra, dāna, vyavahāra, śrāddha, viveka, prāyaścitta, samaya* were called *saukhyas*. An account of some of the *saukhyas* that were available to me may be concisely given here. The Vyavahārasaukhya (D. C. ms. No. 366 of 1875-76) begins with an invocation of Śiva, speaks of the *pārasīka* emperor[1029] (Akbar) of Hind (India) and then deals with the several topics of judicial procedure such as the king's duty to look into disputes, the *sabhā*, judge, meaning of the word *vyavahāra*, enumeration of 18 *vyavahārapadas*, time and place of *vyavahāra*, the plaint, the reply, the agent of the parties (*pratinidhi*), *pratyākalita*, the superiority of one mode of proof over another, witnesses, documents, possession, inference, ordeals and oaths, grades of punishments and fines. The Vyavahārasaukhya does not dwell on the exposition of the several titles of law. Besides the smṛti writers, it principally relies on the Kalpataru, the Pārijāta, Bhavadeva, the Mitākṣarā, the Ratnākara, Harihara and Halāyudha. The several sections are styled *harṣas*.

The Vivāhasaukhya (D. C. ms. No. 868 of 1884-87) is concerned with the astrological aspects of marriage (e. g. the proper year, month, day, sign, nakṣatra &c., for marriage). It names numerous authors and works, some of which are noted below.[1030]

1028 Vide p. 134 of व्यवहारमयूख (my edition).

The Śrāddhasaukhya (D. C. ms. No. 257 of 1884-87) is an extensive work and deals with the usual topics such as the different kinds of śrāddhas, the time and place for śrāddha, the proper brāhmaṇas, sapiṇḍikaraṇa &c. The sections of this work also are divided into *harṣas*. Besides those enumerated above the authors and works mentioned are noted below.[1031]

The Jyotiḥsaukhya (D. C. ms. No. 915 of 1886-92) constitutes the Saṁhitā branch of Indian astronomy and deals with such topics as the results of eclipses, the appearance of comets, the rise of Agastya, Ursa major, the signs of the Zodiac &c. It frequently refers to Kāśyapa, Garga (or Vṛddhagarga), Parāśara, Mayūracitra, Varāha. The colophons state that Ṭoḍaramalla was a scion of the Ṭaṇḍala (or - na) family and that the work was compiled by Nīlakaṇṭha at the order of Ṭoḍaramalla.[1032] This Nīlakaṇṭha appears to be the author of the Sañjñatantra on which a commentary was written by his son Govinda in 1622 A. D., in which it is stated that Nīlakaṇṭha was honoured by Akbar and had composed the Ṭoḍarānanda.[1033] In the Tājika-Nīlakaṇṭhī of Nīlakaṇṭha it is stated that the author composed works on the three branches of Jyotiṣa which gave delight to Ṭoḍara.[1034]

The Jyotiḥsaukhya was composed in śake 1494[1035] (i. e. 1572 A. D.). The ms. of the Vyavahārasaukhya bears at the end the date *saṁvat* 1638 (1581-82[1036] A. D.) which seems to be the date of its composition. Ṭoḍaramalla was a man of versatile genius. He distinguished himself as an able commander as well as a great

financier and statesman. For a brief account of his life, vide Blochmann's translation of the Ain-i-Akbari, vol. I. pp. 351-352. It is there stated that he was *Khetri* by caste, that, though it is generally stated that he was born at Lahore, he was really born at Laharpur in Oudh (p. 620) and that he died at Lahore on the 11th day of 998 of the Mussulman era [1037] (i. e. 1589 A. D.). The Marathi magazine 'Itihāsasaṁgraha' publishes an inscription on a stone found in the Draupadīkuṇḍa at Benares wherein it is said that Ṭoḍara of the Ṭaṇḍana family constructed that beautiful reservoir in 1646 of the Vikrama era[1038] (i.e. 1589 A. D.). Therefore it follows that literary works were compiled under the patronage of Todarmal between 1565-1589 A. D.

105. Nandapaṇḍita

Nandapaṇḍita was a voluminous writer on dharmaśāstra. An account of his principal works on dharmaśāstra is given below, particularly because most of them are yet unpublished.

He composed a commentary called Vidvanmanoharā on the Parāśarasmṛti. He expressly mentions therein that he follows the commentary of Mādhavācārya.[1039] This commentary is referred to in his Vaijayantī.[1040]

He also appears to have written a commentary called Pramitākṣarā or Pratītākṣarā on the Mitākṣarā of Vijñāneśvara.[1041] This com-

1041 On विष्णुधर्मसूत्र 15.9 he says 'स्वैरिण्याः पुनःसंस्काराभावश्चोपपादितोस्माभिः सविस्तरं मिताक्षराटीकायां प्रतीताक्षरायामिति नेहोच्यते ।' folio 86 b of the I. O. ms. (of वैजयन्ती); on विष्णु० 16. 1 'विशेषस्तु मिताक्षराटीकायां प्रमिताक्षरायामस्मृत्कृतायामवगन्तव्यः' (folio 93 b).

mentary was probably not completed, as only fragments are found with his descendants.

Nandapaṇḍita also composed a work called Śrāddhakalpalatā, which is referred to in his Śuddhicandrikā[1042] and in the Vaijayantī. In this work[1043] he refers to a city called Sādhāraṇa (probably modern Saharanpur) where the Sahagila family ruled. He speaks of Siṁhamalla, Vasāvana, Rūpacandra, Bhūpacandra and Paramānanda as successive members of the dynasty and says that he was urged to write the work by the last of them and that he relies upon the Śrāddhadīpikā of Govindapaṇḍita.[1044] At the end of the ms. of the Vaijayantī in the Deccan College Collection it is said that the Vidvanmanoharā, the Smṛtisindhu and the Śrāddhakalpalatā were the commentaries composed by Nandapaṇḍita.[1045] But from the contents given in the India Office Catalogue it does not appear that the work was a commentary. It is divided into five *stabakas* and deals with the usual topics, viz. what is śrāddha, the proper time and place for it, the proper brāhmaṇas, various kinds of śrāddhas &c. The principal authors and works named therein are given below.[1046] The Śuddhicandrikā, a commentary on the Ṣaḍaśīti or Āśaucanirṇaya of Kauśikāditya, is also one of the works of Nandapaṇḍita. It is referred to in his Vaijayantī[1047]. The Bhadkamkar collection made by Prof. Velankar contains a ms. of this work and it has recently been published in the Chowkhamba S. series. The principal authors and works quoted therein are noted below.[1048]

Another work of Nandapaṇḍita is the Smṛtisindhu, which seems to have been an extensive digest of smṛti material. Portions of it have been recovered. In the Deccan College Collection there is a ms. of the Saṁskāra-nirṇayataraṅga of the Smṛtisindhu, which, according to a verse at the end, was composed by Nandapaṇḍita at the command of king Harivaṁśa-varman of the Māhendra family and son of king Maṅgo.[1049]

It appears that he compiled a summary of the doctrines of his work Smṛtisindhu. That summary was called Tattvamuktāvalī.[1050] It is almost certain that the fragment of the Tattvamuktāvalī noticed in the BBRAS cat. at p. 217 is part of this work. That fragment contains 8 verses on upākarma and three on holikā with commentary and the verses are numbered from 557 to 564 and then 607-609. If the above surmise be correct, the work was a large one and contained over 610 verses. Two of the verses name Hemādri and Pārijāta.[1051]

The Vaijayantī or Keśava-Vaijayantī is a famous work of his. It is a commentary on the Viṣṇudharma-sūtra. Extracts from it have been published by Dr. Jolly in his edition of Viṣṇu. This is an extensive work. The following account is taken from the ms. in the India Office Library (vide cat. p. 393 No. 1342 for a brief description). In this work he refers to a Brāhmaṇa dynasty of the Vasiṣṭha *gotra* at Vijayapura (Vijayanagara ?) in Karṇāṭa country, in which was born Koṇḍapanāyaka, whose son was Keśavanāyaka, whose son was Ananta *alias* Vāvarasa, whose sons were Keśava and Rudra. Keśava, son of Koṇḍapa, seems to have gone

to Benares with his sons and grand-sons and made extensive gifts of all kinds.[1052] There is a hyperbolical description of his great gifts (*mahādānas* including *tulā*, i. e. weighing against gold or silver). Keśavanāyaka enjoined upon Nandapaṇḍita the task of composing a commentary on the Viṣṇusmṛti.[1053] In the colophons at the end of the chapters of Viṣṇu, Koṇḍapanāyaka is styled Mahārājādhirāja and it is said that Nandapaṇḍita was encouraged in the task by Keśavanāyaka *alias* Tammasānāyaka. At the end of chapter 101, we are told that Keśavanāyaka, Nandapaṇḍita's patron, secured *mokṣa* by breathing his last on the Maṇikarṇikā in Benares.[1054] There are six verses at the end one of which says that in the Kali age there is no one more liberal than Vāvarasa (a son of Keśavanāyaka) and no one more learned than Nandapaṇḍita.[1055] As he wrote on the encouragement of Keśava, the commentary is also styled Keśava-Vaijayantī. Among the authors and works mentioned in this commentary are Devasvāmī, Budhasmṛti, Bhavadeva, Mādhavācārya, Vācaspati, Sarvajña, Subodhinī (com. on the Mit.), Haradatta, Hemādri. In the Vaijayantī he refers to no less than six of his works viz : the Vidvan-manoharā, the Pramitākṣarā, the Śrāddhakalpalatā, the Śuddhicandrikā, the Dattaka-mīmāṁsā (vide note 1040 above). But in the Dattaka-mīmāṁsā itself he refers to his Keśava-Vaijayantī as already composed.[1056] Therefore it follows that both works were probably being composed at the same time. The Vaijayantī is one of the leading authorities of the Benares School of modern Hindu Law.[1057]

Nandapaṇḍita, though he generally follows the Mitākṣarā, was not a slavish admirer of Vijñāneśvara. He does not accept the explanation the Mitākṣarā gives of Yāj II. 17 (sākṣiṣūbhayataḥ etc.). Similarly on Viṣṇu 8. 12, 22. 41, 23. 11, 27. 2 he emphatically says that the Mitākṣarā is wrong.[1058] He prefers the father to the mother as an heir (on Viṣṇu 17. 6-7) and seems to have placed the paternal grandmother as an heir after the mother but before the brother (folio 101 b). He explains *sapiṇḍa* relationship in the same way as the Mit.[1059] does. He says that the word 'bhrātaraḥ' in Yāj. should be explained as standing for 'brothers and sisters' and that in the father's line, after the brother and brother's son, the brother's grandson succeeds and, on failure of the brother's grandson, the paternal grandfather, his son and grandson are heirs one after another, i. e. in each line three generations succeed and then there is a devolution in favour of the next higher line. This view is opposed to that of the Subodhinī and the Smṛticandrikā, which take only the son and grandson of each paternal ancestor. Vide my notes to the Vyavahāramayūkha for fuller details (pp. 253-254). Nandapaṇḍita stands alone among modern *nibandhakāras* in having recognised a uterine brother[1060] (i. e. the son of the same mother but of a different father) as an heir. It is remarkable that Nanda-

paṇḍita preferred a person's predeceased son's widow (i. e. widowed daughter-in-law) as an heir to that man's own daughter.[1061]

The Dattaka-mīmāṁsā is the most famous work of Nandapaṇḍita. It was translated very early by Sutherland (comprised in Stoke's Hindu Law Books). In the following the edition of Bharatacandra Śiromaṇi (published in 1885 with his own commentary) has been used. In this work he lays down rules as to the person who may adopt, when he may adopt, who can give in adoption, who may be adopted, the motives of adoption, the necessary ceremonies of adoption, the results of adoption. Among the authors and works quoted or referred to those mentioned below may be noted.[1062]

From very early days of the British rule in India the Dattaka-mīmāṁsā came to be regarded as the standard work on adoption. In *Collector of Madura v. Mootoo Ramalinga*[1063] the Privy Council says "Again of the Dattaka-mīmāṁsā of Nandapaṇḍita and the Dattaka-candrikā of Devaṇṇabhaṭṭa, two treatises on the particular subject of adoption, Sir William Macnaghten says that they are respected all over India; but that, when they differ, the doctrine of the latter is adhered to in Bengal and by the southern jurists, while the former is held to be the infallible guide in the provinces of Mithilā and Benares." That this estimate is somewhat too strongly put has been said by the Privy Council itself in *Bhagwansingh v. Bhagwansingh*[1064] 'to call it infallible is too strong an expression and the estimates of Sutherland and of West and Bühler seem nearer the true mark; but it is clear that both works must be accepted as bearing high authority for so long a time that they have become embedded in the general law.' The Privy Council further lays down 'their Lordships cannot concur with Knox J. in saying that

their (of the Dattaka-mīmāṁsā and Dattaka-candrikā) authority is open to examination, explanation, criticism, adoption or rejection like any scientific treatises on European jurisprudence'.[1065] Even in those parts of the Bombay Presidency where the Vyavahāramayūkha is a work of paramount authority, the Dattakamīmāṁsā has on the subject of adoption been preferred in certain matters to the Vyavahāramayūkha. For example, the Bombay High Court, following the Dattakamīmāṁsā, has laid down that among the three higher castes a man cannot adopt his own daughter's, sister's, or mother's sister's son. The view of the Vyavahāramayūkha, on the contrary, is that he can take these in adoption. The limits to which Nandapaṇḍita will be followed by the courts are laid down in *Ramachandra v. Gopal*: 'The authority of Nandapaṇḍita must be accepted except where it can be shown that he deviates from or adds to the *smṛtis* or where his version of the law is opposed to such established custom as the Courts recognise'.[1066]

Several views expressed in the Dattakamīmāṁsā have been set at naught in the various provinces by the British Indian Courts. Nandapaṇḍita held that a widow could not adopt at all.[1067] Except in Mithilā this view has nowhere been entertained in India and the Courts have held that the Law of Benares, Bengal, Madras and Bombay is different. Nandapaṇḍita put forward the position that the brother's son must be preferred for adoption over any other *sagotra* or *sapiṇḍa*.[1068] This has, however, been treated in all provinces as no more than a mere recommendation and that failure to observe it entails no legal or religious consequences whatever. The expression 'putracchāyā' in 'putracchāyāvaham' occurring in the text of Śaunaka was explained by Nandapaṇḍita to mean 'similarity to a son born' and he said that the similarity consisted in the possibility of being begotten by means of *niyoga* and the like.[1069] Sutherland wrongly introduced the word 'marriage' after

niyoga in his translation and some of the High Courts in India, following this wrong translation, evolved the rule that no one could be adopted whose mother the adopting father could not have legally married in her maiden state.[1070] But the Bombay High Court has laid down that the rule is restricted to the three specified cases of the daughter's son, the sister's son, and the mother's sister's son.[1071] From the text (brāhmaṇāditraye nāsti bhāgineyaḥ sutaḥ kvacit), Nandapaṇḍita evolved the curious rule that a widow cannot adopt to her deceased husband her own brother's son. But the Privy Council has refused to follow this *dictum* on the ground that the gloss of Nandapaṇḍita is an extension not based on the authority of any smṛti and has upheld such an adoption.[1072]

About the personal history of Nandapaṇḍita we do not know much. Mandlik in his Hindu Law (LXXII, *n.* 3) gives what information he could gather from descendants of Nandapaṇḍita living in Benares. According to him the founder of the family was Lakṣmīdhara who was a resident of Bidar (now in the Nizam's dominions) and who went to Benares. Nandapaṇḍita was the sixth in descent from him. Dr. Jolly visited at Benares Pandit Dhuṇḍirāja Dharmādhikārī who was 9th in descent from Nandapaṇḍita (Tagore Law Lectures, p. 15) and Mandlik's information also was gathered from persons who were 9th in descent from Nandapaṇḍita. Mandlik also gives a detailed genealogical tree. We learn from several works of Nandapaṇḍita and their colophons that he was also named Vināyakapaṇḍita and was the son of Rāmapaṇḍita of Benares who is styled Dharmādhikarī. Nandapaṇḍita also is described as Dharmādhikarī in the Saṁskāranirṇaya-taraṅga of the Smṛtisindhu (vide note 1049 above). It appears that Nandapaṇḍita was at different times patronised by rich patrons from different parts of India. He composed the Śrāddhakalpalatā for Paramānanda of the Sahagila family of Sādhāraṇa, the Smṛtisindhu for Harivaṁśavarman of the Māhendra family and the Vaijayantī for Keśavanāyaka of Madhurā.

1072 *Puttulal v. Parbati* I. L. R. 37 All. 359 (P. C.).

Mandlik notes that Nandapaṇḍita is credited with the authorship of 13 works. Eight works of Nandapaṇḍita have been named and described above. Mandlik names six of these. Besides these he is said to have written Navarātra-pradīpa, three sections of a work named Harivaṁśavilāsa (viz. dānakautuka, āhnikakautuka and saṁskārakautuka), Bālabhūṣā, Tīrthakalpalatā, Kālanirṇayakautuka, Kāśīprakāśa, Mādhavānanda. But we saw above (note 1050) that the Bālabhūṣā is only a commentary on the Tattvamuktāvalī (probably composed by another writer). The Kāśīprakāśa was certainly composed by Nandapaṇḍita as he is described in the India Office ms. to have been the son of Rāmapaṇḍita.[1073] That work was composed at the order of one Sarvabhaṭṭa, who was the *guru* of Kṛṣṇanāyaka of Madhurā. In Mitra's Notices two works, Jyotiḥśāstrasamuccaya and Smārtasamuccaya, are described as composed by Nandapaṇḍita, son of Devaśarman and Vṛndā.[1074] The latter seems to have been an extensive work and dealt with *tithinirṇaya*, intercalary month, marriage, sapiṇḍa relationship, the saṁskāras, daily observances, *antyeṣṭi* (funeral rites), *āśauca*, *śuddhi*, *śrāddha*, *prāyaścitta*, *dāyabhāga* and *vyavahāra*. Though the name of the father, Devaśarman, creates suspicion in one's mind, both these works must be regarded as the works of Nandapaṇḍita, son of Rāmapaṇḍita, as in the Smārtasamuccaya the author refers his readers to his Dattakamīmāṁsā for the subject of adoption. It is not unlikely that just as Nandapaṇḍita had the *alias* Vināyaka, his father Rāmapaṇḍita was also called Devaśarman.

Mandlik (Hindu Law LXXII, n. 3) notes that on a copy of the Mādhavānanda-kāvya composed by Nanda the year *saṁvat* 1655 (1599 A. D.) is given, probably in Nandapaṇḍita's own handwriting. The Vaijayantī was one of Nandapaṇḍita's latest works. That work, we are told, was composed at Kāśī in Vikrama *saṁvat* 1679 (Nov. 1623) on the Full moon of Kārtika when the sun was in Scorpion and the moon in Taurus.[1075] Therefore the literary

activity of Nandapaṇḍita must be placed between 1595 and 1630 A. D. Mandlik in his Hindu Law (p. 281) says that the Vaijayantī of Nandapaṇḍita is referred to in the Vyavahāramayūkha of Nīlakaṇṭha. I have not been able to find the reference in the latter work.

106. Kamalākarabhaṭṭa

Kamalākarabhaṭṭa was one of the foremost scions of the Bhaṭṭa family. He was a grandson of the famous Nārāyaṇabhaṭṭa and a son of Rāmakṛṣṇabhaṭṭa. He was one of three brothers, the eldest being Dinakara *alias* Divākara[1076] and the youngest was Lakṣmaṇabhaṭṭa,[1077] who studied under Kamalākarabhaṭṭa. Kamalākarabhaṭṭa's father Rāmakṛṣṇa also was a very[1078] learned man and a profound *mīmāṁsaka* and his mother Umā immolated herself as a *satī*. Kamalākara was a man of profound erudition and composed works on almost every śāstra. In some of his own works there are high eulogies of his learning and proficiency in Tarka, Nyāya, grammar, mīmāṁsa (in both the schools of Kumārila and Prabhākara), Vedānta, Poetics, dharmaśāstra and Vedic sacrifices.[1079] He composed more than twenty-two works. At the end of his Vivādatāṇḍava, it is said that he composed the Nirṇayasindhu, a commentary on the Vārtika (of Kumārila), a work on the *mīmāṁsā* (śāstratattva) and a series of 20 other works.[1080] At the end of a ms. of the

Śāntiratna in the Bhau Daji collection there is a list of 22 works of his out of which the Nirṇayasindhu is said to have been the first.[1081] More than half of these works are concerned with topics of Dharmaśāstra, viz. the Nirṇayasindhu, the Dānakamalākara, Śāntiratna, Pūrtakamalākara, Vratakamalākara, Prāyaścittaratna, Vivādatāṇḍava, Bahvṛcāhnika, Gotrapravaradarpaṇa, Karmavipākaratna, Śūdrakamalākara, Sarvatīrthavidhi. The Śūdrakamalākara, the Vivādatāṇḍava and the Nirṇayasindhu are the most famous of his works on dharmaśāstra. Brief references may be made here to some of the works of Kamalākara-bhaṭṭa other than the three mentioned above. It appears from the introductory verses of the Vratakamalākara that Kamalākara intended to compose a digest on dharma called Dharmatattva in ten paricchedas[1082] and not only carried it out but added some more works on dharma. It will be noticed that nine out of these 10 sections are enumerated under the same names at the end of the Śāntiratna quoted above, the one not named being the section on *ācāra*. Burnell mentions a work called Ācāradīpa by Kamalākara on daily duties and on the same page notices another work on āhnika by Kamalākara.[1083] It is difficult to say whether both are names of the same work. It is not unlikely that the ācāra section of the digest Dharmatattva is the same as the Bahvṛcāhnika enumerated at the end of the Śāntiratna. There is a ms. of the Bavṛcāhnika at Bikaner.[1084] It deals with daily duties commencing with rising

from one's bed at the *brāhma muhūrta*. In this work Kamalākara-bhaṭṭa refers to his own Prāyaścittaratna, and to the Madanapārijāta, Madanaratna, Mādhava and Śūlapāṇi. The Pūrtakamalākara[1085] was an extensive work and dealt with the dedication of tanks, wells, trees and gardens to the public, the dedication of Aśvattha tree and five sacred trees, dedication and laying the foundation of public buildings, consecration of sacred images, of Śālagrāma, of temples and flags, repairing of images, accidental breaking of temples, consecration of Vināyaka, pacification of planets, coronation of kings and emperors. In this work he mentions his own Dāna-kamalākara.

The Śāntiratna or Śāntikamalākara is a huge work.[1086]

It deals with various rites for propitiating Vināyaka, the nine planets, and for averting the consequences of portentous occurrences and evil omens, birth on such constellations as *mūla*, the observances known as Ekādaśinī, Laghurudra, Mahārudra, Śatacaṇḍī &c. He refers to his own Nirṇayasindhu in this work.

For his Gotrapravaradarpaṇa or Gotrapravaranirṇaya, vide I. O. cat. p. 579 No. 1780. He follows the Pravaramañjarī in this work. This work is referred to in his Nirṇayasindhu.

In the Bombay Asiatic Society's Library there is a ms. of his Saṁskāra-prayogakamalākara which appears to be over and above the 22 works enumerated above.[1087] He starts with an enumeration of the 48 *saṁskāras* mentioned by Gautama, deals with the several saṁskāras of puṁsavana, jātakarma, marriage &c., and with utsarjana and upākarma, propitiatory rites on the first appearance of menses, the Aṣṭakā śrāddha &c.

His Śāstratattva-kautūhala or Tattva-kamalākara appears to have been a work of considerable interest dealing with the bearing of the doctrines and maxims of the Mīmāṁsā system on ritual and dharma-śāstra.[1088] A ms. of it is dated *saṁvat* 1695 caitra śukla 4 Friday (i. e. 9th March 1638 A. D.).

I was able to secure a ms. of the Vivādatāṇḍava from the Mandlik collection in the Fergusson College at Poona. That work closely resembles in method and matter the Vyavahāramayūkha of Kamalākara's cousin Nīlakaṇṭha, the section on ordeals being almost the same in both. It treats of the following subjects: the *sabhā*; members of the *sabhā*; Judge, amātya; the scribe and the accountant; conflict of smṛtis; the plaint, the reply, the modes of proof, viz., documents, witnesses, possession; modes of punishment; the principal and secondary sons; the enumeration of the eighteen titles of law; partition of heritage and detailed description of the other titles. Like the Vyavahāramayūkha, the Vivādatāṇḍava quotes the Madanaratna as frequently as (or perhaps more frequently than) the Mitākṣarā. The other writers and works quoted are noted below.[1089] As it mentions several works of his own, viz. Nirṇaya-sindhu, the Dānakamalākara, the Prāyaścittaratna and the Śūdra-dharma (i. e. Śūdrakamalākara), the Vivādatāṇḍava was one of his latest works. On several points he differs from his own cousin Nīlakaṇṭha. For example, he prefers the mother to the father as an heir and does not give the sister a high place among the *gotraja* heirs as Nīlakaṇṭha does. The Vivādatāṇḍava has been frequently noticed in judicial decisions.[1090]

The Śūdrakamalākara (also called Śūdra-dharmatattva or Śūdra-dharmatattvaprakāśa) has been printed in Bombay several times (with Marathi translation). I used the Nirṇayasāgara edition of 1895. In this work he refers to his own Dānakamalākara, Pūrtakamalākara, Prāyaścittaratna and Nirṇayasindhu. Out of about two hundred authors and works quoted therein, prominent ones are noted below.[1091] This work is a standard treatise on the duties and religious observances of Śūdras.

He first starts with the discussion that the Śūdra is not authorised to study the Vedas, but that he can listen to the recitation by Brāhmaṇas of smṛtis and purāṇas and religious rites are to be performed for Śūdras with Purāṇic *mantras*. Then the following subjects are dealt with:– worship of Viṣṇu and other deities by Śūdras and the observances of *vratas* and fasts by them; Śūdra can make gifts of works of public utility (pūrta); Śūdra can adopt a son; the conflicting views as to the number of saṁskāras for a Śūdra, most authors holding that he is entitled to ten saṁskāras (without Vedic *mantras*), viz. garbhādhāna, puṁsavana, sīmanta, jātakarma, nāmakaraṇa, śiśuniṣkramaṇa, annaprāśana, cūḍākarma, karṇavedha and vivāha; the five great daily yajñas were to be performed for the śūdra according to the Vājasaneyaśākha;[1092] śrāddhas for Śūdra (to be performed with uncooked food); actions prescribed and forbidden in the case of Śūdras; the details of various rites and saṁskāras of Śūdras; the daily duties of Śūdras; impurity on birth and death; rites after death; duties of wives and widows; persons of mixed castes who have to follow the rules laid down for Śūdras; rules for those who are born of *pratiloma* connections; about *Kāyasthas*.

The Nirṇayasindhu or Nirṇayakamalākara is the most famous of Kamalākara's works. It is a monument of erudition, industry and lucidity. It has been judicially referred to as a work of authority.[1093] I have used the Nirṇayasāgara edition of 1905 (with Marathi translation). In the whole range of nibandhakāras there is hardly any other writer, except perhapas Nīlakaṇṭha and Mitramiśra, who lays under contribution as many works as Kamalākara does. In the Nirṇayasindhu about one hundred smṛtis and over three hundred nibandhakāras are mentioned by name. In the introductory verses he expressly says that he pondered over the views of Hemādri, Mādhava and other learned writers. The work is divided into three *pariccheḍas*. The following is a very concise

statement of the contents of this voluminous work. The principal subject is to give decisive opinions as to the proper times for various religious acts; the various views about the year being solar, lunar, sidereal etc., months of four kinds, lunar, solar etc., saṁkrānti rites and gifts; intercalary month; *kṣayamāsa*; about *tithis*, *śuddhā* and *viddhā* (combined with another *tithi* on same day); *vratas*; the various *vratas* and festivals during the twelve months of the year; the *saṁskāras* from garbhādhāna onwards; sapiṇḍa relationship; consecration of images; auspicious times (*muhūrtas*) for various actions such as sowing operations, buying horses and cattle &c.; śrāddha; impurities on birth and death; rites after death, rites for *satī*; saṁnyāsa.

The time when Kamalākara flourished can be determined with great accuracy. We saw above that the Nirṇayasindhu was one of his earliest works and that it is referred to in several works of his. According to a verse at the end of the Nirṇayasindhu the work was composed in 1668 of the Vikrama era on the 14th day of the dark half of the month of Māgha when cyclic year was Raudra (i. e. on the 20th February 1612 A. D.). In a ms. noticed by M. M. Haraprasāda Śāstri the same verse is read differently, so as to refer the composition to Vikrama *saṁvat* 1678; but it is clearly a copyist's error or misreading, since the cyclic year Raudra cannot tally with Vikrama 1678.[1094] We saw above that a ms. of the Tattvakamalākara is dated 1638 A. D. Kamalākara was a voluminous writer and therefore we shall be not far wrong if his literary activity be assigned to the period between 1610 A. D. and 1640 A. D. This date is corroborated in several ways. His grandfather Nārāyaṇbhaṭṭa was born in 1513 A. D. and he quotes in his Nirṇayasindhu the Ṭoḍarānanda compiled in the last quarter of the 16th century. Gāgābhaṭṭa *alias* Viśveśvarabhaṭṭa, who officiated at the coronation of the great Shivaji in 1674 A. D., was Kamalākarabhaṭṭa's nephew.

107. Nīlakanthabhatta

In my introduction to the Vyavahāramayūkha (Poona, 1926) I have dealt exhaustively with the personal history of Nīlakaṇṭha, his works, their contents, their position in dharmaśāstra literature, the period of Nīlakaṇṭha's literary activity and his position in modern Hindu Law. In the following a brief résumé of the conclusions there arrived at is given.

Nīlakaṇṭha was a grandson of Nārāyaṇabhaṭṭa and a son of Śaṅkarabhaṭṭa. Śaṅkarabhaṭṭa was a profound *mīmāṁsaka* and composed several works on mīmāṁsā, viz. a com. on the Śāstradīpikā, the Vidhirasāyaṇadūṣaṇa, the Mīmāṁsābālaprakāśa. He also wrote Dvaitanirṇaya (vide Annals of the Bhandarkar Institute, vol, III part 2. pp. 67-72 for an account of it) and the Dharmaprakāśa or Sarvadharmaprakāśa. Nīlakaṇṭha composed an encyclopaedia of religious and civil law, styled Bhagavantabhāskara, in honour of his patron Bhagavantadeva, a Bundella chieftain of the Seṅgara clan, that ruled at Bhareha near the confluence of the Jumna and the Chambal. This work is divided into 12 sections (called *mayūkhas* ' rays ') on saṁskāra, ācāra, kāla (or samaya), śrāddha, nīti, vyavahāra, dāna, utsarga, pratiṣṭhā, prāyaścitta, śuddhi, śānti. These have been printed at Benares and some of them have been printed in Bombay at the Gujarati Press and by Mr. Gharpure. Besides this encyclopaedia he composed also a work called Vyavahāratattva, which is a summary of the Vyavahāramayūkha, and probably a work styled Dattakanirṇaya. The Vyavahāratattva has been for the first time published by me as appendix I to my edition of the Vyavahāramayūkha.

Nīlakaṇṭha is one of the foremost *nibandhakāras*. Being brought up in a family that had made the study of mīmāṁsā its own for several generations, he is very acute in applying the maxims and rules of *mīmāṁsā* to dharmaśāstra. He stands unsurpassed by any mediaeval Sanskrit writer on dharmaśāstra in mastery over the vast smṛti lore, in lucidity of exposition, in conciseness and ease of style, in clarity of vision and sobriety of judgment. Though he admired the learning and labours of such predecessors as Vijñāneśvara, Hemādri and others, he does not slavishly follow their dicta and expresses his dissent from them most frankly.

His Vyavahāramayūkha is a work of paramount authority on matters of Hindu law according to the decisions of the Bombay High Court in Gujerat, the island of Bombay and northern Konkan.[1095] Even in the other parts of the Bombay Presidency such as the Maratha country and the Ratnagiri District the Vyavahāramayūkha occupies a very important place though it is subordinate to the Mitākṣarā.[1096] The general principle on which the Bombay High Court acts in construing the rules laid down in the Mitākṣarā and the Vyavahāramayūkha is that the two works are to be harmonized with one another wherever and so far as that is reasonably possible.[1097] Though the Mitākṣarā is a paramount authority in the Maratha country and the Ratnagiri District and though it is silent about the sister's right as a *gotraja* heir, the courts, in deference to the authority of the Vyavahāramayūkha, have assigned to the sister a high place as an heir even in the Maratha country and in Ratnagiri. Among the other Mayūkhas, the Saṁskāramayūkha has been frequently relied upon by the courts.[1098] The Prāyaścittamayūkha and the Pratiṣṭhāmayūkha[1099] have also been relied upon in the High Court.

The period of Nīlakaṇṭha's literary activity can be settled within very narrow limits. He was the youngest son of Śaṇkarabhaṭṭa. In the Dvaitanirṇaya, Śaṅkarabhaṭṭa quotes the views of the Ṭodarānanda which, as we saw above, must have been composed between 1570 and 1589 A. D. So the Dvaitanirṇaya could not have been composed before 1590 A. D. Nīlakaṇṭha, the youngest son of Śaṅkarabhaṭṭa, could hardly have commenced his literary career earlier than Kamalākarabhaṭṭa who was the second son of Śaṅkarabhaṭṭa's elder brother. Kamalākara composed his Nirṇayasindhu in 1612

A. D. So Nīlakaṇṭha's literary activity must have commenced a good deal after 1610. One ms. of the Vyavahāratattva bears the date *saṁvat* 1700 (1644 A. D.). This shows that the Vyavahāratattva was composed not later than 1644 A. D. The Vyavahāratattva refers to the Vyavahāramayūkha as already composed. Hence we may say, without being far from the truth, that Nīlakaṇṭha's literary career falls between 1610 and 1645 A. D. This date is confirmed by the fact that Nīlakaṇṭha's son Śaṅkara wrote the Kuṇḍabhāskara in 1671 A. D. and Divākarabhaṭṭa, the son of Nīlakaṇṭha's daughter, composed his Ācārārka in 1686 A. D. It appears that there was probably a rivalry between the two great cousins Kamalākarabhaṭṭa and Nīlakaṇṭha. On many matters their views diverged. Though the Nirṇayasindhu is said to have been composed in 1668 of the Vikrama era, yet from the references to several works of his own in the Nirṇayasindhu it looks as if Kamalākara revised it from time to time by adding on references to his own other works and to those of others. The Nirṇayasindhu (III *pariccheda*, section on Dattakagrahaṇa) emphatically says that he who asserts the absence of ownership in one's son in spite of Vedic indications is a fool.[1100] It is not unreasonable to suppose that this is a hit at Nīlakaṇṭha who must have been younger than Kamalākara and who tries hard in his Vyavahāramayūkha to establish that there is no ownership in one's wife and children.

108. The Vīramitrodaya of Mitramiśra

The Vīramitrodaya is a vast digest composed by Mitramiśra embracing almost all branches of dharmaśāstra. Excepting the Caturvarga-cintāmaṇi of Hemādri, this work is probably the largest known on dharmaśāstra. But it surpasses in interest and usefulness even Hemādri's work since it deals with vyavahāra also. It was divided into sections called *prakāśas*. So far the *prakāśas* on vyavahāra, paribhāṣā, saṁskāra, rājanīti, āhnika, pūjā, tīrtha and lakṣaṇa have been published, the first by Jivananda (Calcutta 1875) and the rest in the Chowkhamba Sanskrit series. The text of the dāyabhāga portion of the Vyavahāraprakāśa was also published by Golapchandra Sarkar Sastri with an English translation (Calcutta 1879). It appears that

Mitramiśra wrote on prāyaścitta also.[1101] But that work has not yet been met with. The very names of the sections of the Vīramitrodaya convey an idea of the subjects dealt with in them. The Lakṣaṇa-prakāśa deals with the auspicious signs of men, women, the several parts of human body, elephants, horses, thrones, swords, bows and with the characteristics and qualities of the queen, the ministers, the astrologer, physician, doorkeeper, description of śālagrāma, śiva-liṅga, rudrākṣa beads etc. In the *āhnikaprakāśa* he dilates upon the daily duties beginning with one's rising from bed on brāhma-muhūrta, śauca, ācamana and ending with going to bed. The Vya-vahāraprakāśa is probably the largest *nibandha* on *vyavahāra*. This is divided into four parts. The first part deals with the meaning of *vyavahāra*, the constitution of the *sabhā* (court of justice), the appointment of judges, conflict of dharmaśāstra and arthaśāstra, assessors, the various grades of courts, the procedure about plaints and defendant's replies and their faults; the burden of proof and the means of proof. The second gives a detailed exposition of the means of proof, viz. witnesses, documents, possession and ordeals. The third treats of the eighteen titles of law including *dāyavibhāga* and the fourth very briefly speaks of those matters which were to be started *suo motu* by the king and not by a private individual. The *dāyavibhāga* portion of the Vyavahāraprakāśa occupies a little more than one-fourtth of the whole of the work.

In the Tīrthaprakāśa he deals with the nature of *tīrthas*, the utility thereof for men, the persons entitled to undertake pilgrimage, the proper times for pilgrimage, the ceremonial acts to be performed at *tīrthas* such as shaving, fasts, bathing, gifts, the description of the several *varṣas* and *dvīpas* and of sacred rivers like the Ganges, Narmadā, sacred places like Gayā, Prabhāsa, Badrī, Puṣkara and Purī.

In the Pūjāprakāśa he speaks of the definition of *pūjā*, persons entitled to perform *pūjā* (worship of gods), the rewards of *pūjā*, proper times and places for *pūjā*, śālagrāma, the proper articles and clothes for the worship of idols, proper flowers, fragrant substances, *naivedya*, the detailed method of worshiping Viṣṇu, Śiva, the Sun, Durgā, Brahmā etc. In the printed edition there are no introductory verses here.

1101 अत्योद्वहत्याक्षतयोनिसंयोगपतितानां त्यजनेनापि निष्कासनमित्यादि प्रायश्चित्तप्रकारो (प्रकरणे) विवेच्यते: । वीर० p. 640 (व्यवहार section, Jivananda).

In the Saṁskāra-prakāśa the author enumerates the saṁskāras and describes in detail garbhādhāna, puṁsavana, anavalobhana, sīmantonnayana, jātakarma, nāmakaraṇa, śiśuniṣkramaṇa, annaprāśana, cūḍā, upanayana, *vivāha* etc., the duties of brahmacārins, *gotras*, *pravaras* and *sapiṇḍya*, all astrological matters in connection with marriage, piṇḍapitṛyajña, sarpabali, aṣṭakāśrāddha, śūlagava.

The Rājanītiprakāśa treats of the definition of *rājan*, the proper time and procedure of coronation, the daily routine for kings, the qualifications of ministers, commander-in-chief and the dependents of the king, forts, capital, palaces, the four expedients of *sāma* etc., the six *guṇas*, auspicious and evil signs, marching for battle, Kaumudī and Indradhvaja festivals etc.

In all his works Mitramiśra mentions hundreds of authors and works. The portion on vyavahāra is full of long-drawn controversies in which he refutes the views of numerous predecessors. The Vīramitrodaya enters into polemics far more frequently than Nīlakaṇṭha. He generally upholds the Mitākṣarā of Vijñāneśvara against all its critics, particularly the writers of the Bengal school. But he does not slavishly admire the Mitākṣarā in every thing. Now and then he rebukes even Vijñāneśvara. For example, he does not approve of what the Mitākṣarā says about the son called *Kānīna*.[1102] He finds fault with Vijñāneśvara's explanation of the verse 'anyodaryastu' as extremely forced and far-fetched and as simply exhibiting the author's pedantry.[1103] Out of the host of works and writers that he names in the vyavahāra section the important ones are noted below.[1104]

1102 या तु मिताक्षरारुक्ता यद्यनूढायामुत्पन्नस्तर्हि मातामहसुतोप्यूढायां तदा वोढुरेवेति व्यवस्था रुता सापि मनसि न चमत्कारमादधाति । वीर० p. 606.

1104 अपरार्क, कल्पतरु, गोपाल, चण्डेश्वर, जीमूतवाहन, तात्पर्यपरिशुद्धि (of उदयन), दायतत्त्व, धारेश्वर, नयविवेक, पारिजात, पार्थसारथि, प्रकाश, प्रदीप, भवदेव, भवनाथ, मदनरत्न, माधवीय, मिताक्षरा, मेधातिथि, रघुनन्दन, रत्नाकर, लीलावती, वाचस्पति, वादभयङ्कर, विज्ञानयोगिन्, विद्यारण्य, व्यवहारतत्त्व, व्यवहारतिलक (of भवदेव), व्यवहारचिन्तामणि, शारदातिलक, शास्त्रदीपिका, शूलपाणि, सोमेश्वर, स्मृतिचन्द्रिका, स्मृतितत्त्व, हलायुध.

The Vīramitrodaya is a work of high authority in the Benares School of Hindu Law. The Privy Council has laid down that 'the Vīramitrodaya is properly receivable as an exposition of what may have been left doubtful by the Mitākṣarā and declaratory of the law of the Benares school.'[1105] Similarly it has been said by the same high tribunal that the Vīramitrodaya may be referred to even in Bengal where the Dāyabhāga is silent.[1106] But where the text of the Mitākṣarā on any point is quite clear, the gloss of the Vīramitrodaya on the text of any sage which is in conflict with the rule laid down in the former cannot be referred to for the purpose of casting a doubt on the clear rule of the Mitākṣarā.[1107] The Vīramitrodaya is inferior to the Vyavahāramayūkha in Western India[1108] and its doctrines are not followed in those provinces when in conflict with those of the other two works. Their Lordships of the Privy Council say in *Vedachala v. Subramania*[1109] 'although the Smṛticandrikā in the Southern Presidency is regarded as the most authoritative commentary on Vijñāneśvara's work, the Vīramitrodaya holds, as in Western India, a high position. It supplements many gaps and omissions in the earlier commentaries and illustrates and elucidates with logical preciseness the meaning of doubtful prescriptions.'

There is a ms. of the Dānaprakāśa in the Deccan College (No. 305 of 1884-1887). It is an extensive work and contains the usual topics about gifts.

Besides the digest called Vīramitrodaya Mitramiśra composed a commentary on the smṛti of Yājñavalkya. There is a ms. in the Deccan College (No. 58 of A 1883-84) which contains portions (with gaps) of the commentary on the three kāṇḍas (ācāra, vyavahāra, prāyaścitta). From the portion available it appears that

the commentary was of considerable extent, though not as voluminous and as full of polemics as his digest. The ācāra portion had at least 446 folios (with 6 lines on each side and 30 letters in each line), the vyavahāra at least 257 and prāyaścitta a great many more than 153. Besides the works noted above he quotes the Karmapradīpa and the Smṛtisāra. In this work he does not quite approve of the reasons for the preference shown to the mother over the father as an heir by the Mitākṣarā, viz. the occurrence of the word 'mātā' as the first word when the word 'pitarau' is dissolved and the greater propinquity of the mother as compared with the father, since the latter can beget sons from another wife.[1110] The commentary gives three varieties of *dāsī*. [1111] Vide I. O. cat. p. 371 No. 1288 and Peterson's 2nd report pp. 49-53 for further details about this commentary.

In the Ācāraprakāśa he quotes besides some of the works mentioned above the following also, viz. Kullūka, Prayogapārijāta, Prāyaścittaviveka, Madanapārijāta, Śrīdatta (vide I. O. cat. p. 437 No. 1471).

In the introductions to the several sections of his digest and also in the colophons therein Mitramiśra furnishes considerable information about himself, his family and the family of his patron. Mitramiśra was the son of Paraśurāmapaṇḍita and grandson of Haṁsapaṇḍita. Haṁsapaṇḍita seems to have been a native of Gopācala (Gwalior) and was endowed with the rare combination of wealth and learning. One Caṇḍeśvara of Kāśī was the *guru* of Paraśurāmapaṇḍita. Mitramiśra indulges in hyperbolic[1112] descrip-

tions of his own learning and naively tells his readers that they need study only his work and may neglect all other *nibandhas*. Mitramiśra was commanded by Vīrasiṁha to compose his great digest.[1113] The introduction to the Āhnikaprakāśa starts with king Medinīmalla who was a scion of the Kāśīrāja family. His son was Arjunadeva who became ruler of Bundelkhand. His son was Malakhāna, whose son was Pratāparudra (founder of the capital Orccha). His son was Madhukarasāha, whose son was Vīrasiṁha. Vīrasiṁha's son was[1114] Jujhāra who is described as 'young' (yuvā in verse 23). His son was Vikramārka whose son was Narasiṁhadeva. There is no such introduction to the printed Pūjāprakāśa and Narasiṁhadeva is not mentioned in the introductions to the other prakāśas. From the article of Mr. Lala Sitaram in the Calcutta Review (May and July 1924) further information can be gathered about Birsinghdeo (i. e. Vīrasiṁhadeva). In the article it is shown how and under what circumstances Vīrasiṁha killed Abul Fazal, the friend of Emperor Akbar and a great literary genius. We are told there that there is a work called Vīrasiṁhadeva-carita composed in Vikrama year 1664 (1607-8 A. D.) by Keśavadāsa, author of Kavipriyā and Rasikapriyā. Vīrasiṁha was 7th out of the eight sons of Madhu-

karasāha. Not only was he a soldier, but he was a great builder. He built the palace forts of Orcchha and Datia, the temple of Keśavadeva at Mathurā, several lakes called Bīrasāgara, Siṁhasāgara and Deosāgara (after the three parts of his own name). He is said to have ruled at Orchha from 1605 to 1627 A. D. From the introduction to[1115] the commentary on Yājñavalkya it appears that Vīrasiṁha commanded Mitramiśra to write it and that a learned man Sadānanda, the ornament of Tīrabhukti (Tirhoot), was also connected with its composition. It will be seen that the title Vīramitrodaya very cleverly suggests that Mitramiśra wrote it under the patronage of Vīrasiṁhadeva. The title may mean 'the rise of Vīra and Mitra' or 'the rise of the friend of Vīra' or 'the rise of the sun, viz. Vīra'.

The time when Mitramiśra flourished can be easily settled on account of his relations with Vīrasiṁhadeva. In his Āhnikaprakāśa he mentions the great-grand-son of Vīrasiṁha. Therefore that section must have been written when Vīrasiṁha was advanced in age. Vīrasiṁha ruled at Orchha from 1605 to 1627. Hence the literary activity of Mitramiśra must be placed in the first quarter of the 17th century. This date agrees with the fact that he names Vācaspati and Raghunandana. We thus see that Mitramiśra was almost a contemporary of Kamalākarabhaṭṭa and Nīlakaṇṭha. The two latter do not refer to him nor does Mitramiśra name them.

In the Vyaṅgyārtha-kaumudī of Anantāśrama[1116] of Puṇyastambha (Puṇtāmbe) on the Godāvarī, a commentary on the Rasamañjarī of Bhānudatta, the author gives a pedigree of his patron. He describes the Kāśīrāja family at Benares, in which was born Pratāparudra whose son was Madhukarasāha, whose son was Vīrasiṁhadeva. Ananta wrote the commentary for Candrabhānu, a son of Vīrasiṁhadeva, in 1635 A. D. This corroborates the dates above given by Mr. Lala Sitaram. Therefore it is almost beyond doubt that the literary activity of Mitra-miśra lies between 1610 and 1640 A. D.

109. Anantadeva

Anantadeva compiled a vast digest called Smṛtikaustubha divided into several sections on saṁskāra, ācāra, rājadharma, dāna, utsarga, pratiṣṭhā, tithi and saṁvatsara. The section on saṁskāras and that on rājadharma are also called Saṁskāra-kaustubha and Rājadharma-kaustubha. Each Kaustubha is subdivided into parts called dīdhiti. The Saṁskāra-kaustubha is the most popular and most well-known work of his. It has been printed several times, the best editions being that of the Nirṇayasāgara Press (1913) and that issued at Baroda (1914) under the patronage of H. H. the Maharaja Gaikwad (with a Marathi translation by Sastri Venkatacarya Upadhyaya). I have used the latter. The Saṁskāra-kaustubha is recognised as an authoritative work by the highest court for India.[1117] The following is a very brief summary of the contents :-

The sixteen saṁskāras, the first being garbhādhāna, the astrological aspects of the first appearance of menses and the various propitiatory rites therefor ; the proper times for garbhādhāna and the several rites connected therewith ; puṇyāhavācana, nāndīśrāddha, matṛkāpūjana ; nārāyaṇabali and nāgabali ; pañcagavya, kṛcchra and other prāyaścittas ; cāndrāyaṇavrata ; adoption, who is entitled to adopt, who can be adopted, rites of adoption, *gotra* and *sāpiṇḍya* of the adopted son, mourning to be observed by the adopted, succession of the adopted ; putrakāmeṣṭi ; puṁsavana ; anavalobhana ; sīmantonnayana ; rites on the birth of a child or son ; impurity on birth ; propitiatory rites for evil aspects at birth; nāmakaraṇa; niṣkramaṇa ; annaprāśana ; piercing the ear ; celebration of birth day ; caula ; upanayana, proper times for it, the necessary materials for it, the *gāyatrī*, the vows of a brahmacārin; samāvartana; marriage, sāpiṇḍya for it, *gotras* and *pravaras*, proper times for marriage, forms of marriage, vāg-niścaya, sīmāntapūjana, madhuparka, kanyādāna, vivāhahoma, saptapadī, homa on the entrance of the married couple etc.

The portion of the Saṁskāra-kaustubha on the subject of adoption is frequently cited separately as Dattakadīdhiti and is so entered in the catalogues of mss. It is a treatise of great importance and deserves to be studied along with the Dattakamīmāṁsā, the Vyava-

hāramayūkha and other similar works. The more important of his views are set out below. Like the Dattakamīmāṁsā he recommends that the nephew is the most suitable for adoption, then one may select any *sagotra, sapiṇḍa*, then an *asagotra sapiṇḍa*, then a *sagotra* but *asapiṇḍa*, then any one of the same caste though not *sagotra*, but a daughter's or sister's son cannot be adopted nor can a brother, a paternal or maternal uncle be adopted. A Śūdra may adopt a daughter's or sister's son. The person to be adopted must not be an only son or the eldest. A wife can adopt with the consent of her husband and a widow does not require the express permission of her husband. The boy to be adopted may be below five or above five and may be taken before or after the *cūḍā* ceremony is performed in the natural family. Anantadeva refers to the[1118] view of some that the verses of the Kālikāpurāṇa on this subject are not found in several mss. and so are unauthoritative and tells us that others hold that the whole passage refers to the adoption of an *asagotra* boy. Anantadeva himself holds, like the Vyavahāramayūkha, that even an *asagotra* boy may be adopted after his upanayana is performed in the natural family. When the ceremony of *caula* and the rest are performed in the family of the adopter, the adopted boy belongs to the *gotra* of the adopter, but where the *upanayana* alone is performed in the adoptive family or the adoption is made after *upanayana* the boy belongs to both *gotras*. But this holds good only as regards obeisance, śrāddha etc. while for marriage every adopted boy has to avoid the *gotra* and *pravara* of both families. If a natural son be born to the adopter after he takes a boy in adoption, the adopted boy becomes an equal sharer with the *aurasa*, if all the saṁskāras up to *upanayana* are performed by the adoptive father for the adopted boy, or he takes only a

fourth share if only some of the saṁskāras ending with *upanayana* are performed by the adopter and he gets no inheritance but only provision for marriage if he was adopted after upanayana is performed in the natural family. Anantadeva, disagreeing with Nīlakaṇṭha, holds that a girl may be adopted.[1119]

Like the Nirṇayasindhu and the Mayūkhas of Nīlakaṇṭha, Anantadeva in the Saṁskārakaustubha and elsewhere names several hundred authors and works. It is not necessary to set out the whole lot. His authorities are practically the same as those of the former. He principally relies among *nibandhas* upon the Mitākṣarā, Aparārka, Hemādri, Mādhava, Madanaratna, Madanapārijāta. The Smṛtikaustubha was divided into several *dīdhitis* (rays, parts). In the Smṛtikaustubha published by the Nirṇayasāgara Press it is expressly stated that the *tithidīdhiti* has been already[1120] expounded. At the end also it is said that the work is only the complete *abdadīdhiti* (i. e. portion dealing with saṁvatsaras of five kinds). The year is said to be of five kinds, cāndra, saura, sāvana, bārhaspatya and nākṣatra. The printed work treats of the several rites, observances, festivals and *vratas* on the important *tithis* of the twelve months of the cāndra year with the intercalary month and observances thereof, the rites proper to saura year and saṁkrāntis (the sun's passage from one sign into another), the rites of the *sāvana* year, the rules about rites when Jupiter is in the sign of Leo, the rites of the nākṣatra year, the actions forbidden and allowed in Kali age according to Anantadeva and discussion of the views of Hemādri, Mādhava and the Madanapārijāta thereon.

The Rājadharmakaustubha[1121] was divided into several parts (dīdhitis). The first deals with the characteristics and defects of

kings, the qualities and characteristics of queens, ministers, *purohita*, astrologer, the rites to be performed at coronation, duties to be observed after coronation. Another portion of the same work deals with vyavahāra viz., the sabhā, the judge, the plaint, the reply, means of proof, ordeals etc.

It is unnecessary to go into details about the other treatises on prāyaścitta, pratiṣṭhā[1122] &c. Anantadeva also wrote several prayogas such as the Agnihotraprayoga, Cāturmāsyaprayoga. In the Bhadkamkar collection there is a ms. of a drama called Kṛṣṇa-bhakti-candrikā composed by Anantadeva in which the characters are a Śaiva, Vaiṣṇava, Mīmāṁsaka, Tārkika &c.

In the Smṛtikaustubha (Nirṇayasagara edition of 1909) Anantadeva gives a pedigree[1123] of his patron's family. The family claimed descent from the moon. Whether the first three kings mentioned in the Smṛtikaustubha were related as father and son is doubtful. Lakṣmaṇacandra is said to have been the son of Rudra-candra and it was he who conquered several chiefs wielding sway over the Himalayan territories.[1124] Trimallacandra, the successor

(and probably the son) of Lakṣmaṇacandra, is praised for his continual liberality to the learned men of Benares.[1125] It was at the command of Baz Bahadurcandra and for pleasing him that Anantadeva compiled his Smṛtikaustubha.[1126] At the end Anantadeva tells us that Baz Bahadurcandra conquered several mountain forts in the Himālayas.[1127] After giving a pedigree of his patrons' family Anantadeva gives some information about himself. He was a descendant of the great Maratha saint Ekanātha whom he describes as endowed with Vedic sacrifices and as a devotee of Kṛṣṇa.[1128] That this Ekanātha is the same as the great Maratha saint is vouchsafed by Kāśīnātha, author of Dharmasindhu, in another work of his.[1129] Anantadeva was the great-great-grand-son of Ekanātha and he was the grandson of Ananta and son of Āpadeva, the author of the Mīmāṁsānyāyaprakāśa *alias* Āpadevī-.

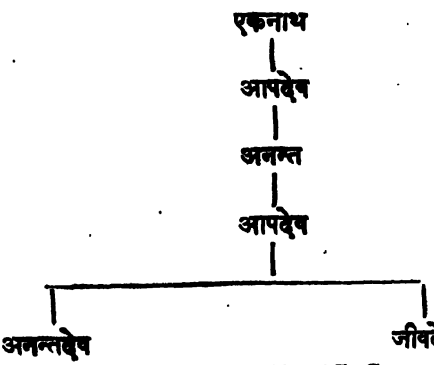
The pedigree of अनन्तदेव is



1129 Vide his विहलकल्पद्रुमसारभाष्य folio 37 a (D. C. ms. No, 100 of 1869-70).

Mīmāṁsā lore seems to have been a hereditary endowment in the family as in the case of the Bhaṭṭas of Benares. In all his works, particularly in the Saṁskārakaustubha, Anantadeva applies at every step the maxims and doctrines of the Pūrvamīmāṁsā for the decision of doubtful points of Dharmaśāstra. Anantadeva had a younger brother Jīvadeva whose Gotrapravaranirṇaya he draws upon in the Saṁskārakaustubha while dealing with sāpiṇḍya for marriage.[1130] Bhandarkar notices an Āśaucanirṇaya of Jīvadeva in which the Nirṇayasindhu is cited as an authority.[1131]

West and Bühler in their digest[1132] thought that Anantadeva flourished about the same time as the author of the Nirṇayasindhu. But this requires some correction. Baz Bahadur, the patron of Anantadeva, seems to have been a scion of the Candra (or Chand) family and ruled over Almora and Nainital from 1638 to 1678 A. D. It is said in the Imperial Gazetteer[1133] that the first of the Chandra-rājas was Somachand who hailed from Jhūsi near Allahabad and came to the Himalayan regions in the 10th century and that in 1563 the capital was transferred to Almora by Kalyancand, whose son Rudracandra was a contemporary of Akbar and made his obeisance to the latter in 1587 A. D. at Lahore. The Smṛtikaustubha does mention the ancestors Kalyanacandra and Rudracandra of Baz Bahadur. Between Baz Bahadur and Rudracandra there are three names. Supposing that they are the three direct ascendants of Baz Bahadur and allowing a period of 25 years for each after Rudracandra's known date of 1587 A. D., we get the year 1662 A. D. for Baz Bahadur. We are told in the Gazetteer that in 1672 Baz Bahadur introduced a poll tax, the proceeds of which he remitted to Delhi as tribute. Therefore Anantadeva must have been patronised by Baz Bahadur between 1645 and 1675 A. D. A greater approximation can be made in another way. The saint Ekanātha finished his Marathi Bhāgavata at Benares in śake 1495 and 1630 of the Vikrama era on Kārtika full-moon day (i. e. 9th November

1573) as he himself tells us.[1134] Anantadeva was the fourth in descent from him (exclusive of Ekanātha). Counting 25 years for each of the four generations, Anantadeva should have been a grown up man in 1673 A. D. There are controversies about the dates of the birth and death of Ekanātha, the commonly accepted dates being śake 1450-1521 (b. 1528-d. 1600 A. D.).[1135] The date of his death is *śake* 1521 Fālguna dark half 6th day (25th February 1600). Others give 1548-1599 A.D. as the dates. Whichever date is correct, the literary activity of Anantadeva must be assigned to the third quarter of the 17th century. This date is confirmed by the fact that in the Āśaucanirṇaya of Jīvadeva, younger brother of Anantadeva, the Nirṇayasindhu composed in 1611-12 A. D. is cited as an authority.

110. Nāgojibhatta

The learning of Nāgojibhaṭṭa was of an encyclopaedic character. Though his special *forte* was Vyākaraṇa (grammar) he wrote standard works also on poetics, dharmaśāstra, yoga and other śāstras. The total number of his works is about thirty. On dharmaśāstra he composed several works, viz. Ācārenduśekhara, Āśaucanirṇaya, Tithīnduśekhara, Tīrthenduśekhara, Prāyaścittenduśekhara or Prāyaścittasārasaṁgraha, Śrāddhenduśekhara, Sapiṇḍīmañjarī and Sāpiṇḍyadīpikā or Sāpiṇḍyanirṇaya. Of his far-famed works on the Paṇinean system, such as the Mahābhāṣya-pradīpoddyota, the Paribhāṣenduśekhara, the Vaiyākaraṇasiddhāntamañjūṣā (in large and small recensions), the Subdenduśekhara (big and small) and of his

Nāgojibhaṭṭa was the son of Śivabhaṭṭa and Satī and was a Mahārāṣṭra Brāhmaṇa surnamed Kāla (Kaḷe). At the beginning and end of several works of his (such as the Rasagaṅgādhara-marmaprakāśa, the Mañjūṣā) he tells us that he was patronised by Rāma of the Bisena family,[1136] the ruler of a city named Śṛṅgavera (which seems to be on the Ganges above Allahabad). He was the pupil of Haridīkṣita,[1137] son of Vīreśvara and pupil of Rāmāśrama and grandson of the great grammarian Bhaṭṭoji-dīkṣita.[1138] Tradition says that he composed the grammatical work Śabdaratna and ascribed it to his teacher Haridīkṣita in gratitude. In the[1139] commentary on the Prauḍhamanoramā Haridīkṣita refers to the Śabdaratna as his own work and to the Śabdenduśekhara as that of his pupil.

Bhaṭṭojidīkṣita was a pupil of the Mīmāṁsaka Śaṅkarabhaṭṭa and of Śeṣa Śrīkṛṣṇa and almost a contemporary of Jagnnāthapaṇḍita. Bhaṭṭoji's pupil Nīlakaṇṭha Śukla wrote a work in saṁvat 1663 (Dr. Belvalkar in ' Systems of Sanskrit Grammar ', p. 47). Therefore he flourished in the first half of the 17th century. Nāgojibhaṭṭa was a pupil of Bhaṭṭoji's grandson. Therefore Nāgojibhaṭṭa must have flourished towards the end of the 17th century and the first half of the 18th century. Nāgojibhaṭṭa's literary activities, looking

Svāmi makes Bhaṭṭoji a pupil of Śeṣa Vīreśvara and not of Śeṣa Kṛṣṇa. But the passage of the Manoramākucamardana, if properly interpreted, makes it clear that Bhaṭṭoji was the pupil of Śeṣa Kṛṣṇa and not of Vīreśvara.[1141] A ms. of Nāgojibhaṭṭa's commentary on the Rasamañjarī is dated *saṁvat* 1769, Māgha 7th bright half, Wednesday, i. e. 21st January 1713 A. D. (vide I. O. cat. vol. III p. 365). It is not unlikely that Nāgojibhaṭṭa first composed his commentaries on the comparatively easy śāstra of poetics and that he then worked upon Dharmaśāstra and Vyākaraṇa. The edition of the Rasagaṅgādhara in the Kāvyamālā series says that there is a tradition that Nāgoji was invited by king Savai Jaising of Jaipur to a horse-sacrifice in 1714 A. D., but that Nāgoji declined on the ground of *Kṣetra-saṁnyāsa*. Therefore his literary activity must be placed between 1700 and 1750 A. D. Mahāmahopādhyāya Haraprasad Śāstri says (Ind. Ant. vol. 41 p. 12) that Nāgoji died about 1775. But this appears rather improbable. If one of his works was copied in 1713 A. D. he could hardly have lived up to 1775, unless he was about 100 years old at that time.

111. Bālakrsna or Bālambhatta

The Lakṣmīvyākhyāna *alias* the Bālambhaṭṭī is a commentary on the Mitākṣarā of Vijñāneśvara, ascribed to a lady named Lakṣmīdevī. The commentary is a voluminous one and displays uneven workmanship. The commentary on the ācāra section of the Mitākṣarā is the most learned part of the whole book and is almost an

independent work. The ācāra portion has been published by Mr. J. R. Gharpure. The vyavahāra portion of the Bālambhaṭṭī was published by Mr. S. S. Setlur, Advocate, Bombay in 1911 and by Mr. J. R. Gharpure (1914). This portion of the commentary explains the Mitākṣarā word by word and also engages in lengthy discussions on important topics. The portion of the commentary on the prāyaścitta section has not yet been published ; but Mr. Govinda Das who examined it (vide Mr. Gharpure's edition of the ācāra portion, p. 27 at end) reports that it is meagre as compared with the preceding sections. In the following Mr. Gharpure's edition has been used.

In the Bālambhaṭṭī the author quotes by name a host of writers and works. As the Bālambhaṭṭī is almost the latest work on Dharmaśāstra worth special mention in this work, no useful chronological purpose will be served by giving the names of all such writers and works. It may however be stated that he names the Nirṇayasindhu, the Vīramitrodaya, the Mayūkhas of Nīlakaṇṭha, the Saṁskārakaustubha, Siddheśvarabhaṭṭa the nephew of Nīlakaṇṭha, Khaṇḍadeva the author of Bhāṭṭadīpikā on the Mīmāṁsāsūtra, the Kāyasthadharmapradīpa of Gāgābhaṭṭa and the author's father's commentary thereon.

Of the Bālambhaṭṭī ascribed to Lakṣmīdevī,[1142] West and Bühler say ' she generally advocates latitudinarian views and gives the widest interpretation possible to every term of Yājñavalkya. Her opinions are held in comparatively small esteem and are hardly ever brought forward by the *śāstris*, if unsupported by other authorities '.[1142] For example, in the Bālambhaṭṭī the word ' bhrātaraḥ ', occurring in Yājñavalkya's verses laying down the order of succession to a man dying without male issue, is interpreted as including sisters and the author says that sisters succeed immediately after brothers.[1143] This dictum of Bālambhaṭṭa taken along with the words of the Vyavahāramayūkha seems to have influenced their Lordships of the Privy Council in *Vinayak v. Lakshmibai* on the question of the rights of the sister as an

heir.[1144] In *Sakharam v. Sitabai*[1145] Sir Michael Westropp C. J. went so far as to say on the construction of the term 'brethren' in the Mitākṣarā as including sisters, which construction was adopted in that case (in *Vinayak v. Lakshmibai*) both by the Supreme Court and the Privy Council, "we must treat the Mitākṣarā also as preferring sisters to half brothers, whom it brings in after brothers." But this was a mere *obiter dictum*, since the case in which these observations were made was governed by the law of the Vyavahāramayūkha which expressly prefers full sisters to half brothers. It has been laid down in several cases in Bombay[1146] that Bālambhaṭṭa's doctrine that the word 'brothers' includes 'sisters' has not been accepted in that Presidency and that Sir Michael Westropp was under a misapprehension as to the exact drift of the Bālambhaṭṭī which nowhere says that the term 'brothers' excludes half brothers and which does not bring in the full sister before the half brother, but expressly says that the full brother inherits first, then the half brother and then comes the sister. The Bālambhaṭṭī not only brings in the sisters after full and half brothers, but places the sons and daughters of sisters after the sons and daughters of brother's, full or half. This is in direct conflict with the order of succession expressly mentioned by the Mitākṣarā and the Bombay High Court has refused to give the sister's son the place which the Bālambhaṭṭī assigns to him and treats him as a mere *bandhu*.[1147] The Bālambhaṭṭī is regarded as of little authority in the interpretation of the Mitākṣarā in the Bombay Presidency and its interpretations cannot be accepted without due caution and examination.[1148] Even in the Benares[1149] School where the Bālambhaṭṭī has been accepted as one of the leading authorities, the authority of Bālambhaṭṭa has been held to be inferior to that of Nandapaṇḍita in matters of adoption, it being held that a widow cannot adopt in the Benares School without express authority from her husband (while Bālambhaṭṭa holds that she can adopt without such authority). Similarly it has

been held that the Bālambhaṭṭī cannot prevail over the views of the Vīramitrodaya and that a daughter-in-law is not in the line of heirs at all though the Bālambhaṭṭī says that she is so.[1150]

The author of the Bālambhaṭṭī is somewhat of an enigma. Such women as Śīlā, Vijjā, Avanti-sundarī have been worshippers at the shrine of the Muse of Poetry. A lady has been associated with the composition of a work on Mathematics, viz. the Līlāvatī. Inspiration for several works on Dharmaśāstra was, we know, derived from queens and princesses, as in the case of the Vivādacandra compiled by Queen Lakṣmīdevī through Misarumiśra, the Dānavākyāvali compiled by Mahādevī Dhīramatī of Mithilā through Vidyāpati, the Dvaitanirṇaya composed by Vācaspati at the bidding of queen Jayā, wife of king Bhairavendra. It gives one great pleasure to contemplate that at least one work on Dharmaśāstra, the Bālambhaṭṭī, is claimed by a lady as her own. But this pleasure receives a rude shock if the question of the authorship of the Bālambhaṭṭī is dispassionately considered. The introductory verses no doubt start by saying that Lakṣmī, the wife of Vaidyanātha Pāyaguṇḍa, and the daughter of Mahādeva of the Mudgala *gotra* and surnamed Kheraḍā, composed the work, her maiden name being Umā.[1151] The colophon at the end of the ācāra portion says that the work was composed by Lakṣmī, the daughter of Mahādeva and Umā, the wife of Vaidyanātha Pāyaguṇḍa and the mother of Bālakṛṣṇa.[1152] At the end of the vyavahāra section in the printed editions we have the words ' mother of Lālākṛṣṇa ' but this is obviously a misreading of the mss. or a mistake of the copyists. The pretence that the work was composed by a lady is made extremely plausible by

the frantic efforts made in it for the rights of women in matters of inheritance. But this pretence is not kept up in the body of the work at all. In several places the author of the Bālambhaṭṭī refers to the Mañjūṣā and other works of his *guru* and to works of his father.[1153] We know that Vaidyanātha Pāyaguṇḍa was a pupil of Nāgojibhaṭṭa,[1154] who composed several Mañjūṣās (on grammar) and a work on prāyaścitta. Therefore it follows either that the Bālambhaṭṭī was composed by Vaidyanātha himself and ascribed to his wife or that the work was composed by Bālakṛṣṇa *alias* Bālambhaṭṭa, son of Vaidyanātha, and was ascribed to his mother. Nāgojibhaṭṭa who certainly attained a very advanced age was the *guru* of Vaidyanātha as well as of the latter's son Bālakṛṣṇa. That Bālakṛṣṇa or Bālambhaṭṭa Pāyaguṇḍa was a learned man like his father Vaidyanātha follows from several circumstances. He wrote a work called Upākṛtitattva.[1155] Gopāla *alias* Manudeva, in his commentary called Laghubhūṣanakānti on the Vaiyākaraṇabhūṣanasāra, styles Bālambhaṭṭa Pāyaguṇḍa his *guru*.[1156] Looking to the colophons where Lakṣmī is referred to as the mother of Bālakṛṣṇa and to the fact that the work is known as Bālambhaṭṭī, we must conclude that it was composed by Bālambhaṭṭa and not by his father Vaidyanātha. What motive impelled Bālambhaṭṭa to publish the work in the name of his mother it is difficult to say. Tradition

says that he did so to console Lakṣmīdevī in her bereavement on the death of a child. Vaidyanātha composed several commentaries on grammatical works such as on the Mahābhāṣyapradīpoddyota of Nāgojibhaṭṭa, on the Paribhāṣenduśekhara (com. called Kāśikā and Gadā), on the Vaiyākaraṇa-siddhāntamañjūṣā (com. called Kalā), on the Laghuśabdenduśekhara (com. Cidasthimālā), on the Laghuśabdaratna (com. Bhāvaprakāśa). Mr. Govinda Das (p. 27 in Mr. Gharpure's edition of ācāra portion) says that these works were really composed by Bālambhaṭṭa and ascribed to his father. In these grammatical works the names of Vaidyanātha's parents are given as Mahādeva and Veṇī.

The I. O. cat. (pp. 458-59, No. 1507) notices an incomplete work called Dharmaśāstrasaṁgraha compiled by Bālaśarman Pāyaguṇḍa, son of Vaidyanātha and Lakṣmī and patronised[1157] by Colebrooke. The work dealt with topics of civil law, viz. definition of vyavahāra, *sabhā*, the judge, the sabhyas, the relative strength of smṛtis etc., return of debts etc. It breaks off at folio 79. On the ms. there is a note in Colebrooke's own hand (which is not complimentary to the honesty of Bālaśarman) dated 1st may 1800 " fresh sheets were received from Bālaśarma Pāyaguṇḍa on this date. This is little else but the Vīramitrodaya revised. As it is a scarce book and very little known Bālaśarma and his pupil Manudeva did not suspect I could detect the plagiarism."

The foregoing shows that Bālakṛṣṇa Pāyaguṇḍa was a Deccani Brāhmaṇa, that his father and mother were Vaidyanātha and Lakṣmī, that his maternal grandfather was Mahadeva, also a Deccani Brāhmaṇa surnamed Kheradā, that he was the pupil of Nāgojibhaṭṭa and that he was a *pandit* of Colebrooke. Mr. Govinda Das is not right when he identifies (p. 27) Vaidyanātha the commentator of several grammatical works of Nāgojibhaṭṭa with Vaidyanātha the author of several commentaries on Alaṅkāra works (such as the Udāharaṇacandrikā on the Kāvya-prakāśa and the Prabhā on the Kāvyapradīpa). The reasons are two. Vaidyanātha, author of the Udāharaṇacandrikā,

[1157] श्रीकोंपणी विजयते रणरङ्गधीरः ॥ ४ श्रीशं नत्वा श्रीनिवासी दाक्षिणात्यो निबन्धरुत् । नागेशपादनिरतो वैद्यनाथात्मजः सुधीः ॥ ५ सुमनःकुलुबुरुकसाहेबाख्यबुधजीविकः । लक्ष्मीसूनुर्भवन्यम्बो विप्रद्वयविलेखकः ॥ ६ धर्मशास्त्रिमहादेवमन्तू (नु ?) देवसहायकः । बालशर्मौबालबुद्धिः पायगुण्डोपनामकः ॥ ७.

was the son of Rāmabhaṭṭa, son of Viṭṭhala Tatsat, while Vaidyanātha the grammarian was a son of Mahādeva and Veṇī. Besides the Udāharaṇacandrikā was composed[1158] in *saṁvat* 1740 Kārtika śuddha 8, Wednesday (i. e. 17th October 1683). We saw above that Vaidyanātha Pāyaguṇḍa was a pupil of Nāgoji, who flourished towards the end of 17th and the first half of the 18th century. If Vaidyanātha, the writer on poetics, were the same as the commentator of Nāgoji, he could not have composed a work on poetics so early as 1683 A. D. Dr. Belvalkar (Systems of Sanskrit Grammar p. 60) says 'Lakṣmīdevī, the wife of king Candrasiṁha of Mithilā, was probably his patroness in whose honour he is reported to have composed a commentary on the Vyavahārakāṇḍa of the Mitākṣarā.' This throws to the winds all chronology. We saw above (pp. 399 and 404) that the Mithilā princess Lakṣmī or Lachimādevī flourished in the first half of the 15th century, while the Bālambhaṭṭī quoting as it does writers and works like Gāgābhaṭṭa and the Kaustubha could not have been composed before 1700 A.D.

Mr. Govinda Das says that a ms. of the ācārakāṇḍa of the Bālambhaṭṭī in the Benares palace library is dated *saṁvat* 1831 (i. e. 1774-75 A. D.). The I. O. cat. (pp. 458-459) notices that Bālambhaṭṭa was about 80 years old when Colebrooke entrusted the Dharmaśāstrasaṁgraha to him about 1800 A. D. Besides both Bālambhaṭṭa and his father Vaidyanātha were the pupils of Nāgojibhaṭṭa. The ms. of the Upākṛtitattva (Stein's Jammu cat. p. 302) is dated *saṁvat* 1848 i. e. 1791-92 A. D. and the ms. of the Laghubhūṣanakānti of Bālambhaṭṭa's pupil is dated *saṁvat* 1856 (i. e. 1799-1800 A. D.). Hence it follows that Bālambhaṭṭa must have flourished between 1730 and 1820 A. D. Mr. Govinda Das says that Bālambhaṭṭa died at the age of 90 and gives his dates as 1740 to 1830 A. D. (p. 29 of Mr. Gharpure's ācāra section of Bālambhaṭṭī at the end).

112. Kāśināṭha-Upādhyāya

Kāśināṭha Upādhyāya or Bābā Pādhye composed an extensive work called Dharmasindhusāra or Dharmābdhisāra, which is popularly known as Dharmasindhu. It is now the leading work in matters of religious observances in the Deccan and has been referred to even in judicial decisions.[1159] It has been published several times. In the following the Nirṇayasāgara edition of 1926 with Marathi translation has been used. He says that he consulted former *nibandhas* and, following the order of the subject matters in the Nirṇayasindhu, composed the work which sets forth only the established conclusions after eliminating the original smṛti texts.[1160] At the end he says that the work is not meant for learned men conversant with *mīmāṁsā* and Dharmaśāstra, but for men whose intellect is not sharp and yet who want to know the established conclusions on matters of dharma. The work is divided into three *paricchedas*, the third being the longest and split into two parts. The first deals with *kāla* in general, viz. the kinds of year, month, the saṁkrāntis, intercalary months and kṣayamāsa, what *tithis* are proper for what rites, conclusions about *tithis* from the first to the 15th and about amāvāsyā, eclipses; the second deals with the festivals, fasts and observances of particular months from Caitra to Phālguna; the third in the first part speaks in detail about the saṁskāras from garbhādhāna to marriage, sāpiṇḍya, gotras and pravaras, duties of brahmacārin, the daily duties from rising to going to bed, the five daily mahāyajñas, consecration of sacred fires, idols and dedication of tanks and works of public utility, kalivarjya; the latter part of the third *paricchedа* dilates upon the details of śrāddha, impurity on birth and death, the rites after death, the duties of widows, *saṁnyāsa*.

Kāśināṭha was a very learned man and a great devotee of God Viṭhobā at Pandharpur in the Sholapur District. He wrote several other works, such as the Prāyaścittenduśekhara (Bühler 3. 110), an exposition of the Vedastuti in the Bhāgavatapurāṇa (X. 87)

and a work called Viṭṭhala-ṛṅmantrasārabhāṣya.[1161] In the latter he takes several Ṛk verses (such as Ṛgveda I. 95. 1-11 and I. 164. 31) and explains them as applying to God Viṭṭhala.

We know a good deal about the family of Kāśīnātha Pādhye from his own works and from the biography of the great Marathi poet Moropant published by Mr. L. R. Pangarkar (ed.of 1908, chap. 16 pp. 107-119). His family hailed from Golavali, a village in the Ratnagiri District. They were Karhādā Brāhmaṇas and had the Joshi and Upadhye *vṛtti* of seventy-two villages in the Saṅgameśvara *taluka* of the Ratnagiri District. At the end of the Dharmasindhu he says that his grandfather was Kāśyupādhyāya who had two sons Yajñeśvara and Ananta. Ananta was a very pious man and a great devotee and left his native land Koṅkaṇa, and resided at Pandharpur on the banks of the Bhīmā. The Dharmasindhu does not give the reason for Ananta's migration from Koṅkaṇa. But it is said that the Pādhyes had a dispute with another family about the *upadhye vṛtti*, took it for decision to the Peshwa's Court at Poona and were defeated, on which they cursed the Peshwa, vowed not to stay in the territories under the Peshwa's rule and migrated to Pandharpur. The Dharmasindhu was composed[1162] in *śake* 1712 i. e. 1790-1 A. D. Kāśīnātha was related to the great Marathi poet Moropant, as his daughter Āvaḍī was married to Rāmakṛṣṇa, the second son of the poet. He had great veneration for Moropant and refers to the Mantrabhāgavata of the latter.[1163]

113. Jagannātha Tarkapañcānana

After the British took over the administration of Bengal from the Nabobs, attempts were made to compile easily accessible digests of the personal law of the Hindus. The Vivādārṇavasetu[1165] compiled in 1773 for Warren Hastings by several *pandits* was translated into English from a Persian rendering and was published in 1774 A. D. as Halhed's Gentoo Code. But this was a very unsatisfactory work. Another attempt was made at the instance of Sir William Jones by Trivedi Sarvoruśarman who compiled in 1789 A. D. a digest of civil law called Vivādasārārṇava[1166] in nine *taraṅgas*. But the most famous of such digests that owed their inspiration to the British is the Vivādabhaṅgārṇava compiled by Jagannātha Tarkapañcānana of Triveṇī on the Ganges, son of Rudra Tarkavāgīśa. This digest was suggested by Sir William Jones and two parts of it on contracts and succession were translated by Cole-

brooke in 1796. The translation was first published in 1797 A. D. and is known to the legal profession as Colebrooke's Digest. This work exercised great influence over the courts in their administration of Hindu Law in the early days. The work is divided into *dvīpas*, each *dvīpa* being subdivided into *ratnas*. The principal topics dealt with are : recovery of debts, deposits, sale without ownership, partnership, rescission of gifts, non-payment of wages, rescission of sale and purchase, emancipation from slavery, disputes between master and servant, duties of man and wife, inheritance and partition. Jagannātha is said to have died at the venerable age of 111 in 1806.[1167] Though Jagannātha exercised great influence in moulding Hindu Law in Bengal, his work has been held from very early times not to have any binding authority in Western India.[1168]

114. Conclusion

In the foregoing pages most of the classical works and the most prominent writers on Dharmaśāstra during a period of about twenty five centuries have been passed in review. The number of authors and works on dharmaśāstra is legion. All these numberless authors and works were actuated by the most laudable motives of regulating the Aryan society in all matters, civil, religious and moral, and of securing for the members of that society happiness in this world and the next. They laid the greatest emphasis on the duties of every man as a member of the whole Aryan society, as a member of the particular class to which he belonged and very little emphasis on the privileges of men. They created great solidarity and cohesion among the several classes of the Aryan society in India in spite of their conflicting interests and inclinations and enabled Hindu society to hold its own against successive aggressions of foreign invaders. They preserved Hindu culture and literature in the midst of alien cultures and in spite of bigoted foreign domination. There is no doubt that the authors on dharmaśāstra in their desire to evolve order out of chaos and to adjust and harmonise the varying practices of people with the dicta of ancient sages were guilty of the faults of raising hair-splitting arguments, divisions and

sub-divisions and also of thinking that religious rites and formularies were the be-all and end-all of human existence. But living as most of the later writers did in the midst of aggressive and violently unsympathetic cultures and rulers and possessing no powerful central government that sympathised with their ideals, they were driven more and more to revolve within their own narrow grooves and could not see far in order to regulate society in a free and buoyant spirit. In spite of these defects, the work done by the writers on dharmaśāstra should excite our admiration and entitles them to the regard of all those that are interested in the study of the vicissitudes of Hindu society for thousands of years.

APPENDIX A.

List of Works on Dharmaśāstra

It is necessary to say a few words about the methods followed in preparing this list of the works on dharmaśāstra. Purely śrauta works have generally been excluded, except where they have been profusely quoted or relied upon by dharmaśāstra writers. Works of the Tantra class and the Purāṇas have been passed over, inasmuch as they form in themselves independent and extensive branches of Sanskrit literature requiring an exhaustive and detailed treatment, which from considerations of space had to be abandoned here. All individual prayogas, māhātmyas, vidhis, vratas, śāntis, stotras have been omitted, except where the names of the authors are well-known or there is some importance or peculiarity attaching to them. Purely astrological works on jātaka, and tājika have not been included, but works of the muhūrta class that are closely connected with everyday religious practices have been included. Though the gṛhyasūtras and their commentaries were not dwelt upon in the body of the present work, they have been included in this list as their subject-matter is closely allied to dharmaśāstra. Only works up to about 1820 A. D. have been entered here. Works on politics (arthaśāstra) have also been included. I am afraid that all the restrictions set out above have not been rigorously observed in the following and crave the indulgence of scholars in this respect. I must gratefully acknowledge, as everyone engaged in preparing a similar list on any branch of post-Vedic literature must do, my indebtedness to the monumental Catalogus Catalogorum of Dr. Aufrecht. But even that catalogue leaves many things doubtful and necessarily gives meagre information. For removing such doubts I was compelled to read and compare the original catalogues of Sanskrit mss. such as that of the India Office, the Notices of Sanskrit mss. by Dr. Mitra and and M. M. Haraprasāda. Besides the third part of Aufrecht's Catalogue was published in 1903. Since then several other catalogues, such as the Descriptive Catalogues and Triennial Catalogues of the Madras Govt. mss. Library, Notices of mss. (new

series, part III) by M. M. Haraprasād Śāstri, Catalogue of Palmleaf and Paper mss. of Nepal Durbar Library by M. M. Haraprasad Śāstri, Hultzsch's Report (part III), Catalogue of Central Provinces Sanskrit mss. by Rai Bahadur Hiralal and Catalogue of the mss. collected by the Bihar and Orissa Govt. (vol. I), have been published. Moreover I have consulted hundreds of mss. from collections like those at the Deccan College (now in the Bhandarkar O. R. Institute at Poona), at the Ānandāśrama Institution (Poona), the Bhadkamkar memorial collection started by Prof. H. D. Velankar in Bombay at the Wilson College and the vast collection of the Baroda Oriental Institute. In preparing this list I give wherever possible and desirable the names of the authors and of their ancestors, the names of the works quoted by them or of the works that quote them, the age of the work (or of the mss.) their contents &c. In most cases the very name of the work indicates its subject-matter. In spite of all this many doubtful points are still left. Various circumstances tend to create confusion in preparing such lists as are offered here. The same work appears under two, three or even more names in the mss. and the catalogues. Sometimes the names of the authors and even their fathers' names are the same as in the case of Divākara, son of Mahādeva and Śaṅkara, son of Nīlakaṇṭha. Very often portions of a large work appear separately as distinct works in the Catalogues. The same author appears under several forms, as Narasiṁha and Nṛsiṁha, Nāgeśa and Nāgoji. I have made great efforts to remove such doubts as far as I could and hope that I have been able to make my own humble contributions to the work so ably done by Aufrecht and others. I do not give references to catalogues in the case of each work, nor do I give all possible references to catalogues against each entry. Only in imporant cases have I given references to catalogues. It has been my endeavour to give earlier references to works and authors wherever I could than those given by Aufrecht and to find out the age of a work or author by resort to various devices. Only a detailed comparison with Aufrecht can show this, which task I must in all humility leave to the readers who will use this list. One more feature of this list to which I wish to draw the attention of the reader is that I have pointed out what works have been printed. In doing this I generally refer only to well-known series and editions like the Bombay Sanskrit series,

the Benares Sanskrit series and have not set out editions to which very few can have access. For those who want exhaustive information on this point, the catalogues of printed works in the British Museum Library which have now been brought up to 1928 will be found helpful.

Besides the abbreviations given at the beginning of this work, the following abbreviations have been employed in this list and the next.

APPENDIX B

LIST OF AUTHORS ON DHARMAŚĀSTRA

While preparing this list, great difficulties were experienced in stating all the works composed by an author. In the case of such names as Ananta, Kṛṣṇa, Gaṅgādhara, Nārāyaṇa, Rāmakṛṣṇa, Śaṅkara, which are extremely common, the only method that could be followed, in the absence of materials to identify the authors bearing these names, was to place the same name several times in the list against the work composed by that author. Since the authors themselves very often convey no more information than their own names and since some of the reports on the search for mss. do not give even what little information about the author can be gathered from the ms. of his work, Aufrecht also was compelled to follow this method. In order to avoid repetition and save space, I have not repeated in this list the information that was given under the works contained in the list A. Dates are given principally under the names of authors and sometimes under works also. For further information readers will have in many cases to refer to the works put down as composed by an author. In the case of authors who have written on several śāstras, their works on dharmaśāstra alone have been mentioned. Wherever possible parentage has been noted and dates assigned. In a few cases information which became available after list A was prepared has been incorporated here.

अखण्ड a. of अखण्डादर्श.

अखण्डानन्दमुनि, disciple of अखण्डानुभूति ; a. of महाविष्णुपूजापद्धति.

VOL. II PART I

PREFACE

It is a little over ten years since the first volume of my History of Dharmaśāstra was published. In the preface to that volume I expressed the hope that time and health permitting I might issue in a few years the second volume dealing with the development of the various subjects comprised in Dharmaśāstra. For several years thereafter whatever leisure I could secure from professional work was devoted to the collection and orderly assortment of the vast Literature on Dharmaśāstra. After my return from a few months' visit to Europe in 1937 I commenced the work of writing the second volume. It soon became apparent to me that to compress within the limits of a single volume the development of the thousand and one topics that fall within the purview of Dharmaśāstra would present only a scrappy and faint outline of the whole field. To add to the difficulties of my task my old painful complaint (duodenal ulcer) recurred with far greater virulence than before, so much so that, partly on medical advice and partly out of despair, in October 1938 I gave up the work altogether. When relief did not come even after six months' total abstinence from literary labours I resumed, in spite of my extremely painful complaint, the work of writing, for fear that otherwise the extensive materials that I had been collecting for nearly two decades might be entirely lost to the world of Sanskrit scholars and that my labours might be altogether wasted. Being afraid that my strength and resolution may not last till the completion of the rather ambitious undertaking, I decided upon bringing out in two volumes the development of the various subjects comprised in Dharmaśāstra. The present volume contains the treatment of varṇa and āśrama, the saṁskāras, āhnika and ācāra, dāna, pratiṣṭhā and utsarga, and śrauta (vedic) sacrifices. The next volume (the last) will deal with the following topics: vyavahāra (Law and procedure), āśauca (impurity on birth and death), śrāddha, prāyaścitta, tīrtha, vrata, kāla, śānti, the influence of the Pūrva-mīmāṁsā and other śāstras on Dharmaśāstra, customs and usages modifying Dharmaśāstra, the philosophical background of Dharmaśāstra, and future developments in Dharmaśāstra. Looking to my past performance I am unwilling to make any promise about the time when the next volume may be

expected to be published. I may state, however, that in view of the fact that at present I am in much better health than I have been for several years I shall try to publish it in three years more.

Excellent works dealing with distinct topics of Dharmaśāstra have been given to the world by eminent scholars. But so far as I know no writer has yet attempted single-handed to survey the whole field of Dharmaśāstra. From that point of view this volume partakes of the nature of a pioneer undertaking. It is therefore to be expected that such an ambitious project will manifest the defects of all pioneer work. The circumstances (adverted to above) in which this work had to be written and the great hurry with which it had to be rushed through are other factors that are responsible for the awkward or obscure expressions and the errors that it may contain. I mention these matters for lessening the surprise that such blemishes might lead my friends to feel and not for blunting the edge of adverse criticism. The critic is certainly entitled to mercilessly criticize the work for its shortcomings and mistakes. Some readers may complain that the present work is prolix, while others may say that the space devoted to several topics is meagre. I have tried to pursue a middle course.

There was great temptation throughout this work to compare ancient and medieval Indian customs, usages and beliefs as disclosed by dharmaśāstra works with those of other peoples and countries. But I have tried to omit, as far as possible, such comparisons. Whenever I indulge in them I do so for several reasons. It is the fashion among many writers, both European and Indian, to hold the caste system and the dharmaśāstra view of life responsible for most of the evils from which India suffers at present. To a very large extent I do not subscribe to that view. I have endeavoured to show that human nature being the same in essentials throughout the world, the same tendencies and evils manifest themselves in all countries, the same abuses prevail and the same perversions of originally beneficent institutions take place everywhere and anywhere, whether particular countries or societies are within the grip of the caste system or any other casteless system. Undoubtedly the caste system has in fact produced certain evils, but it is not singular in this respect. No system is perfect and immune from evil effects. Though I have been brought up in the midst of the Brahmanical system, I hope it will be conceded by scholars

that I have shown both sides of the picture and that I have endeavoured to write with detachment.

A few words must be said about the extensive quotations from Sanskrit works and the references to modern Indian Legislation and case-law. For those who cannot read English (most *pandits* and *śāstris* do not) the quotations will be of great help in understanding at least the trend of the arguments. Besides Indian scholars are as a class poor and cannot afford to purchase numerous books. Nor are there many good libraries in India where all works of reference can be had. For all these reasons thousands of quotations have been cited in the footnotes. The quotations are mostly drawn from published works and references to mss. are few and far between. I hope that the numerous quotations will not intrude themselves on the attention of those who want to read only the English portion of the work. Legislative enactments and case-law have been referred to for showing that many regulations of dharmaśāstra are still very much alive, that they govern the every-day life of Hindus and permeate all classes of Hindu society in spite of the fact that a considerable part of dharmaśāstra has become obsolete. Similar remarks apply to the numerous references to inscriptions on stone and copper. These latter serve to prove that rules laid down in the dharmaśāstra were throughout two thousand years observed by the people and enforced by kings and that such rules were not mere precepts composed by dreamers or scholastic pedants.

I acknowledge with great pleasure that I am under deep obligations to many predecessors and workers in the same and other fields and to many friends. Among the works to which I had to refer constantly and from which I derived the greatest benefit I must specially refer to the following: Bloomfield's Vedic Concordance, the Vedic Index of Professors Macdonell and Keith, the Sacred Books of the East edited by Max Müller (vol. II, VII, XII, XIV, XXV, XXVI, XXIX, XXX, XXXIIII, XLI, XLIII, XLIV). As I was handicapped by the fact that I know little German and less French, I could not fully utilise all the work done by modern European scholars. I am highly obliged to Paramahaṁsa Kevalānanda Svāmī of Wai for constant help and guidance (particularly in the śrauta portion); to Chintāmaṇśāstri Datar of Poona for assistance in the chapter on darśapūrṇamāsa and for carefully going through the other chapters on śrauta; to Mr. Keshav Lakshman Ogale for his work on a

portion of the Index; to Tarkatīrtha Raghunāthaśāstrī Kokje for reading through the whole work and suggesting additions and emendations.

Besides, assistance in various ways during the progress of the work for over three years was very kindly rendered by a host of friends, among whom I should like to make special mention of Prof. H. D. Velankar, Prof. Rangaswami Ayyangar Prof. P. P. S. Śāstrī, Dr. Alsdorf, Mr. Bhabatosh Bhattacharya, Mr. N. G. Chapekar, Mr. G. H. Khare, Mr. N. C. Bapat, Pandit Rangacharya Raddi, Mr. L. S. Dravid (a Sāmavedī of Poona), Pandit S. D. Satavlekar, Mr. P. K. Gode. Thanks are due to all these and other friends for their help and interest in this volume. I must state, however, that I alone am responsible for the views and mistakes contained in this work.

In a work containing thousands of quotations and references it is very likely that many slips have occurred. Besides it is very much to be regretted that several misprints have crept into the footnotes by the loss or displacement of dots and other loose parts of Sanskrit letters in the process of printing.

CHRONOLOGICAL TABLE

(of important works and authors referred to in this volume)

N. B.—Some dates, particularly of ancient works, are conjectural and only tentative.

4000 B. C.-1000 B. C.—The period of the Vedic Saṁhitās, Brāhmaṇas and Upaniṣads. It is possible that some hymns may go back to a period even earlier than 4000 B. C. and that some Upaniṣads (even out of those that are regarded as the principal and the earliest ones) are later than 1000 B. C.

800 B. C.—500 B. C.—The Nirukta.

800 B. C.—400 B. C.—The principal śrauta sūtras (of Āpastamba, Āśvalāyana, Baudhāyana, Kātyāyana, Śāṅkhyāyana, Lātyāyana, Drāhyāyaṇa, Satyāṣāḍha) and some of the gṛhya sūtras (Āśvalāyana, Āpastamba &c.).

600 B. C.—300 B. C.—The dharmasūtras of Āpastamba, Gautama, Baudhāyana, Vasiṣṭha and the Gṛhya-sūtras of Pāraskara, Baudhāyana and some others.

600 B. C.—300 B. C.—Pāṇini.

500 B. C.—200 B. C.—Jaimini's Pūrvamīmāṁsā-sūtra.

300 B. C.—100 A. D.—Kauṭilya's Arthaśāstra

150 B. C. —Mahābhāṣya of Patañjali.

200 B. C.—200 A. D.—Manusmṛti.

100 A. D.—300 A. D.—Yājñavalkya-smṛti.

100 A. D.—300 A. D.—Viṣṇudharmasūtra.

100 A. D.—400 A. D.—Nāradasmṛti.

200 A. D.—500 A. D.—Vaikhānasa-smārtasūtra.

200 A. D.—500 A. D.—Śabara, com. of Jaimini.

300 A. D.—500 A. D.—Bṛhaspatismṛti (not yet found).

300 A. D.—600 A. D.—Some of the extant purāṇas viz. Vāyu, Viṣṇu, Mārkaṇḍeya, Kūrma, Matsya.

400 A. D.—600 A. D.—Kātyāyanasmṛti (not yet found).

505 A. D.—587 A. D.—Varāha-mihira, author of Bṛhatsaṁhitā.

650 A. D.—750 A. D.—Tantravārtika of Kumārila.

788 A. D.—820 A. D.—Śaṁkarācārya, the great Advaita philosopher.

600 A. D.—900 A. D.—Most of the other smṛtis and some of the purāṇas.
800 A. D.—850 A. D.—Viśvarūpa, com. of Yājñavalkya.
900 A. D. —Medhātithi, com. of Manu
1100 A. D. —Mitākṣarā of Vijñāneśvara.
1100 A. D.–1150 A. D.—Kalpataru of Lakṣmīdhara.
1100 A. D.–1150 A. D.—Jīmūtavāhana.
1125 A. D. —Aparārka.
1150 A. D.–1200 A. D.—Smṛtyarthasāra.
1200 A. D.–1225 A. D.—Smṛticandrikā.
1150 A. D.–1300 A. D.—Haradatta.
1150 A. D.–1300 A. D.—Kullūka.
1260 A. D.–1270 A. D.—Hemādri's Caturvargacintāmaṇi.
1310 A. D.–1360 A. D.—Caṇḍeśvara, author of the Gṛhastharatnākara and other Ratnākaras.
1300 A. D.–1380 A. D.—Mādhavācārya, author of Parāśara-Mādhavīya.
1360 A. D.–1390 A. D.—Madanapārijāta.
1425 A. D.–1450 A. D.—Madanaratna.
1520 A. D.–1570 A. D.—Raghunandana.
1610 A. D.–1640 A. D.—Kamalākarabhaṭṭa, author of Nirnayasindhu and Śūdrakamalākara.
1615 A. D.–1645 A. D.—Nīlakaṇṭha, author of Saṁskāra-mayūkha and other Mayūkhas.
1610 A. D.–1640 A. D.—Mitra Miśra, author of Vīramitrodaya.
1650 A. D.–1680 A. D.—Anantadeva, author of Saṁskāra-kaustubha.
About 1686 A. D.—Smṛtimuktāphala of Vaidyanātha.
1700 A. D.–1750 A. D.—Nāgojībhaṭṭa.
1750 A. D.–1820 A. D.—Bālambhaṭṭa, author of Bālambhaṭṭī.
1790 A. D. —Dharmasindhu (of Kāśīnātha).

SYNOPSIS OF CONTENTS

CHAP. I. 1—18

Topics of dharmaśāstra. Various divisions of *dharma*. Dharmas common to all (sādhāraṇa-dharma). Truth, love, charity, self-restraint. Standard of moral values. Four puruṣārthas (goals of human existence) and their gradation. Limits of Āryāvarta. Bharatavarṣa.

CHAP. II. 19—104

Varṇa. High eulogy and condemnation of caste system. Characteristic features of modern caste system. History of the word varṇa. Ārya and dāsa or dasyu. Viś in the Ṛgveda. Position of Śūdra in Vedic Literature. Position of the three higher varṇas *inter se*. Professions and crafts in Vedic Saṁhitās. Rathakāra and Niṣāda. Propositions deducible from Vedic Literature. List of various crafts and avocations culled from Vedic Literature. Ramifications of caste traced by dharmaśāstra writers to mixed unions. Two postulates as to castes in dharmaśāstra writers. *Anuloma* and *pratiloma* castes. *Jāti*. Status of children of mixed castes. *Varṇasaṁkara*. *Jātyutkarṣa* and *Jātyapakarṣa*. Professional castes and guilds. List of castes mentioned by works from 500 B. C. to 1000 A. D. Revolt against the caste system in the Mahābhārata. A few of the castes mentioned by medieval works.

CHAP. III. 105–164

Duties, disabilities and privileges of varṇas. Brāhmaṇa's special privileges and duties—study of veda, teaching the veda, officiating at and performing sacrifices, making and receiving gifts. Rules about receiving gifts. Special duty of śūdras to serve higher castes. Divisions of śūdras. Brāhmaṇa in distress may do the work specially meant for kṣatriyas and vaiśyas. Brāhmaṇa and money-lending, agriculture, sale and barter as means of livelihood in distress. Begging. High eulogy of brāhmaṇas. Enumeration and discussion of special privileges claimed by brāhmaṇas. Disabilities of śūdras, viz. not authorized to study the veda nor to perform vedic sacrifices with vedic mantras, liability to receive higher punishment for certain offences, not to hold high offices like that of judge.

CHAP. IV. 165–179

Untouchability. Hardly any Vedic passage supports it. *Antyajas* according to the smṛtis. Rules about shadow of untouchables. Public roads and untouchables. Matters in which immediate relief required.

CHAP. V. 180–187

Slavery. Existence of slavery in Vedic times. Kinds of slaves in the smṛtis. Manumission of slaves.

CHAP. VI. 188–267

Saṁskāras. Purpose of saṁskāras. Divisions of saṁskāras. Divergence as to number of saṁskāras. List of saṁskāras named by all or most of the smṛti writers. Saṁskāras of śūdras. Easy expiation provided for non-performance of saṁskāras. Garbhādhāna known from the times of the Atharvaveda. Procedure of Garbhādhāna in the Bṛhadāraṇyaka upaniṣad and smṛtis. Whether it is a saṁskāra of the woman or of the child. Altar in grhya rites. *Homa.* Preliminary rites in all saṁskāras such as Gaṇapatipūjana, Puṇyāhavācana, Mātṛkāpūjana, Nāndīśrāddha. *Puṁsavana. Anavalobhana. Sīmantonnayana. Viṣṇubali. Soṣyantīkarma. Jātakarma* and several component parts of it such as homa, *Medhājanana. Nāmakaraṇa.* How names were given at various periods; several names for the same person. Rules about names. *Karṇavedha. Niṣkramaṇa. Annaprāśana. Varṣavardhana. Caula. Vidyārambha.*

CHAP. VII. 268–415

Upanayana. Meaning of the word. Origin and development of this sacrament. It implies gāyatryupadeśa. Ancient features of upanayana. Originally a simple ceremony. The proper age for upanayana for the three varṇas. The auspicious time for it. Rules about the skin, the garments, the girdle and the staff of the brahmacārin of different varṇas. The preliminary rites of Upanayana such as homa. The principal rites of upanayana. History of *yajñopavīta* from ancient times. Rules for manufacturing and wearing yajñopavīta. Whether women had upanayana performed and could wear yajñopavīta. Wearing of yajñopavīta given up by kṣatriyas in the first few centuries after Christ. Whether upanayana performed for the blind, the deaf and dumb, idiots &c. Upanayana of mixed castes and of the aśvattha tree. Imparting of sacred Gāyatrī to the student.

Vyāhṛtis and ' om '. Eulogy of Gāyatrī. The dharmas (duties) of brahmacārins. Bhikṣā (begging) for food by brahmacārin. Performance of Saṁdhyā twice daily and rules about the principal elements of saṁdhyā, such as ācamana, prāṇāyāma, mārjana, aghamarṣaṇa, arghya to the sun, japa of Gāyatrī, upasthāna (worship). Nyāsas and Mudrās. Study of the veda, the first duty. Features of the ancient educational system, such as oral instruction, teaching without stipulating for a fee, student's stay with the teacher. Qualifications of a good teacher and the qualities of a good pupil. Students did work for the teacher. Rules about honouring the teacher and elders, bowing to them and about the return of greetings. Saluting women relatives and the wife of the teacher. Rules about showing courtesy and precedence on public roads. Grounds of showing respect. Duration of student-hood. Subjects of study at various periods. Corporal punishment of pupils. Education of kṣatriyas, vaiśyas, śūdras and of women. Merits and defects of the ancient system of education. The *Veda-vratas.* Perpetual (naiṣṭhika) students. *Patitasāvitrīka* (whose upanayana had not been performed). Whether kṣatriyas and vaiśyas exist in the Kali age. The Vrātyastoma for those whose upanayana had not been performed at all. Taking back those who had been forcibly converted or who belonged to other faiths. Tolerance in ancient India. Absorption of foreign elements. *Punarupanayana* (performing upanayana again). *Anadhyāya* (cessation of study) on various days and for various reasons. *Keśānta* or *Godāna. Snāna* or *Samāvartana* (the student's return from the teacher after finishing Vedic study). Rules of conduct for *snātakas.*

CHAP. VIII. 416–426

Āśramas. Origin and development of the idea of āśramas (stages of life). Number of āśramas four from the times of the most ancient dharmasūtras. Manu's theory. Brahmacarya and householder's stage well-known even to the Ṛgveda. Vaikhānasa and yati in Vedic Literature. Three āśramas expressly mentioned in the Chāndogya Upaniṣad. Idea of mokṣa (release from saṁsāra). Varṇa and āśrama complementary. Three different points of view about the four āśramas.

CHAP. IX. 427–541

Marriage. The most important saṁskāra of all. Texts do not point to a society where there was promiscuity and no

marriage. Purposes of marriage. Qualifications of a desirable bridegroom. Rules for the selection of a bride. Lakṣaṇas (indicatory characteristics), *bāhya* (visible) and *ābhyantara* (invisible or inferrible). Four or five grounds for preferring a particular girl. Selecting a girl by asking her to take one out of several lumps of clay gathered from various places. In ancient times brotherless maidens not accepted as brides. No unmarried woman was deemed in medieval times to go to heaven. Restrictions as to caste, gotra, pravara and sapiṇḍa relationship. Breach of these rules rendered a so-called marriage null and void. Age of marriage for men not fixed. Age of marriage for girls varied at different periods. In the ancient sūtras girls were married about the time of puberty. Reasons for insistence on pre-puberty marriages in Yājñavalkyasmṛti and other works not clear. Examples of inter-caste marriages in Vedic Literature, in dharma and gṛhya sūtras and smṛtis and in inscriptions. Anuloma marriages allowed till about the 9th century A. D. Sapiṇḍa relationship explained in the Mit. Rules about prohibition of marriage on the ground of sapiṇḍa relationship. Conflict of texts as to these rules. Marriage with one's maternal uncle's daughter. Conflict on this point among medieval writers and among several castes. Narrowing of sapiṇḍa relationship permitted by writers of digests only on the ground of usage. Meaning of '*viruddhasambandha*.' Sapiṇḍa relationship of the adopted son. Meaning of sapiṇḍa according to Dāyabhāga and Raghunandana. Marriage between sagotras and sapravaras forbidden. Meaning of 'gotra' and 'pravara' in Vedic works. Gotra and pravara of importance in several matters. Gotra in the sūtras and digests. Divisions and sub-divisions of gotras. Each gotra has one or more pravaras. Gotras of kṣatriyas and vaiśyas. Names of ksatriya kings among gotras and pravaras. Marriage of sagotras and sapravaras void according to the writers of digests. Persons that have power to give a girl in marriage. Sale of girls in marriage in ancient times. Taking monetary consideration for one's daughter condemned. Father's power over his children. Conflict of views among writers as to ownership over one's wife and children. Infanticide, medieval and modern. Auspicious time for marriage. Medieval works introduced difficulties on astrological grounds. Forms of marriage. Meaning of rākṣasa and paiśāca marriages. *Svayaṁvara*. Only two forms of marriage in vogue in modern times. Procedure of marriage in the Ṛgveda and in the gṛhya sūtras. List of the several elements in the marriage rite and

their description. When marriage becomes complete and irrevocable. Marriage brought about by force or fraud.

CHAP. X. 542-549

Madhuparka. Procedure of it from the sūtras. *Arkavivāha* (marriage with the arka plant). *Parivedana* (marrying before an elder brother or sister).

CHAP. XI. 550-582

Polygamy, polyandry, rights and duties on marriage. No evidence for polyandry in Sanskrit Literature except in the case of Draupadī. First duty of wife was to co-operate with the husband in all religious matters. Wife not authorised to perform religious rites independently or without husband's consent. Precedence among co-wives in religious matters. Theory of debts with which every man was supposed to be born, one being the debt to his ancestors and discharged by procreating sons. Duties of wife dwelt upon at great length in all smṛtis and digests. Foremost duty of wife is to obey her husband and honour him as god. Ideal of a *pativratā*. Wife's conduct when husband was away from home on a journey. Supernatural powers ascribed to *pativratā*. Wife's right of residence and maintenance. Husband's power of correction. Humane treatment even when wife guilty of adultery. No identity of husband and wife for secular or legal purposes. Position of women in ancient India. Estimate of the character of women in Sanskrit works. Passages condemning women's character. High eulogy of and reverence for the mother.

CHAP. XII. 583-598

Duties of widows. Rules of conduct for widows for one year after the death of the husband. In widowhood woman to lead an ascetic life, avoid luxuries like perfumes, flowers, chewing betelnut. Widow (except one's mother) declared to be most inauspicious. Her rights in a joint family, and as heir to husband's separate property. Widow's position improved by recent legislation. The practice of tonsure of brāhmaṇa widows has no sanction in the vedas and smṛtis (excepting one or two). Examination of texts relied upon in support of this practice. Only Skandapurāṇa and medieval digests insist on tonsure. Practice gradually evolved from about 10th or 11th century. Sentiment that a woman should not be killed on any account.

Position of women became assimilated to that of śūdras in religious matters. Certain advantages conceded to women. Practice of *purda* did not exist for women except for queens and ladies of high or noble rank.

CHAP. XIII. 599-607

Niyoga. Great divergence of views about the origin and purpose of this practice. Stringent conditions were laid down by smṛtikāras before niyoga could be resorted to. Breach of the conditions severely condemned and made punishable. Some even very ancient writers on dharma did not allow this practice. The Mahābhārata is full of examples of niyoga. Some writers held that texts permitting niyoga applied to śūdras or to girls who were only promised in marriage to a person but not actually married to him (as he died in the meantime). Three views upon the question 'to whom the child born of niyoga belonged.' Niyoga forbidden in the Kali age by Bṛhaspati and other smṛti writers.

CHAP. XIV. 608-623

Remarriage of widows. The word 'punarbhū' does not necessarily mean 'remarried widow'. Nārada on the kinds of *punarbhūs* and *svairiṇis.* Baudhāyana and Kaśyapa on 7 kinds of punarbhū. Smṛtis (except those of Vasiṣṭha, Nārada and one or two others) prohibit remarriage of widows. Rules for a wife whose husband is unheard of for many years. Hindu Widow's Remarriage Act of 1856. Appalling number of child widows. Verses of Ṛgveda and Atharvaveda supposed to refer to remarriage of widows examined. Divorce unknown in Vedic or Dharmaśāstra Literature. Kauṭilya on divorce. Divorce law in England and Roman Catholic countries.

CHAP. XV. 624-636

Satī. Forbidden in India from 1829. Practice of widow burning obtained in many countries. Practice of Satī very limited in ancient times. *Sahagamana* and *anumaraṇa.* Brāhmaṇa widows were not allowed anumaraṇa. References to practice of Satī in classical Sanskrit Literature and epigraphic records. Rewards promised to *Satī.* Some commentators were opposed to this practice. Restrictions imposed against widow-burning by the smṛtis. Procedure of the rite of widow-burning. Widow-burning more prevalent in Bengal than anywhere else owing to the higher rights of succession granted to wives.

CHAP. XVI. 637-639

Veśyā. The institution existed from Vedic times. The rights of concubines to maintenance.

CHAP. XVII. 640-695

Āhnika and ācāra. Importance of the stage of householder. Gṛhasthas grouped into śālīna and yāyāvara. Duties of householders described in detail in many smṛtis and digests. Various ways of dividing the day. Smṛtis usually divide the day into eight parts. Actions to be done on getting up from bed, such as hymns of praise to God, repeating the names of famous personages like Nala and of persons that are supposed to be *cirajīvins*. Auspicious and inauspicious sights on getting up from bed. Rules about answering calls of nature. Cleanliness of body (*śauca*) in various ways. Ācamana (sipping water). *Dantadhāvana* (brushing the teeth) existed from the most ancient times. What twigs to be used for it. Times when there is to be no brushing of teeth. *Snāna* (bath). Kuśas necessary in most religious acts. Rules about collecting kuśas. Snāna twice a day or thrice according to some. No bath at night (except on rare occasions). Natural water preferred to water drawn from wells or hot water. Procedure of bathing. Rules about the clay to be employed for smearing and cleaning the body. Ten good results of a bath. Six varieties of bathing with water. How one who is ill is to be purified. *Tarpaṇa* as a constituent part of *snāna*. Clothes to be worn by a householder. Making marks on the forehead after bathing. *Ūrdhvapuṇḍra* and *Tripuṇḍra*. Śaiva and Vaiṣṇava sectarians condemning each other's marks. *Saṁdhyā* after bath. *Homa*. Two views about performing it before or after sunrise. Agnihotra twice daily. Three or five or six fires. When to begin maintaining gṛhya fire. Materials for *havis*. Homa to be offered by oneself or by one's son, pupil, brother, sister's son or a similar relative. Wife or unmarried daughter may offer homa in gṛhya fire if householder be ill. *Japa* of Vedic texts. What are maṅgala (auspicious) objects. The matters described so far occupy first eighth part of the day. In 2nd part revision of Vedic texts, collecting fuel sticks, flowers, kuśas &c. In 3rd part one was to find out means of maintenance and to earn wealth. In 4th part mid-day bath. Then *tarpaṇa* of gods, sages and *pitṛs*. A brief tarpaṇa is also prescribed.

CHAP. XVIII. 696-704

Mahāyajñas (five daily observances or sacrifices). These are mentioned in the Śatapatha Brāhmaṇa and Taittirīya Āraṇyaka. Mahāyajñas distinguished from śrauta rites in two ways. Sentiments that prompted the five yajñas in very remote days. Later on purpose of Mahāyajñas stated to be atonement for injury to life caused by daily acts. The five yajñas in order of performance are brahmayajña, devayajña, bhūtayajña, pitṛyajña and manuṣya-yajña. *Brahmayajña.* Earliest description in Śatapatha Br. and Tai. Ār. Brahmayajña for Ṛgvedins described.

CHAP. XIX. 705-740

Devayajña. In sūtras homa is Devayajña. In medieval times homa receded into background and *devapūjā* took its place. Discussion whether images of gods were known in Vedic times. Meaning of *Śiśnadeva.* Phallic emblems at Mohenjo-daro. Liṅga worship. Images known long before Pāṇini. Erection of temples and worship of images, whether borrowed or indigenous. Substances from which images were made. Principal gods of whom images were worshipped. Ritual of image worship. Who are entitled to perform devapūjā. Śālagrāma and other sacred stones. Pañcāyatanapūjā. Ten *avatāras* of Viṣṇu. Germs of the theory in Vedic Literature. When Buddha came to be looked upon as an *avatāra* of Viṣṇu. Why Buddhism disappeared from India. Evidence for religious persecution in India very meagre. Śiva worship. Worship of Gaṇeśa and Dattātreya. Earliest description of the worship of Viṣṇu and Śiva. The 16 modes of worship (*upacāras*). Flowers in the worship of different gods. *Tāmbūla.* Namaskāras to the sun. Worship of Durgā. Analysis of devapūjā in modern times.

CHAP. XX. 741-748

Vaiśvadeva. According to some it comprises three yajñas, viz. to gods, bhūtas and pitṛs. Deities of Vaiśvadeva. Usually performed only once in the noon. Procedure of Vaiśvadeva. Views about Vaiśvadeva in relation to śrāddha. *Baliharaṇa* or *bhūtayajña.* Daily pitṛ-yajña.

CHAP. XXI. 741-756

Nṛyajña or *Manuṣyayajña* (honouring guests). Guests honoured from Ṛgveda downwards. Who is an *atithi.* Modes

of showing honour to guests. Motive of the injunction about guests was universal kindliness. Taking leave of a guest.

CHAP. XXII. 757-806

Bhojana (taking meals). Importance attached to purity of food. Rules about *bhojana* in Vedic Literature. Direction in which to take food. Times of taking food. Vessels to be used in *bhojana*. Preliminaries before bhojana (such as ācamana, prāṇāhutis &c.). Posture at time of eating. How much to eat. How paṅktis (rows of dinners) were distinguished. Who are *paṅktipāvana* brāhmaṇas. Etiquette at time of bhojana. Occasions (like eclipses) when abstaining from food was prescribed. What food should or should not be eaten. Various grounds on which food was forbidden. Flesh-eating in Vedic times. Sacredness of cow. *Pañcagavya*. Occasions when cow could be offered in sacrifices. Rules about the flesh of beasts, birds and fishes. Causes of the giving up of flesh-eating. Kṣatriyas have been meat-eaters from ancient times. Rules about taking milk and its products and about certain herbs and vegetables. Exhaustive list of persons whose food may not be taken. Great fluctuations about the rules as to whose food may not be taken by a brāhmaṇa. Laxity about food prepared with ghee, oil or milk. Food from five classes of śūdras could be taken by brāhmaṇas in the times of sūtras, but later on this was forbidden. Rules about persons who could cook and serve food for brāhmaṇas. Drinking liquor in ancient times. All intoxicants forbidden to brāhmaṇas from sūtra times, but some intoxicants allowed to kṣatriyas and others. *Madyas* of various kinds. *Tāmbūla* after bhojana. Acts to be done after bhojana. Rules about sleeping. Sexual intercourse between husband and wife. Rules about *Rajasvalā* (a woman in her monthly illness). Rules about the distribution of the king's duties—in the several parts of the day and night.

CHAP. XXIII. 807-818

Upākarma (starting of the session of vedic studies) and *utsarjana* (cessation from vedic studies). Divergence about time of upākarma. Explanation of the importance attached to the month of Śrāvaṇa and the Śravaṇa constellation. Procedure of upākarma in ancient times. Analysis of the constituents of upākarma in modern times. Holiday after upākarma. Divergence about times of utsarjana. Description of modern *utsarjana*.

CHAP. XXIV. 819–836

Minor gṛhya and other rites. Pārvaṇa sthālīpāka. *Caitrī*. Sītāyajña. Śrāvaṇī and Sarpabali. Serpent-worship from ancient times. Festival in honour of Indra. *Aśvayujī*. *Agrayaṇa iṣṭi*. Āgrahāyaṇī. Śūlagava or Īśānabali. Vāstupratiṣṭhā, ancient and modern.

CHAP. XXV. 837–888

Dāna (gifts). Dāna is a special feature of householder's stage. Gifts highly extolled in the Ṛgveda. Gift of horses censured in some works. Gifts of land were not favoured in very early times. Difference between dāna, yāga and homa. Meaning of iṣṭāpūrta. All could make gifts (including women and śūdras). Persons fit and unfit to be donees. What things could be donated and what not. Three classes of things that could be given. Dānas of three kinds, viz. *nitya*, *naimittika* and *kāmya*. Making gifts in secret eulogised. Certain gifts should not be spurned. Gifts of certain things forbidden. Proper times for making gifts. Generally gifts not to be made at night. Gifts at times of eclipses, *saṁkrānti* and on *ayana* days specially recommended. Proper places for gifts. Presiding deities of various articles of gift. General procedure of making gifts. Kings were required to make various kinds of gifts to brāhmaṇas. Spending money for marriages of brāhmaṇas and settling them in houses highly eulogised. Gifts of land the most meritorious. Smṛti rules about land-grants followed in epigraphic records. Verses deprecating the resumption of gifts made by earlier kings. Prior gifts to temples and brāhmaṇas excepted in grants of villages. Taxes remitted in royal grants. The eight *bhogas* in relation to land grants. Discussion whether king is owner of all lands in the kingdom. Gifts called mahādānas described in purāṇas. Sixteen mahādānas. Procedure of Tulā-puruṣa and other mahādānas. Gift of cows highly extolled. Gifts of ten kinds called *dhenus* such as of ghee, jaggery &c. Ten kinds of gifts called *parvata* or *meru dānas* viz. of heaps of corn, salt, sesame &c. Establishing a pavilion for distributing water. Gift of books. Gifts for propitiating planets. Founding of hospitals. Expiations for accepting gifts which should not have been accepted. When gift becomes irrevocable. Kinds of invalid gifts. Gifts to dharma held void by modern courts.

CHAP. XXVI. 889–916

Pratiṣṭhā and *Utsarga* (founding of temples and dedication of wells &c.). Women and śūdras also could spend on *pūrta-*

dharma, though not on iṣṭa (vedic sacrifices). Charitable works for the benefit of the public came to be regarded as more meritorious than sacrifices. Procedure of dedicating a tank or well to the public in the sūtras. Procedure prescribed in purāṇas gradually superseded the sūtra procedure. Meaning of dāna, pratiṣṭhā and utsarga. Trees highly valued in ancient India. Trees supposed to save a man from hell just as a son did. Worship of trees. Consecration of images in temples. Image worship in a public temple or privately. Procedure of consecration of images according to the Matsya-purāṇa. In later times other details added from Tantra works. Three kinds of Nyāsas viz, mātṛkānyāsa, tattvanyāsa and mantranyāsa. Consecration of the image of Viṣṇu from Vaikhānasa Smārtasūtra. Practice of attaching dancing girls to temples is comparatively ancient. When re-consecration (punaḥ-pratiṣṭhā) becomes necessary. *Jīrṇoddhāra* (repairing or re-constructing a dilapidated temple &c.), time and procedure of. Founding of maṭhas (monasteries or colleges for teachers and pupils). Distinction between a temple and a maṭha. Maṭhas said to have been established by the great teacher Śaṁkarācārya. The origin of maṭhas in general. How property of maṭha devolves. Appointment and powers of the head of a maṭha. How rulers and courts in ancient and medieval times controlled administration of temple and maṭha properties. Modern legislation dealing with religious and charitable endowments. *Yogakṣema* is impartible. Control of founder on work dedicated to the public. Powers of a *shebait* to remove an idol or to establish another.

CHAP. XXVII. 917-929

Vānaprastha (forest hermit). Vaikhānasa, ancient word for vānaprastha. An ancient work called Vaikhānasa sūtra or śāstra. Time for becoming a vānaprastha. Principal points connected with being a vānaprastha. If he suffers from an incurable disease, he may start on the great journey till the body falls to rise no more. Intricate classification of vānaprasthas in Baudhāyana-dharma-sūtra and others. Members of all varṇas except śūdras could become vānaprasthas. Members of princely houses as vānaprasthas. Ending one's life by starting on the great journey (mahāprasthāna) or by fire or water or falling from a precipice when and why allowed. Historical examples of this practice. This practice prohibited in the Kali age. Most of the duties prescribed for vānaprasthas

are the same as those for saṁnyāsins. So vānaprastha stage forbidden in Kali age by the Nāradīya-purāṇa and other works.

CHAP. XXVIII. 930–975

Saṁnyāsa (order of ascetics). Life of giving up worldly ties, of begging and contemplation on the Absolute known to the earliest Upanisads. Jābālopaniṣad prescribes rules for ascetics. The most salient features of saṁnyāsa gathered from the dharmasūtras and smṛtis. Tridaṇḍi and ekadaṇḍi ascetics. Four kinds of ascetics, *kutīcaka*, *bahūdaka*, *haṁsa* and *paramahaṁsa* and their characteristics. Popular notion that the paramahaṁsa is beyond all rules and prohibitions combated by ancient texts. Vidvat-saṁnyāsa and vividiṣā-saṁnyāsa. The *turīyātīta* and *avadhūta* kinds of ascetics. Opinions as to whether saṁnyāsa was allowed only to brāhmanas or to all three varṇas. According to smṛtis and medieval works a śūdra could not become an ascetic. Women in rare cases adopted the ascetic mode of life. The word saṁnyāsa conveys two distinct ideas. Some held that saṁnyāsa was meant only for the blind and the cripple. Ascetics were to give up wife and home and were not to revert to householder's life. Ten orders of *advaita* saṁnyāsins following Śaṁkarācārya's doctrines and their maṭhas. Disputes among the heads of these maṭhas as to properties and ecclesiastical jurisdiction. How successors to the pontiffs of the maṭhas are appointed. How and why saṁnyāsins gave up doctrine of *ahiṁsā* in medieval times. A saṁnyāsin is severed from his family and loses rights of property in it. By custom certain saṁnyāsins called Gosāvis were allowed to have wives and concubines. Procedure of saṁnyāsa according to the sūtras. Procedure of saṁnyāsa according to Dharmasindhu. Principal elements are; eight śrāddhas, *sāvitrīpraveśa*, virajāhoma, declaration of leaving home, all wealth and desires and taking vow of ahiṁsā, giving up of topknot and sacred thread, teaching by guru of *pañcīkaraṇa* and *mahāvākyas* (like tat tvam-asi), giving of a new name by the teacher, yogapaṭṭa (p. 962), paryaṅka-śauca. Saṁnyāsa *in extremis* (āture-saṁnyāsa). Controversies about giving up śikhā and yajñopavīta. Daily duties of an ascetic. No impurity on his death for his relatives and *vice versa*. Ascetic heads of maṭhas claim in modern times jurisdiction in matters of caste, excommunication, expiations for lapses. In ancient times *pariṣads* (assemblies of learned

men) exercised these functions and kings acted on their advice. The number of persons required to constitute a parisad for deciding a doubtful point about dharma. Śiṣṭas constitute a *pariṣad*. Meaning of śiṣṭa. The council of eight ministers established by Shivaji and the duties of the Panditrao, one of these eight. Panditrao took advice of the pariṣads of learned brāhmaṇas on questions of re-admission of converts, expiations &c. Many features of asceticism are common to all religions. It is a partial truth that Indians have the highest regard for the ascetic.

CHAP. XXIX. 976–1008

Śrauta (Vedic) sacrifices. Deep study of vedic sacrifices essential for the proper understanding of Vedic Literature, for appreciating the influence of that Literature on varṇas. Chronology uncertain. Works, ancient and modern, on Vedic sacrifices. Jaimini on interpretation of Vedic texts relating to sacrifices. Cult of yajña existed in Indo-Iranian period. Literary and epigraphic evidence for the performance of Vedic sacrifices by kings after the advent of Buddha. Grants made by kings for enabling brāhmaṇas to perform agnihotra &c. The references to sacrificial matters in the Ṛgveda. General rules applicable in all sūtras. Mantras of four kinds, *ṛk*, *yajus*, *sāman* and *nigada*. Different kinds of ladles. Sacrificial utensils. The several fires. The five bhūsaṁskāras. *Agnyādheya*. Choosing the devayajana (place of worship). Procedure of agnyādheya. *Punarādheya*. *Agnihotra* in the morning and evening. Rules about agnihotra when the householder goes away from home either alone or with his wife.

CHAP. XXX. 1009–1090

Darśapūrṇamāsa (New moon and Full moon sacrifices). Time for starting the performance of darśapūrṇamāsa. Anvārambhaṇīyā iṣṭi, śākhāharaṇa, barhirāharaṇa (bringing bundles of kuśa grass), idhmāharaṇa (bringing fuel-sticks), *Sāyamdoha*. *Upavasatha* day. *Sānnāyya*. *Brahmavaraṇa* (choosing the brahmā priest). *Praṇītā* waters. *Nirvāpa* (taking out sacrificial material). Prokṣaṇa (sprinkling) of sacrificial material, utensils &c. The *Haviṣkṛt* call. Beating the grains of rice. Baking cake (puroḍāśa) on potsherds. Construction of vedi (altar). *Patnīsaṁnahana* (girding up the sacrificer's wife). Barhirāstaraṇa (strewing the vedi with kuśas). Fifteen Sāmidhenī verses. *Pravaramantra* (invocation of fire). The two āghāras

(pouring of ājya in a continuous stream). *Hotṛvaraṇa.* The *Prayājas* (five offerings). Vaṣaṭkāra. *Ājyabhāgas* (two). The principal sacrifice of portions of the cake. Offering to Agni sviṣṭakṛt. Cutting off a portion of the cake called prāśitra (for brahmā). *Iḍā* cut off from puroḍāśa. A thin long slice of puroḍāśa for yajamāna. Invocation of Iḍā by the hotṛ. Brahmā eats prāśitra, hotṛ eats avāntareḍā, all priests together with the yajamāna partake of iḍā. Division of puroḍāśa for Agni into four parts and eating of the portions by the four priests. *Mārjana* thereafter. Cooking a mess of boiled rice (called *anvāhārya*) as fee for the four priests. The three *anuyāja* offerings. Recitation of *sūktavāka.* Throwing of prastara bunch and śākhā into fire. Śaṁyuvāka. Throwing the *paridhis* on fire. *Patnīsaṁyājas. Phalīkaraṇahoma.* Samsthājapa by hotṛ. Samiṣṭayajus offerings. Adhvaryu and brahmā leave the sacrificial hall. Yajamāna takes Viṣṇu strides. Final prayer by yajamāna. *Piṇḍapitṛyajña.*

CHAP. XXXI. 1091-1108

Cāturmasyas (seasonal sacrifices). Four Cāturmāsyas each called a *parvan*, viz. Vaiśvadeva, Varuṇapraghāsa, Sākamedha and Śunāsīrīya, respectively performed on Full moon days of Phālguna, Āṣāḍha, Kārtika and on the 5th full moon day from Sākamedha or two or three days before it. Observances on all *parvan* days such as shaving head and face, not using a cot, avoiding meat, honey, salt and sexual intercourse. Five offerings common to all Cāturmāsyas. Cāturmāsyas may be performed throughout life or for one year. Three special offerings in Vaiśvadeva-parva. Nine *prayājas* and nine *anuyājas* in Vaiśvadeva. Varuṇapraghāsa performed in rainy season outside the house. Two vedis prepared, to north and south, respectively in charge of adhvaryu and pratiprasthātṛ. Procedure is like that of Vaiśvadeva. Four special offerings in this in addition to five common to all. Procedure of Varuṇapraghāsas. The wife has to declare or indicate if she has any paramour. Concluding avabhṛtha (bath) in a river or the like. Sākamedha requires two days. Three iṣṭis and a *mahāhavis* of eight offerings to eight deities. Then pitṛyajña (called mahāpitṛyajña) on a separate vedi. Also Traiyambaka homa offered to Rudra. Śunāsīrīyaparvan has three special offerings to Śunāśirau, Vāyu and Sūrya. Iṣṭi called Āgrayaṇa (offering of first fruits) in Śarad on Full moon day. Other iṣṭis performed for some specific objects e. g. putreṣṭi for son, Kārīrīṣṭi for rain &c.

CHAP. XXXII. 1109–1132

Nirūḍhapaśubandha or Paśubandha (animal sacrifice). A victim is offered in Somayāga also, but as part of it. Nirūḍhapaśu is an independent sacrifice to be performed by an *āhitāgni* every six months or once a year. Six priests required in this sacrifice. Procedure of animal sacrifice. Selecting a tree and making a yūpa (sacrificial post) and a head piece (caṣāla) for the post. Preparing a vedi and a raised platform on it called *uttaravedi* and a square hole thereon called *nābhi.* Animals sacrificed for Indra-Agni or Sūrya or Prajāpati. Eleven prayāja offerings. Verses from Āprī hymns employed. The eleven prayāja deities. Śāmitra fire for roasting omentum of the victim. Hotṛ's recitation of the Adhrigu formula. Choking to death or strangling of the he-goat. Omentum taken out and offered by the adhvaryu into Āhavanīya fire for Indra-Agni or Sūrya or Prajāpati. Six priests, sacrificer and his wife perform *Mārjana.* The limbs of the victim that are cut off, and portions of which are offered as paśu-puroḍāśa. Heart of victim is roasted with a pike on śāmitra fire and offered as *havis* to Manotā. Priests and sacrificer partake of *iḍā* constituted by remnants of the limbs of the victim. Upayāja offerings of a part of the entrails along with the Anuyāja offerings. The hotṛ repeats the formula called Sūktavāka. Maitrāvaruna throws his staff into fire. Offerings of Patnī-saṁyājas with portions of the tail. *Kāmyāḥ Paśavaḥ* (animal sacrifices from various desires). Ekādaśina, a group sacrifice of eleven victims.

CHAP. XXXIII. 1133–1203

Agniṣṭoma. Sacrifices are divided into *iṣṭi, paśu* and *soma.* Seven forms of soma sacrifices, Agniṣṭoma, Atyagniṣṭoma, Ukthya &c. Soma sacrifices divided into ekāha, ahīna and sattra. Jyotiṣṭoma, often identified with Agniṣṭoma, usually lasts for five days. Chief rites performed on those five days. Time for performing Agniṣṭoma. Priests invited and honoured with Madhuparka. Requesting the king for sacrificial ground (*devayajana*). Sacrificer and his wife undergo *apsu-dīkṣā* and subsist on milk or light food. Purification of both with bunches of darbhas. Procedure of dīkṣaṇīyā iṣṭi after which sacrificer comes to be called dīkṣita. Even a kṣatriya sacrificer was announced as a brāhmaṇa. Observances of the dīkṣita and his wife and people's conduct towards him. Observance of silence by sacrificer twice daily. The *prāyaṇīyā iṣṭi.* Purchase of Soma and the drama of higgling about its price. Cow offered as its price is taken back. Bundle

of Soma stalks placed on antelope skin spread on a cart, that is brought to the east of the prāgvaṁśa. Recital of the Subrahmaṇyā litany by the Subrahmaṇya priest. A goat is presented to king Soma. Oxen are released from the cart, soma bundle taken out of the cart, placed on a couch of udumbara wood and brought to the south of the āhavanīya. Ātithyeṣṭi (iṣṭi for hospitably receiving king Soma) follows. Then comes Tanūnaptra (a solemn covenant of the sacrificer and priests not to injure each other). Pravargya and Upasad follow. Pravargya was a sublime rite supposed to endow sacrificer with a new body. Not necessary in every Agniṣṭoma. The heated milk is called gharma and the pot of heated milk Mahāvīra or Saṁrāṭ. Wife was not to look at it (at least in the beginning), nor śūdras. On 2nd, 3rd and 4th days Pravargya and Upasad performed twice. How pravargya apparatus is discharged (udvāsana). *Upasad* is an iṣṭi. Mantras repeated in Upasad refer to sieges of iron, silver and gold castles. On 2nd day of upasads *Mahāvedi* is prepared, on which a quadrangular platform (called uttaravedi) is raised and a square hole called nābhi is made on which fire is brought on the 4th day from the original āhavanīya. Erection of the harvidhāna-maṇḍapa in which two carts are kept. Digging of four holes (called uparavas) below the forepart of the shafts of the southern cart. A mound (*khara*) to east of uparavas for keeping soma vessels on. Erection of sadas to the west of the havirdhāna maṇḍapa. Planting of an udumbara post in sadas. Preparing eight dhiṣṇyas (seats), six in sadas, one in the āgnīdhrīya shed and the eighth in the mārjālīya shed. On uparavas kuśas are spread, over which two boards of udumbara are placed and a hide thereon. On the hide are stones for crushing soma stalks. Offering of an animal to Agni-Soma. Then follow offerings of ājya called Vaiśarjina to Soma. Fire is carried to the uttaravedi, and established on āgnīdhra dhiṣṇya. Bringing Vasatīvarī water in a jar and keeping it in āgnīdhra shed. Last day is called 'sutyā'. Repeating of a long prayer called Prātaranuvāka by hotṛ long before day-break to Agni, Uṣas and Aśvins. Making ready of five offerings. Filling of *ekadhana* pitchers by adhvaryu and of *pannejana* vessel by the sacrificer's wife. Extracting Soma from a few stalks, filling the upāṁśugraha and offering its contents. Then comes *Mahābhiṣava* (principal pressing). Offering soma from various cups to several deities. *Viprud-ḍhoma.* Priests come creeping towards the north corner of the great vedi, where the

Bahiṣpavamāna laud is to be chanted by the udgātṛ, prastotṛ and the prati-hartṛ. Some of the other priests and the sacrificer become choristers. The nine verses of the Bahispavamāna stotra set out from the Ṛgveda and method of their manipulation when sung in the sāma chant exhibited. Notes on the parts and svaras of *sāmans*. Rites of offering the *savanīya* animal. The five savanīya offerings of cake &c. Offerings of soma from *dvidevatya grahas* (cups). *Camasonnayana* (filling of nine camasas) for the priests called Camasādhvaryus. The offering of soma from the cups called *śukra* and *manthin*. Two chips of wood offered to the asuras, Śaṇḍa and Marka. Acchāvāka priest's request and filling his camasa with soma Offering of *ṛtugrahas*. Ksatriyas were not authorised to drink soma. The hotṛ performs japa, āhāva (hotṛ's call) to which there is *pratigara* (response of adhvaryu), hotṛ offers prayer called tūṣṇīm-śaṁsa, twelve clauses of *nivid*, then hotṛ recites the *ājyaśastra*. Enumeration and distribution of the twelve stotras and śastras of Agniṣtoma. Explanation of *stoma*, *stobha* and *stotra*. Meaning of Rathantara and other sāmans. Chanting of stotras other than Bahispavamāna near audumbarī post in sadas. Four ājya-stotras in morning pressing. The 2nd śastra called Prauga recited by hotṛ and three more repeated by maitrāvaruṇa, brāhmanācchaṁsin and acchāvāka. At the end of morning pressing priests go out of the *sadas*. For the mid-day pressing priests again enter sadas. Procedure of mid-day pressing similar to that of morning pressing. The priest grāvastut wears the cloth, in which soma stalks were tied, as a turban and repeats many verses from the Ṛgveda. The chanting of the Mādhyandina-pavamāna-stotra. The dadhigharma rite, then the offering of paśu puroḍāśa and the five savanīya offerings (cake &c.). Distribution of dakṣiṇā to the several priests, sight-seers and others. The yajamāna throws antelope horn in cātvāla pit. Five offerings called Vaiśvakarmaṇa. The Marutvatīya śastra. Pṛṣṭha-stotra and Niṣkevalya śastra. Three more Pṛṣṭha stotras and three śastras recited by maitrāvaruṇa and two others. Procedure of evening pressing similar to mid-day pressing. Ārbhava-pavamāna chanted. Ṛbhus connected with third pressing. *Havis* prepared from savanīya paśu offered. Vaiśvadeva śastra. The Pātnīvata cup to Agni Patnīvat. Chanting of Yajñāyajñīya stotra also called Agniṣṭomasāman. Wife of sacrificer pours *pānnejana* water over her thigh and udgātṛ priest looks at her. Āgnimāruta-śastra recited by hotṛ. Hāriyojana cup offered to

Indra. All priests wait on āhavanīya with *Mindā* mantras. Avabhṛtha (final bath). All vessels except four sthālīs are thrown into water. Yajamāna casts antelope skin in cātvāla pit. Avabhṛtha sāman chanted. The *nidhana* of the sāman is repeated by all priests, yajamāna and his wife at three places on their way to reservoir of water. Yajamāna and wife enter water, rub each other's back. Handful of kuśa thrown in avabhṛtha iṣṭi. Puroḍāśa offered to Varuṇa and then to Agni and Varuṇa. The unnetṛ brings out yajamāna, wife and priests. They offer fuel sticks. The Udayanīyā iṣṭi (concluding). Anubandhyā rite (offering of a barren cow to Mitra and Varuṇa) or only *payasyā*. Then five offerings called Devikā to Dhātṛ, Anumati, Rākā, Sinīvālī and Kuhū. Udavasānīyā iṣṭi like punarādheya. Theories about the identity of the soma plant and its relation to the moon. In the Deccan a substitute called 'rāṅśera' is employed for soma.

CHAP. XXXIV. 1204-1223

Other soma sacrifices. Brief descriptions of Ukthya, Ṣoḍaśin, Atyagniṣṭoma, Atirātra and Aptoryāma. Vājapeya may be regarded as an independent sacrifice. Number 17 predominant in it. 17 cups of soma and 17 cups of surā for Prajāpati. A race with 17 chariots and 17 drums beaten. Vājapeya to be performed only by a brāhmaṇa or kṣatriya who desired super-eminence or overlordship. Horses of the chariots are made to smell *caru* of wild rice. When race starts brahmā priest repeats Vāji-sāman. An udumbara post as the goal for the chariot race. Chariot of sacrificer is in front and the rest follow at a distance. Chariots go round udumbara post and return to sacrificial ground. The principal wine cup is held by the pratiprasthātṛ and other sixteen are held by those who joined in the race and they are drunk by those latter. Ladder raised against yūpa and the sacrificer climbs up and holds a dialogue with his wife. Animals for Prajāpati are offered at time of mid-day pressing. Adhvaryu declares yajamāna to be *saṁrāṭ* Certain observances after Vājapeya. Fees distributed are 1700 cows, 17 chariots with four horses yoked to each, 17 *dāsīs* &c. After Vājapeya a king should perform Rājasūya and a brāhmaṇa Bṛhaspatisava. Jaimini's conclusions about Vājapeya. Viśvajit, Gosava and Sarvasvāra among Ekāha sacrifices briefly described. *Ahīna* sacrifices extending over two to twelve days of soma pressing. Description of the twelve days of the Dvādaśāha. Differences between Dvādaśāha as an ahīna and as a sattra. *Rājasūya*. A

very complex ceremony extending over a long period (over two years), and comprising many separate iṣṭis, soma sacrifices and animal sacrifices. Rājasūya to be performed only by kṣatriyas. Its relation to Vājapeya. Dīkṣā on first day of bright half of Phālguna. The Pavitra sacrifice which is like Agniṣṭoma. One year thereafter Abhiṣecanīya. Five offerings one on each day after Pavitra sacrifice. On Full moon of phālguna iṣṭi to Anumati. Cāturmāsyas performed for one year, between the *parvans* of which darśa and pūrṇamāsa rites are celebrated. After Śunāsīrīya several rites. Twelve offerings called 'ratnināṃ havīṁṣi' on twelve days in the houses of the *ratnas* (viz. the king, his queens, state officers &c.) offered to different deities. Abhiṣecanīya (consecration) rite on first of Caitra and follows procedure of Ukthya. Eight offerings called Devasūhavīṁṣi. Waters of seventeen kinds in seventeen vessels of udumbara from Sarasvatī river and other sources. Pārtha homas. Holy water taken in four vessels. Sacrificer recites *āvid* formulae. Four principal priests sprinkle him with water from four vessels and a kṣatriya, vaiśya and a friend of the king do the same. Story of Śunaḥśepa recited by hotṛ for sacrificer's benefit. King takes three strides called Viṣṇukramas. Remnants of anointing water handed by king to his son. Symbolic march for plunder of cows. Dice-play which is so arranged that best throw comes to the king. Avabhṛtha follows. For ten days after Abhiṣecanīya offerings called 'Saṁsṛpām havīṁṣi' are made to Savitṛ and other deities. The Daśapeya, in which each of the camasas of soma are drunk by ten brāhmaṇas (i. e. in all 100). Very large dakṣiṇās prescribed e. g. some say 240000 cows should be presented. After Daśapeya some observances are kept by the sacrificer for one year. At the end of the year, the keśavapanīya ceremony took place. Then two rites called Vyuṣṭi-dvirātra at the interval of a month. One month after 2nd Vyuṣṭidvirātra the Kṣatradhṛti rite. One month after that the Sautrāmaṇī iṣṭi.

CHAP. XXXV. 1224–1255

Sautrāmaṇī and other sacrifices. *Sautrāmaṇī* is one of the seven Haviryajñas according to Gautama. Chief characteristic was offering of surā (wine) in it, in modern times milk being offered instead. Kokilī and Caraka-sautrāmaṇī. Procedure of both. Sautrāmaṇī takes four days, during first three of which wine is prepared from various ingredients and on last day, three cups of milk and three of wine were offered. Three goats

were killed in this and fourth to Bṛhaspati. Method of preparing wine described. Remnants of the wine offered were not drunk by the priests, but a brāhmaṇa was hired for drinking them or they were poured on an ant-hill. Persons for whom Sautrāmaṇī was offered. Avabhṛtha and then āmikṣa to Mitra-Varuṇa and an animal to Indra. *Aśvamedha.* Horse-sacrifice in vogue even in Ṛgveda. It was a sacrifice for three days, to be performed by a king. Time of commencement. The four queens accompanied by princesses and large retinue come near the king. Rules about colour and qualities of horse. Guards of the horse, when it is let off to roam over the country. During horse's absence for a year three iṣṭis every day to Savitṛ. Chants by a brāhmaṇa after the iṣṭis every day and also by a kṣatriya lute-player. Hotṛ recites to the king surrounded by his sons and ministers the narrative called 'Pāriplava.' Every day for a year four oblations called Dhṛti made in the āhavanīya. At the end of the year horse was brought back and sacrificer took dīkṣā. 21 yupas, each 21 aratnis high. Large number of animals tied to yūpas slaughtered. Horse taken to a lake, bathed in it, brought back and anointed by the queens on various parts of the body. Dialogue between hotṛ and brahmā. When horse killed, queens go round horse, fan it with their garments, crowned queen lies by the side of the horse and both are covered with mantle. Abusive and obscene dialogues between hotṛ and crowned queen, between brahmā and favourite wife, between four principal priests and chamberlain on one side and the queens and their attendants on the other. Fat and blood of the horse offered. *Brahmodya* (theological dialogue of questions and riddles). *Mahiman* offerings. Remnants of these sprinkled over the king and offering to 12 months. Avabhṛtha on third pressing day. Offerings on the head of a bald man who dips into water to 'Jumbaka' (Varuṇa). When sacrificer comes out of water after avabhṛtha bath, persons guilty of grave sins plunge into it and become free from sins. Large fees on first and third pressing days. Aśvamedha rare even in ancient times. Description of Aśvamedha in the Mahābhārata. Epigraphic references to Aśvamedha. *Sattras.* Their duration is from twelve days to a year or more. Dvādaśāha is the archetype. Sattras divided into two classes, rātrisattras and sāṁvatsarika. Gavāmayana is model of all sattras of one year or more. Scheme of the parts of Gavām-ayana. When dīkṣā commenced. General rules applicable to all sattras. Though all are yajamānas and

also priests in a sattra, one of them is called gṛhapati. Peculiar procedure followed as to dīkṣā. *Brahmodya* on 10th day or abuse of Prajāpati. Rules to be observed while dīkṣā lasts. Most interesting day is Mahāvrata, which is the last day but one in sattras. Harp with a hundred strings, brāhmaṇa and śūdra engage in praise and abuse of those engaged in sattra. Fight of ārya and śūdra for a white circular skin; abuse by harlot and brahmacārin of one another. Drums beaten on corners of vedi. Wives of sacrificers become choristers for chanting. Dance round mārjālīya by servants and slave-girls singing popular airs referring to cows. Sattras of a thousand years believed even by ancient writers to be mythical and Jaimini states that in such descriptions saṁvatsara means 'a day'.

Agnicayana (piling of the fire altar). This rite is the most complicated and recondite of all śrauta sacrifices. Śatapatha Brāhmaṇa is leading work on it. Fundamental conceptions underlying it are cosmological. Construction of fire altar in five layers is an aṅga of Somayāga. Five victims are first offered. Heads built up into altar. Clay for the bricks how brought, mixed and prepared. First brick called Aṣāḍhā prepared by wife of sacrificer. Ukhā (pan) prepared from same clay, from which he prepares three bricks called Viśvajyotis. Other bricks prepared. Description of the piling of the altar in five layers. Several forms of altar and of bricks. Bricks are of various sizes and have various names. Three bricks called svayamātṛṇṇāḥ. Ground measured and ploughed. Furrows sown with several corns. Several things such as a lotus leaf, golden ornament, golden image of a man are first placed, then a living tortoise is enveloped in moss and made motionless and then altar is constructed on it. Each of five layers contains 200 bricks according to Satyāṣāḍha, but others give larger numbers. Time required for piling varies. Peculiar mode of cooling altar. Numerous offerings. Procedure of Somayāga followed with a few variations. Observances for a year after *cayana*.

HISTORY OF DHARMASASTRA
VOLUME II
CHAPTER I
THE TOPICS OF DHARMAŚĀSTRA

Manifold are the topics that have been included under Dharmaśāstra from very ancient times. The Dharma-sūtras of Gautama, Baudhāyana, Āpastamba and Vasiṣṭha deal in greater or less detail principally with the following subjects: the several *varṇas* (classes), *āśramas* (stages of life), their privileges, obligations and responsibilities; the *saṁskāras* performed on an individual (from *garbhādhāna* to *antyeṣṭi*); the duties of the *brahmacārin* (the first āśrama); *anadhyāyas* (holidays on which Vedic study was stopped); the duties of a *snātaka* (one who has finished the first stage of life); *vivāha* (marriage) and all matters connected therewith; the duties of the *gṛhastha* (house-holder's stage); *śauca* (daily purification of body); the five daily *yajñas*; *dāna* (gifts); *bhakṣyābhakṣya* (what food should one partake of and what not); *śuddhi* (purification of persons, vessels, clothes &c.); *āśauca* (impurity on birth and death); *antyeṣṭi* (rites on death); *śrāddha* (rites performed for the deceased ancestors and relatives); *strīdharma* (special duties of women) and *strīpuṁdharma* (duties of husband and wife); *dharmas* of *kṣatriyas* and of kings; *vyavahāra* (judicial procedure, and the sphere of substantive law such as crimes and punishments, contracts, partition and inheritance, adoption, gambling &c.); the four principal classes, mixed castes and their proper avocations; *āpaddharma* (actions and avocations permitted to the several castes in extreme difficulties); *prāyaścitta* (sins and how to expiate them); *karmavipāka* (results of evil deeds done in past lives); *śānti* (rites on the happening of portents or for propitiating the planets &c.); duties of *vānaprastha* (forest hermit) and *saṁnyāsin* (ascetic). All these subjects are not treated in any fixed or settled order in the sūtra works. To take only one example, the subject of partition and inheritance occurs at the end of the dharmasūtra of Gautama, while Vasiṣṭha places the same subject in the middle of his work (17th chapter) and Āpastamba deals with those topics after finishing

three-fourths of his work (in II. 6. 14). Further, some works on *dharmaśāstra* give very elaborate treatment of certain topics of which only faint traces are found in the ancient dharmasūtras and metrical smṛtis. Such topics are *vratas* (which may be looked upon as extensions of the subject of gifts), *utsarga* and *pratiṣṭhā* (dedication of works of public utility and of temples and shrines), *tīrtha* (sacred places and pilgrimages to them), *kāla* (auspicious times, festivals &c.).

A glance at the above list will convince anyone how the conception of dharma was a far-reaching one, how it embraced the whole life of man. The writers on dharmaśāstra meant by *dharma* not a creed or religion but a mode of life or a code of conduct, which regulated a man's work and activities as a member of society and as an individual and was intended to bring about the gradual development of a man and to enable him to reach what was deemed to be the goal of human existence.

From this standpoint various divisions of *dharma* were suggested. Dharma was divided into *śrauta* and *smārta*. The first comprised those rites and ceremonies with which the Vedic *Saṁhitās* and Brāhmaṇas were chiefly concerned, such as consecration of the three sacred fires, the Full moon and New moon sacrifices, the solemn *soma* rites &c. The *smārta* comprised those topics that were specially dealt with by the smṛtis and that concerned the various classes and stages of life.[1] The present work will concern itself principally with *smārta dharma* and *śrauta dharma* will be dealt with concisely in an appendix. Some works divide *dharma* into *śrauta* (Vedic), *smārta* (based upon smṛtis) and *śiṣṭācāra* (the actions of the respected in society)[2]. This classification is based on the three sources of *dharma* viz., *śruti*, *smṛti* and *śiṣṭācāra*, as observed by Baudhāyana.[3] Another and more comprehensive classification says that *dharma* is sixfold, viz. dharma of varṇas (injunctions based on *varṇa* alone such as 'a brāhmaṇa should never drink wine' or 'a brāhmaṇa should not be killed'), *āśramadharma*

(such rules as 'begging' and 'carrying a staff' enjoined on a brahmacārī'), *varṇāśrama-dharma* (rules of conduct enjoined on a man because he belongs to a particular class and is in a particular stage of life, such as 'a brāhmaṇa *brahmacārī* should carry a staff of *palāśa* tree'), *guṇadharma* (such as protection of subjects in the case of a crowned king), *naimittika* dharma (such as expiation on doing what is forbidden), *sādhāraṇa dharma* (what is common to all humanity viz., *ahiṁsā* and other virtues).[4] This classification appears to have been an ancient one. Medhātithi on Manu II. 25 speaks of fivefold dharma (only omitting *sādhāraṇa dharma* from the abovementioned six) and quotes the explanations of them from the expounders of smṛtis. Hemādri (vrata-khaṇḍa p. 5) quotes 16 verses from the Bhaviṣyapurāṇa on the six-fold dharma.[5] It will be noticed from the above that all matters (except *sādhāraṇa* or *sāmānya* dharma) have *varṇa* and *āśrama* as the pivots round which the whole of dharmaśāstra revolves. It is therefore that in ancient smṛtis like those of Manu (I. 2 and 107) and Yājñavalkya (I. 1) the sages are represented as asking the great expounders of those codes to impart to them instruction in the dharmas of *varṇas* and *āśramas*.

Before embarking upon any treatment of varṇas it would not be out of place to say a few words about dharmas common to all humanity. Our dharmaśāstra works do not enter into any subtle or detailed examination of the principles of ethics or of the moral standard, nor are the concepts of duty, happiness or perfection subjected to any searching analysis[6]. But

6. Reference may be made to the 'Ethics of India' by Prof. Hopkins (1924) and 'Hindu Ethics' by Dr. John McKenzie in 'Religious quest of India' series. The former work is marked by a detached and fair attitude towards the ideas of the ancient Indians and their writings. The latter, I am sorry to say, is marred by the unsympathetic and supercilious attitude of a Christian missionary. Its key-note is perverse inasmuch as the foundation of the author's criticism is the notion that one is not really moral unless one is engaged in active social service. There is very little warrant for

(*Continued on next page*)

this does not at all mean that the principles of ethics were passed over by dharmaśāstra works or were not highly thought of by them. From very ancient times truth is exalted above everything else. Ṛgveda VII. 104. 12 says[7] 'True speech and

this hypothesis in well-known works on Ethics. To expose the fallacies in Principal McKenzie's work would require a volume. But a few words must be said here. What particular brand of active social service the learned author has in view is difficult to follow. I would like to make him a present of the following lines from the Encyclopædia Britannica on Social Service 'The term social service is a comparatively new one in Great Britain. If it had been used previous to the 20th century it would have meant philanthropy and charity in the ordinary sense'. If the learned author means that ancient India never insisted on universal philanthropy and charity, he has read the Indian Literature in vain. Every house-holder was called upon by the Hindu Śāstras to offer food according to his ability to students, ascetics and to all beings including the untouchable cāṇḍālas and even dogs and crows. Every brāhmaṇa who could teach had to do so without demanding any fee beforehand. *Maths* were established in all parts of India for expounding religious books, feeding students and the poor. There are *annasatras* even now where hundreds are fed every day. No necessity arose throughout the ages for a Poor Law in India with its attendant evils well portrayed in Dickens' famous master-piece 'Oliver Twist'. The above were some of the different aspects of philanthropy and charity which are now dubbed social service. In the third century B. C. Aśoka had established hospitals not only for men but even for beasts and Yāj. 1.209 equates the free nursing of sick persons with gifts of cows. The learned Professor asks with an air of triumph and condemnation of all Indian morality (p. 251) 'Is there anything comparable to the movement which St. Francis of Assisi initiated and led?' The learned Professor has fallen into the frequent error of comparing a movement of the 13th century with Indian ideas over 2000 years old. Again I shall quote words from the Encyclopædia Britannica. 'It would be an anachronism to think of Francis as a philanthropist or social worker or a revivalist preacher, though he fulfilled the functions of all these. Before every thing he was an ascetic and mystic'. The particular brands of Social Service that are now in vogue are mainly due to the ravages of Imperialism and extreme capitalistic tendencies. Besides he forgets that even the movement started by St. Francis had schisms and was guilty of all the moral evils that are associated with Western monastic institutions. Vide the recent and lucid book of Sir Sivaswamy Aiyer on 'Evolution of Hindu moral ideals' (1935, Calcutta University).

7. सुविज्ञानं चिकितुषे जनाय सच्चासच्च वचसी पस्पृधाते । तयोर्यत्सत्यं यतरदृजीयस्तदित्सोमोऽवति हन्त्यसत् ॥ ऋ. VII. 104. 12.

false speech run a race against each other. Soma protects out of the two what is true and what is very straight-forward and strikes down what is false'. The conception of *ṛta* in the Ṛgveda is a sublime one and is the germ of the later doctrine of the rule of dharma. The Śatapatha-brāhmaṇa (S. B. E. vol. 44 p. 85) enjoins 'therefore let a man speak naught but truth'[8]. In the Taittirīyopaniṣad (I. II. 1), the teacher when taking leave of his pupil at the end of the latter's studenthood places truth in the forefront of his exhortation and dharma next.[9] In the Chāndogya (III. 17) there is an allegory of a Soma sacrifice on life, where the dakṣiṇā (fee to be paid) is fivefold viz. the five virtues of tapas (asceticism), dāna (charity), ārjava (straightforwardness), ahiṁsā (non-injury to sentient beings), satyavacana (truthfulness). The Bṛ. Up. remarks that truth and dharma are in practical life identical terms.[10] One of the noblest prayers in all literature occurs in the Bṛ. Up. (I. 3.28) 'from falsehood lead me unto truth, from darkness lead me unto light, from death lead me unto immortality'. The Muṇḍakopaniṣad says 'only truth is victorious and not falsehood; the path of the gods is spread out by (the pursuit of) truth'. The Bṛ. Up. inculcates on all the great need of three cardinal virtues, viz. self-restraint, *dayā* (compassion or love for all sentient life) and dāna (gifts or charity).[11] The Chān. Up. says that the world of Brahman is free from all evil and only those who have lived as chaste students can enter the world of *brahma*. The Chān. Up. V. 10 sternly condemns five sins, viz. theft of gold, drinking spirits, murder of a brāhmaṇa, defiling of one's guru's bed and association with these, as the greatest sins and in V. 11. 5 Aśvapati exultantly declares that in his kingdom there were no grave sinners. The Kaṭhopaniṣad (I. 2.23) insists[12] upon cessation from evil

conduct, peace of mind and concentration as essential for the seeker after the Self. The Udyogaparva 43.20ff. speaks of the twelve *vratas* (vows or rules of conduct) for brāhmaṇas and verses 22-25 describe at great length the characteristics of one who is dānta (self-controlled). Śānti 160 contains an eulogy of *dama* (self-control). Śānti 162.7 describes how *satya* has 13 aspects and verse 21 says that non-injury to all beings in thought, word and deed, good will and charity are the eternal dharma of the good.[13] The Gautama-dharmasūtra (VIII. 24-26) holds that *dayā* (compassion or love for all beings), *kṣānti* (forebearance), *anasūyā* (freedom from envy), *śauca* (purity of body, speech and thought), *anāyāsa* (absence of painful efforts or ambitions), *maṅgala* (doing what is commended), *akārpaṇya* (not demeaning oneself before others), *aspṛhā* (not hankering after sensual pleasures or the possessions of others)[14] are the qualities of the soul and remarks that the person who has these eight qualities realizes non-difference from Brahma and reaches the world of Brahma, though he may not have all the other forty *saṁskāras*, while he who has all the forty saṁskāras but is not possessed of these eight qualities does not reach the world of Brahma.[15] Vasiṣṭha (X. 30) says that avoiding back-biting, jealousy, pride, egoism, unbelief, crookedness, self-praise, abuse of others, deceit, covetousness, delusion, anger and envy is the dharma of all āśramas and further (XXX. 1) he delivers a fine exhortation 'practise dharma (righteousness) and not adharma; speak the truth and not untruth; look far ahead, not

Atri (verses 34-41) also defines these eight similarly but in different words. Aparārka (pp. 164-165), Smṛticandrikā (I. p. 13), Hemādri (Vrata p. 8) and Parāśaramādhavīya I. part 1 p. 84 quote from Bṛhaspati eight verses defining these eight qualities, which closely resemble Atri's. Vide Matsya 52.8-10 for these eight qualities and Vāyu 59.40-49, Mārkaṇḍeya 61.66 for saying that dayā (love for beings) is at the top of the eight ātmaguṇas and 28.31-32 for a slightly different enumeration of the eight. Viṣṇupurāṇa (III. 8.35-37) says that these eight mentioned by Gautama (तितिक्षा being substituted for क्षान्ति) and three more namely नाभिमानिता, सत्य, and प्रियवादिता are common to all varṇas. Vide वसिष्ठ VI. 3 आचारहीनं न पुनन्ति वेदाः.

near; look at what is highest, not at what is not highest'. Āpastamba Dh. S. (I. 8. 23. 3–6) calls upon all āśramas to eradicate faults that tend to destruction and to cultivate the opposite virtues (and gives long lists of both). This shows that in the scale of values mere performance of sacrifices and purificatory and other religious ceremonies ranked according to Gautama and other writers very low and the highest value attached to the moral qualities of the soul. There is no elaborate discussion of the questions as to why a man should tell the truth or abstain from *hiṁsā* (injury to sentient beings) and cultivate other high moral qualities. But it should not be supposed that no indications whatever are given of the reasons why this should be done. Two principles emerge if we closely examine the texts. In the midst of countless rules of outward conduct there is always insistence on the necessity to satisfy the inner man (āntara-puruṣa) or conscience. Manu IV. 161 says 'assiduously do that which will give satisfaction to the antarātman' (inner self); IV. 239 says 'No parents, nor wife nor sons will be a man's friends in the next world; but only righteousness.' 'Gods and the inner man mark the sinful acts' Vanaparva 207·54 and Manu VIII. 85, 91–92. Vide also Ādiparva 74. 28–29, Manu VIII. 86, Anuśāsana 2. 73–74. The reason given for cultivating such virtues as *dayā, ahiṁsā* is based upon the philosophical doctrine of the one Self being immanent in every individual as said in the words 'tat tvam-asi'. This is the highest point reached in Indian metaphysics and combines morality and metaphysics. That doctrine requires us to regard the goodness or badness of one's actions from the standpoint of other individuals who will be affected by such actions. Dakṣa (III. 22) declares [16] 'one who desires happiness should look upon another just as he looks upon himself. Happiness and misery affect one's self and others in the same way'. Devala says that the quintessence of dharma is that one should not do to others what would be disliked by one's self.[17] There-

fore our texts lay down two seats of authority in morals viz., the revealed truth (śruti) that 'All this is brahma' and the inner light of conscience. Another reason for cultivating high moral qualities is found in the doctrine of the goals or ends of human existence (*puruṣārtha*). From very ancient times they are said to be four, dharma (right conduct), artha (economic interests), kāma (satisfaction of sexual, emotional and artistic life), mokṣa (liberation of the spirit). The last is said to be the supreme end and to be attained only by the few and the vast majority can only place it as an ideal to be attained in the most distant future. As regards the other three, there is a gradation of values. *Kāma* is the lowest of all and only fools regard it as the only end.[18] The Mahābhārata says: 'A wise man tries to secure all three, but if all three cannot be attained, he secures dharma and artha or only dharma if he has a choice of only one from among the three. A man of middling discipline prefers artha to the other two; dharma is the source of both artha and kāma.' The dharmaśāstra writers did not condemn kāma altogether, they recognise that kāma has a place as a motive urging men to be active but they assigned it a low place. They recognised that a man shares with lower beings the impulses and emotions of sex, but that the satisfaction of these impulses is of lower values than the moral and spiritual ends proper for a developed human personality and therefore insist that it should be subordinated to *artha* and *dharma*. Gautama (IX. 46–47) says 'one should not allow the morning, midday and evening to remain fruitless so far as dharma, artha and kāma are concerned. But among these three one should attach most importance to dharma.' Yāj. I. 115 says practically the same thing. Āp. Dh. S. (II. 8. 20. 22–23) declares that 'a man should enjoy all such pleasures as are not opposed to

dharma. In this way one secures both worlds'.[19] In the Bhagavadgītā (VII. 11) Kṛṣṇa identifies himself with *kāma* that is not opposed to dharma. Kauṭilya says[20] 'one may enjoy *kāma* provided there is no conflict with dharma and artha, one should not lead a life of no pleasures' and then true to his role of a writer on arthaśāstra, he proclaims that his own opinion is that *artha* is the principal of the three, as *dharma* and *kāma* both spring from *artha*.' Manu (II. 224)[21] after setting out several views about which of the three is principal states it as his own opinion that one should strive for all the three, but adds that if *artha* or *kāma* is in conflict with *dharma* one should give up artha or kāma as the case may be. Viṣṇu Dh. S. (71. 84) and Bhāgavata I. 2. 9 say the same. The Kāmasūtra[22] of Vātsyāyana defines the three and says that out of dharma, artha and kāma each preceding one is superior to each following one and that to the king artha should be the highest goal. This teaching shows that there are proximate ends or motives and ultimate ends or motives, that the ultimate ends are really the most valuable and that the whole teaching of dharmaśāstra points to this that all higher life demands discipline both of body and mind and requires the subjection of lower aims to aims of higher value. Manu II. 4 (like Aristotle in the first sentence of his Politics) says that the end of all activity is some presumed good. Manu further says (V. 56) that the natural proclivity of all beings is to hanker after the satisfaction of the common and lower desires of hunger, thirst and sexual gratification and therefore no stress is to be placed on them but on the cessation or curbing of these. The Upaniṣads[23] recognise the

distinction between what is beneficial (*hita*) and what is most beneficial (*hitatama*). Śāntiparva (288. 20 and 330. 13) declares that what conduces to the greatest good of beings is ' satya.'

The Mitākṣarā on Yāj. I. 1. remarks that *ahiṁsā* and other qualities are the dharmas common to all including even cāṇḍālas. The qualities are variously enumerated and emphasis is laid upon different lists in different works. Śaṅkhasmṛti (I. 5) says that forbearance, truthfulness, self-restraint and purity are common to all varṇas. The Mahābhārata says that three are the best qualities among all beings viz., absence of enmity, truthfulness and freedom from anger[24] and in another place says that the best *vrata* (vow) for a man is threefold viz., he should feel no enmity (to others), should give and should speak the truth. Vasiṣṭha (IV. 4) says[25] that truthfulness, freedom from anger, generosity, *ahiṁsā* (non-injury) and procreation of offspring are (the common dharma) of all (varṇas). Gautama (X. 52) says that even the Śūdra has to submit himself to the dharma of truthfulness, freedom from anger and purity (of body and mind). Manu says that *ahiṁsā*, truthfulness, no wrongful taking of another's possessions, purity and restraint of senses are in brief the common dharmas of all varṇas.[26] Manu (IV. 175) calls upon all to take delight in truth, in dharma, in conduct worthy of an ārya and in purity. In the 3rd century B. C. the remarkable emperor Aśoka inscribed on stone in all parts of his empire the following list of virtues: compassion, liberality, truth, purity gentleness, peace, joyousness, saintliness, self-control ; which bear a close resemblance to Gautama's list and even to a later list of St. Paul (vide Pillar Edicts II and VII in E. I. vol. II p. 249 and p. 272). Yāj. (I. 122) mentions nine qualities as the means of securing dharma for all (from the brāhmaṇa to the cāṇḍāla[27]). The Mahābhārata says that freedom from anger, truthfulness, sharing one's wealth

with others, forbearance, procreation (of children) from one's wife (alone), purity, absence of enmity, straight-forwardness, maintaining persons dependent on one-self—these nine are the duties of all varṇas.[28] The Vāmanapurāṇa says that tenfold dharma is common to all and names these ten as *ahiṁsā, satya, asteya, dāna,* forbearance, restraint, quiescence, not demeaning oneself, purity, tapas.[29] Hemādri (vratakhaṇḍa pp. 7–8) quotes several passages from the Brahma, Brahmavaivarta and Viṣṇu-dharmottara for several sādhāraṇa dharmas (virtues common to all varṇas and āśramas). The Viṣṇudharmasūtra enumerates fourteen qualities as sāmānya-dharma.[30]

The foregoing discussion establishes that all dharmaśāstra writers attached the highest importance to moral qualities and enjoined them upon all with all the emphasis they could command; but as their main purpose was a practical one, viz., to guide people to right acts in everyday life, they dealt more elaborately with the acts, rites and ceremonies that each person had to do with reference to his station in society. They are therefore found principally concerning themselves with varṇāśrama dharma and not with *sādhāraṇa dharma* (i. e. duties common to all alike).

Āryāvarta — One important question that is very much canvassed in works on dharmaśāstra is about the country or territory which should be called *āryāvarta* or which was a fit habitation for those who called themselves the followers of the Vedic religion. Therefore a few words on this subject would be quite relevant. The Ṛgveda shows that the centre of Āryan culture in the times of the Ṛgveda was the land of the seven

rivers, viz. North-west India and Punjab. We find that the rivers from Kubhā (the Kabul river, in Ṛg. V. 53. 9 ; x. 76. 6), Krumu (the modern Kurram, Ṛg. V. 53. 9, X. 75. 6), Suvāstu (modern Swat, in Ṛg. VIII. 19. 37), the seven Sindhus (Ṛg. II. 12. 12, IV. 28. 1, VIII. 24. 27, X. 43. 3) up to the Yamunā (Ṛg. V. 52. 17, X. 75. 5), the Ganges (Ṛg. VI. 45. 31, X. 75. 5) and Sarayu (probably in modern Oudh, in Ṛg. IV. 30. 18 and V. 53. 9) figure in the Ṛgveda. Among the rivers of the Punjab the following are individually mentioned:— Sindhu (Ṛg. II. 15. 6 'he made the Sindhu flow northwards', Ṛg. V. 53. 9, Ṛg. IV. 30. 12, Ṛg. VIII. 20. 25 where reference is made to the medicine in the Sindhu, in the Asiknī, in the seas and on mountains), Asiknī (Ṛg. VIII. 20. 25, X. 75. 5), Parusnī (Ṛg. IV. 22. 2, V. 52. 9), Vipāś and Śutudri (Ṛg. III. 33. 1 where their confluence is spoken of), Vipāś alone in Ṛg. IV. 30. 12, Śutudri alone in Ṛg. X. 75. 5, Dṛṣadvatī, Āpayā and Sarasvatī (as very holy in Ṛg. III. 23. 4), Sarasvatī alone (Ṛg. VII. 95, the whole hymn is addressed to it of which verse 2 says it springs from the mountains; Ṛg. VI. 61 is another hymn addressed to it, v. 10 of which says it has seven sisters), Gomatī (Ṛg. VIII. 24. 30, X. 75. 6), Vitastā (Ṛg. X. 75. 5). Gradually the Āryans spread southwards and eastwards. The Kāṭhaka S. X. 6 speaks of Kuru-Pañcālas. In the Brāhmaṇas the centre of Āryan activities and culture shifted to the countries of the Kurus and Pañcālas and Kosala-Videhas. For example, the Śatapatha Brāhmaṇa remarks that in the lands of Kurupañcālas speech is at its best.[31] In Śat. Br. XI. 4. 1. 1 Uddālaka Āruṇi is called a Kuru-Pañcāla brāhmaṇa and contrasted with brāhmaṇas of the north (S. B. E. vol. 44 p. 51). Similarly the Kauṣītaki-br. (VII. 6) remarks[32] that those who want to learn (best) speech go northwards or wait upon him who comes from that direction. In the Śatapatha we have the story of Videgha Māṭhava who went beyond the country of Kosala-Videha, crossed the river Sadānīrā that came down from the Himālaya, and settled to the east of that river, where the country was a cultivated and civilized one in the times of that work, while in former ages it had been uncultivated (I. 4. 1. 4-17, S. B. E. vol. 12 pp. 105-106). Even in the Buddhist

Jātakas we see that being an 'udicca brāhmaṇo' was a source of great pride (vide Fick's work p. 40). The Tai. Br. speaks of the *vedi* of the gods as being in Kuru-kṣetra.[33] Even in the Ṛgveda itself the country through which the rivers Dṛṣadvatī, Āpayā and Sarasvatī flowed is spoken of as the best spot (vide III. 23. 4). The Tai. Br. says that the Kurupañcālas go east in the winter and westwards in the last month of summer. In the times of the Upaniṣads also the Kurupañcāla country appears to have occupied a pre-eminent place. The Bṛ. Up. (III. 1. 1.) says that when Janaka, king of Videha, performed a sacrifice the brāhmaṇas of Kurupañcāla flocked there in large numbers. *Vide* also Bṛ. Up. III. 9. 19. The Bṛ. Up. VI. 2. 1 and Chāndogya V. 3. 1 say that Śvetaketu went to the assembly of the Pañcālas. Kauṣītaki Br. Up. (IV. 1.) names the countries of Uśīnara, Matsya, Kurupañcāla and Kāśivideha as centres of intellectual activity and in II. 13 refers to two mountains one in the North and the other in the South (meaning probably Himavat and Vindhya). According to the Nirukta (II. 2), the country of Kamboja was outside the limits of the country of Āryas, though the language spoken there seems to have been the same. The Mahābhāṣya lends support to this and adds that Surāṣṭra was not an Ārya country (vol. 1, p. 9). In the times of the Dharmasūtras great divergence of opinion prevailed on the question of the location of Āryāvarta. The Vasiṣṭha-dharma[34]-sūtra says; ' Āryāvarta is to the east of the disappearance (of Sarasvatī in the desert), to the west of Kālakavana, to the north of the mountains Pāriyātra and Vindhya and to the south of the Himālaya '. It then refers to two more views held by other authors viz., ' Āryāvarta is in the region between the Ganges and the Jumna ' and ' where the black antelope roams about there is spiritual pre-eminence '. The Baud. D. S. (I. 1.27) gives the same limits of Āryāvarta as Vasiṣṭha,

substituting the word 'vinaśana' for 'ādarśa'.[35] Patañjali in his Mahābhāṣya defines Āryāvarta several times in the same terms as Vasiṣṭha does.[36] The Dharmasūtra of Śaṅkha-Likhita gives somewhat similar limits by remarking 'spotless spiritual pre-eminence is to be found (in the country) to the east of the countries of Sindhu and Sauvīra, to the west of the city of Kāmpilī, to the south of Himālaya and to the north of Pāriyātra '.[37] The extant Manusmṛti (II. 22) makes Āryāvarta coterminos with the whole of India north of the Vindhya by saying that the territory between the Himālaya and the Vindhya and extending up to the eastern and western oceans is known by the wise as Āryāvarta. The second view (viz. Āryāvarta is the region between the Ganges and the Jumna) occurs in Baud. Dh. S. (I. 1.28). In the Tai. Ār. II.20 special honour is shown to those who dwell between the Gaṅgā and the Yamunā. The third view (viz. *Āryāvarta* is the country where the black antelope roams about naturally) is the one given in most smṛtis. Both Vasiṣṭha (I. 14–15) and Baud. Dh. S. (I. 1. 29-30) quote an ancient *gāthā* from the Nidāna work of the Bhāllavins[38] to the effect that wherever the black antelope roams about in the country lying between the Sindhu in the west and the rising mountain in the east, there is spiritual pre-eminence. So this view is a very ancient one and probably

Even so early as the ताण्ड्यमहाब्राह्मण we have the words सरस्वत्या विनशने दीक्षन्ते (24.17.1). This shows that the Sarasvatī had disappeared by the time of the ताण्ड्य. According to the Vanaparva 82. 111 Vinaśana is the tīrtha where the Sarasvatī disappeared and Vanaparva (130. 3-5) says that the Sarasvatī disappeared at the entrance of Niṣādarāṣṭra through fear of pollution from Niṣādas and Śalyaparva (37. 1-2) tells us that Vinaśana is the sacred place where the Sarasvatī disappeared through hatred for Śūdras and Ābhīras.

arose from some mythological account as is indicated by the commentary of Viśvarūpa on Yāj. I.2 which quotes a prose passage of the Śvetāśvataras 'Sacrifice became a black antelope and wandered over the earth; *dharma* followed it in its wanderings'. This view of the limits of Āryāvarta is maintained by Śaṅkha (as quoted by Viśvarūpa on Yāj. I. 2), Viṣṇudharma-sūtra 84.4, Manu II. 23, Yāj. I. 2, Saṁvarta 4, Laghu-Hārīta (I. p. 178), Veda-Vyāsa (I. 3), Bṛhat-Parāśara (p. 56) and several other smṛtis. The Manusmṛti (II. 17-24) defines Brahmāvarta as the country between the holy rivers Sarasvatī and Dṛṣadvatī,[39] says that the traditional mode of conduct observed in that country is called *sadācāra*, that the countries of Kurukṣetra, Matsya, Pañcāla and Śūrasena are styled Brahmarṣideśa and are slightly less (in holiness) than Brahmāvarta, that Madhyadeśa is between the Himālaya and the Vindhya and to the east of Vinaśana and to the west of Prayāga, that Āryāvarta is the country between the Himālaya and Vindhya up to the eastern and western oceans, that that territory where the black antelope roams about naturally is the country fit for sacrifices and the countries beyond constitute *mlecchadeśa*, that men of the three higher varṇas should endeavour to live in these countries (viz. Brahmāvarta, Brahmarsideśa, Madhyadeśa, Āryāvarta &c.) while a śūdra, when distressed for his livelihood, may stay in any country whatever. The Viṣṇudharmasūtra (84. 4) says that the country where the system of the four varṇas is not established is to be known as Mleccha country and Āryāvarta is beyond that. This is explained by Aparārka (p. 5) as follows: one who desires to practise Vedic religion should live in one of the four countries viz. Brahmāvarta and others; if that is not possible, then in a country where there is establishment of the four varṇas and the black antelope roams about naturally; if both these cannot be had, then one should dwell in a country where at least one of the two (*cāturvarṇya* and black antelope) is found. The above discussion shows that in very ancient times the country south of the Vindhya was looked upon as beyond the pale of Aryan culture. Baud. Dh. S. (I. 1. 31) says that the countries of Avanti, Aṅga, Magadha, Surāṣṭra, Dakṣiṇāpatha, Upāvṛt, Sindhu

and Sauvīra are of mixed origin (i. e. not of pure Āryan ancestry), that a person who goes to Āraṭṭaka, Kāraskara, Puṇḍra, Sauvīra, Aṅga, Vaṅga, Kaliṅga and Prāṇūna (?) has to offer a solemn sacrifice like the Sarvapṛṣṭha and that for going to Kaliṅga the prāyaścitta is an offering to Vaiśvānara Agni. The Mit. on Yāj. III. 292 quotes a verse of Devala to the effect that if a man goes to Sindhu, Sauvīra, Saurāṣṭra, the border lands (or Mlecca countries), Aṅga, Vaṅga, Kaliṅga and Andhra he has to perform the Upanayana saṁskāra over again.[40] The Mit. adds a remark that this is so only if the man goes to these countries for some purpose other than pilgrimage. Gradually however as Āryan culture spread over the whole of what is now called India the view of the sages about the countries pre-eminently Āryan had to be given up. Medhātithi on Manu II. 22 explains that Āryāvarta is so called 'because Āryas again and again spring up there and because the Mlecchas even if they overrun it from time to time do not abide there for long' and then makes the following very sensible observation (on II. 23) 'if a kṣatriya king of excellent conduct were to conquer the Mlecchas, establish the system of four varṇas (in the Mlecca country) and assign to Mlecchas a position similar to that of cāṇḍālas in Āryāvarta, even that (Mlecca) country would be fit for the performance of sacrifices, since the earth is not by itself impure, but becomes impure through contact (of impure persons or things).'[41] As a result of the spread of Āryan culture eastwards and southwards and the frequent invasions of non-Āryan tribes on the north-west, the countries on the rivers of the Punjab came to be looked upon in the whirligig of time as unworthy of the Āryas to live in. Karṇaparva 43. 5–8 abuses those who live on the Sindhu and the five rivers of the Punjab as impure and *dharmabāhya.*[42]

Another word which is very often used, particularly in the Purāṇas, to denote the territory where the ancient Vedic religion prevails is Bharatavarṣa or Bhāratavarṣa. It occurs in the Hathigumpha Inscription of Khāravela (2nd century B. C.) as Bharadhavasa.[43] The Mārkaṇḍeyapurāṇa says that Bharatavarṣa has the ocean on the east, south and west and the Himālaya on the north.[44] The Viṣṇupurāṇa (II. 3.1) says the same and Matsya (114·10) and Vāyu define Bharatavarṣa as stretching from Cape Comorin to the source of the Ganges.[45] Śabara (not later than 5th century A. D.) in his bhāṣya on Jaimini (X. 1·35 and 42) shows that to him there was unity of language and culture from the Himālaya to Cape Comorin.[46] Paiṭhīnasi as quoted in the Paribhāṣā-prakāśa (p. 58) says that dharma is fully developed (lit. four-legged) in the country from the Himālaya to Cape Comorin.[47] According to Mārkaṇḍeya (53·41), Vāyu (vol. I chap. 33·52) and other Purāṇas Bharatavarṣa is so called after Bharata, son of Ṛṣabha, descendant of Svāyambhuva Manu; while Vāyu (vol. II. chap. 37·130) appears to strike a different note by saying that Bharatavarṣa is so called after Bharata, the son of Duṣyanta and Śakuntalā. The Viṣṇupurāṇa says that after thousands of births a person secures life as a human being in Bharatavarṣa and this land is called *Karmabhūmi* (the land of religious actions) for those who want to secure heaven and final liberation.[48] The Vāyupurāṇa says almost the same and adds that in no land other than Bharatavarṣa is *karma* prescribed for mortals. It is somewhat amusing to find that

many of the countries of India that in modern times pride themselves on being most orthodox are declared by the Āditya-purāṇa (as quoted in the Smṛticandrikā) to be countries unfit for habitation and to be such that a stay in them except for pilgrimage entailed loss of caste and prāyaścittas.[49] The Ādipurāṇa (Ādityapurāṇa?) as quoted in the Paribhāṣāprakāśa (p. 59) says 'no one, whether a dvija or not, born in Āryāvarta should cross the three rivers, Sindhu, Karmadā (i. e. Karmanāśā) or Karatoyā except on a pilgrimage' and that if he does so, he should perform the penance of cāndrāyaṇa.

All smṛti writers and commentators generally restrict themselves to the duties of varṇas and āśramas as practised in Āryāvarta or Bharatavarsa, though in very rare cases (as in Yāj. II. 192) they provide for the observance of the usages of even heretics.

CHAPTER II

VARṆA

The number of works dealing with the origin and characteristics of the caste system in India is legion. Most of them, however, concern themselves with the detailed description of the bewildering variety of castes and subdivisions of castes in modern times and their present religious and social customs and usages. The origin of caste has given rise to great speculation and several schools of thought have arisen. Generally individual authors lay undue emphasis on one element or attach far too much importance to one point in tracing the origin of the caste system and its ramifications, such as race (Risley), tribe (Ibbetson), occupation (Nesfield). The study of the origin and development of caste in India is one of deep and absorbing interest to all students of sociology. A complete and critical examination of the several theories of caste advanced by distinguished authors and a detailed description of the hundreds of castes and subcastes now found in India is far beyond the scope of the present work. For those who want to make a thorough study of the most important works on caste a modest list is given in the footnote below.[50]

The caste system has been highly eulogised and also most severely condemned by Western writers. Sidney Low in his 'Vision of India' (pp. 262–263, 2nd ed. of 1907) speaks of the beneficent aspect of the caste system in the following eloquent passage 'There is no doubt that it is the main cause of the fundamental stability and contentment by which Indian society has been braced up for centuries against the shocks of politics and the cataclysms of Nature. It provides every man with his place, his career, his occupation, his circle of friends. It makes him at the outset a member of a corporate body, it protects him through life from the canker of social jealousy and unfulfilled aspirations; it ensures him companionship and a sense of community with others in like case with himself. The caste organization is to the Hindu his club, his trade union, his benefit society, his philanthropic society. There are no work-houses in India and none are as yet needed.' Abbe Dubois, who wrote about 130 years ago after being in close touch with Hindus of all castes for 15 years as a missionary, remarks (in his work on the character, manners and customs of the people of India, translated into English and published in London in 1817) 'I consider the institution of castes among the Hindu nations as the happiest effort of their legislation; and I am well convinced that, if the people of India never sunk into a state of barbarism, and if, when almost all Europe was plunged in that dreary gulf, India kept up her head, preserved and extended the sciences, the arts and civilization, it is wholly to the distinction of castes that she is indebted for that high celebrity' (p. 14) and he devotes several pages to the justification of this remark. (1877); 'Mysore Tribes and castes' by S. V. Nanjundayya and Rao Bahadur L. K. Ananthakrishna Iyer, vol. I–IV with several hundred illustrations. Besides these there are numerous papers published in Journals such as Weber's in 'Indische Studien' vol. X pp. 1–160 (very exhaustive as to Vedic material); Dr. Ghurye's on 'Ethnic theory of caste' in 'Man in India' vol. IV (1924) pp. 209–271.

Law ' (new edition of 1930 p. 17) characterises it as ' the most disastrous and blighting of all human institutions.' Sherring in ' Hindu tribes and castes ' vol. III p. 293 says ' it is the most baneful, hard-hearted and cruel social system that could possibly be invented for damning the human race '. On the other hand Meredith Townsend in ' Europe and Asia ' (edition of 1901 p. 72) wrote ' I firmly believe caste to be a marvellous discovery, a form of socialism which through ages protected Hindu Society from anarchy and from the worst evils of industrial and competitive life — it is an automatic poor law to begin with and the strongest form known of Trades Union '. There are others,[51] though their number is small, that believe

51. E. g. Sherring in his ' Hindu Tribes and castes ' vol. III p. 274 says ' It has been said with some truth that caste promotes cleanliness and order and is in a certain sense a bond of union among all classes of the Hindu community. Yet surely these ends might have been attained in a simpler manner and by a less antagonistic process. *The invention of a project* so wonderfully elaborate and intricate — a project of bringing into absolute subjection two hundred millions of the human species by robbing them of their independence, ... the invention of a project like this, so prodigious and far-reaching was not needed to accomplish such useful and beneficent ends. That another and very different object was in view from the very first is abundantly manifest. This object was neither more nor less than to exalt the Brahman, to feed his pride and to minister to his self-will.' Equally sweeping condemnation can be and has been indulged in as regards feudalism and modern capitalism. Fick (p. 331) entirely scouts the idea that the theory of castes was invented by the priests. There are several fallacies lurking in the above quoted passage of Sherring. In the first place, there is nothing to show that the caste system was invented by any body of persons who could impose their will on a continent. The system simply grew up in the lapse of ages. The population of Hindus when Sherring wrote may have been near two hundred millions, but it could not have been more than a small fraction of that colossal number during the thousands of years that the system has flourished. Besides writers like Sherring pass over the great achievements of Indians under the caste system in Literature, religion and philosophy, in handicrafts and in the fine arts and unduly exaggerate the defects of the system that have become glaring only in the machine-made civilization of the 19th and 20th centuries. These critics ignore the great adaptability of the system, whereby it preserved Indian society from social anarchy during ages of foreign invasions and internecine wars. While severely condemning the brāhmaṇas the critics altogether forget that the vast and varied Sanskrit Literature owes its production and preservation mostly to the sacrifice of the brāhmaṇas for ages. Under the caste

(*Continued on next page*)

that the caste system was an invention, an artificial product, due to the machinations of crafty brāhmaṇas. Every great institution has its extremes of good or evil. This work will endeavour to steer clear of downright and hypercritical condemnation of the caste system due to relying on modern standpoints and conditions of society and unthinking adulation thereof. It will try to present and balance facts and though it cannot help passing judgments it will leave the reader free to judge for himself as far as possible. In the present work the discussion will be mostly confined to the evidence of Sanskrit literary monuments, ancient and medieval. An attempt will be made to trace the origin of caste from Vedic times, to exhibit theories of the Dharmasūtrakāras, other smṛtikāras and commentators on the subject and to describe the peculiar ceremonies, privileges, duties and responsibilities of Hindu castes as gathered from these works in Sanskrit. To discuss the feasibility or desirability of totally destroying the caste system or the ways and means of attaining that end is deemed to be outside the legitimate limits of this volume. It may, however, be expressly stated as the author's opinion, in order to avoid misunderstandings or fruitless speculations about his personal views, that he does not think that the caste system was an artificial product due to the intrigues, greed and cunning of brāhmaṇas, nor does he hold that it is feasible to destroy the whole edifice of the caste system in the near future. In the cities we may find some people taking their food together but the real India is in the villages, where in spite of the loud denunciations of reformers for a hundred years, the restrictions on taking food and inter-caste marriages are almost as rigid as they once were. Our efforts must be directed to wide and rapid spread of literacy among the village people, the diffusion of the idea of one people and one nationality and gradual fusion of small subcastes into larger similar units. We in India have no doubt reached a critical stage in our history when old ideals, institutions and

---

(*Continued from last page*)

system, no man was allowed to be useless to the commonwealth and his conduct was a question of honour with his group. When all work was turned out with the hands, the caste system tended to preserve and augment the skill of artisans. Moreover what social organization is to be substituted and how is not made clear by these critics. Most of these critics have the western social system based on wealth and the industrial revolution in view; but that system also is as evil as or perhaps worse than the modern caste system.

habits are being shattered by the impact of new ideas and by the onrush of world forces. We have to decide whether we shall make or be able to make a clean sweep of all old ideals and institutions as so much debris and rubbish or whether while keeping the old ideals and some of the old institutions as foundations we shall build up a new social order and create and foster new habits of thought and action. It is beyond the scope of the present work to write more on this point.

A sort of caste system based on birth and occupation did prevail in many countries in ancient times as in Persia, Rome and Japan. But in all these countries it hardly ever made any near approach in rigour and complexity to the caste system that we have in India and instead of ramifying into divisions and subdivisions, it dwindled and disappeared in the course of time. No unanimity seems possible as to the several causes and circumstances which led in India alone to the evolution of the stupendous structure of caste. Not only is it impossible to hold that the origin of the modern complexity of the caste system is to be traced back to one single cause, but it is difficult to accept that even all the origins that have been postulated by the several authors can adequately and satisfactorily explain the modern caste system.

In most of the works on the castes in India a few features are pointed out as the characteristics of the caste system and as common to all castes and sub-castes. They are: (1) heredity i. e. in theory a man is assigned to a particular caste by birth in that caste; (2) endogamy and exogamy i. e. restriction as to marrying in the same caste and not marrying certain relatives or other persons, though of the same caste; (3) restrictions as to food (i. e. what food and water may be taken or not taken and from whom); (4) occupation (i. e. members of most castes follow certain occupations and no others); (5) gradation of castes, some being at the top in the social scale and others being deemed to be so low that they are untouchable. Some authors[52] like Senart add another characteristic, viz. the caste council with its chief having in meeting assembled among other matters the power to regulate the conduct of its members, to impose the penalties of fine or excommunication for lapses. It may be said at once that this last is a feature

52. Vide Senart's 'caste in India' tr. by Ross pp. 66–73 (1930). Fick pp. 36–37 holds that there were no caste councils and no caste chiefs

that is not found among most of the brāhmaṇa and kṣatriya castes even in modern times and is not dealt with by dharmaśāstra works. Endogamy is now the most prominent characteristic of caste and so is the theory that it is by birth. The other three are more or less fluctuating from province to province and age to age. In this work the first five characteristics of the caste system set out above will be subjected to a close critical examination on the basis of the Vedic and dharmaśāstra material. We must also remember that the attributes of caste have not been the same throughout the ages. There is great difference between the popular conceptions of modern caste and the conceptions about it embodied in the ancient and medieval dharmaśāstra works. In the twentieth century caste in India is a matter of marriage and to a much lesser extent of food and drink. As to avocations any one can at present follow any profession without fear of loss of caste excepting a few believed to be very impure and very degrading ones (like those of sweepers, butchers, tanners &c.). It is also not possible even now for any one to be generally accepted as a priest, unless he is or claims to be a brāhmaṇa. The old barriers that separated one caste or subcaste from another have been greatly shaken by the influx of modern ideas and the exigencies of the times and one may hope that in a few decades more caste will remain as a purely social institution regulating marriages and to a lesser extent commensality (and not a religious one). Western scholars, in spite of their most commendable patience and industry, often present, through ignorance or lack of first-hand knowledge, the number of castes as larger than what it actually is. For example, Sherring (vol. II. Introduction pp. XXII-XLVI) gives an alphabetical list of brahmanical tribes and remarks (XLVII) 'Hundreds of these tribes, if not at enmity with one another, cherish mutual distrust and antipathy to such a degree that they are socially separated from one another as far as it is possible for them to be-as much as brāhmaṇas are from the lowest outcastes-neither eating nor drinking together nor intermarrying'. The list he gives is most misleading. To take only a few examples, he enumerates Athavle, Achwal, Abhyankara, Apte, Agashe, Bhanu, Bivalkar, Badye, Bhide, Bhagvat, Bhuskute, Bhat, Bodas as separate tribes; but it is well-known to people in Western India that these are the surnames (not subcastes) of the Koṅkaṇastha or Citpāvana brāhmaṇas, who not only interdine, but also inter-marry among themselves,

provided there is no bar on the ground of sameness of *gotra* and *pravara*.

The word *varṇa* means 'colour' or 'light' in most passages of the Ṛgveda (e. g. I. 73.7, II. 3.5, IX. 97.15, IX. 104.4, IX. 105.4, X. 124.7). But in some verses of the Ṛgveda[53] the word *varṇa* is associated with groups of people having a skin of a dark or fair colour. For example, we read in Ṛg. II. 12.4 '(Indra) who placed low the *dāsa* colour in a cave (or darkness)'; in Ṛg. I. 179.6 'the fierce sage (Agastya) cherished both varṇas'; in Ṛg. IX. 71.2 'like one (a fighter) who strikes the people he (Soma) who is powerful goes giving out frequent roars; he exposes the Asura colour'; in Ṛg. I. 130.8 'Indra helped in battles the Ārya sacrificer..... Indra punished for the sake of Manu (the dāsas) who do not observe the ordinances and subdued (or killed) the dark skin'; 'Indra having killed the dasyus protected the ārya varṇa' (Ṛg. III. 34.9); 'You (Indra) subdued for Ṛjiśvan, the son of Vidathin, Kipru and powerful Mṛgaya; you mowed down fifty thousand dark (men), you shattered cities as old age does shatter good looks' Ṛg. IV. 16.13; 'Somas, which strike away the dark skin' Ṛg. IX. 41.1. In Ṛg. I. 158.5 a certain dāsa is called Traitana which name has a Persian ring about it; In Ṛg. I. 104.2 varṇa seems to be placed in opposition to dāsa. These passages make it clear that the Āryas and dāsas were two opposing camps and both were designated 'varṇas' on account of the colour of their skins. The Tai. Br. I. 2. 6 (with reference to the Mahāvrata in which there was a mock fight between a brāhmaṇa and a śūdra) says 'that the brāhmaṇa is the divine varṇa, and śūdra is the *asurya varṇa*'.[54] If we can interpret the Ṛgveda verse by the help of the Tai. Br. then in Ṛg. IX. 71.2, the words 'asuryam varṇam' mean 'śūdra tribe'. There is no doubt that the word *asura* when applied to gods like Varuṇa has another meaning also in the Ṛg. In numerous places in the Ṛgveda the antagonism

53. यो दासं वर्णमधरं गुहा कः। ऋ. II.12.4; उभौ वर्णावृषिरुग्रः पुपोष। ऋ. 1.179.6. Here Sāyaṇa interprets 'varṇau' as 'kāma' and 'tapas,' but this is far-fetched and it appears better to take the passage as meaning that Agastya supported both Āryas and dāsas. The words cannot reasonably be taken to refer to Brāhmaṇa and Kṣatriya since there was no difference of colour between the two and since varṇas have been four and not two.

54. ब्राह्मणश्च शूद्रश्च चर्मकर्ते व्यायच्छेते। देव्यो वर्णो ब्राह्मणः असुर्यः शूद्रः। तै. ब्रा. I. 2. 6.

between the *āryas* and *dāsas* or *dasyus* is emphasized and prayers are offered to Indra and other gods for having subdued or for subduing the dāsa in favour of the Ārya. Rg. I. 51.8; I. 103.3; I. 117.21; II. 11.2, 4, 18, 19; III. 29.9; V. 70.3; VII. 5.6; IX. 88.4; VI. 18.3; VI. 25.2. In Rg. I. 51.8 Indra is requested to mark who are āryas and who are dasyus. This does not mean that there was difference between the two in bodily appearance only; on the contrary the antithesis between the ārya who is referred to as 'barhiṣmat' and the dasyu who is styled 'avrata' clearly shows that the emphasis was rather on the difference of their cults. That *dasyu* and *dāsa* are identical in meaning follows from the same epithets being applied to both and from the fact that dasyu and dāsa occur in the same verses as applying to the same enemy.[55] In Rg. X. 22.8 dasyu and dāsa are used in the same verse as applicable to the same enemy. In Rg. X. 99.6 and 8 Indra is represented as killing both dāsa and dasyu respectively. The dasyus are described as '*avrata*' (not obeying the ordinances of the gods) in Rg. I. 51.8, I. 175.3, VI. 14.3, 'akratu' (who perform no sacrifice) in VII. 6.3,[56] 'mṛdhravācaḥ' (whose speech is indistinct or soft) in VII. 6.3 and V. 29.10, 'anāsaḥ' (snub-nosed or dumb) in Rg. V. 29.10. It appears that dāsa and dasyu are synonyms and were sometimes styled asuras. For example, Sambara is called dasyu and dāsa in Ṛgveda VI. 31.4 and dāsa in Rg. VI. 26.5 and is also associated with asuras like Pipru in VI. 18.8; Pipru is spoken of as a dāsa in Rg. VIII. 32.2 and as an asura in X. 138.3. Varcin is styled dāsa in Rg. IV. 30.15 and VI. 47.21 and asura in VII. 99.5. In Tai. S.[57] (IV. 3.11.3) also it seems that they are held to be identical. The enmity between dāsa and ārya is breathed in such verses as the following: Rg. II. 11.4 'vanquish the tribe of dāsas by the sun (i. e. by the help of a brilliant weapon); Rg. I. 174·7 'You made the earth a pillow for the dāsa (i. e. you laid him low on the ground); Rg. III. 12·6 'Oh! Indra and Agni, by one effort together you shook ninety

They are called paṇis (greedy traders), अश्रद्ध (without faith). In Nirukta VI. 31 Yāska paraphrases मृधवाचः as मृदुवाचः. In Rg. V. 34. 6–7 the dāsa is called paṇi.

cities that had dāsas as overlords'. It is not possible to say that dāsas or dasyus were some Aryan tribes that had fallen from the worship or culture of the Aryan singers of Vedic hymns. In many places the sage refers to the conquest for him by Indra and other gods of dāsas as well as Aryan foes. For example, 'Protectors of the good! you (two) killed Aryan foes and dāsa foes' Rg. VI. 60·6; 'Oh Indra and Varuṇa! you killed dāsa foes and also Ārya foes and helped Sudās with your protection' Rg. VII. 83.1. Vide also Rg. VI. 22·10, X. 69·6, X. 83·1, X. 102·3. This shows that though the āryans had become divided and fought among themselves, they kept āryas and dāsas quite distinct. The foregoing shows that in the times of the Ṛgveda there were two antagonistic camps, of the āryas and dāsas or dasyus, they differred in the colour of their skins and also in worship, speech and bodily appearance. Therefore, in the earliest period we find the word varṇa associated only with dāsa and with ārya. Though the words brāhmaṇa and kṣatriya occur frequently in the Ṛgveda, the word varṇa is not used in connection with them. Even in the Puruṣasūkta (Ṛgveda X. 90) where the words brāhmaṇa, rājanya, vaiśya and śūdra occur the word varṇa is not used. Hence, one may reasonably say that the only water-tight groups that are positively or expressly vouchsafed by the Ṛgveda are ārya and dāsa or dasyu. (It is often argued that as the word brāhmaṇa denotes a caste in later literature, in the Ṛgveda also it must be presumed to have the same meaning. But this begs the whole question. No one denies that brāhmaṇa denotes a caste in later literature.) But whether it has the same sense in the Ṛgveda must be determined on the materials furnished by the Ṛgveda itself. Some rely on the word 'brahmaputra' in Rg. II. 43. 2 as showing that a brāhmaṇa became so only by birth in the Ṛgveda. But the verse begins by saying that 'you sing a Sāma like the Udgātṛ priest' and so 'brahmaputra' must mean a ṛtvij whose duty it was to recite *śastras* (the Brāhmaṇācchaṁsin as Sāyaṇa explains). It is generally conceded that the Puruṣasūkta is a much later hymn than most of the hymns of the Ṛgveda. (In the whole of the Ṛgveda the words vaiśya and śūdra do not occur except in the Puruṣasūkta, though both of them occur in the Atharvaveda (V. 17·9 for vaiśya and IV. 20. 4 and 8 for śūdra and ārya) and very frequently in the Tai. S. Besides we cannot forget that the final redaction of the Ṛgveda must be held to have been separated from the composition of the individual hymns by several hundred years (if not more) and that even if it be conceded

that at the time when the Puruṣasūkta was composed, the four varṇas had been constituted and had become castes, yet the same cannot be affirmed for the time of the original composition of the other hymns. The word brāhmaṇa occurs several times in the Ṛgveda:[58] 'Oh brāhmaṇas, Oh pitṛs fond of soma! May the sinless Dyāvāpṛthivī (Heaven and Earth) tend to our welfare'; 'Like brāhmaṇas in the Atirātra where soma is to be drunk, utterring (words) round a lake full of water you have, Oh frogs, gathered together on that day of the year on which the rains begin' (Ṛg. VII. 103. 7);[59] 'The brāhmaṇas, who drink soma, reciting prayers of the yearly sacrifice, have sent forth their speech' (Ṛg. VII. 103. 8). In this verse brāhmaṇas are expressly said to be getting 'brahma' ready. 'May Agni who devours everything make that (dead body) free from disease and (may) soma also (do the same) who entered into the brāhmaṇas' (Ṛg. X. 16. 6). 'When the brāhmaṇas worship together as friends in hymns (lit. speed of the mind) that are fabricated from their hearts' (Ṛg. X. 71. 8). In Ṛg. VI. 75. 10 brāhmaṇas are invoked for welfare along with pitṛs. This shows that the brāhmaṇas were highly venerated. The other verses establish that they were the reciters of hymns (brahma) and drank soma. In Ṛg. VIII. 35. 16–18 we read 'You (Aśvins) urge on (or inspire) brahma, you urge on our thoughts (or actions), you kill the evil spirits and subdue diseases; (17) you urge kṣatra (valour) and also men, you kill evil spirits (same as 16); (18) you urge on the cows and also the Viś (the rest is same as 16).' Here it seems that the groups of people (viz. those who think and make songs, those who show valour and lead men, and those common people who tend cattle) are clearly meant. These verses may be conceded as pointing to the existence of three groups (brāhmaṇas, kṣatriyas and viśaḥ) but there is nothing in them to show that these three had crystallised into somewhat like the castes of later times. In Ṛg. VII. 33. 11 Vasiṣṭha is addressed as brahman, but that does not mean that he was a brāhmaṇa (by birth), as he is said to have been born of Urvaśī from Mitra and Varuṇa. Similarly, in

Ṛg. IX. 96. 6 (Brahmā devānām) the word brahmā [60] does not certainly mean 'brāhmaṇa by birth', nor does 'viprāṇām' mean 'brāhmaṇas by birth'. In that verse one who is super-eminent among a group is specified, just as the buffalo among animals, the hawk among carnivorous birds &c. In Ṛg. VIII. 33. 19 'look down and not up; bring your feet close together; may thy kaśaplakas (legs?) be not seen, for though a brahmā, thou wert born a woman,' it is impossible to hold that the last words mean 'thou wert a brāhmaṇa woman'. If it is only intended to refer to the fact that she is a brāhmaṇa woman, there is no reason why the Perfect tense (babhūvitha) is used and not the present. Here 'brahmā' most probably means 'a priest of that name', as that is the meaning in Ṛg. II. I. 2 (brahmā cāsi gṛhapatiś-ca no dame). The word 'brahmajāyā' in Ṛg. X. 109. 2, 3, 6 and 7 does not mean the wife of a brāhmaṇa by birth but rather 'wife of Bṛhaspati'. The whole hymn is obscure and more or less enigmatic or allegorical. In the Aitareya-brāhmaṇa [61] 35. 2-4 it is said that soma is the food of brāhmaṇas and that a kṣatriya was to press the tendrils of the Nyagrodha tree and the fruits of Udumbara, Aśvattha and Plakṣa and drink the juice so pressed instead of soma. It appears, therefore, that the brāhmaṇas were a distinct group even in the earliest period of the Ṛgveda. Whether they were hereditary is certainly not clear; nor is there anything to show that there were restrictions as regards partaking of food from persons other than brāhmaṇas or as to marriage. That brāhmaṇas in the Ṛgveda were a class by themselves may be conceded, but whether they had become a caste by birth is a matter of opinion dependent on the connotation given to the word caste. Dr. Ghurye ('Caste and race in India' p. 42) thinks, probably following the Vedic Index (vol. I on Kṣatriya), that the reference in Ṛg. X. 71. 9 to a false claim for being regarded as a brāhmaṇa points to the conclusion that brāhmaṇas had become a caste. The verse literally translated means 'these (persons) who do not move below nor beyond, who are neither brāhmaṇas, nor engaged in pressing soma — they

being ignorant and having resorted to speech in sinful (or coarse) language take to ploughshares and engage in (agricultural) operations'. It is difficult to see how there is here any false claim to be regarded as a brāhmaṇa. This verse means apparently that those who are not composers of prayers or drinkers of soma (because they are ignorant) are men of low speech and have to turn to agriculture. Even in the days of the dharma-sūtras restrictions as to food and marriage for brāhmaṇas were not at all as rigid as they became in medieval and modern times ; but even when these restrictions were not rigid it was clearly laid down that a brāhmaṇa is so by birth alone. The word 'brahma' generally means in the Ṛgveda 'prayer' or 'hymn'. Vide[62] Ṛg IV. 6.11, VI. 52.2, X. 105.8, X. 141.5 ('Oh Agni, make our prayer and sacrifice prosper by your flames'). Ṛg. III. 53.12 is 'this brahma (prayer or spiritual power) of Viśvāmitra protects the Bhārata people'. In the Atharvaveda II. 15.4 (as brahma and kṣatra entertain no fear, nor are they harmed) brahma seems to mean 'the class of brāhmaṇas'. The transition of meaning from 'brahma' (prayer) to 'brahma' meaning the class of those who composed or recited prayers is natural and easy. In the Ṛgveda I. 157.2 both brahma and kṣatra occur[63] in the same verse where they probably mean 'prayer' and 'valour' respectively. In the Atharvaveda III. 19.1 both words occur and probably mean the same thing as in Ṛg. I. 157.2. In some Vedic works *brahma* and *kṣatra* stand collectively for brāhmaṇas[64] and kṣatriyas (e. g. Tai. Br. II. 7.18, Br. Up. I. 4.11, Kaṭhopaniṣad I. 2. 24). The word kṣatriya is very frequently applied as an epithet to several gods; e. g. Ṛg. VII. 64. 2 and VIII. 25. 8 (in both to Mitra and Varuṇa), Ṛg. VIII. 67. 1 (to Ādityas), Ṛg. X. 66.8 (to gods in general). In some verses kṣatriya means 'a king or a nobleman'; e. g. Ṛg. IV. 42.1 'the kingdom on both sides (heaven and earth) belongs to me, who am a kṣatriya and who holds sway over all living persons, so that all the immortals (gods) are ours (on my side)';[65] Ṛg. (=Atharva V. 17.3) 'the domain of the kṣatriya has been protected (from the sight of enemies)'. The word 'rājanya occurs in the Ṛgveda only in the Puruṣasūkta. It occurs in the sense of kṣatriya in the Atharvaveda V. 17.9. The same remark applies to the word kṣatriya as to brāhmaṇa. It is difficult to say whether kṣatriyas were so by birth in the times of the hymns of the Ṛg. or were only a class more or less fluid. We find that the Ṛg. speaks of Devāpi as the *purohita* of Śantanu who became a king. The story[66] is that both were sons of Ṛṣṭiṣeṇa and that Śantanu, though a younger brother, became king as Devāpi was not willing to be a king. The result was a famine due to Śantanu's transgression and so Devāpi performed a sacrifice to induce rainfall. This shows that out of two brothers one became a king and the other a purohita. So kings and purohitas did not depend on birth. In Ṛg. IX. 112. 3 a poet exclaims 'I am a reciter of hymns my father is a physician and my mother grinds (corn) with stones. We desire to obtain wealth in various actions.'[67] In Ṛg. III. 44.5 the poet wistfully asks Indra 'O, Indra, fond of soma, would you make me the protector of people, or would you make me a king, would you make me a sage, that has drunk of soma, would you impart to me endless wealth?' This shows that the same man could be a ṛṣi or a noble or a king. Dr. Ghurye (in 'Caste and race in India' p. 44) thinks that the kṣatriyas had become a compact body and he particularly relies on Ṛg. VII. 104. 13 (= Atharvaveda VIII. 4. 13) which is cited in the Vedic Index (vol. 1, p. 207) for the same purpose. That verse literally means 'Soma does not urge on the crooked one, nor the kṣatriya who bears false. He strikes the rakṣas, and strikes him who speaks falsely; both lie in the bonds of Indra'. The words 'kṣatriyam mithuyā dhārayantam' are explained by Sāyaṇa as 'Kṣatriya who bears false words'. The 2nd half is only an expansion of the first half and so 'vṛjina' corresponds to 'rakṣas' and 'asad vadantam' is only a paraphrase of 'mithuyā dhārayantam'. They may mean this that one who is a kṣatriya, but has no strength as a kṣatriya should have, is at

67. कारुरहं ततो भिषगुपलप्रक्षिणी नना। नानाधियो वसूयवो अनु गा इव तस्थिम। ऋ. IX. 112.3. Kāru means here 'composer of hymns'; Viśvāmitra is addressed as kāru by the rivers in Ṛg. III. 33. 10 'आ ते कारो शृणवामा वचांसि'. Vide निरुक्त VI. 6 for कारुरहं.

the mercy of Indra. Unless we project our notions of the later state of society and the caste system when considering this verse, it is hardly possible to hold that this verse indicates that it refers to persons making a false claim for entrance into a compact body of kṣatriyas by birth. Dr. Ghurye also says (p. 44) 'The 2nd order in society, the kṣatriya, is known in the earlier portions of the Ṛgveda as rājanya.' I have not been able to find the word rājanya in the Ṛgveda any where except in the Puruṣasūkta. In the Aitareya brāhmaṇa (chap. 34. 2) the word 'rājanya' stands for a member of the 2nd class in society, while kṣatriya means a king of whom land (for sacrifice to gods) is asked for by brāhmaṇa, rājanya or vaiśya.

Though the word vaiśya occurs in the Ṛgveda only in the Puruṣasūkta, the word 'viś' is very frequently employed in it. It generally means 'people or group of people'. In a large number of cases we have the words *mānuṣīr-viśaḥ* or mānuṣīṣu *vikṣu* or mānuṣīnām viśām, e. g. Ṛg. III. 5. 3, III. 6. 3, III. 11. 5 (invincible Agni goes in front of human groups), IV. 6. 7 and 8, IV. 9. 2, V. 1. 9, V. 8. 3, VI. 48. 8, VI. 47. 16 (viśo mānuṣyāḥ), X. I. 4, X. 69. 9. In some places we have 'dāsīr viśaḥ' (the dāsa hordes) e. g. IV. 28·4, VI. 25·2. In[68] Ṛg. III. 34·2 we have 'Oh Indra, you are the leader of human hordes as well as of divine hordes' (where we have daivīnām viśām). Ṛg.[69] VIII. 63·7 (when loud invocations were sent towards Indra by the people consisting of five groups) shows that 'viś' means all the Aryan people. In Ṛg. V. 32. 11 Indra is styled 'pāñcajanya' (favourable to the five people) and in IX. 66. 20 Agni has the appellation 'pāñcajanyaḥ purohitaḥ' (the *purohita* of the five peoples). Sometimes *jana* and *viś* seem to be contradistinguished as in Ṛg. II. 26. 3 (sa ij-janena sa viśā sa janmanā sa putrair-vājam bharate dhanā nṛbhiḥ). But the very fact that *viś* is qualified also as pāñcajanya shows that

68. इन्द्र क्षितीनामसि मानुषीणां विशां दैवीनामुत पूर्वयावा । ऋ. III. 34.2.

69. यत्पाञ्चजन्यया विशेन्द्र घोषा अनुक्षत । ऋ. VIII. 63.7. Śaṁkara in his bhāṣya on Vedāntasūtra I. 4. 12 says that the word pañcajana in Ṛg. VIII. 63 7 means 'prajā' (people) and also notes that according to some 'pañca janāḥ' are devas, pitṛs, asuras, gandharvas and rakṣases ; while according to others they are the four varṇas and niṣādas as the fifth. The Ait. Br. (13. 7) gives an explanation of pañca janāḥ similar to the first 'पाञ्चजन्यं वा एतदुक्थं यद्वैश्वदेवं सर्वेषां वा एतत्पञ्चजनानामुक्थं देवमनुष्याणां गन्धर्वाप्सरसां सर्पाणां च पितॄणां च'. The Nirukta (III. 8) in explaining Ṛg. X. 53. 4 remarks about pañca janāḥ. 'गन्धर्वाः पितरो देवा असुरा रक्षांसीत्येके । चत्वारो वर्णा निषादः पञ्चम इत्यौपमन्यवः ।'

there was hardly any distinction between jana and viś. In the Ṛgveda frequent reference is made to five people (pañca janāḥ); vide Ṛg. III. 37. 9, III. 59. 7, VI. 11. 4, VIII. 32. 22, X. 65. 23, X. 45. 6. In the same way the words kṛṣṭi (II. 2. 10, IV. 38. 10), kṣiti (V. 35. 2, VI. 48. 7, VII. 75. 4), carṣaṇi (V. 86. 2, VII. 15. 2) are employed along with *pañca*. We have also 'pāñcajanyāsu kṛṣṭiṣu' in Ṛg. III. 53·16. So it is clear that *viś* cannot in almost all hymns of the Ṛg. mean 'vaiśya' but means the 'people' or 'āryan people' when no epithet like 'dāsīḥ' or 'daivīḥ' is prefixed.[70] The Ait. Br. (I. 26) says that 'viśaḥ' means 'rāṣṭrāṇi' (countries) when explaining Ṛg. IV. 50·8 (tasmai viśaḥ svayam-evānamante).

The word 'dāsa' in later literature means 'a serf or a slave.' It follows that the dāsa tribes that we see opposed to the Āryas in the Ṛgveda were gradually vanquished and were then made to serve the Āryas. In the Manusmṛti (VIII. 413) the śūdra is said to have been created by God for service (*dāsya*) of the brāhmaṇa.[71] We find in the Tai. S., the Tai. Br. and other Brāhmaṇa works that the śūdra occupies the same position that he does in the smṛtis. Therefore it is reasonable to infer that the *dāsas* or *dasyus* conquered by the Āryas were gradually transformed into the śūdras. From being enemies they were brought into friendly relations and given a very subordinate position. Traces are visible even in the Ṛgveda that friendly relations had begun to be established between certain dāsas and the priests. For example in Ṛg. VIII. 46. 32 we read 'the singer took a hundred (cows or other gifts) from the dāsa Balbūtha and from Taruksa.' In the Puruṣasūkta (X. 90. 12) the brāhmaṇa, ksatriya, vaiśya and śūdra are said to have sprung from the mouth, arms, thighs and feet of the supreme Puruṣa. In the very next verse the sun and the moon are said to have been born from the eye and mind of the Puruṣa. This shows that the composer of the hymn regarded the division of society into four classes to be very ancient and to be as natural and God-ordained as the sun and the moon.

We shall now see what position was assigned to the śūdra in the Vedic Saṁhitās and Brāhmaṇas. In the Ṛgveda the Ārya is contradistinguished from the men 'of dark skin.' In the dharmasūtras we find the śūdras spoken of as 'dark varṇa.'

70. Vide Ṛg. I. 25.1, I. 114 3, VI. 15·1, X. 173·4 for 'viś' by itself.

71. शूद्रं तु कारयेद् दास्यं क्रीतमक्रीतमेव वा। दास्यायैव हि सृष्टोसौ ब्राह्मणस्य स्वयंभुवा॥ मनु VIII. 413

Vide Āp. Dh. S. I. 9. 27. 11 which is the same as Baud. Dh. S. II. 1. 59.[72] 'The śūdra among men and the horse among beasts. Therefore those two, the horse and the śūdra, are the conveyances of beings; therefore the śūdra is not fit (or ordained) for sacrifice' (Tai. S. VII. 1. 1. 6).[73] This shows that the śūdra could not perform the Vedic sacrifices and that he was employed for carrying persons in a palanquin or otherwise. In Tai. S. V. 7. 6. 3-4 we have 'put light (glory) in our brāhmaṇas, put it in our chiefs (or kings), (put) light in vaiśyas and śūdras, put light in me by your light.'[74] This is a sure indication that the śūdra who took the place of the dāsa is here placed on the same level with the other three classes in the matter of the receipt of light from God and that far from being looked upon as an enemy, he had come to be looked upon as a member of the society (though the lowest in the scale). 'The śūdra is a moving burial ground; therefore one should not study the Veda in the vicinity of a śūdra.'[75] 'He created the brāhmaṇa with Gāyatrī, the rājanya with Triṣṭubh and the vaiśya with Jagatī; but he did not create the śūdra with any metre.'[76] The Tāṇḍyamahābrāhmaṇa says[77] 'Therefore a śūdra, though he may have many beasts, is not entitled to perform sacrifice, he is godless as no deity was created after him (as in the case of the other varṇas); therefore he does not go beyond washing the feet (of the three other varṇas), since he was created from the feet' (this last being an allusion to the Puruṣasūkta X. 90. 12 *padbhyāṁ śūdro ajāyata*). This shows that the śūdra, however rich in cattle he might be, had to perform the menial duty of washing the feet of *dvijas*. The

Śatapatha Br. says that 'the śūdra is untruth' (S. B. E. vol. 44. p. 446), that 'the śūdra is toil' (S. B. E. vol. 44 p. 410), and that a dīksita (one who was initiated for a Vedic sacrifice) was not to speak with a śūdra (S. B. E. vol. 26 p. 4). The Aitareya Brāhmana remarks that 'the śūdra[78] is at the beck and call of others (the three varnas), he can be made to rise at will, he can be beaten at will.' When the father of Śunahśepa[79] (who had sold Śunahśepa for 100 coins and had shown himself ready to kill him as a paśu for another hundred coins) urged his son to come back to him after the boy had been taken into favour by Varuna and Viśvāmitra, he contemptuously discards his father's proposal with the words 'one who commits an evil deed once may commit another sinful deed thereafter; you did not leave aside the śūdra's line of conduct; you did what leaves no door for reconciliation.' These passages show that the śūdra, though he had ceased to be an enemy of the ārya and had been allowed to be within the pale of society, was looked down upon, was assigned a very low position, had to perform work of toil as a menial and was not allowed to perform Vedic sacrifices. A clear line of demarcation was kept between the Ārya and the Śūdra in the times of the Brāhmana works and even in the dharmasūtras. The Tāndya Brāhmana[80] speaks of a mock fight 'the śūdra and ārya fight on a hide, out of the two they so arrange that the ārya colour becomes the victor'. The Āp. Dh. S. (I. 1.3.40–41 says[81] that a brāhmacārin, if he cannot himself eat all the food he has brought by begging, may keep it near an ārya (for his use) or he may give it to a śūdra who is a dāsa (of his teacher)'. The same Dharmasūtra[82] (II. 2.3. 1 and 4) says 'Āryas who are pure (by bath) should prepare the food for Vaiśvadeva;.....or śūdras supervised by āryas should prepare it'. Similarly Gautama X. 69 uses the word 'anārya for śūdra and Gautama 12.3 prescribes heavy punishment for a

śūdra having sexual intercourse with an ārya woman. Jaimini in his Pūrvamīmāṃsā sūtra (VI. 1.25–38) establishes after elaborate discussion that the śūdra has no *adhikāra* for the performance of Agnihotra and Vedic sacrifices. It is, however, somewhat gratifying to find that at least one ācārya, Bādari, espoused the cause of the śūdra and propounded the view that all (including śūdras) were entitled to perform Vedic sacrifices (VI. 1.27). In the Vedānta-sūtras also (I. 3.34–38) it is established that the śūdra has no *adhikāra* for brahmavidyā based on Veda study, though some śūdras like Vidura might have been endowed with the knowledge of *brahma* owing to saṁskāras of former births. In the smṛti literature, however, a few passages are found allowing marriages of āryas with śūdra women (which will be discussed later on). Similarly sexual relations (illicit) between a śūdra woman and a man of higher varṇa are alluded to even in the Saṁhitās e. g. Tai. S.[83] VII. 4.19.3 ' when a śūdra woman has an *ārya* as her paramour she does not seek wealth for the prosperity (of her relations) '. In Ait. Br. (8. 1) there is the story of Kavaṣa Ailūṣa, who was driven out from the sacrifice on the Sarasvatī with the words ' Oh, son of a female slave, you are a rogue and not a brāhmaṇa ; how did you take the dīkṣā (initiation) as one of us ' and they carried him off to a sandy desert with the idea that he might die of thirst there. He when tormented by thirst ' saw ' the hymn Ṛg. X. 30 and Sarasvatī came rushing to him.[84] Further discussion about the śūdra and his disabilities will follow in another section later.

The position of the three varṇas *inter se* (called collectively ārya) now requires consideration. It is clear that the Saṁhitās other than the Ṛgveda and Brāhmaṇa works show that the three classes of brāhmanas, kṣatriyas and vaiśyas had become differentiated and their privileges, duties and liabilities had become more or less fixed in those times.

83. शूद्रा यदर्यजारं न पोषाय धनायति। तै. सं. VII. 4. 19.3 and Vājasaneya Saṁhitā 23. 30. 'Arya' may mean an Ārya, or simply 'master' or 'vaiśya' (as in later literature). The words न...यति may mean ' He (the father of the śūdra woman) does not desire wealth for his own prosperity ' (as he is pained by the event).

84. A similar story is told in the Śāṅkhāyana Brāhmaṇa XII. 3. The words ' dāsyāḥ putraḥ ' may be only terms of abuse or they may mean that, though he posed to be a brāhmaṇa, he was the son of a brāhmaṇa from a dāsī.
